1. Overview

Walmart Canada Integration for Magento 2 store is an extension, developed by CedCommerce(https://marketplace.walmart.com/k/articles/Article/Integration-Methods-Channel-Partner?c=&q=channel%20partner&l=en_US&kb=) helps to integrate the Magento store with Walmart by establishing a synchronization of products, orders, and refunds with the help of Walmart Canada API.

The CRONs implemented in this extension help to automate the process thereby keeping it up to date.

This extension interacts with Walmart Canada Marketplace to integrate the synchronized product listing between the Magento 2 store and the Walmart Canada retailers. After installing the extension, the merchant can map with multiple Walmart Canada Categories and the dependent attributes on the Magento 2 store.

The process enables the merchant to configure the desired product category into the Magento 2 store for automatic submission of the selected product to the same Category on Walmart Canada.

The features of the Walmart Canada Integration with Magento 2 store extension are as follows:

- Profile Based Product Upload
It allows you to Create a particular profile and Upload Products on the basis of the profile
- Easy Walmart Canada Category and Attribute mapping
Choose among multiple categories and map attributes on the basis of categories Selected
- Manage Walmart Canada Product and Upload Product (directly from the grid and bulk upload all products)
- Product Synchronization
 - Automatic process on each product edit
 - Manual synchronization process
- Review Product/Inventory/Price Feeds
Debug Mode Enables you to Check the feeds corresponding to every SKU Updated
- Automated Order Import & Acknowledgement
This works on the basis of Crons(Automated Programs)
- Shipment and Cancellation of Orders
Ship/Cancel Your orders In one Click
- Automated Shipment with Shipworks/Shipstation
Our Extension is completely compatible with Shipworks/Shipstation
- Multiple Shipment of an Order
Ship Multiple orders from Magento 2 store itself
- Upload Configurable Product(s)
You can upload configurable products along with proper attributes
- Bulk Product Upload/Publish
This Feature allows you to upload products in a bulk
- Retire/Unpublish Selected Product(s)
With, this You can Select and Retire products as you need
- CRON Facility
Crons are working for Order, Inventory, Price Auto-sync
- Knowledge Base
- Walmart Canada Tax Codes

Caution

: Extension is heavily dependent on Crons for running various automated processes. So, make sure that Cron Job is properly configured and working on the server.

2. Walmart Canada Integration Installation

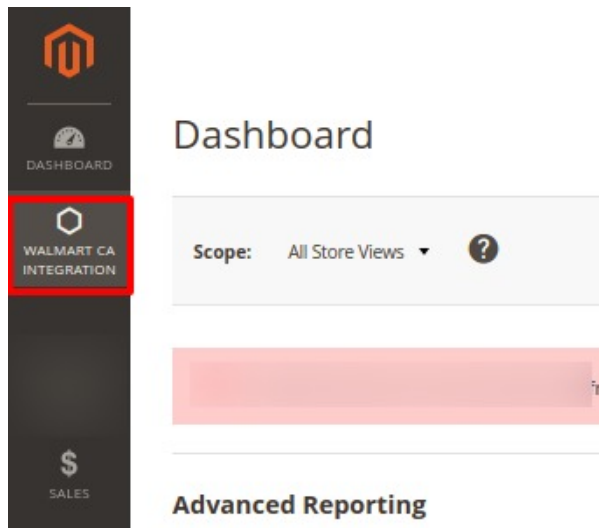

To install the extension manually

1. Log in to the **ftp**, and then go to Magento 2 root folder (generally present under the [public_html](#) folder).
2. Create a new folder named [code](#) under the [app](#) folder; under [code](#) folder, create a folder named [Ced](#).
 - a. Drag and Drop [app/code/Ced/WalmartCa](#) directory.
 - b. After successfully uploading the directory, the extension will be installed/upgraded.
 - c. Now run the following upgrade command in [cmd](#)

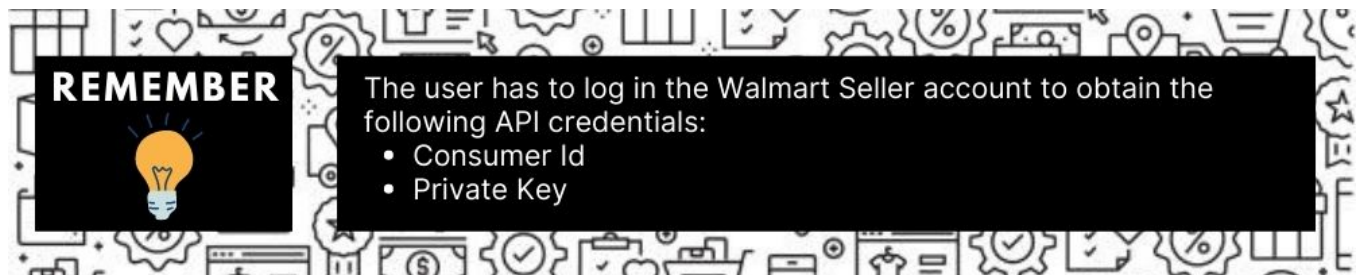

```
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy -f  
php bin/magento index:reindex  
php bin/magento cache:clean  
php bin/magento cache:clean
```

- d. Once the extension is installed it appears in the main menu of the Magento panel just like this –

3. Configuration Settings

Once the extension is successfully installed on the Merchant's store, WALMART.CA INTEGRATION menu appears in the Magento 2 store Admin Panel. The merchant has to fill in the API credentials in the **Walmart Canada Configuration** page of the admin panel.

After obtaining the Consumer Id and the Private Key, the merchant has to copy all of them one by one from the Walmart Canada Seller account and paste it one by one to the Configuration page of the admin panel of the merchant.

To follow the process of copying and pasting the consumer ids and private keys, open the Walmart Seller account and the Magento 2 store Admin Panel in two different tabs or windows of the browser. Thus, copy the keys from the Walmart Canada Seller account and paste them one by one to the Magento store Admin Panel.

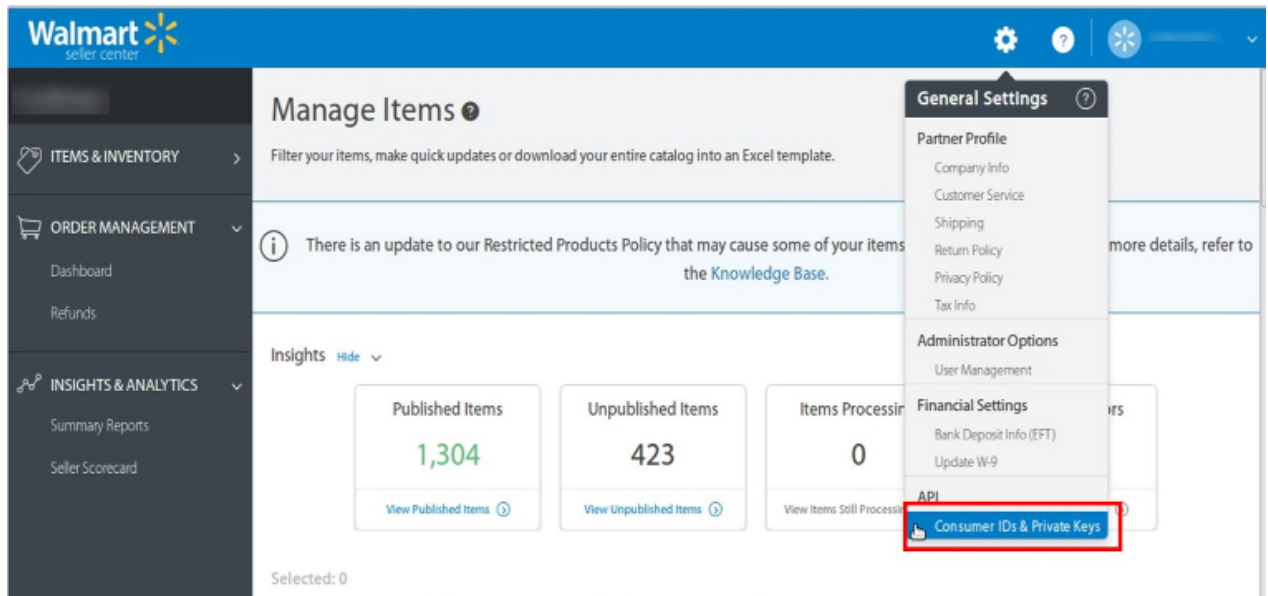

To copy the API Credentials from the Walmart Canada Seller account

1. Open the **Walmart Canada Seller** account.
2. Click the **Settings**

icon.

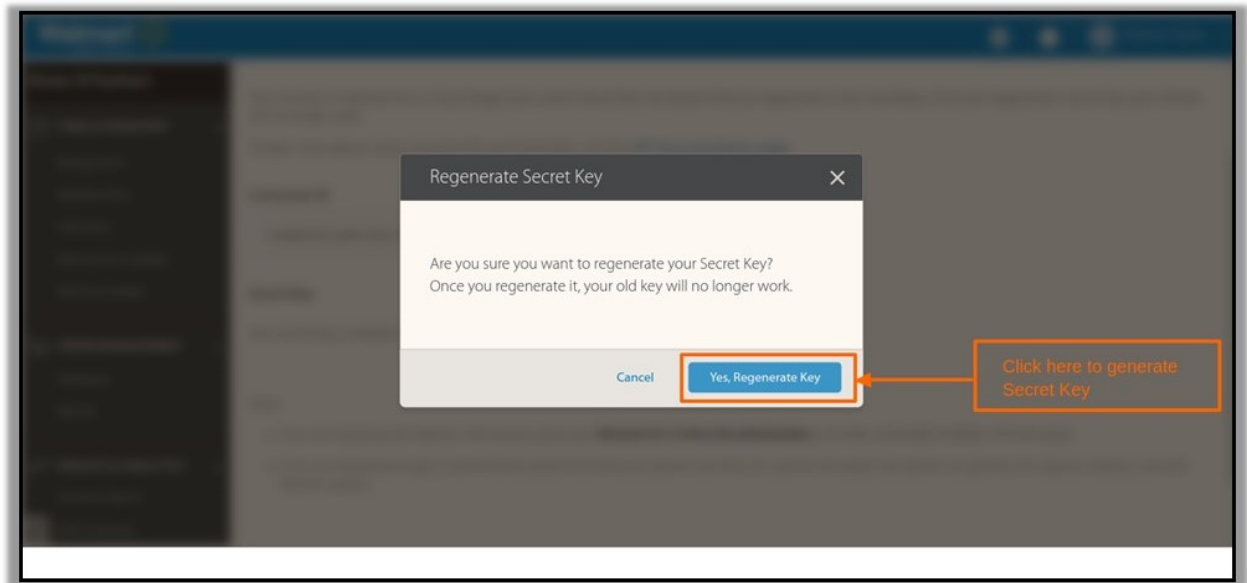

The **General Settings** menu appears as shown in the following figure:

- Under **API**, click **Consumer IDs & Private Keys**.
The page appears as shown in the following figure:

- Under **Consumer ID**, click the **Copy** button.
- Under **Private Key**, click the **Regenerate Key** button.
The **Regenerate Secret Key** dialog box appears as shown in the following figure:

6. Click the **Yes, Regenerate Key** button.
The key is generated. Copy the generated key.

To Set up the Configuration settings in the Magento 2 store Admin panel

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **WALMART.CA INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Configuration**.

The **Configuration** page appears as shown in the following figure;

4. Now in the right click on **WalmartCA API Settings**, the section is expanded as shown below:

WalmartCa Api Settings

Enabled
[global] Yes

WalmartCa Account Type
[global] Walmart CA
Please Select A Account Type Walmart CA

Consumer Id
[global]

Private Key
[global]

Orders Fetch Start Date
[global] 2021-04-28
 Select Date

Debug Log
[global] No

Select Store
[global] Default Store View

5. Under **Walmart Ca API Settings**, do the following steps:

- In the **Enabled** list, select **Yes**.

- In **WalmartCa Account Type**, select the type of Walmart Account.
 - In the **Consumer Id** box paste the corresponding **Consumer ID** copied from the **Consumer IDs & Private Keys** page of the **Walmart Seller Account**.
 - In the **Private Key** box, paste the corresponding **Private Key** copied from the **Consumer IDs & Private Keys** page of the **Walmart Canada Seller Account**.
 - In the **Orders, Fetch Start Date** box, click the calendar icon, and enter the date.
The date when the user starts to fetch the order.
 - In **Debug Log**, select **Yes** if you want the developer's debugging log to be enabled.
 - In **Select Store**, select the store view.
6. Click the **Product Global Settings** tab.
- The tab is expanded and the relevant fields appear as shown in the following figure:

Product Global Settings

Please set the global settings for WalmartCa.com

WalmartCa Product Price [global]

Select to send a different product price to **walmartca.com**

Inventory Fulfillment Lag Time (Default) [global]

Days to Ship the Order once it is **placed** Please Enter Default Value.

Inventory Fulfillment Lag Time [global]

Days to Ship the Order once it is **placed** Please Select Attribute. [High Priority over Default Value]

Product Tax Code [global]

Global Tax Code to be applied on each product for **walmartca.com**

Shipping Override Rules [global]

Enabled	Region	Method	Attribute	Default	Action
<input type="button" value="Add Rule"/>					

WalmartCa Product Id Override [global]

Enable to Override WalmartCa Product Identifier . Keep It disabled until it is specifically Needed.

WalmartCa Product SKU Override [global]

Enable to override product SKU on walmartca

Enable Swatches for Configurable Product [global]

Enable Vacation Mode [global]

Enable Vacation Mode . If this setting is enable then zero (0) inventory send on walmartca.

Product Image Setting For Configurable products [global]

This setting is used to control which images are sent with product i.e. if you want to upload only Parent product images Only or Child images Only

- **Case 1** : Default : Send Child Images Only.
- **Case 2** : Send Parent Images Only.

7. Under **Product Global Settings**, do the following steps:

- a. In the **WalmartCa Product Price** list, select the required option.
 - i. **Walmart Product Price**: This is to set a different price for all the products as shown in the following figure:
The user can set the price on the following basis: –

Increase by Fixed Price: If selected, then the **Modify by Fix Price** field appears.

Increase by Fixed Percentage: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to increase the price of the Walmart Canada product price by the entered value % of Magento price

For Example – Magento price + 5% of Magento price.

Magento Price = 100

Select **Increase By Fixed Percentage** option

Modify by Percentage Price = 5

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, Walmart Canada Product Price = 105

Decrease by Fixed Price: If selected, then the **Modify by Fix Price** field appears.

Decrease by Fixed Percentage: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to decrease the price of the Walmart product price by the entered value % of Magento price

For Example – Magento price – 5% of Magento price.

Magento Price = 100

Select **Decrease By Fixed Percentage** option

Modify by Percentage Price = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, Walmart Product Price = 95

2. In the **Inventory Fulfillment Lag Time (Default)** box, enter the number of days to fulfill the inventory when the product is out of stock.
3. In the **Product Identifier Type** attribute, select the options according to your product's unique identifiers.
4. In the **Product Tax Code Value** box, enter 7 digit global product tax code that will be applied on each product for Walmart Canada.

Product Tax Code [global]

Global Tax Code to be applied on each product for **walmartca.com**

5. Or Click the **Select Taxcode** button.

The **Find a Tax Code** page appears as shown in the following figure:

Find a Tax Code

Search Key

Tax Code	Category	Category Description	Action
2043138	SST Testing Codes Not for General Use	SST Matrix Testing SKU 61220 not for general use	<input type="button" value="Select"/>
2044217	Energy Drinks	Energy Drink sold in a 22 ounce plastic bottle. The beverage contains vitamins, caffeine, is sweetened, carbonated and carries a "Nutrition Facts" label. Single serving.	<input type="button" value="Select"/>
2044218	Energy Drinks	Energy Drink sold in a 22 ounce plastic bottle. The beverage contains vitamins, caffeine, is sweetened, carbonated and carries a "Nutrition Facts" label. Package of 2 containers.	<input type="button" value="Select"/>

6. Scroll down to the required Tax Code.
7. In the **Action** column, click the corresponding **Select** button.
The Tax Code is selected and appears on the top-right corner of the page as highlighted.

Find a Tax Code

Search Key

Selected Tax Code

Tax Code	Category	Category Description	Action
2043138	SST Testing Codes Not for General Use	SST Matrix Testing SKU 61220 not for general use	<input type="button" value="Select"/>
2044217	Energy Drinks	Energy Drink sold in a 22 ounce plastic bottle. The beverage contains vitamins, caffeine, is sweetened, carbonated and carries a "Nutrition Facts" label. Single serving.	<input type="button" value="Select"/>
2044218	Energy Drinks	Energy Drink sold in a 22 ounce plastic bottle. The beverage contains vitamins, caffeine, is sweetened, carbonated and carries a "Nutrition Facts" label. Package of 2 containers.	<input type="button" value="Select"/>

8. Click the **Save** button.

The page is closed and the selected Tax Code appears in the **Product TaxCode** box.

9. In the **Shipping Settings** field, click the **Add** button.

Shipping Override Rules [global]

Enabled	Region	Method	Attribute	Default	Action
<input type="button" value="Yes"/>	<input type="text"/>	<input type="text"/>	<input type="text" value="--pl"/>	<input type="text"/>	<input type="button" value="Add Rule"/>

- In **Enabled**, select **Yes**.
- Select the shipping region in the **Region** field.
- Select Shipping **Method** in the next field.
- Select the **Magento Attribute Code** in the next field.
- In **Default** enter the default shipping rule.

10. In the **Walmart Product Id Override** list, select the required option.

Walmartca Product Id Override [global]

Enable to Override Walmartca Product Identifier . Keep It disabled until it is specifically Needed.

Walmartca Product SKU Override [global]

Enable to override product SKU on walmartca

11. In the **Walmart Product SKU Override** list, select the required option.

Note: **Enable to Override Product SKU on Walmart.**

12. In the **Enable Swatches for Configurable Product** list, select the required option.

13. On selecting **Enable**, a field appears as:

Enable Swatches for Configurable Product [global] Enable

Swatches Attributes [global]

- color
- size
- assembledProductWidth
- material
- shoeSize
- clothingSize
- sportsTeam
- sportsLeague
- capacity
- shape

14. Select the swatch attributes from the list given.

15. Then is the **Enable Vacation Mode** which is for the purpose of if you are going on a vacation then the inventory won't be uploaded.

16. In **Product Image Setting for Configurable Products**, select the image type you want to upload as configurable.

In this, you can upload images in two cases only: Either send child images only or Send Parent images only.

Product Image Setting For Configurable products [global] Use Parent Images Only

This setting is used to control which images are sent with product i.e. if you want to upload only Parent product images Only or Child images Only

- **Case 1 :** Default : Send Child Images Only.
- **Case 2 :** Send Parent Images Only.

8. Click the **Order Settings** tab and the section will expand as:

Order Settings

WalmartCa Order Id Prefix [global]
 Prefix for WalmartCa Increment ID | Enter "PO" to have WalmartCa Purchase Order ID as your Magento Order ID

Customer Id [global]
 Enter the Customer Id for which customer will be created for WalmartCa Orders.

Customer Email [global]
 Enter the Email for which customer will be created for WalmartCa Orders.

Shipping [global]

Payment [global]

- a. In the **Walmart Order Id Prefix** box, enter a text as a prefix for Walmart Canada Increment ID.

- b. In **Customer Id** field, enter the customer Id for which customer will be created for Walmart orders.
- c. In **Customer Email** field, enter the email for which customer will be created for Walmart Orders.
- d. In **Shipping** field, select the shipping method from the options in the drop down list.
- e. In the **Payment** field, select the payment method from the options in the drop down list.
9. Click the **Walmart Canada Inventory Rules** tab and the tab expands as:

WalmartCa Inventory Rules

Set Inventory on Basis of Threshold [global]
 Choose yes to send inventory on walmartca by condition

10. Under **Walmart Canada Inventory Rules** do the following steps:
- In **Set Inventory on the Basis of Threshold**, select **Enable** to send the inventory based on the threshold.

Only when the admin selects Enable, the other fields appear.

- The section appears as shown in the following figure:

WalmartCa Inventory Rules ⌵

Set Inventory on Basis of Threshold [global] Enable ▼
 Choose yes to send inventory on walmartca by condition

Inventory Threshold Value [global]
 Set inventory quantity on which lesser and greater condition can control.

Send Inventory for Lesser Than Threshold Case [global]
 Send Quantity to WalmartCa for those products, whose inventory is LESSER than the inventory threshold.

Send Inventory for Greater Than Threshold Case [global]
 Send Quantity to WalmartCa for those products, whose inventory is GREATER than the inventory threshold.

- In the **Inventory Threshold Value** box, enter the value which you consider to be the minimum for your inventory.
- In the **Send Inventory for Lesser Than Threshold Case** box, enter the value that needs to be visible on Walmart Ca in case your inventory is lesser than the threshold value that you have set in the earlier parameter.
- In the **Send Inventory for Greater Than Threshold Case** box, enter the value that needs to be visible on Walmart Ca in case your inventory is more than the threshold value that you have set.

For Example:

Suppose you have set the threshold value of a product to be 500. You have set the greater than the threshold value to say 600 and the lesser than the threshold value to be 300.

Now you have 530 of that product in the inventory, then the number visible on Walmart Ca would be 600. Suppose you sold 33 products and now the value is decreased to be 497 which is below the threshold. The value that will now appear on Walmart Ca be 300.

11. Click on **WalmartCa Crons** tab and the tab will expand as:

Walmartca Cron's ⌵

Order Cron [global] Disable ▼
 Order Fetch Cron

Price Cron [global] Disable ▼
 Price Sync Cron

Inventory Cron [global] Disable ▼
 Inventory Sync Cron

Shipment Cron [global] Disable ▼
 This will automatically generate

- i. In the **Order Cron** list, select **Enable** to enable the order to fetch cron.

- ii. In the **Price Cron** list, select **Enable** to enable the price sync cron.
- iii. In the **Inventory Cron** list, select **Enable** to enable the inventory sync cron.
- iv. In the **Shipment Cron** list, select **Enable** to automatically generate the shipment cron.

12. Click the **Chunk Size Setting** tab and it will expand as:

Chunk Size Setting

Validation Size <small>[global]</small>	<input type="text" value="10"/>
	Chunk size for validate Product .
Upload <small>[global]</small>	<input type="text" value="10"/>
	Chunk size for Upload Product .
Inventory Update <small>[global]</small>	<input type="text" value="1"/>
	Chunk size for Inventory Update .
Price Update <small>[global]</small>	<input type="text" value="10"/>
	Chunk size for Price Update .
Retire Product <small>[global]</small>	<input type="text" value="10"/>
	Chunk size for Retire product execution.
Sync Status <small>[global]</small>	<input type="text" value="10"/>
	Chunk size for Product Status Sync.

- a. In the **Validation Size** field, enter the chunk size for the products. The products that will get validated before being uploaded on Walmart Canada would be the same as the number you enter in this field.
 - b. In the **Upload** field, enter the number of products that you want to upload in one go from Magento to Walmart Canada.
 - c. In the **Inventory Update** field, enter the chunk size of the products. The inventory will be updated in one batch for the number of products that you enter in this field.
 - d. In the **Price Update** field, enter the chunk size for the number of products. The price will be updated in one batch for the number of products that you enter in this field.
 - e. In the **Retire Update** field, enter the chunk size of the products. The number of products that you will be able to retire on Walmart would be the same as the number that you enter in this field.
 - f. In the **Sync Status** field, enter the chunk size of the products. The number of products that you will be able to sync the status for would be same as the number that you enter in this field.
13. Click on the section **API Calling Switch**, it is expanded as shown below:

API Calling Switch

Price and Inventory By Post <small>[global]</small>	<input type="text" value="Yes"/>	<input type="button" value="v"/>
	Update Price and Inventory By Post Request	

- 14. Under **API Calling switch**, in the **Price and Inventory By Post** box, you have to always select **Yes** for price and inventory update.
- 15. Click on the **Save Config** button. The configuration settings will be saved.

4. Manage Profiles

Product Profiling is a process of arranging similar types of products from a catalog and bundling them to perform multiple bulk actions.

Let's say you are selling Clothing – you create a profile labeled as Men's T-shirts and add all the t-shirts in the same profile. Now with product profiling, you have the feasibility to take actions such as bulk upload, alter the prices, edit details and even remove them in bulk with just a few clicks.

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, The admin can map the Magento Store attributes to the Walmart Canada attributes. These attributes are applicable to all the products that are assigned to the profile.

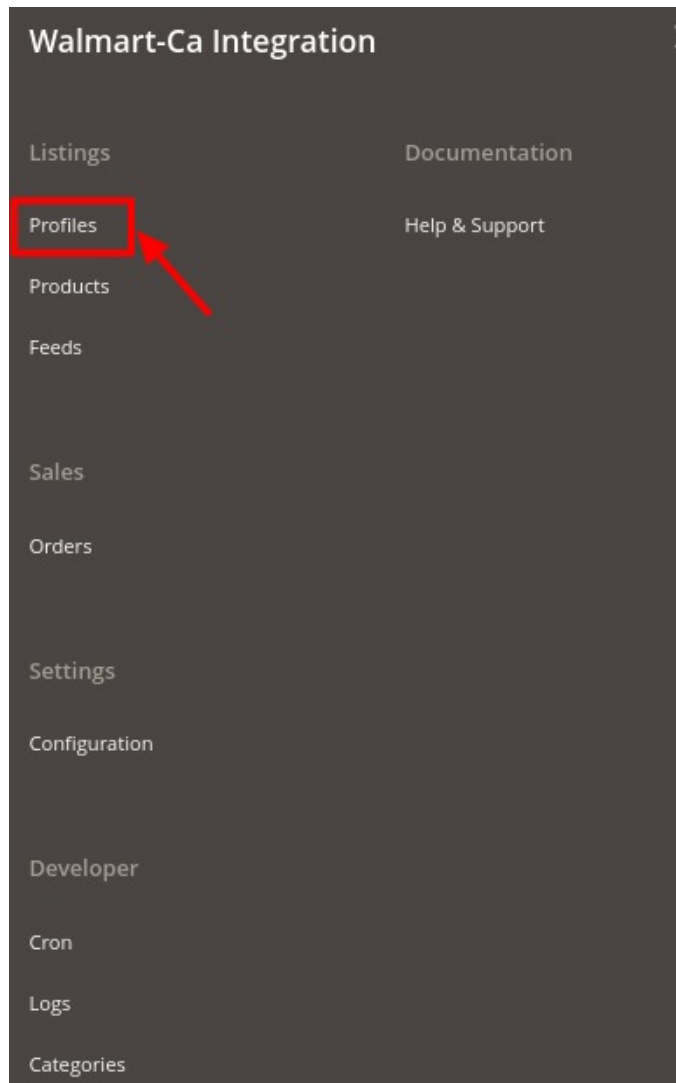

Admin can do the following tasks:

- Add new profile(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=add-new-profile-4>)
- Edit the existing profile(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=edit-the-existing-profile-5>)
- Delete the profile(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=delete-the-profile-4>)
- Submit Actions on the Manage Profile page(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=submit-actions-on-the-manage-profile-page-2>)

4.1. Add New Profile

To add a new profile

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **WALMART.CA INTEGRATION** menu.
The menu appears as shown in the following figure:

- Click on the **Profile Manager**.

The **Manage Profile** page appears as shown in the following figure:

5. Manage Products

On this page, admin can view, edit, and upload the individual product. Also, the admin can view the error message if any error exist in any product details. The admin can also submit certain actions on the selected products available on the **Manage Products** page.

This section covers the following topics:

- View and Edit Single Product(<https://docs.cedcommerce.com/magento-2/walmart-canada-integration-magento-2-manual/?section=view-and-edit-single-product-2>)
- Upload Single Product(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=upload-single-product>)
- View Error Log(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=view-error-log>)
- Submit Actions on the Manage Products Page(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=submit-actions-on-the-manage-products-page>)

5.1. View and Edit Products

To view the product information,

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **WALMART CANADA INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click on **Products**.

The **Manage Products** page appears as shown in the following figure:

5.6. Submit Actions on the Manage Products Page

Admin can perform the following tasks through the Bulk Action feature:

- **Validate Products:** To validate the selected products before uploading to the Walmart Canada website. It displays the corresponding validation error if any. If there is no error, it confirms that the product is ready to upload.
- **Validate and Upload Products:** To validate and upload the selected products to the Walmart Canada website. It displays the corresponding validation error, if any. If there is no error, then the selected products are validated and uploaded, and a success message appears.
- **Sync Product Status:** To get the request from Walmart Canada to update the status of the selected products in the Magento 2 store. It helps the user to view the status of the product. For example, unpublished, transmit, data fix, system error, or so on.
- **Retire Products:** To withdraw the selected products so that it is neither used nor ordered. On submitting this action, the product is not listed on Walmart. Thus, nobody can order them from Walmart Canada.
- **Update Inventory:** To update the inventory of the selected products on Walmart Canada. This action completes all the job related to the product inventory and also it manages the quantity related issues.
- **Update Price:** To update the price of the selected products on Walmart Canada. *For example*, if the user has changed the product price on the Magento store and also wants to change the price on Walmart then this action is applicable. The price is updated when the user submits this action for the selected product.

To Submit Action

1. Go to the **Magento Store Admin** panel.
 - a. On the left navigation bar, click the **WALMART.CA INTEGRATION** menu.
The menu appears as shown in the following figure:

- b. Click **Upload Products**.
The **Manage Products** page appears as shown in the following figure:
