1. Overview

Zalando Retail is a platform for sellers to connect their online and physical retail shops. Connected Retail is Zalando's solution that enables brick-and-mortar stores to serve customers on the Zalando platform. This program has 4700 active stores that is selling to millions of Zalando customers online.

Zalando Retail Integration for Magento 2 helps the retailers to connect their Zalando Retail store with Magento and sell effortlessly. The extension has a single centralised dashboard through which sellers can easily manage their store and focus more on sales. Selling on Zalando retail shops is now much easier with this extension.

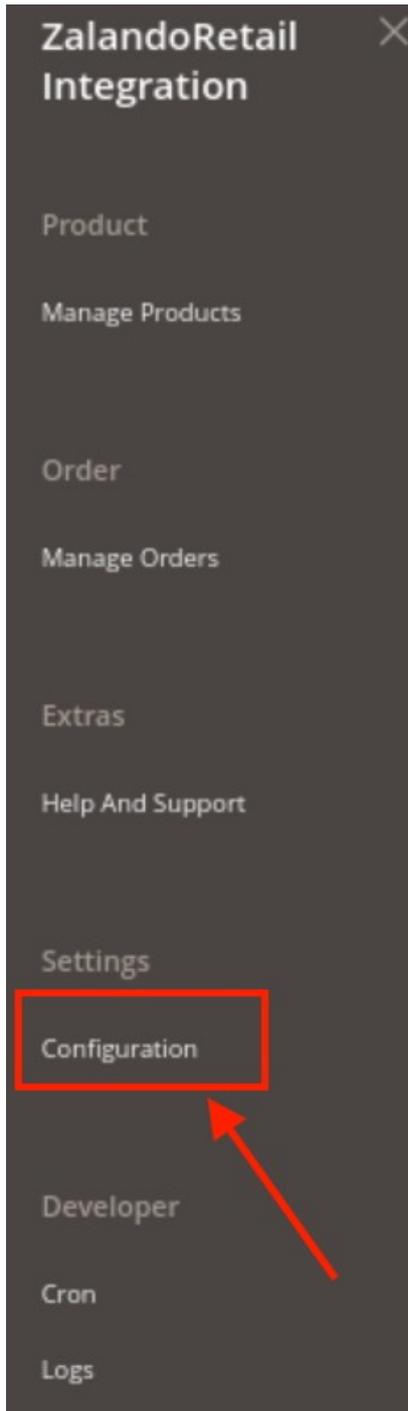

Key Features:

- **Order Import:** By setting up the extension for this feature on the marketplace, sellers can import orders with a single click.
- **Inventory Sync-** The extension synchronised the inventory at regular intervals of time keeping the figures updated.

2. Configuration Settings

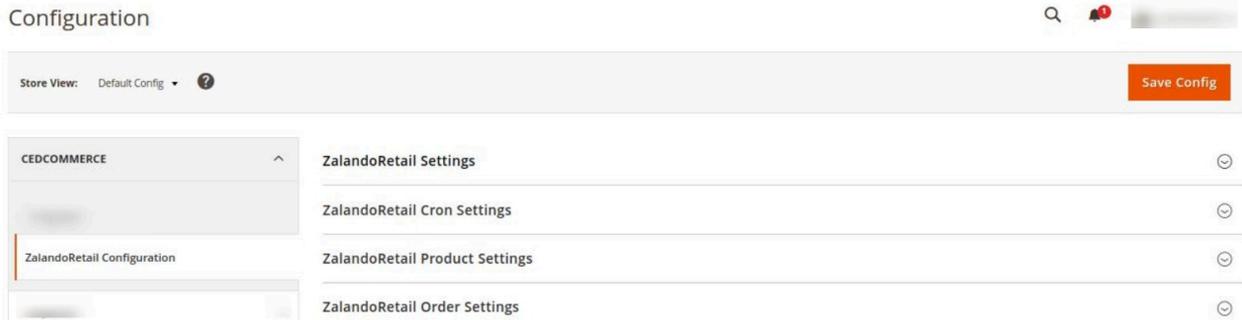

To configure the extension,

1. Go to the **Magento Admin Panel**.
2. On the left navigation bar, click on **Zalando Retail Integration**.
The menu appears as shown below:

3. Click on **Configuration**.

The **Configuration Settings** page appears as shown below:

4. In the right panel, click on **ZalandoRetail Settings**. The section expands as shown below:

5. Under **Zalando Retail Settings**, do the following steps:

- In the **Enabled** list, select **Yes** to enable the extension features for configuring the settings.
- In **Client Id**, copy the client id from the Zalando Retailer panel and paste it here.
- In **API Key**, copy the API Key from the Zalando Retailer panel and paste it here.
- In **Order API Key**, you need to mention the order API key here. With the order API key, you will receive the orders that will be sent by Zalando Retail and it will act as a password.
- In **WebHook Url**, the URL on which marketplace orders are received is displayed.

6. Scroll down and click on **Zalando Retail Cron Settings**, the section is expanded as shown below:

7. Under **Zalando Retail Cron Settings**, do the following steps:

- In the **Order Cron**, select **Enable** if you want to fetch the orders automatically. Order Crons are used to fetch the orders at regular intervals of time.
- In **Order Cron Time**, select the duration for running the order cron. Whatever time is selected by you at that duration the order cron will run and import the order.
- In the **Inventory Cron** list, select the Enable option to enable the synchronization of the inventory

automatically at regular intervals of time.

- In **Inventory Cron Time**, select the duration to run the cron for syncing the inventory in real-time.
8. Now scroll down and click on **Zalando Retail Product Settings**, the section is expanded as shown below:

ZalandoRetail Product Settings ⌵

Product Price <small>[global]</small>	Default Magento Price	▼
	<small>Select to send different product price</small>	
Product Retail Price <small>[global]</small>	Default Magento Price	▼
	<small>Select to send different product price</small>	
Product EAN Number <small>[global]</small>	Default Zalando Ean Number	▼
	<small>Select to send different product Ean number</small>	
Product Auto Inventory Sync <small>[global]</small>	Yes	▼
