1. Overview

About CedCommerce:

CedCommerce is a client-first eCommerce Solution Provider, catered to 30,000+ happy customers with more than 850 Products across 25+ countries.

Our contribution to the eCommerce industry over the years has positioned us among the world-class leaders, and a distinguished Business Partner with Meta, Google, Amazon, Walmart, HubSpot, Shopify, BigCommerce, and 50 other Global Brands.

Our constant efforts in facilitating best-of-class affordable eCommerce solutions and 24X7 customer live support services have been recognized 5 Times in a Row Under Deloitte Technology Fast 50.

We are a group of 800+ professionals who work round the clock with a motive to make eCommerce easier. And, through our rigorous teamwork, we are successfully able to attain 5 Star Ratings on Trustpilot, Capterra, and Shopify.

CedCommerce – Facebook & Instagram Shopping App:

CedCommerce's enterprise-class Facebook & Instagram Shopping App is designed to help Salesforce Merchants effortlessly sell across Meta Commerce Surfaces Facebook *Marketplace*, *Facebook Shops*, and *Instagram Shopping*.

With our app, you would be easily able to:

- Set up Facebook and Instagram Shops
- Connect through the Meta Commerce Manager and Leverage Facebook Business Extension (FBE) beneficial.
- Map your Salesforce Listings on Meta Product Catalogue
- Upload Products in Bulk as well as Profile-wise
- Synchronize Real-Time Product Status
- Ensure end-to-end customer support from a single point of contact

Our user guide will help you step-by-step from scratch for hassle-free onboarding on CedCommerce App, covering crucial portions of Salesforce, Facebook & Instagram.

2. Registration & Sign In on app

You can find the answers to the most important queries like:

- [How to Register on the app?](#)
- [How to Sign in on the app?](#)
- [How to Reset Forgotten Password on the app?](#)

2.1. Register on app

Register on CedCommerce

- You need to first **“Register”** yourself on CedCommerce. For this, please [click here](#) to visit the Sign Up Page. You will have the Registration Page as displayed below:

CED
COMMERCE

Create your account

[Sign in](#)

Username*

First name*

Last name*

Email address*

Phone number*

Password*

Confirm Password*

Country name*

Company website URL*

Register

- Enter your **“Username”, “First name”, “Last name”, “Email address”, “Phone number”, “Password”, “Confirm Password”, “Company name”, and “Company website URL”**. Thereafter, click on the **“Register”** button. While registering you need to take care of the following points:
 - While entering the Username there should be **no spacing** in between them. For example, if your name is Ronald Patrick ? Enter your Username as **“RonaldPatrick”** instead of **“Ronald Patrick”**.
 - The password should be of a **minimum of 6 characters**. You are free to create the password as per your choice i.e. purely numeric or alphabetical or alphanumeric. For example, you can have passwords like **Ronald@123456, Ronald1234, PatrickRonald, 879832, etc.**

After successfully completing the registration process, you will be redirected to the Sign-in page.

2.2. Sign in on App

Sign in on CedCommerce

- Moving ahead, you will be automatically redirected to the [Sign-in Page](#).

The image shows a sign-in form for CedCommerce. At the top left is the CedCommerce logo, which consists of a stylized 'C' icon and the text 'CED COMMERCE'. Below the logo is a white rounded rectangle containing the sign-in form. The form has a heading 'Sign in' in bold. Underneath is a label 'Username or Email ID' followed by a light blue input field. Below that is a label 'Password' followed by a light blue input field with a toggle icon on the right. A blue button with the text 'Sign in' is centered below the fields. At the bottom left of the form area is a link 'Register' and at the bottom right is a link 'Forgot your password?'.

- Enter the “**Username**” or “**Email ID**” and “**Password**” you created while registering in the previous step. Thereafter, click on “**Sign in**”.

Sign in

Username or Email ID

Password

Sign in

[Register](#) [Forgot your password?](#)

- Once you log in, you will be redirected to the “Integration Set-Up Section” where you need to **complete the following three mandatory steps**:
 - [Authenticate your Salesforce Commerce Account Details on CedCommerce API](#)
 - [Connect your Facebook & Instagram Accounts on CedCommerce API](#)
 - [Configure Category and Attribute Mapping on CedCommerce API](#)

Let's understand this in the upcoming sections.

2.3. Reset Forgotten Password on app?

Reset Forgotten Password on CedCommerce

1. Click on the “**Forgot Password**” as displayed below.

Sign in

Username or Email ID

Password

Sign in

[Register](#) [Forgot your password?](#)

1. Further, “**Enter your registered email address**” (which you used during the [registration process on CedCommerce App](#)) and click on the “**Submit**” button.

Reset password

Enter your registered email address.

Note: If you have any trouble resetting your password contact us at apps@cedcommerce.com

1. You will be prompted to message, “**Please check your mailbox, we have sent you a password reset link.**” Next, check your inbox and reset the password.

Reset password

Enter your registered email address.

Note: If you have any trouble resetting your password contact us at apps@cedcommerce.com

Please check your mailbox, we have sent you a password reset link.

3. Onboarding Process

The onboarding process guides you through the important section and steps that need to be undertaken in order to connect your Salesforce account to the Meta Commerce platforms efficiently.

It consists of three necessary steps to authenticate your accounts, connect with Meta platforms, and map your product category to successfully leverage the app functions and sell seamlessly upon both platforms.

The Onboarding process is divided into the following three steps:

- [Authenticate your Salesforce Commerce Account Details on the app](#)
- [Connect Facebook Account with the app](#)
- [Configure Category and Attribute Mapping on the app](#)

3.1. Authenticate your Salesforce Commerce Account Details on app

After you are done with registration on CedCommerce API, you will get the “Verify your Credentials” Page as shown below.

Here you need to authenticate your following Salesforce Commerce Account details with CedCommerce.

- [Account Manager Client ID](#)
- [Account Manager Secret Key](#)
- [Sub Domain URL](#)
- [Short Code](#)
- [Organization ID](#)
- [Site ID](#)
- [Business Manager User ID](#)
- [Business Manager User Password](#)

STEP 1 / 3

Verify your credentials Guide

Please authenticate your Salesforce Commerce account details by filling up the form below.

Account Manager Client ID	<input type="text"/> <p>For eg : b02dd00f-b55f-47cb-8c66-0847fdb768ff</p> <p>Salesforce Commerce Cloud (Demandware) → Account Manager → API Client</p>
Account Manager Secret Key	<input type="text"/> <p>For eg : cedcommerce@123</p> <p>The 12 characters password (e.g. 123456789abc) that you have created while adding API Client.</p>
Sub Domain URL	<input type="text"/> <p>For eg : https://pdyh-003.sandbox.ab04.ab.commercecloud.salesforce.com</p> <p>Salesforce Commerce Cloud (Demandware) → Account Manager → API Client → Roles → Salesforce Commerce API</p>
Short Code	<input type="text"/> <p>For eg : kv9qzn78</p> <p>Salesforce Business Manager → Administration → Site Development → Salesforce Commerce API Settings</p>
Organization ID	<input type="text"/> <p>For eg : f_ecom_zycl_087</p> <p>Salesforce Business Manager → Administration → Site Development → Salesforce Commerce API Settings</p>
Site ID	<input type="text"/> <p>For eg : ReffAch</p> <p>Salesforce Business Manager → Top Left Corner → Select Site ID from the dropdown</p>
Business Manager User ID	<input type="text" value="shiva"/> <p>Salesforce Business Manager → Administration → Organization → Users</p>
Business Manager User Password	<input type="password" value="....."/> <p>The password (eg:Name123)that you as a user have created for Business manager.</p>

NEXT

Don't worry; we will guide you on "how & from where" you'll find all these data.

For this, you need to have access to:

[Salesforce Commerce Cloud Account](#): This will give you the details of Account Manager Client ID, Account Manager Secret Key, and Sub Domain URL.

Salesforce Business Manager: This will give you the details of Short Code, Organization ID, and Site ID.

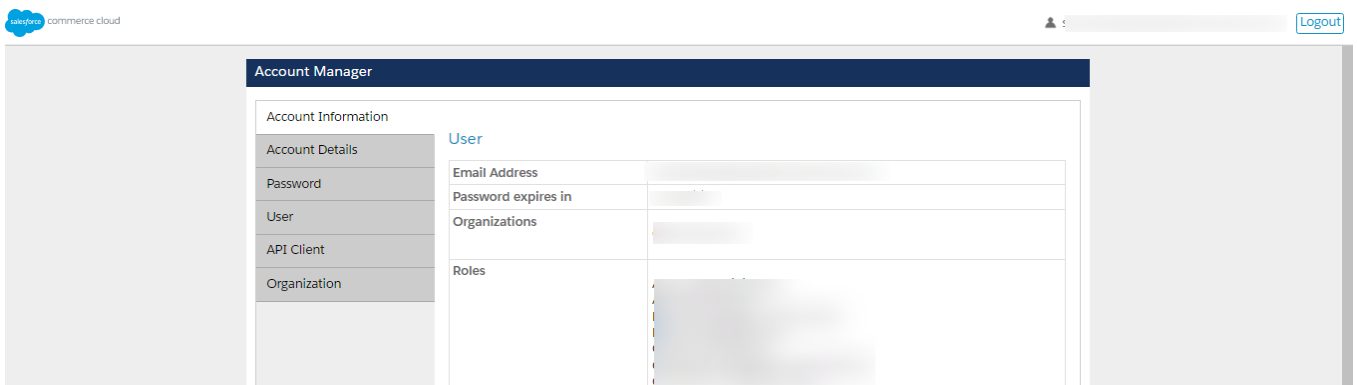

3.1.1. How to get Account Manager Client ID from Salesforce Commerce?

- [Click here](#) to log in to the Salesforce Commerce Cloud.

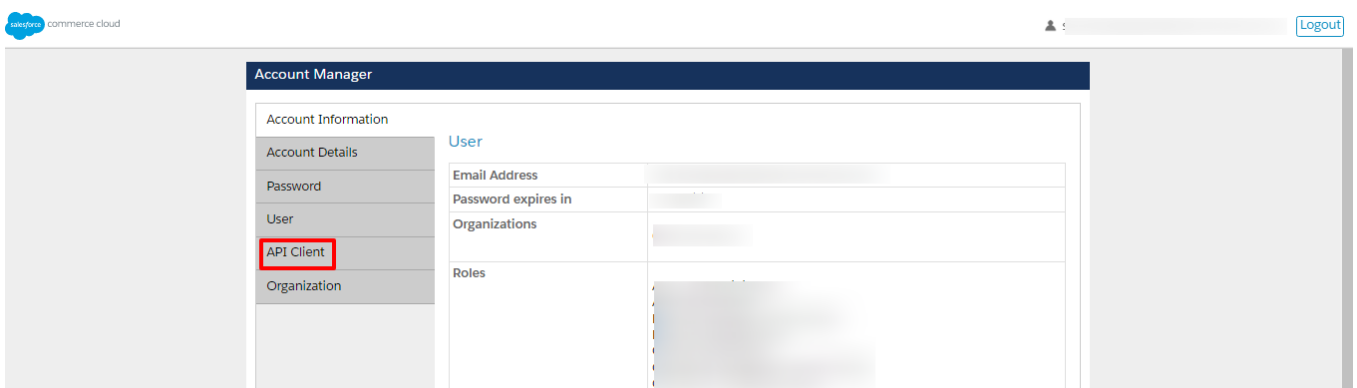

- Enter the email address you have registered on Salesforce Commerce Cloud and click on “**Login**”.

Further, you will be asked to enter your password and after successful login, you will be redirected to the Salesforce Commerce Cloud **Account Manager also known as Demandware**, as displayed below:

- Now click on “**API Client**” available on the Left Hand Side.

- Here, you will find the **API Client ID** which is your **Account Manager Client ID** that you need to fill in the “**Verify your credentials**” page – first field.

Note: In case, you are unable to find anything over here means it is blank. You need to “**Add API Client**” which has been guided under [How to configure API Client](#).

3.1.2. Get Account Manager Secret Key from Salesforce Commerce

The Account Manager Secret Key that you need to fill at the second field on the “**Verify your credentials**” page is the 12 characters password.

You need to provide the alphanumeric code containing the numbers & letters that you created while adding API Client — e.g. 123456789abc

3.1.3. Get Sub Domain URL from Salesforce Commerce

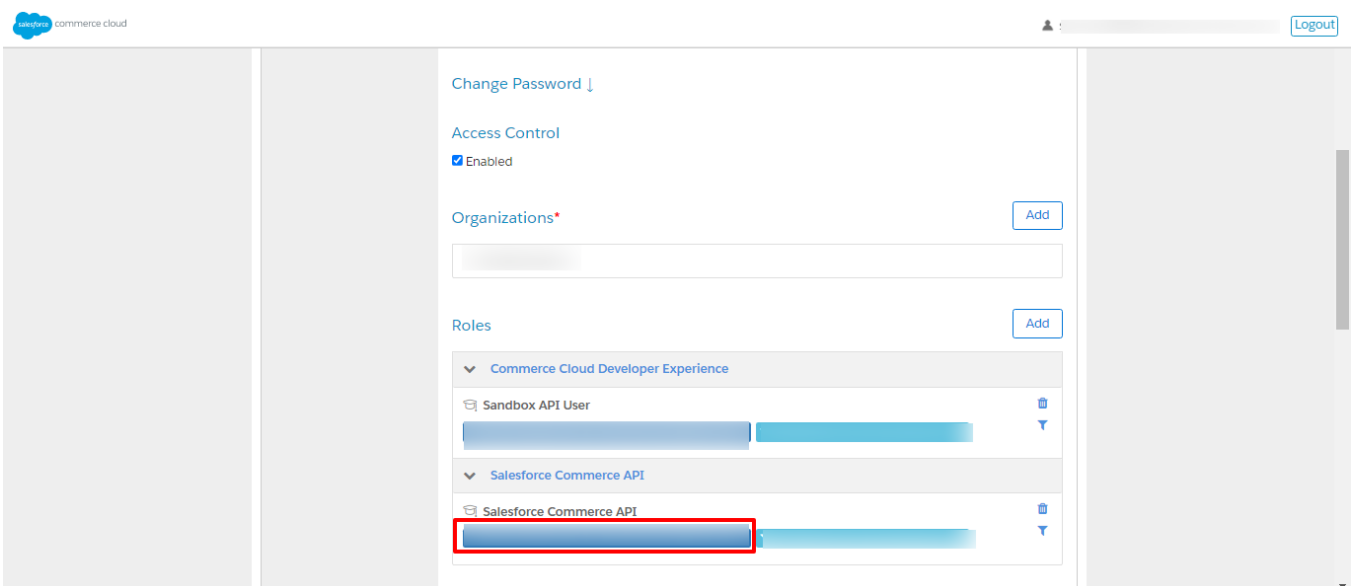

- Click on your **API Client ID**.

- You will be directed to the complete details of that particular API Client ID as displayed below:

- Scroll down on this same page and you will get “**Roles**” as displayed below. From here you can have the detail of the **Sub Domain URL**. The same you need to fill at the **third field on the “Verify your credentials” Page**.

- Copy the URL from the red section and **add https://** before the URL you have copied. **This is your final Sub Domain URL**. For example, `https://zycl-001.sandbox.us01.dx.commercecloud.salesforce.com/`

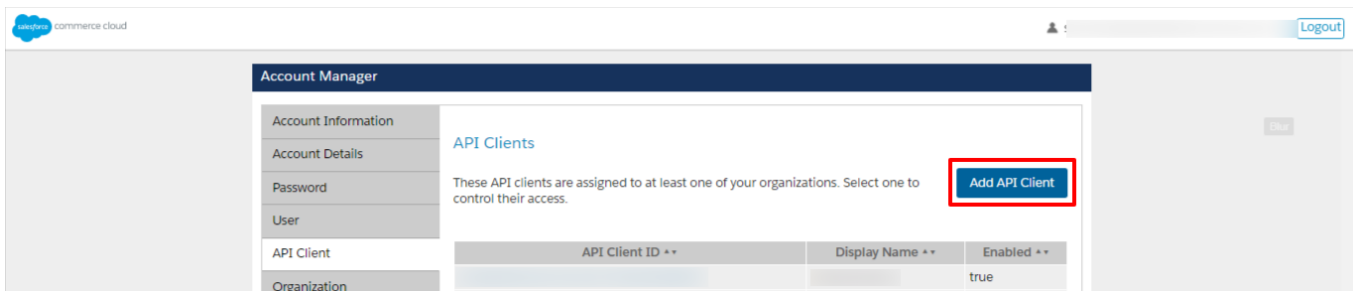

With this, you have successfully retrieved the first three fields of the “**Verify your credentials**” Page.

3.1.4. Configure API Client

This step is for those who haven't created any API Client ID. Here we will go through the complete process on **How to Add API Client**.

Let's proceed!

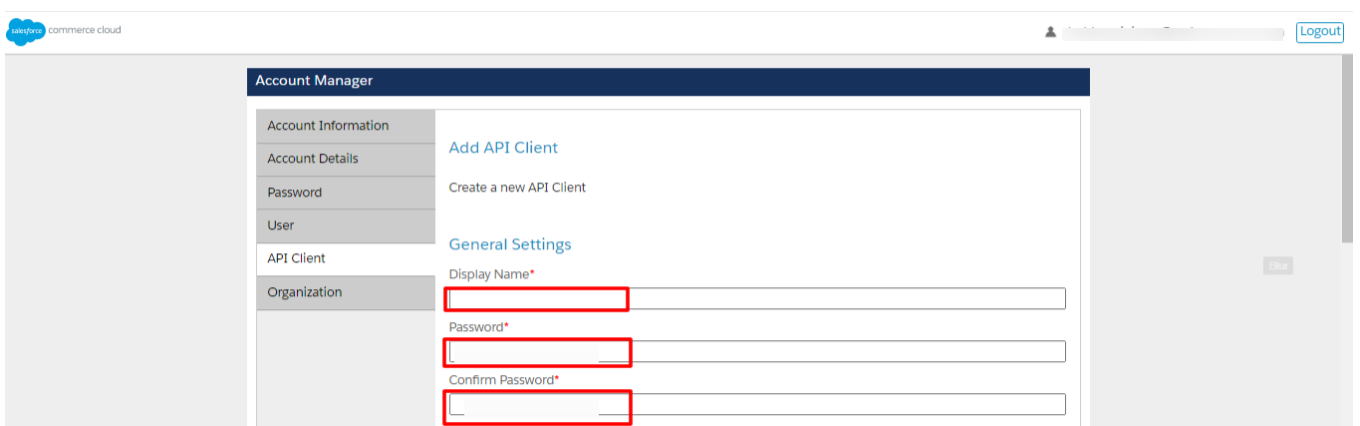

- Click on **“Add API Client”** as displayed below:

- First, you need to fill over here is **General Settings**.
 - Add **“Display Name”** as your Organization Name.
 - Create at least 12 characters **“Password”** (should contain numbers & letters — e.g. 123456789abc).
 - **“Confirm Password”** created.

We recommend you save both these important details separately on a notepad.

Note: This password is your Account Manager Secret Key that you need to fill at the second field in Verify your credentials Page on CedCommerce API.

- Scroll down and checkmark **“Enabled”** in **“Access Control”**.

Access Control

- In the next step, Click on **“Add”** in **“Organizations”**.

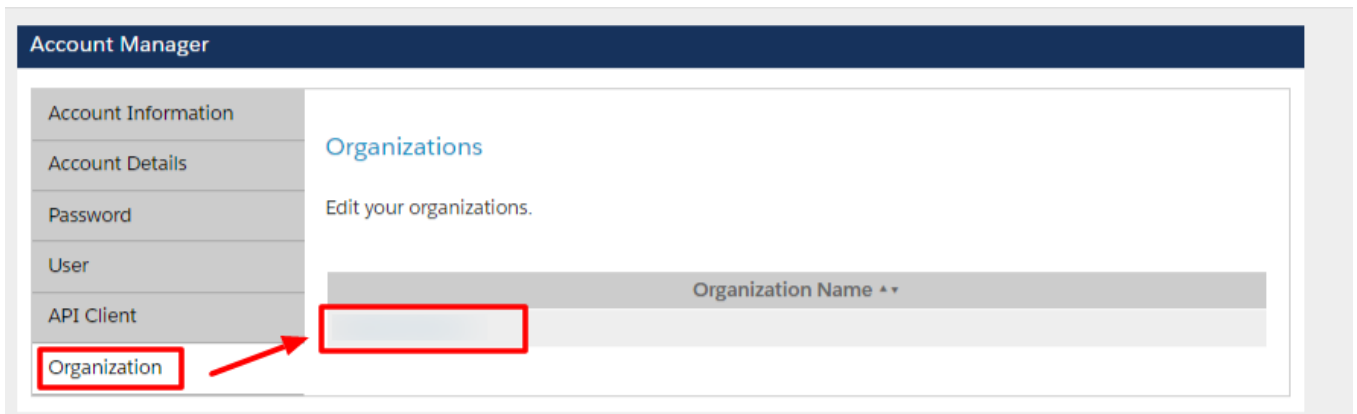

- Further, under “**Assign Organizations**”, tick mark on the checkbox of your Organization Name and click on “**Add**”.

If you don't get your Organization Name over here, don't panic.

Move back to the “**Account Manager**” —> Go to “**Organization**” available on the Left Hand Side and click on your “**Organization Name**” as displayed below.

Next, verify that Salesforce has assigned a domain to your organization —> Furnish the basic details and click on “**Save**”.

3.1.5. Get Short Code, Organization ID, and Site ID from Salesforce Business Manager

- Go to the **Business Manager** of your store —> you will get the **Login Page** as displayed below.

The URL for the same would be —> (Your Sub Domain URL)/on/demandware.store/Sites-Site.

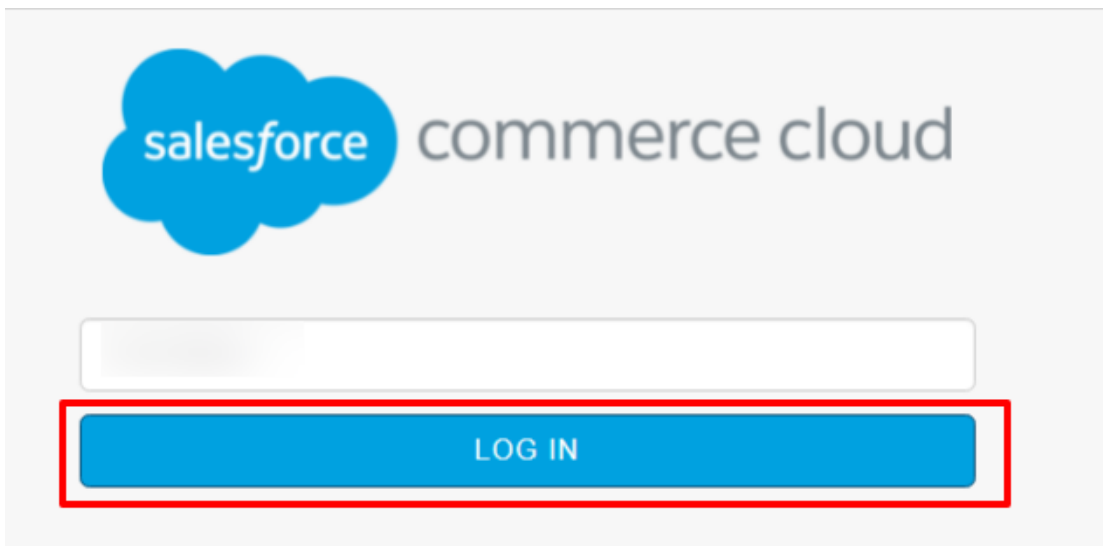

For example,

<https://zycl-001.sandbox.us01.dx.commercecloud.salesforce.com/on/demandware.store/Sites-Site>

The image shows the Salesforce Commerce Cloud login interface. At the top left is the Salesforce logo, a blue cloud with the word "salesforce" in white. To its right, the words "commerce cloud" are displayed in a grey, sans-serif font. Below the logo is a white rectangular input field with the placeholder text "User Name". Underneath the input field is a solid blue rectangular button with the text "LOG IN" in white, uppercase letters.

- Enter the “**Email Address**” you have registered on Salesforce Commerce Cloud and click on “**Login**”.

The image shows the Salesforce Commerce Cloud login interface, similar to the previous one but with an additional field. It features the same Salesforce logo and "commerce cloud" text. Below the logo is a white rectangular input field, which is currently empty. Underneath this field is a solid blue rectangular button with the text "LOG IN" in white, uppercase letters. This button is highlighted with a red rectangular border.

- Enter the “**Password**” and click on “**Login**”.

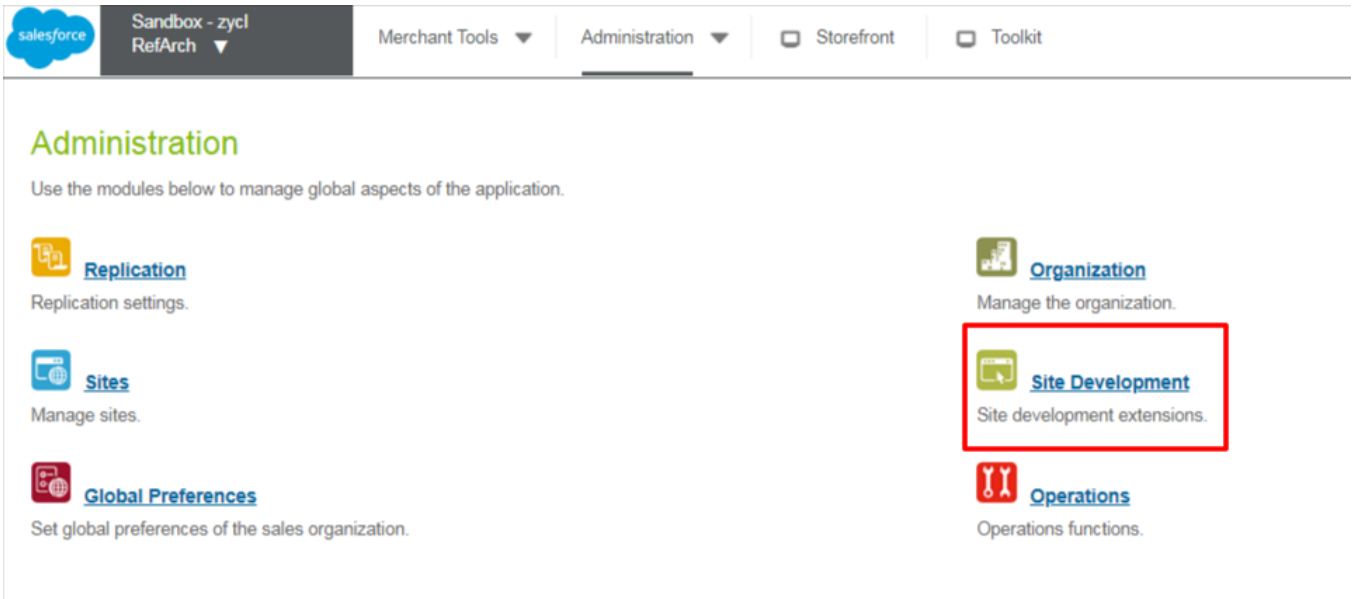

- You will be redirected to the Business Manager Dashboard.

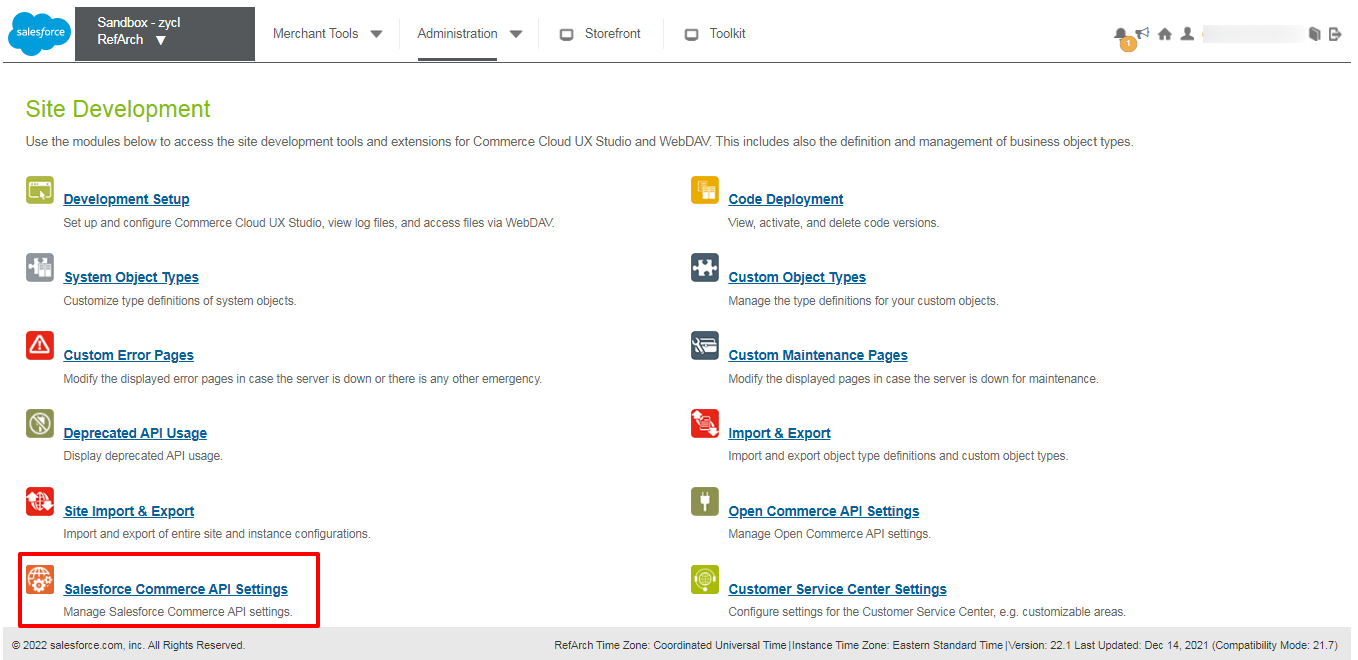

- Now, click on the “Administration” as displayed below:

- You will be redirected to the Administration Dashboard, next click on “Site Development” as shown below:

- Under the dashboard of Site Development, you will see 12 options. You only have to click on **“Salesforce Commerce API Settings”** as displayed below.

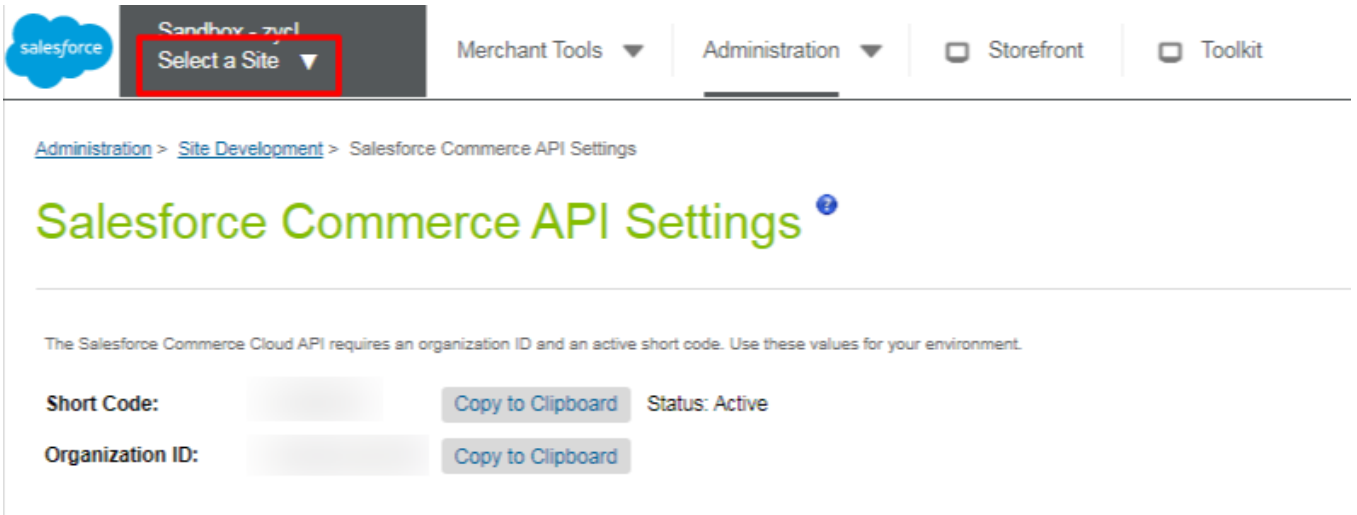

- From here you will get **“Short Code”, “Organization ID”, and “Site ID”** i.e. the fourth, fifth, and sixth fields required at Verify your credentials Page on CedCommerce API.
 - For **Short Code**, click on **“Request Short Code”** as displayed below.

The screenshot shows the Salesforce Commerce API Settings page. At the top, there is a navigation bar with the Salesforce logo, a dropdown menu for 'Sandbox - zycl RefArch', and links for 'Merchant Tools', 'Administration', 'Storefront', and 'Toolkit'. Below the navigation bar, the breadcrumb trail reads 'Administration > Site Development > Salesforce Commerce API Settings'. The main heading is 'Salesforce Commerce API Settings'. A note states: 'The Salesforce Commerce Cloud API requires an organization ID and an active short code. Use these values for your environment.' Under 'Short Code:', there is a 'Request Short Code' button highlighted with a red box. Under 'Organization ID:', the value 'f_ecom_zycl_001' is displayed next to a 'Copy to Clipboard' button.

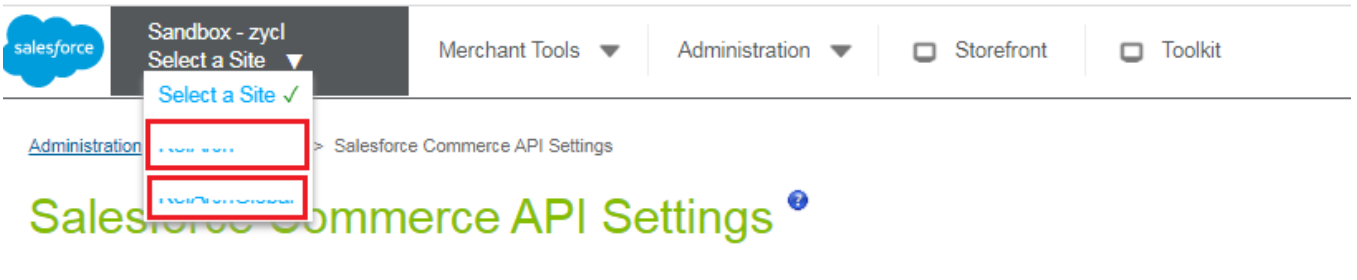

Further, copy **Short Code and Organization ID** as shown below:

This screenshot shows the same Salesforce Commerce API Settings page, but with the 'Short Code' and 'Organization ID' fields highlighted with red boxes. The 'Short Code' field is empty, and the 'Organization ID' field contains the value 'f_ecom_zycl_001'. Both fields have 'Copy to Clipboard' buttons next to them. The 'Short Code' field also has a 'Status: Active' label to its right. The rest of the page layout, including the navigation bar and breadcrumb trail, is identical to the previous screenshot.

For “**Site ID**”, go to the top left corner and select a site as displayed below:

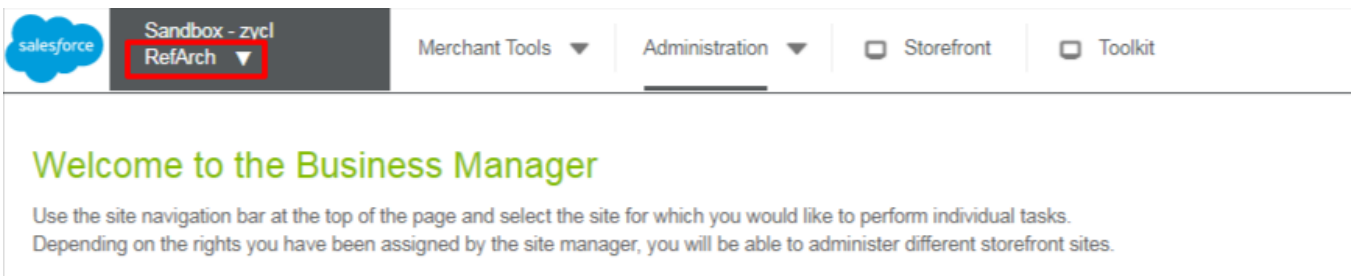

On selection, it will **display all the site names which are Site IDs (i.e. Site Name=Site ID)** configured with your Salesforce Business Manager as displayed in the screenshot below.

Now **select the site ID you want to connect with CedCommerce API** and **copy exactly the same** as written over there.

For your better understanding, we have shown below a sample for you.

The Site ID of the merchant is “RefArch”. The merchant has to copy and paste as it is in the sixth field of the Verify your credentials Page in CedCommerce API.

With this, you have successfully retrieved the subsequent three fields of the “**Verify your credentials**” Page.

Further, visit back to the CedCommerce App and complete the Onboarding Step 1 as guided below.

If you need any help regarding login, please refer to [How to Sign in on CedCommerce App](#).

3.1.6. How to get your Business Manager User ID?

- Login in to your Salesforce Commerce Cloud account enter your credentials – you will be redirected to the Business Manager page as shown below:-

- Click on the “**Administration**” tab as shown below:

- Now click on the “**Organization**” block in the left, and a list of options opens – select the “**Users**” option to proceed further. Refer to the image below for better understanding-

How to get your Business Manager User Password?

Business Manager User password is that password you've used while creating your Business Manager User ID for **Salesforce Commerce Cloud**.

To get that, you simply need to enter your **Business Manager User ID** as shown below –

And then, your password will be auto-displayed (if you have saved the credentials while creating your ID). Refer to the image for better understanding-

This is the password that you have to enter in the app.

3.1.7. Verify your credentials on app

Enter details in all eight fields, and click on “**Next**” as displayed below:

STEP 1 / 3 ● ● ●

Verify your credentials Guide

Please authenticate your Salesforce Commerce account details by filling up the form below.

Account Manager Client ID	<input style="width: 100%;" type="text" value="For eg : b02dd00f-b55f-47cb-8c66-0847fdb768ff"/> <small>Salesforce Commerce Cloud (Demandware) → Account Manager → API Client</small>

[NEXT](#)

Now, you will be asked to connect your Facebook account with CedCommerce API. The complete process is described in the upcoming Section.

3.2. Connect Facebook Account with app

Step 1:

Connect your existing Facebook Account with CedCommerce API by clicking on “**f Connect**” as displayed in the below screenshot.

3.2.1. Onboarding to Facebook Business Extension

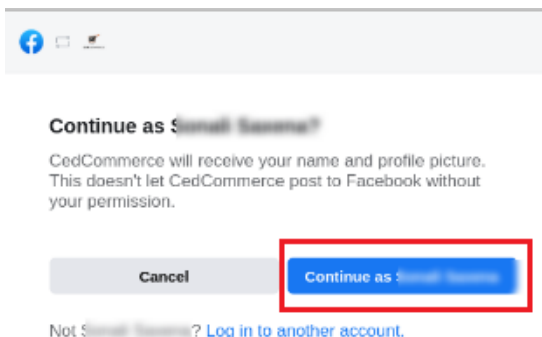

Merchants can now easily set up their Meta pixels, catalog, and also run their business through Facebook and Instagram Shops. By integrating with Facebook Business Extension, you can unlock a broad suite of Facebook business tools for your customers in the eCommerce and services verticals experiences such as Facebook Shops, Dynamic Ads, and other business tools available across the Facebook family of apps.

Benefits of Facebook Business Extensions

Facebook Business Extension (FBE) makes it easier for businesses to list products and offer other variety of services like run ads, look after the Facebook & Instagram insights, surface products to a targeted audience, and much more; right from a single place. Once you integrated with the Facebook Business Extension, you can easily manage your Meta assets like; Facebook product catalog, Meta pixel, Facebook page, and Instagram profile without any hassle.

Step 1:

Here, you need to allow permission to CedCommerce API to access your Profile Name and Profile Picture, click on the **“Continue as (your name)”** button as displayed below.

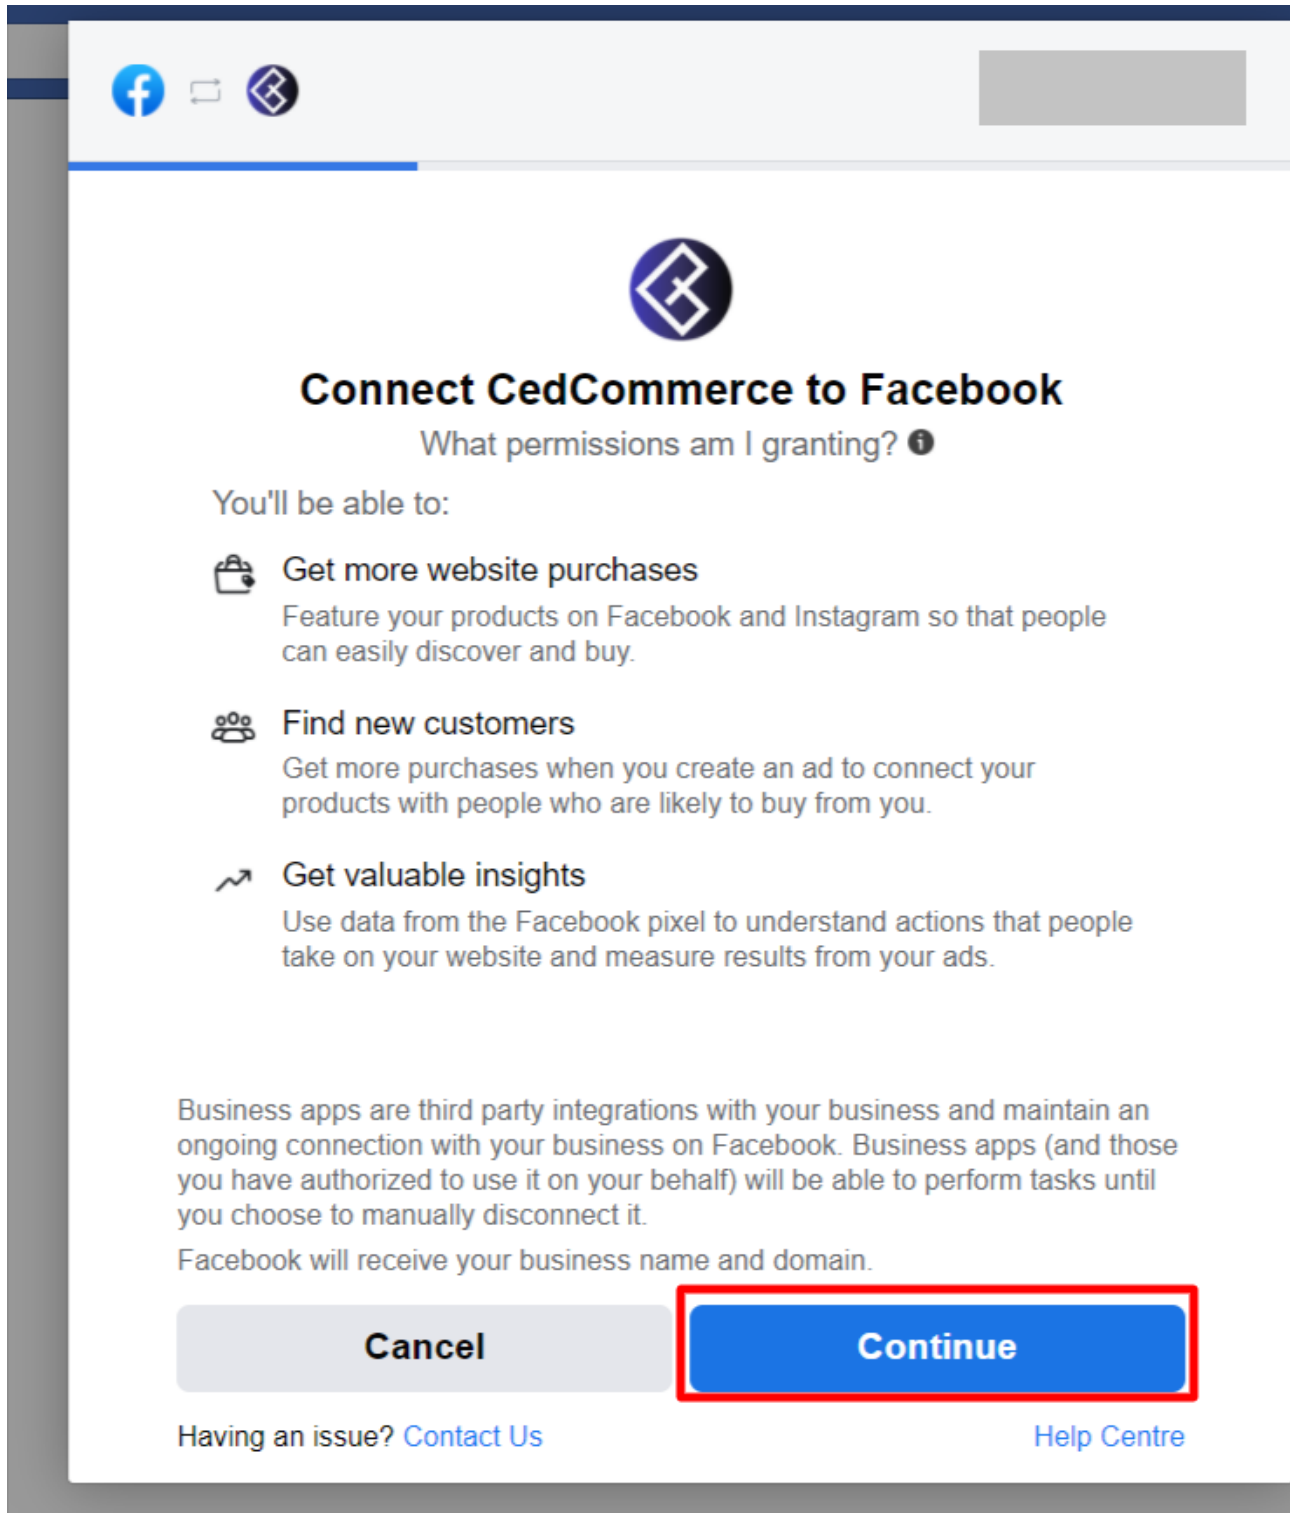

Step 2:

In this step, you will get to know what are the benefits of connecting with CedCommerce API for Facebook Shops:

- Get more website purchases
- Find new customers
- Get valuable insights

Further, **click on “Continue”** as displayed below to step into the next step.

Connect CedCommerce to Facebook
What permissions am I granting? ⓘ

You'll be able to:

-  **Get more website purchases**
Feature your products on Facebook and Instagram so that people can easily discover and buy.
-  **Find new customers**
Get more purchases when you create an ad to connect your products with people who are likely to buy from you.
-  **Get valuable insights**
Use data from the Facebook pixel to understand actions that people take on your website and measure results from your ads.

Business apps are third party integrations with your business and maintain an ongoing connection with your business on Facebook. Business apps (and those you have authorized to use it on your behalf) will be able to perform tasks until you choose to manually disconnect it.

Facebook will receive your business name and domain.

Cancel **Continue**

Having an issue? [Contact Us](#) [Help Centre](#)

Step 3:

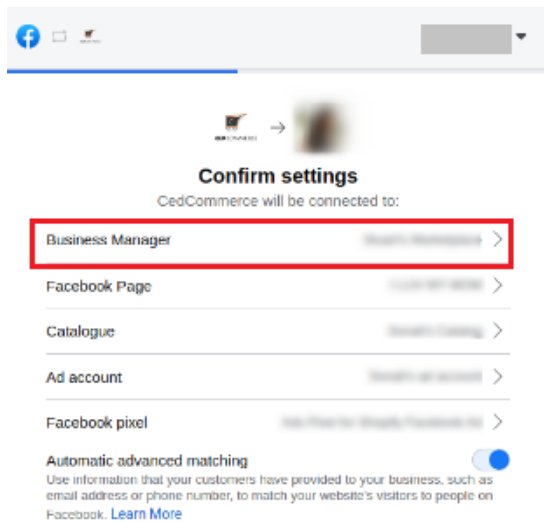

Now here you need to **perform 5 tasks** – provide information as listed below and thereafter you need to **confirm the settings** by clicking on the “**Continue**” button.

- [Connect Meta Business Manager Account](#)
- [Connect Facebook Page](#)
- [Connect Meta Product Catalogue](#)
- [Connect Meta Ad Account](#)
- [Connect Meta Pixel](#)
- [Connect to Instagram Shopping](#)

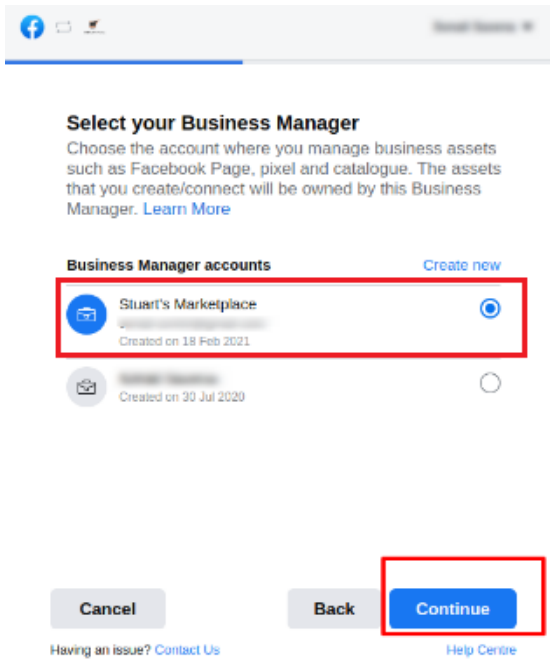

But before it, let's understand how to perform each task.

3.2.1.1. Connect Meta Business Manager Account

Click on “**Business Manager**” as displayed below:

You will be redirected to **select your Business Manager Account** as shown below. Choose the account you wish to connect with CedCommerce API and thereafter, **click on “Continue”**.

3.2.1.1.1. How to Create a New Meta Business Manager Account

If you **don't find any options** under “**Business Manager Accounts**”, it means you don't have a Business Manager Account. In this case, “**Create New**” within the app itself as shown below:

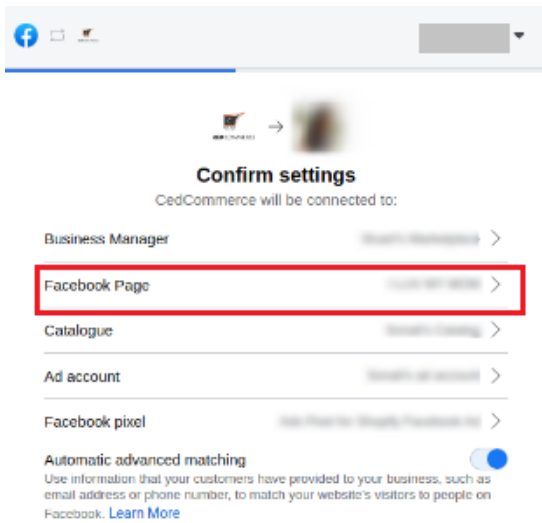

A new window or tab will get in front of you in which you need to **fill in the following details**. After that click on “**Next**”.

- Your Business Name
- Your Name
- Your Business/Work Email Address

Now, **fill up the required business details** and then click on the **“Submit”** button.

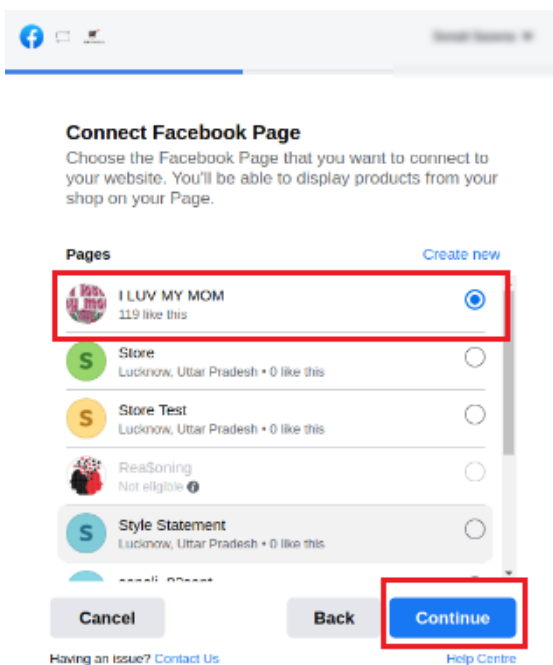

3.2.1.2. Connect Facebook Page

Click on **“Facebook Page”** as displayed below:

You will get the **list of all the Facebook Pages associated with the Business Manager Account** you have selected in **the previous step**.

Choose the Facebook Page you wish to connect with CedCommerce API and thereafter, **click on “Continue”** as displayed below:

3.2.1.2.1. How to create a new Facebook Page

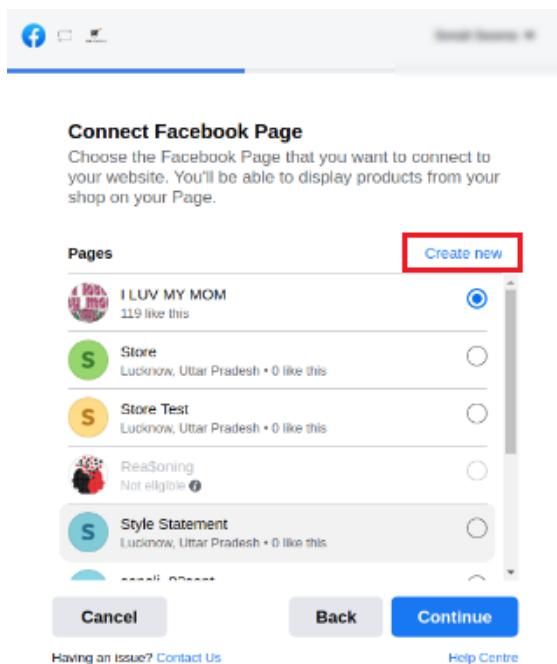

In case you are new to the Meta business and you do not have an existing page on Facebook, you can create a new Facebook page and then connect it with the website.

You can create a new page for your Facebook account in two ways:

- From the Facebook panel at https://www.facebook.com/pages/create/?ref_type=hc
- From the Commerce Manager

*Note: To create a new Facebook page for your business, you need the Page type and desired product category to convert the same into a Shop. Check detailed page requirements here

The process is simple and you can carry it out within the app itself by simply clicking on “Create New” as shown below:

3.2.1.3. Connect Meta Product Catalogue

Click on “Catalogue” as displayed below:

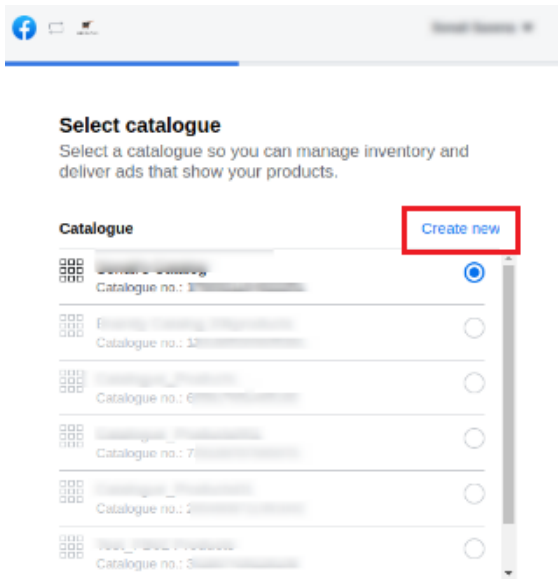

Next, you need to select the **Product Catalogue of your Commerce Store** that you wish to **connect with the Facebook Page** selected in the previous step.

Further, click on **“Continue”** as displayed below

3.2.1.3.1. How to create a new Meta product catalog

If you **don't find any options** under “Catalogue” or in case you **want to create a separate** product catalogue dedicated for Meta and Instagram Shops, click on **“Create New”** as displayed below:

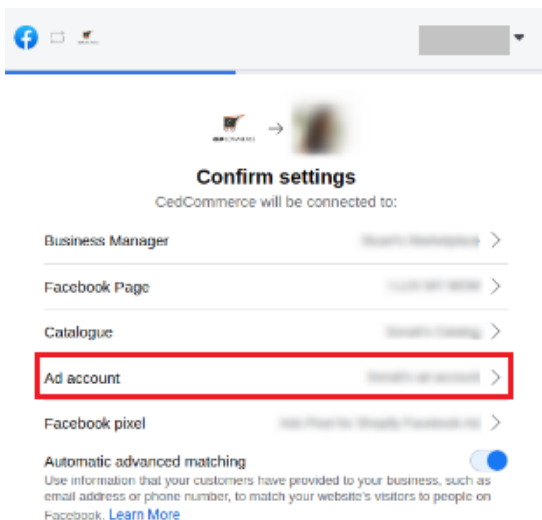

You will be redirected to the **Meta Commerce Manager**. Now, select **“Product & Settings”** and click on **“Create New Product Catalogue”**.

Once you are done with it, start adding products to the newly created catalogue and define the attributes of your products.

3.2.1.4. Connect Meta Ad Account

Click on **“Ad account”** as displayed below:

Here, you will see the **list of all the MetaAd Accounts associated with the Business Manager Account** you have selected.

Choose the Ad Account you wish to connect with CedCommerce API and thereafter, **click on “Continue”** as displayed below:

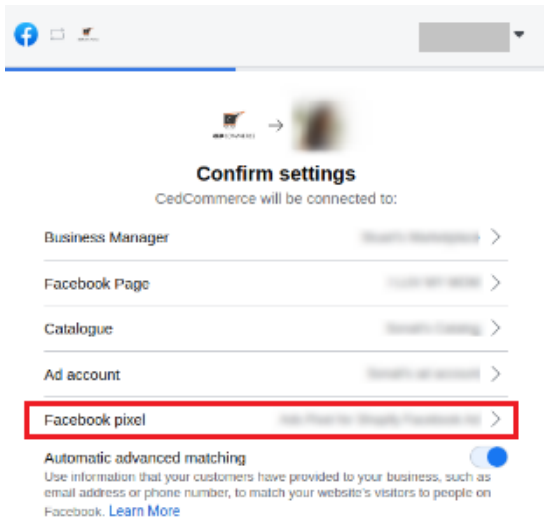

3.2.1.4.1. How to create a new Ads Account

If you **don't find any options** under "All Ad Accounts", create an Ad Account (connecting with your Business Manager account) within the app itself by clicking on "**Create New**" as shown below:

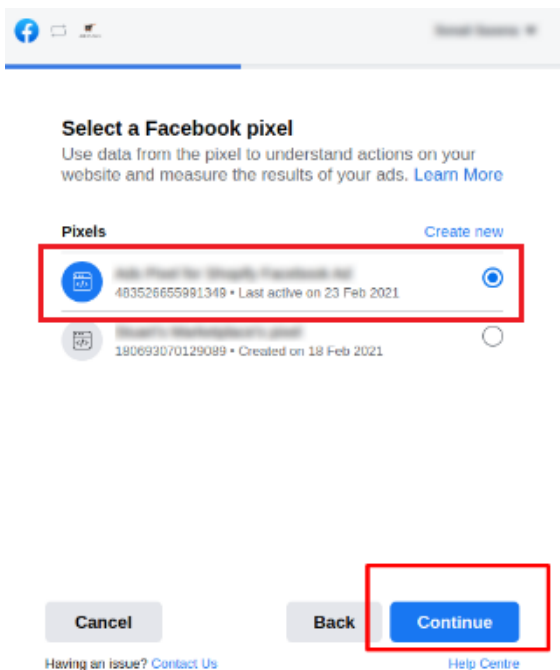

3.2.1.5. Connect Meta Pixel

Click on "**Meta Pixel**" as displayed below:

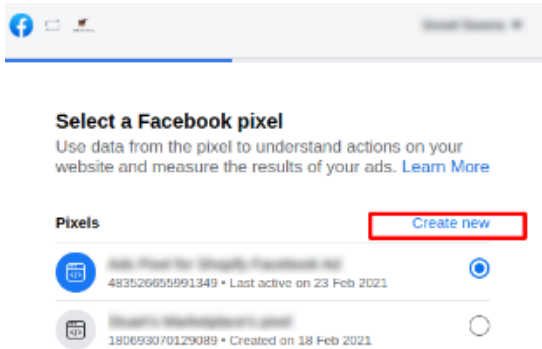

Select the **Meta Pixel Code** from the list you wish to connect with the Meta Ad Account you have selected and click on **“Continue”** as displayed below:

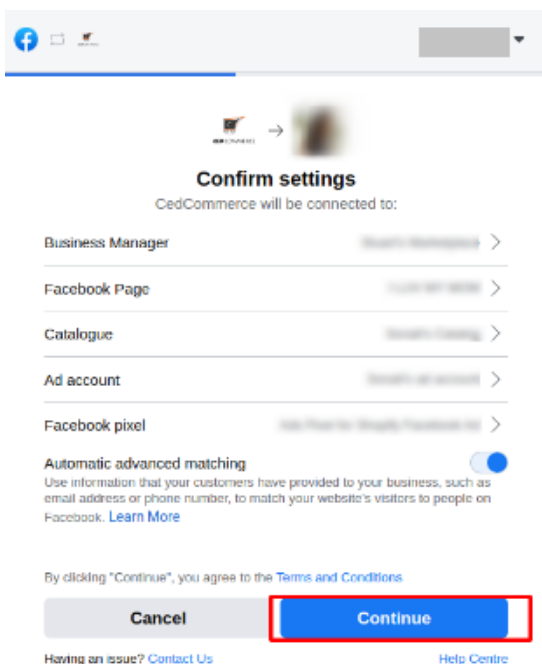

3.2.1.5.1. How to create a new pixel

If you **don't find any options** under “Pixels” or in case you **want to create a separate** one for the Ad Account dedicated only for Facebook and Instagram Shops, click on **“Create New”** as displayed below:

With this, you have successfully connected Meta Business Manager, Facebook Page, Meta Product Catalogue, Meta Ad Account, Meta Pixel Code with CedCommerce API.

Next, you need to **confirm the settings** (details provided) as we mentioned in the **initial stage**. For your convenience, we have re-attached the tab snapshot below to avoid any confusion – simply click on **“Continue”**.

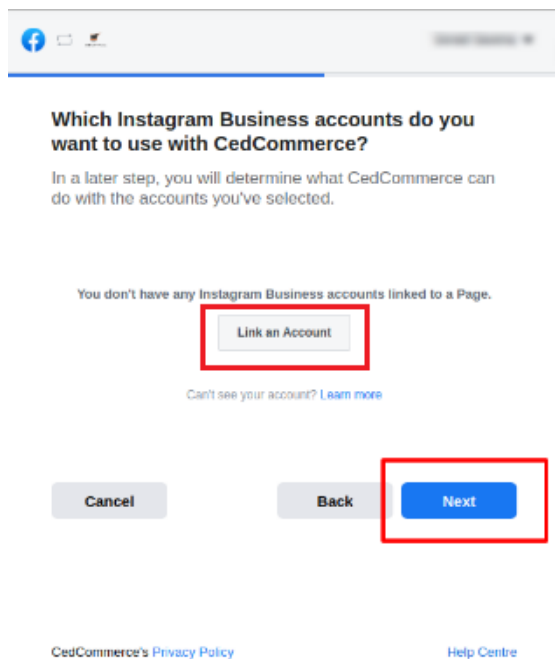

3.2.1.6. Connect to Instagram Shopping

If you want to sell on Instagram Shopping; you need to connect your Instagram Business account with a Facebook business page and CedCommerce.

It is a one-click process where you will have to **connect your Instagram Business or Creator Account** with

your Commerce Store's **Facebook Page** and **CedCommerce API**.

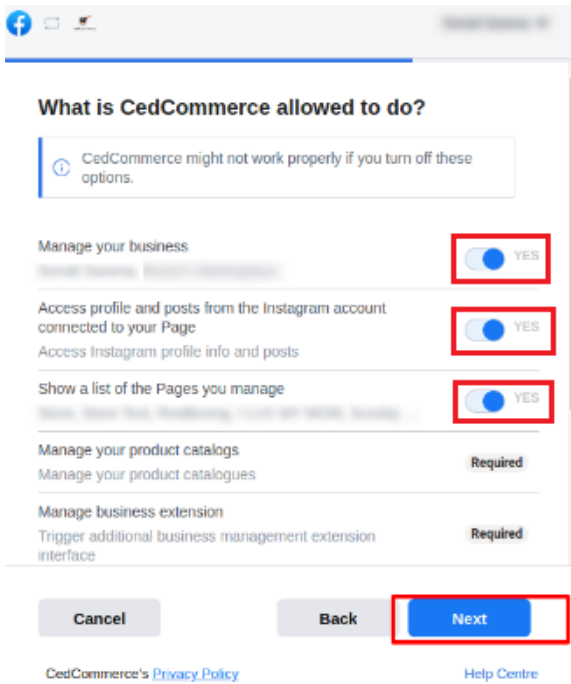

Please follow the process as displayed below, click on **“Link an Account”** and thereafter on the **“Next”** button.

3.2.1.7. Allow Permission to CedCommerce

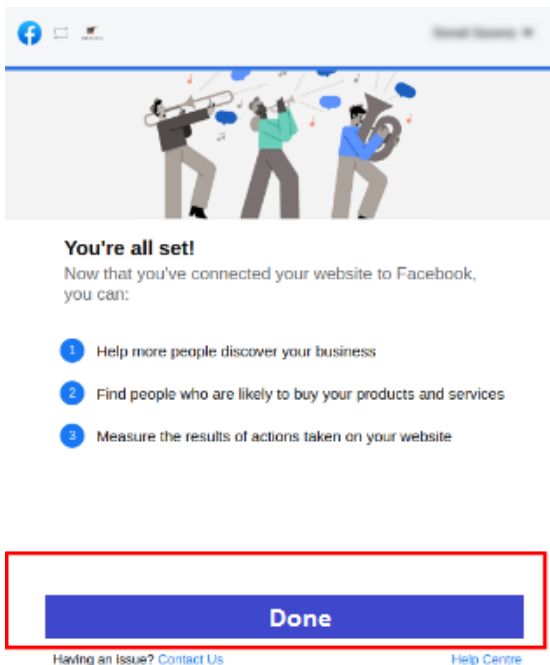

This section deals with what permissions you allow CedCommerce with. Select Yes to all permissions to run ads, Shops and gain insights into all your business activities.

You need to **allow permissions to CedCommerce API** by clicking **toggle (select) to “Yes”** against each permission. Thereafter, **click on “Next”** as displayed below:

Note: You need to **grant all the permissions** (as listed) to CedCommerce API so that the application works properly.

This is the last step where you will have a **confirmation screen** from CedCommerce API “**You’re all set!**” To finalize it, click on “**Done**”.

In case, by mistake you connected a wrong account/page or want to re-edit, you can make the changes from the link as displayed below.

STEP 2 / 3

Congratulations!

You have successfully connected your Facebook account.

Guide

Want to reset the connected account/page? Don't worry, [click here.](#)

Continue

With this, you have successfully connected your assets across Facebook & Instagram. Click on “**Continue**” for Category and Attribute Mapping.

3.3. Configure Category and Attribute Mapping on app

- It would be best to map **your product category listed on Salesforce Commerce Cloud with the CedCommerce app** so that the same available category can be uploaded to Facebook Catalogue.
- Select your product's **Category under Select Category for Mapping** as displayed below.
- After that, in **Select Attribute(s)**, map at least one attribute corresponding to each product and then **click on Save & Proceed**.
- Attribute Mapping is an ultimate process in which you provide additional details (variants) of your product like age, gender, size, pattern, etc.

It **enhances the visibility of your product catalog** among the shoppers (they can shop using filters plus recommendations) across Facebook and Instagram.

Step 1

Under Select Category, click on “**Select**” and **choose your category from the drop-down.**

STEP 3 / 3

Select Category

Map the category of your Salesforce Store with Meta Catalog.

Once you are done with it, CedCommerce App will automatically initiate **product importing** (and synchronization) from Salesforce in the backend.

With this, we are **successfully done with the complete onboarding process**.

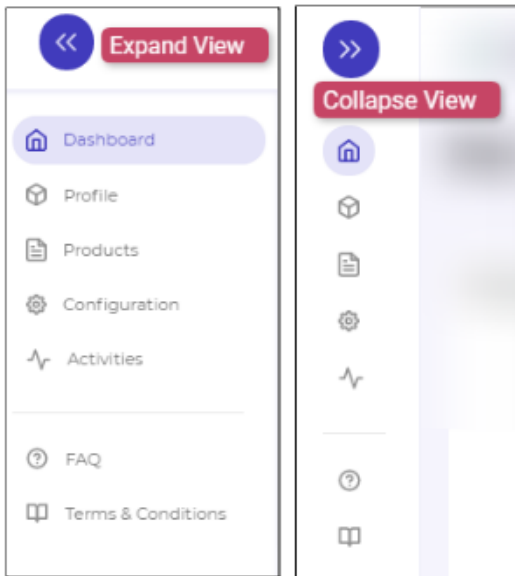

4. Dashboard

As shown below, the app's dashboard showcases the holistic view of all the merchant operations, synchronized with Facebook & Instagram Shops.

Let's understand each block from top to bottom:

Header View:

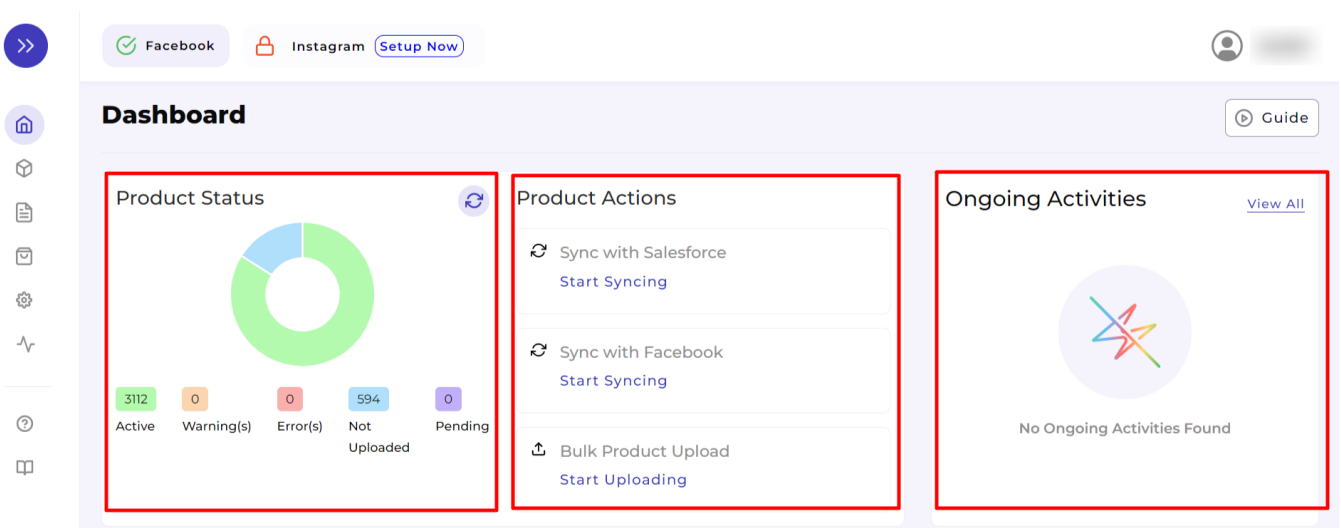

- With this icon, you can expand/collapse the left bar view as per your requirement and convenience.

(Left Bar View)

- You can hassle-free set up your Facebook and (or) Instagram Shops from here.
- It displays your Profile Name.
- This is the CedCommerce Support Chatbox available at your service 24X7.

Dashboard Middle View:

- **Product Status:** It shows the real-time status of your products imported from the Salesforce Commerce Store or uploaded from the CedCommerce App to the Meta Catalogue.
- **Sync Products**
 - **Sync with Salesforce:** You can sync products from Salesforce Commerce Store to the CedCommerce app in one click.
 - **Sync with Facebook:** This syncs the real-time status of the products (i.e., Error, Not Uploaded, Warning, and Finished) between the CedCommerce app and Meta catalogue.

- **Bulk Product Upload:** You can bulk upload the products from here.

Bulk Upload X

Please select a profile to which you want to upload to your Meta catalogue.

Default ▼

- Your "Default" profile is the one where, the product(s) will be uploaded according to the category mapped during the onboarding process. You can check and edit the same under the [Configuration](#) section (General → Default Profile).
- To upload the product(s) profile-wise, you can select the desired profile from dropdown and can also [Create a new profile](#) from here itself.

Cancel
Start Upload

If you want to upload the products profile-wise, that is also feasible from here itself. You need to select the profile created for the product set you wish to upload and click on “**Start Upload**” (refer below to the screenshot).

- **Guide** – It allows you to access the complete video help guide, with which you can learn the complete working of the app.
- **Ongoing Activities:** It shows the real-time progress of your recent operations, as displayed in the below screenshot.

The screenshot displays the dashboard interface. At the top, there are status indicators for Facebook (checked) and Instagram (Setup Now). The main dashboard area is titled 'Dashboard' and includes a 'Guide' button. The 'Product Status' section features a donut chart and a summary table:

Status	Count
Active	3112
Warning(s)	0
Error(s)	0
Not Uploaded	594
Pending	0

The 'Product Actions' section lists three actions: 'Sync with Salesforce', 'Sync with Facebook', and 'Bulk Product Upload', each with a 'Start' button. The 'Ongoing Activities' section, highlighted with a red box, shows a circular icon with a starburst and the text 'No Ongoing Activities Found'.

What is “View All” – If you have performed multiple operations at a time or want to view the operations performed so far, you can view it from here.

You will be redirected to the “**Activities**,” as displayed below:

5. Profile Tab

Profiling is all about creating a category of a similar product set or is created on the basis of the particular template or conditions for several products in which you wish to upload them.

By such refined categorizations, profiling not only saves time in performing multiple operations on a particular product set but also **makes the process easier while uploading the products.**

- Click on the “**Profile**” Tab as displayed below.

No Ongoing Activities Found

- You will be redirected to the **Profile page** wherein you will find the complete list of profiles created. And

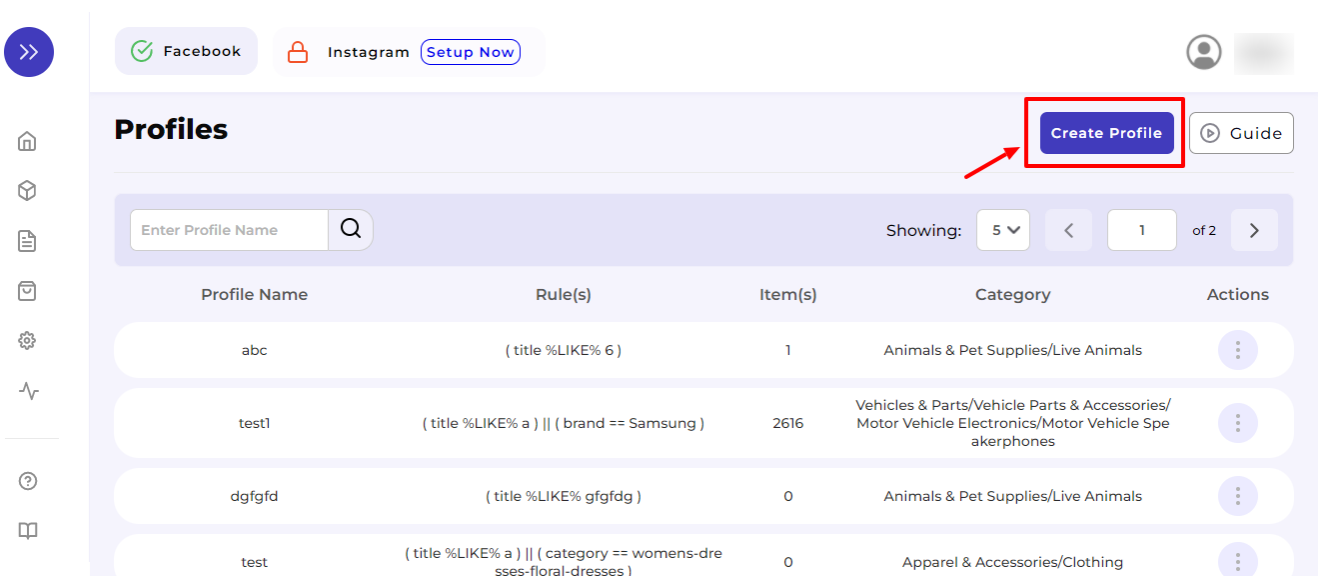

also, you can even create a new profile from there.

5.1. How to Create a Profile?

Step 1:

Click on “**Create Profile**” as shown below:

Step 2:

You will be redirected to the creation page where you will need first to Enter “**Profile Name**” (remember every profile name has to be a unique name) and **perform Category Mapping** as shown below.

Create Profile [Back] [Next]

STEP 1/2

Complete necessary details for creating the new profile.

Profile Name
 Profile name should be unique and it must not exceed 80 characters.
 [Enter profile name]

Select category
 Select the category which best defines your product(s).
 [Select]

Product(s) Selection Criteria
 Create a query by selecting a rule group to fetch product(s) for the current profile.

Override Product(s)
 By enabling, you agree to override the existing product(s).

Rule Group
 Product must match: Any Condition All Condition

[Title] [Contains] [Enter title]

Rule Group Help Guide
 Select Any Condition to fetch the product(s) fulfilling any of the conditions created.

Step 3:

Select category from the drop-down as shown below with sample:

Create Profile [Back] [Next]

STEP 1/2

Complete necessary details for creating the new profile.

Profile Name
 Profile name should be unique and it must not exceed 80 characters.
 [Enter profile name]

Select category
 Select the category which best defines your product(s).
 [Select]

Product(s) Selection Criteria
 Create a query by selecting a rule group to fetch product(s) for the current profile.

Rule Group Help Guide
 Select Any Condition to fetch the product(s) fulfilling any of the conditions created.

Search...
 Animals & Pet Supplies/Live Animals
 Animals & Pet Supplies/Pet Supplies
 Animals & Pet Supplies/Pet Supplies/Bird Supplies
 Animals & Pet Supplies/Pet Supplies/Bird Supplies/Bird Cage Accessories

[Title] [Contains] [Enter title]

Step 4:

For your convenience, we are **attaching a sample** of the same:

The screenshot shows the 'Create Profile' interface. At the top, there are tabs for 'Facebook' and 'Instagram' with a 'Setup Now' button. The main heading is 'Create Profile' with 'Back' and 'Next' buttons. The form is divided into several sections:

- Profile Name:** A text input field with the placeholder 'Enter profile name' and a note: 'Profile name should be unique and it must not exceed 80 characters.'
- Select category:** A dropdown menu currently showing 'Animals & Pet Supplies/Pet Supplies' and a note: 'Select the category which best defines your product(s)'. A green tag below the dropdown also shows 'Animals & Pet Supplies/Pet Supplies' with a close icon.
- Product(s) Selection Criteria:** A section with a note: 'Create a query by selecting a rule group to fetch product(s) for the current profile.' It contains a 'Rule Group Help Guide' box and a 'Rule Group' configuration box.
 - The 'Rule Group' box has a red border and contains:
 - An 'Override Product(s)' checkbox, which is checked and highlighted with a red box and an arrow. Below it is the text: 'By enabling, you agree to override the existing product(s)'.
 - 'Product must match:' with two radio buttons: 'Any Condition' (selected) and 'All Condition'.
 - A 'Title' dropdown menu.
 - A 'Contains' dropdown menu.
 - An 'Enter title' text input field.
 - 'Run Query' and 'Add More' buttons.

Step 5:

Further, you need to select **“Rule”** containing conditions to select a particular product type in the Profile you are selecting.

The Rule is based on **ANY** and **ALL** conditions that define whether you want all the selected conditions or any of them to be true.

How does “Override” work?

Suppose, earlier; you have created a profile XYZ of a particular **product** set. Some of the products of profile XYZ are **mutual (common/same)** in the Profile you are creating currently, let's say ABC.

Now, if you enable the override option, the mutual products will get removed from the XYZ profile and be linked to your **“new current”** profile ABC.

Consequently, whenever you upload the Profile ABC to the Meta Catalogue, those mutual products will automatically get updated with the details furnished under Profile ABC (not XYZ). Therefore, be cautious while executing the changes.

Once you are done with aligning the ruling group, click on **“Run Query”** to fetch the product details.

Step 6:

For your convenience, we have explained it through a sample below:

In the “**Rule Group**,” choose from Category, Product ID, Title, and Brand.

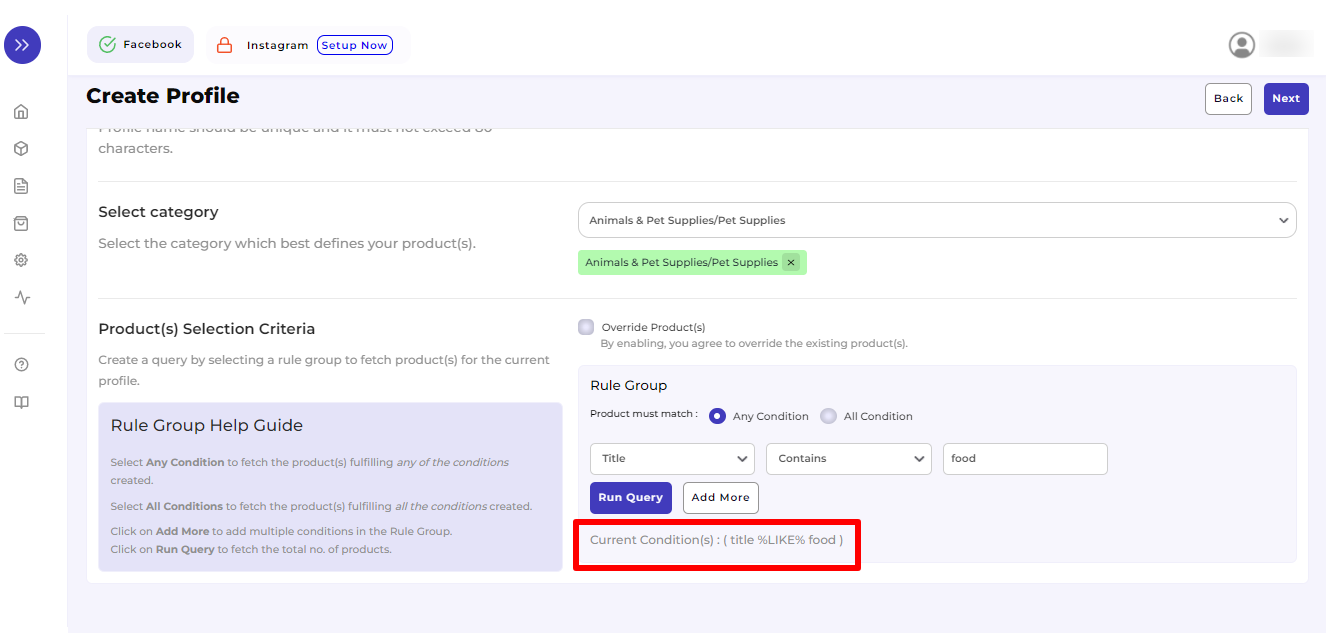

Further in the Rule Group itself, choose the Value from the following options:

- Equals
- Not Equal
- Contain
- Does Not Contain

Concerning it, enter the **Filter Value** and click on **“Run Query.”** Products details will be fetched as shown below. After it, you need to click on **“Next.”**

In case you want to **add more rule groups**, click on logics **“Any”** or **“ALL”** and then **“Run Query”** Let the app fetch the product details, and after that, click on **“Next.”**

A glimpse of the same has been displayed below for better understanding:

Create Profile Back Next

Profile Name
Enter profile name
Profile name should be unique and it must not exceed 80 characters.

Select category
Select the category which best defines your product(s).
Animals & Pet Supplies/Pet Supplies

Product(s) Selection Criteria
Create a query by selecting a rule group to fetch product(s) for the current profile.

Rule Group Help Guide
Select **Any Condition** to fetch the product(s) fulfilling *any of the conditions* created.
Select **All Conditions** to fetch the product(s) fulfilling *all the conditions* created.
Click on **Add More** to add multiple conditions in the Rule Group.
Click on **Run Query** to fetch the total no. of products.

Rule Group
Product must match: Any Condition All Condition

Title food

Run Query **Add More**

Current Condition(s) : (title %LIKE% food)

Repeat selecting “Rule group” again, as done previously. Refer to the image below for a better understanding:

Create Profile Back Next

Select category
Select the category which best defines your product(s).
Animals & Pet Supplies/Pet Supplies

Product(s) Selection Criteria
Create a query by selecting a rule group to fetch product(s) for the current profile.

Rule Group Help Guide
Select **Any Condition** to fetch the product(s) fulfilling *any of the conditions* created.
Select **All Conditions** to fetch the product(s) fulfilling *all the conditions* created.
Click on **Add More** to add multiple conditions in the Rule Group.
Click on **Run Query** to fetch the total no. of products.

Rule Group
Product must match: Any Condition All Condition

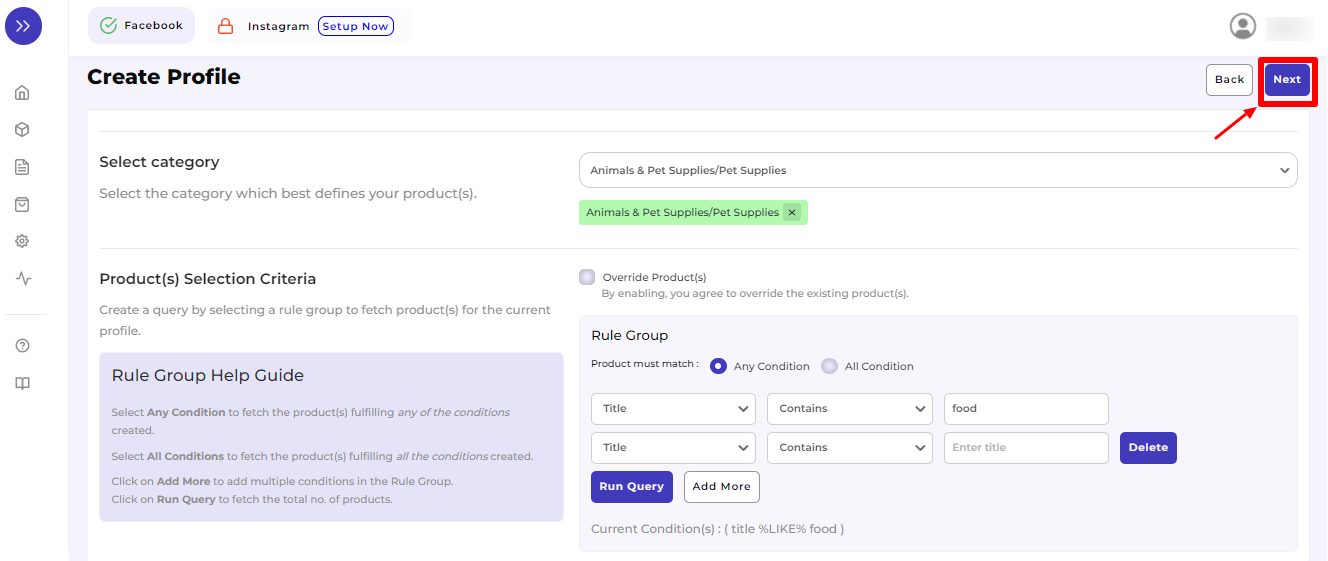

Title food

Title Enter title **Delete**

Run Query **Add More**

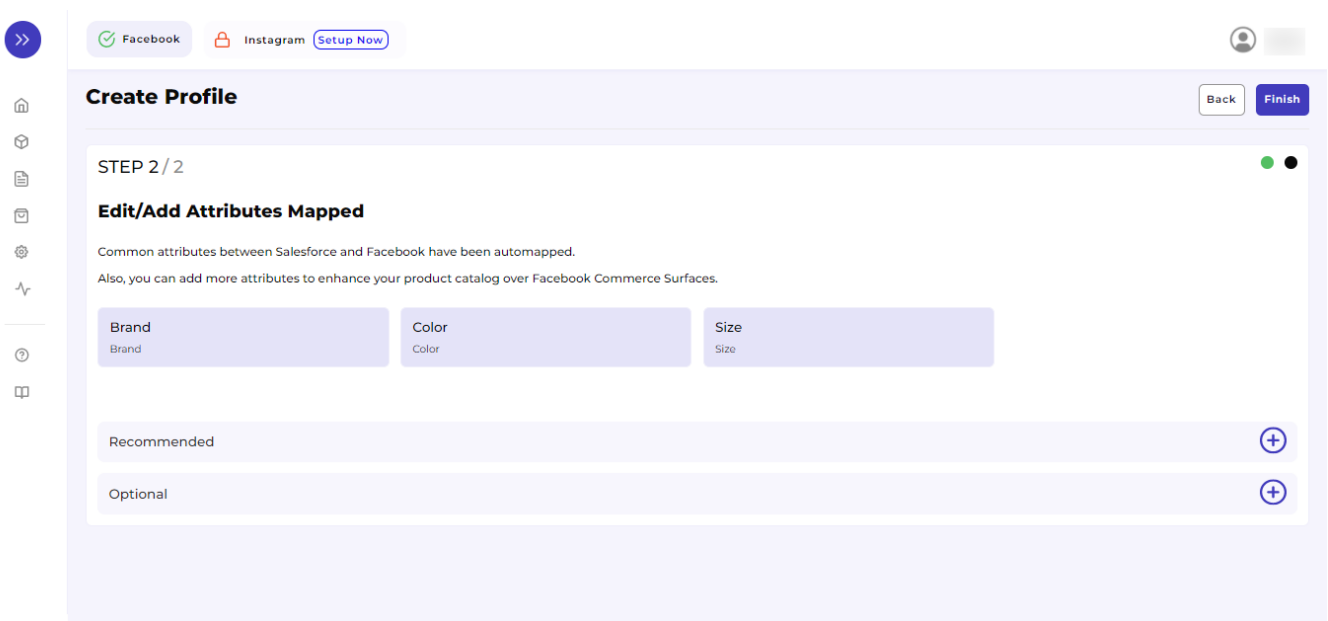

Current Condition(s) : (title %LIKE% food)

Once you complete the **basic profile creation part**, you will be redirected to the next step, “**Attribute Mapping**,” as guided in **Step 7**.

Step 7

It is mandatory to **map at least one attribute per Profile** in the attribute mapping. The same can be edited any time after profile creation.

You will get **“Recommended”** and **“Optional”** options to map attributes. You are free to choose only Recommended or both of them.

In Recommended, the attribute mapping is done based on Age Group, Brand, Color, Gender, Material, Size, and Pattern Style to the category that you have selected in the previous step.

To map attributes, you just need to click + icon as shown in the snapshot.

The screenshot shows the 'Create Profile' interface. At the top, there are tabs for 'Facebook' (checked) and 'Instagram' (with a 'Setup Now' button). Below the tabs, the title 'Create Profile' is displayed with 'Back' and 'Finish' buttons. The main content area is divided into three columns: 'Brand', 'Color', and 'Size'. Below these columns is a 'Recommended' section with a minus sign icon. The 'Age Group' dropdown menu is highlighted with a red border. Other dropdowns include 'Brand', 'Color', 'Gender', 'Material', 'Size', 'Pattern', and 'Style'. At the bottom, there is an 'Optional' section with a plus sign icon.

Now, click on the “Finish” button to complete the process of creating a Profile.

This screenshot shows the same 'Create Profile' interface as the previous one. The 'Age Group' dropdown is no longer highlighted. Instead, the 'Finish' button in the top right corner is highlighted with a red border, indicating the next step in the process.

After completing Attribute Mapping, you will be prompted with the message “Profile Created Successfully,” and further, you will be redirected to the “Profiling” Page having the details of the Profile (s) created (please refer below the screenshot).

Facebook Instagram Setup Now

Profiles Create Profile Guide

Enter Profile Name Showing: 5 < 1 of 2 >

test	(title %LIKE% a) (category == womens-dresses-floral-dresses)	0	Apparel & Accessories/Clothing	⋮

With this, we are done with the creation of a profile successfully!

5.2. How to Upload Product Profile-wise?

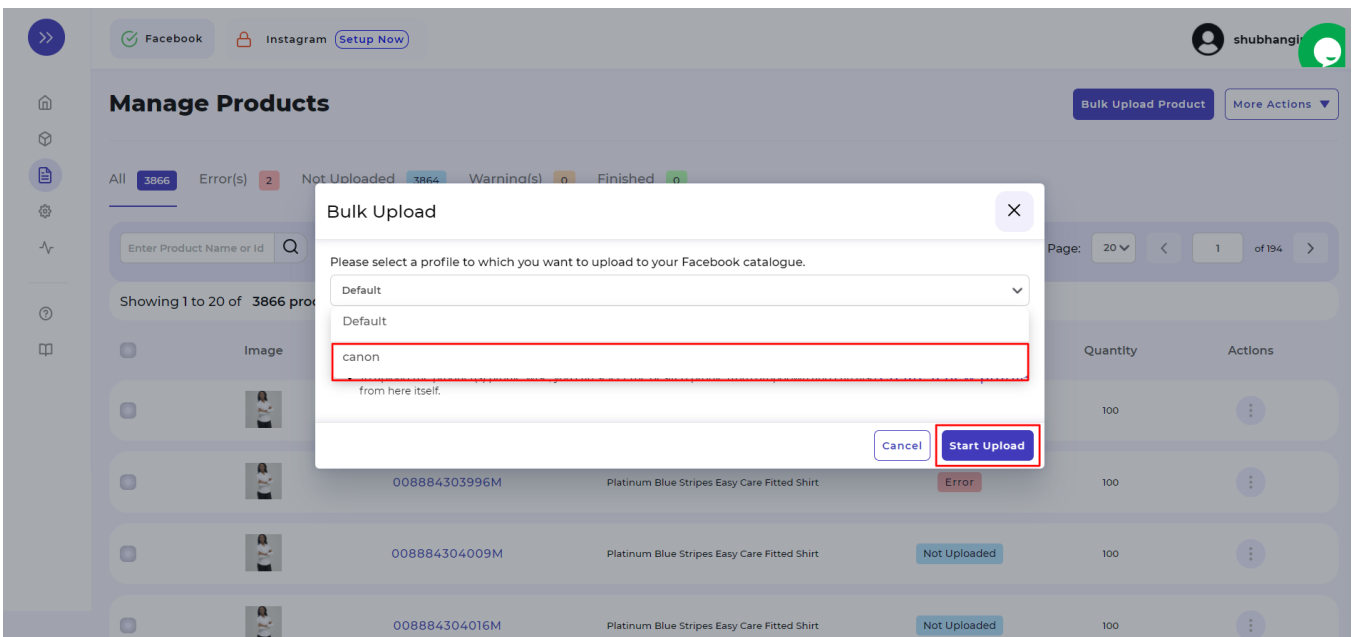

Step 1

Go to the “Products” Tab and click on the “Bulk Upload Product” button. A pop-up box will appear in front of you, click on the **drop-down menu** as shown below:

Step 2

Select the profile you want to upload (as displayed below) and thereafter click on the **“Start Upload”** button.

With this, all the products (or product-set) under the profile selected will start uploading that you can view either in the **Ongoing Activities** section from Dashboard or directly from the **Activities Tab**.

6. Products Tab

This tab gives a comprehensive real-time status of the operations performed on the products. Let's understand this product management block-wise as displayed below:

The screenshot displays the 'Products' dashboard. At the top, there are tabs for 'Facebook' and 'Instagram' with a 'Setup Now' button. The main header shows 'Products' and a 'Bulk Upload Product' button. Below this, a summary bar indicates: All 3706, Error(s) 0, Not Uploaded 2570, Warning(s) 0, and Finished 1136. A search bar with 'Additional Fields' and 'More Filters' is present. A table lists products with columns for Image, Product ID, Product Name, Status, Quantity, and Actions. The table shows four rows of 'Platinum Blue Stripes Easy Care Fitted Shirt' with various statuses like 'Not Uploaded' and 'Edited'. A 'More Actions' dropdown menu is open, showing options for 'Sync with Facebook' and 'Sync with Salesforce'.

Product Status

It shows the following statuses:

- **All:** Total no. of products Uploaded
- **Error(s):** Total no. of products with errors that need to be corrected.
- **Not Uploaded:** Total no. of products imported from the Salesforce Commerce Store to the app but not uploaded in the product catalog.
- **Warning(s):** Total no. of products with the warning that needs to be corrected.
- **Finished:** Total no. of products uploaded and are available in the product catalog.

Bulk Upload Product and More Actions

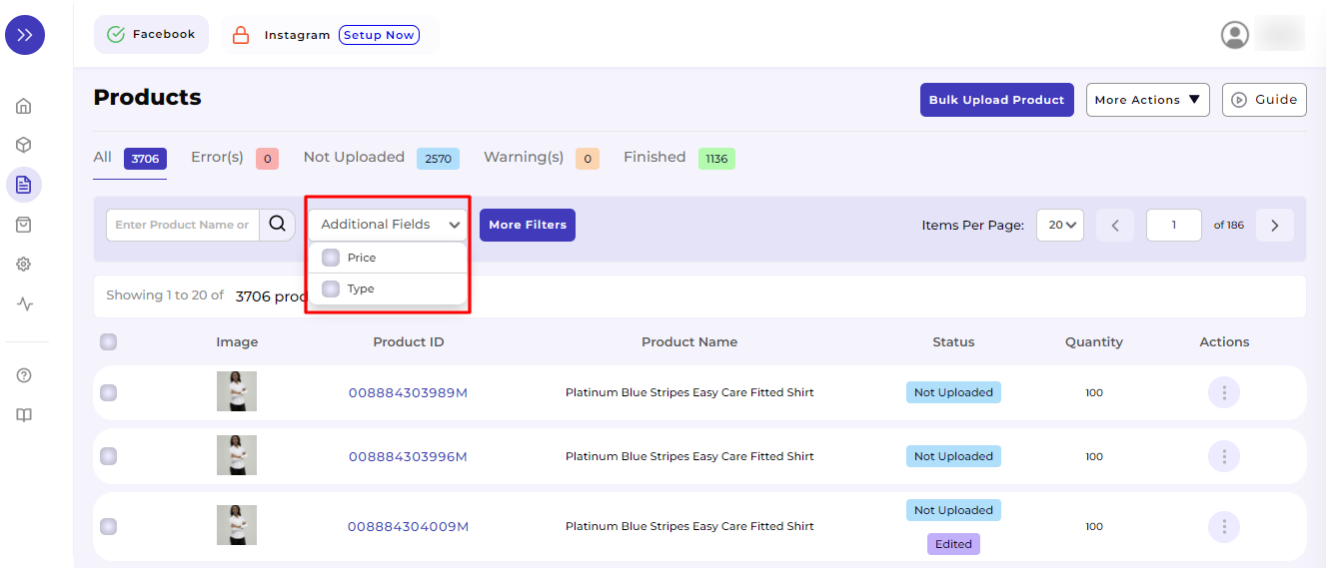

As shown in Section 5 – Dashboard, you have two options to bulk upload the products, **either with the default selection or profile-wise.**

In one click **you can sync product importing** with Salesforce or Facebook and Instagram Shops.

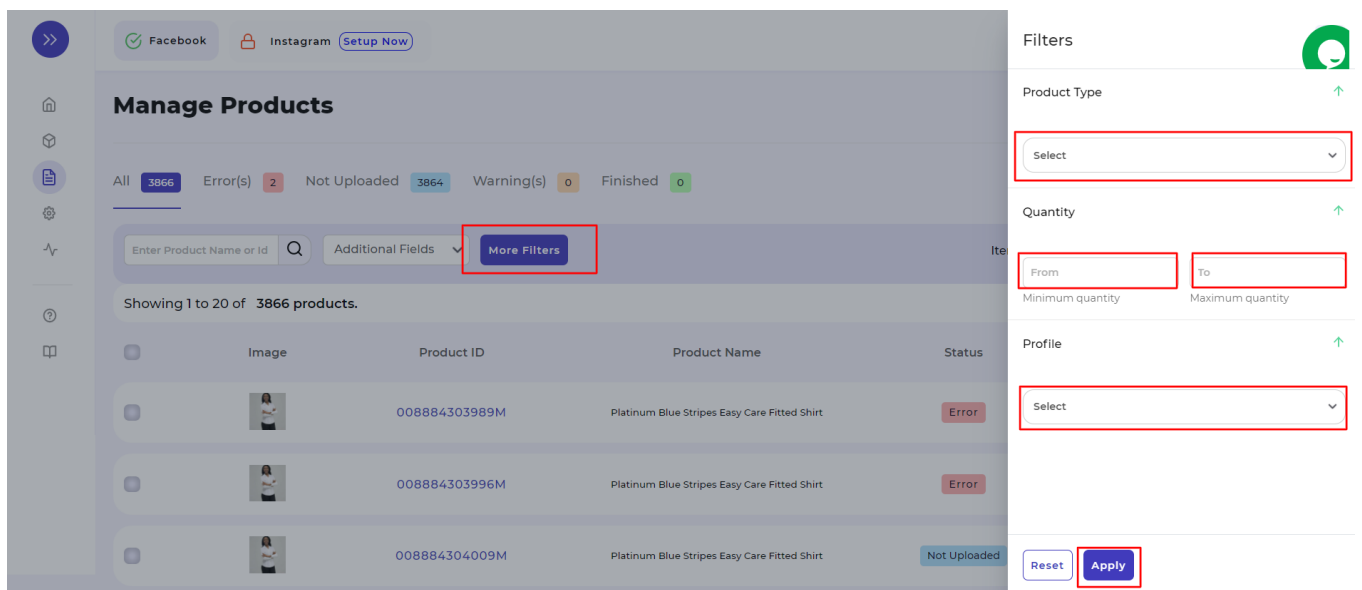

- **Sync with Salesforce:** This operation will import your products from Salesforce to the CedCommerce app.
- **Sync with Facebook:** This operation will sync the status by matching the Product IDs available on the CedCommerce App with that of the Meta Catalogue. For all the products of which the match will be found to be true, the status will be changed to **Finished** in the CedCommerce App.

More Filters

Product Type, Quantity, Source ID, and Profile are the extra filters apart from the provided **Additional Fields** (-price and type) for a more refined product search.

Select the option “**More Filters**” —> Choose the detail from a dropdown or enter the details and then click on “**Apply**”.

7. Orders Tab

With **Orders Tab**, you can smoothly manage orders received from Meta Commerce Surfaces to your Salesforce Store. Meta Commerce Surfaces include Facebook Marketplace, Facebook Shops, and Instagram Shopping.

The end-to-end process of order syncing is real-time automated within the app itself.

Let's understand what operations you can perform under order management:

- [How to sync orders from Meta Commerce Platforms to Salesforce Store?](#)
- [What are the different order statuses?](#)
- [How to search for orders?](#)
- [What are the order fields?](#)
- [What are the additional fields?](#)
- [How to fetch orders?](#)
- [What is displayed under Order Details?](#)
- [How to map skipped orders?](#)
- [How to manage pending orders?](#)

7.1. How to sync orders from Meta Commerce Platforms to Salesforce Store?

- Click on the “Orders” Tab as displayed below:

The screenshot displays the Salesforce interface for managing orders. The 'Orders' tab is highlighted in the left-hand navigation menu. The main content area shows a search bar for Facebook Order IDs, a 'Fetch Order' button, and a table of orders. The table includes columns for Facebook Order ID, Managed By, Date, Customer, Status, and Total. The status column shows 'PENDING' and 'SKIPPED' orders. A 'Sync Facebook orders to Salesforce' button is visible in the top right corner of the main content area.

Facebook Order ID	Managed By	Date	Customer	Status	Total
276794237853382	Salesforce(00000812)			PENDING	
1058893808015115	Order not created on salesforce			SKIPPED	
1106706753421971	Order not created on salesforce			SKIPPED	
483183880068276	Order not created on salesforce			SKIPPED	

- Just under your profile on the right-hand side, you will see a button “**Sync Meta orders to Salesforce**”. For your convenience, we have highlighted it in the screenshot attached below:

The screenshot shows the 'Orders' management interface. At the top, there are tabs for 'Facebook' (active) and 'Instagram' with a 'Setup Now' link. A red box highlights a button labeled 'Sync Facebook orders to Salesforce'. Below this, a summary bar shows: All 7, Skipped 5, Error(s) 0, Warning(s) 0, Completed 0, Pending 2. A search bar contains 'Enter FB Order ID or Em.' and a 'Fetch Order' button. A table lists orders with columns: Facebook Order ID, Managed By, Date, Customer, Status, and Total. The table contains four rows with statuses: PENDING, SKIPPED, SKIPPED, and SKIPPED. A 'Meta Here' watermark is visible in the bottom right corner.

- Click on the button “Sync Meta orders to Salesforce” and wait till it completes the syncing process.

This screenshot shows the 'Orders' page after the sync process. A red box highlights a blue notification bubble containing three dots, indicating a confirmation message. The interface elements are identical to the previous screenshot, including the 'Orders' title, summary bar (All 7, Skipped 5, Error(s) 0, Warning(s) 0, Completed 0, Pending 2), search bar, and table. The table now shows five rows, with the last row having a 'PENDING' status. A 'Meta Here' watermark is present in the bottom right corner.

- Once the orders are synced, you will get a confirmation message as “Order Sync Completed”.

Facebook Order ID	Managed By	Date	Customer	Status	Total
642298190412617	Salesforce(00001904)	23rd Feb, 2022	Sonali Saxena	PENDING	\$22.74
271429438423252	Salesforce(00001905)	15th Feb, 2022	Pawan Singh	PENDING	\$545.48
476526084087714	Salesforce(00001906)	15th Feb, 2022	Sonali Saxena	PENDING	\$54.14
458799922449194	Order not created on salesforce	15th Feb, 2022	Sonali Saxena	SKIPPED	\$273.17

Below we have listed all the statuses alongside their definition:

- **All:** Total no. of orders received.
- **Pending:** Total no. of orders pending to be fulfilled.
- **Skipped:** Total no. of orders skipped due to Product ID mismatch that needs to be mapped.
- **Error(s):** Total no. of orders with error(s) that need to be corrected.
- **Warning(s):** Total no. of orders with the warning that needs to be corrected.
- **Completed:** Total no. of orders fulfilled.

7.3. How to search for orders?

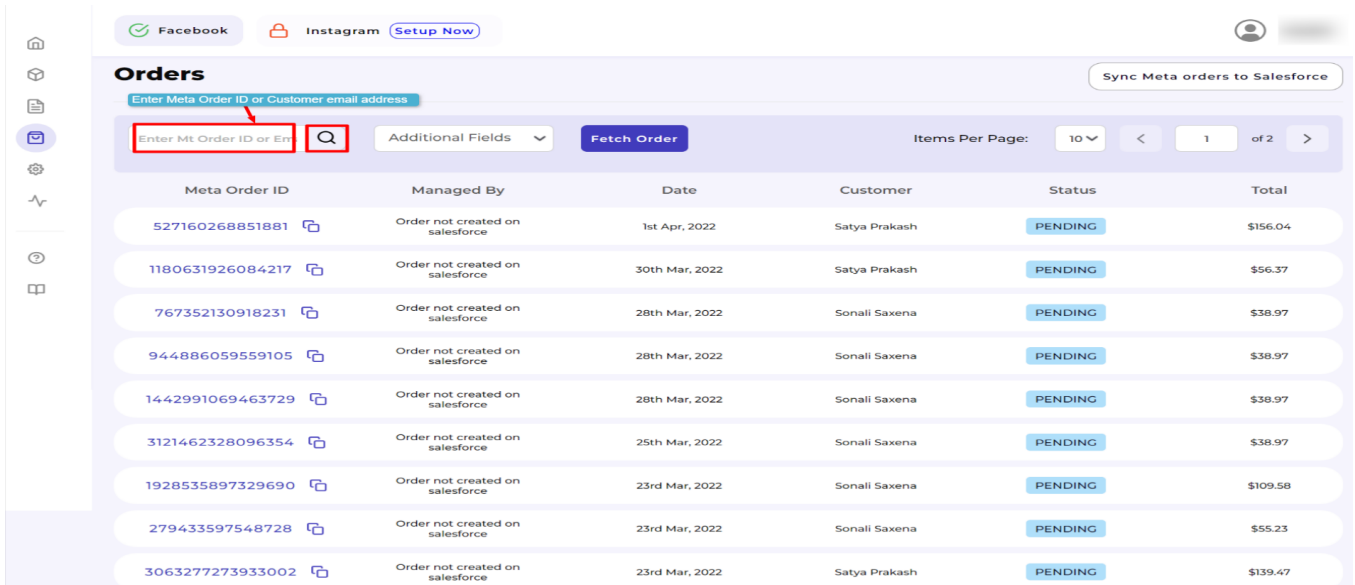

For this you need to enter the **Meta Order ID** or **Customer Email address** in the search box as displayed below:

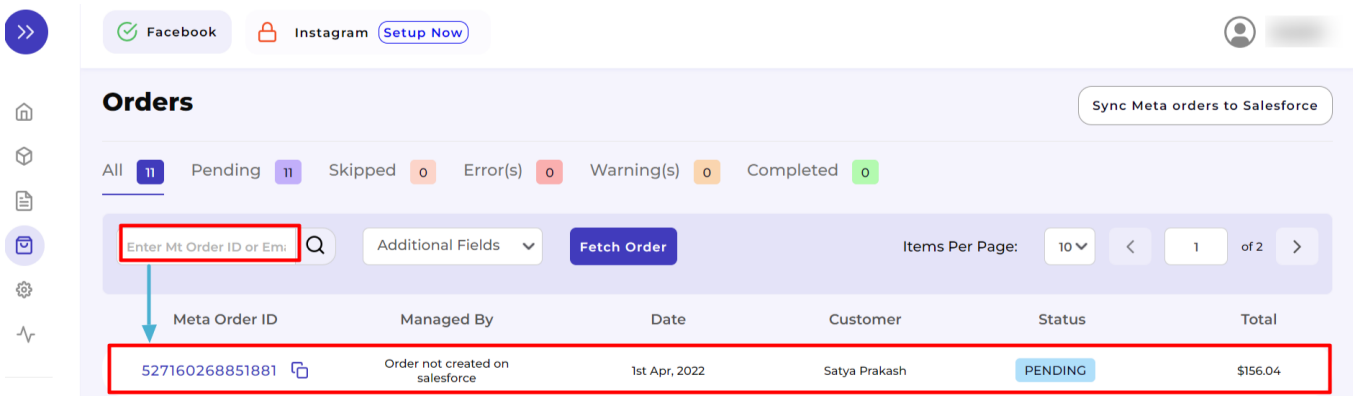

The screenshot displays the 'Orders' management interface. At the top, there are tabs for 'Facebook' and 'Instagram' with a 'Setup Now' button. A search bar is present with the placeholder text 'Enter Mt Order ID or Em:' and a 'Fetch Order' button. The table below lists several pending orders.

Meta Order ID	Managed By	Date	Customer	Status	Total
527160268851881	Order not created on salesforce	1st Apr, 2022	Satya Prakash	PENDING	\$156.04
1180631926084217	Order not created on salesforce	30th Mar, 2022	Satya Prakash	PENDING	\$56.37
767352130918231	Order not created on salesforce	28th Mar, 2022	Sonali Saxena	PENDING	\$38.97
944886059559105	Order not created on salesforce	28th Mar, 2022	Sonali Saxena	PENDING	\$38.97
1442991069463729	Order not created on salesforce	28th Mar, 2022	Sonali Saxena	PENDING	\$38.97
3121462328096354	Order not created on salesforce	25th Mar, 2022	Sonali Saxena	PENDING	\$38.97
1928535897329690	Order not created on salesforce	23rd Mar, 2022	Sonali Saxena	PENDING	\$109.58
279433597548728	Order not created on salesforce	23rd Mar, 2022	Sonali Saxena	PENDING	\$55.23
306327273933002	Order not created on salesforce	23rd Mar, 2022	Satya Prakash	PENDING	\$139.47
965885860793329	Order not created on salesforce	23rd Mar, 2022	Satya Prakash	PENDING	\$183.67

For your better understanding, we have illustrated the same through *an example*:

Once the app will complete its search operation, would reflect the result as displayed in the below screenshot.

7.4. What are the order fields?

The order fields are the *report heads* that give you a summary of the orders received from Meta Commerce Surfaces so far.

The screenshot shows the 'Orders' section of the app. At the top, there are tabs for 'Facebook' and 'Instagram' with a 'Setup Now' button. Below the tabs, there's a 'Sync Meta orders to Salesforce' button. The main area displays a summary of order counts: All (11), Pending (11), Skipped (0), Error(s) (0), Warning(s) (0), and Completed (0). A search bar is present with the text 'Enter Mt Order ID or Em:' and a 'Fetch Order' button. To the right of the search bar, there's a dropdown for 'Additional Fields' and a button labeled 'With all additional fields'. Below the search bar, a table lists orders with the following columns: Meta Order ID, Managed By, Date, Customer, Status, and Total. The table contains three rows of pending orders.

Meta Order ID	Managed By	Date	Customer	Status	Total
527160268851881	Order not created on salesforce	1st Apr, 2022	Satya Prakash	PENDING	\$156.04
1180631926084217	Order not created on salesforce	30th Mar, 2022	Satya Prakash	PENDING	\$56.37
767352130918231	Order not created on salesforce	28th Mar, 2022	Sonali Saxena	PENDING	\$38.97

- **Meta Order ID:** It is the unique order ID for the orders placed through Meta Commerce Platforms.
- **Managed By:** It indicates where the particular order is managed. If the order is created on Salesforce Store, it displays as "Salesforce(ID)", else it reflects as "Order not created on Salesforce", and thereafter you have to accordingly perform the operation as per the *Order status*.
- **Date:** It shows the date of order created.
- **Customer:** It shows the customer's name who has placed the order.
- **Status:** It shows the real-time status of the order received.
- **Total:** It shows the total amount of the order placed.

7.5. What are the additional fields?

For a more refined order search, we have provided **Email and Items** as the **Additional Fields** in the app.

The screenshot shows the 'Orders' section of the app with the 'Additional Fields' dropdown set to 'With all additional fields'. The table now includes 'Email' and 'Items' columns. The table contains two rows of pending orders.

Meta Order ID	Managed By	Date	Customer	Email	Status	Items	Total
527160268851881	Order not created on salesforce	1st Apr, 2022	Satya Prakash	p.satyaparakash.viet.2009@gmail.com	PENDING	2	\$156.04
1180631926084217	Order not created on salesforce	30th Mar, 2022	Satya Prakash	p.satyaparakash.viet.2009@gmail.com	PENDING	1	\$56.37

These **Additional Fields** are available adjacent to the search box as shown below:

The screenshot shows the 'Orders' section of a dashboard. At the top, there are tabs for 'Facebook' and 'Instagram' with a 'Setup Now' button. Below the tabs, there's a 'Sync Meta orders to Salesforce' button. The main area displays a table of orders with the following columns: Meta Order ID, Managed By, Date, Customer, Email, Status, Items, and Total. A search bar and a dropdown menu labeled 'Additional Fields' are visible above the table. The dropdown menu is highlighted with a red box.

Meta Order ID	Managed By	Date	Customer	Email	Status	Items	Total
527160268851881	Order not created on salesforce	1st Apr, 2022	Satya Prakash	p.satyaprakash.viet.2009@gmail.com	PENDING	2	\$156.04
1180631926084217	Order not created on salesforce	30th Mar, 2022	Satya Prakash	p.satyaprakash.viet.2009@gmail.com	PENDING	1	\$56.37

Click on the *dropdown* to add these *fields* to the report displayed. You can add both of them or any one of these fields as per your preference.

This screenshot shows the 'Additional Fields' dropdown menu open, with 'Items' and 'Email' selected. The 'Items' and 'Email' columns in the table below are highlighted with a red box.

Meta Order ID	Managed By	Date	Customer	Email	Status	Items	Total
527160268851881	Order not created on salesforce	1st Apr, 2022	Satya Prakash	p.satyaprakash.viet.2009@gmail.com	PENDING	2	\$156.04
1180631926084217	Order not created on salesforce	30th Mar, 2022	Satya Prakash	p.satyaprakash.viet.2009@gmail.com	PENDING	1	\$56.37

We have illustrated the same through a *sample* as displayed in the consecutive screenshots.

- If you simply add “Items” to the report.

This screenshot shows the 'Additional Fields' dropdown menu open, with 'Items' selected. The 'Items' column in the table below is highlighted with a red box.

Meta Order ID	Managed By	Date	Customer	Status	Items	Total
527160268851881	Order not created on salesforce	1st Apr, 2022	Satya Prakash	PENDING	2	\$156.04
1180631926084217	Order not created on salesforce	30th Mar, 2022	Satya Prakash	PENDING	1	\$56.37
767352130918231	Order not created on salesforce	28th Mar, 2022	Sonali Saxena	PENDING	1	\$38.97

- If you only add “Email” to the report.

The screenshot shows the 'Orders' section of the app. At the top, there are buttons for 'Facebook' and 'Instagram Setup Now'. Below that, the 'Orders' title is followed by a search bar and a 'Fetch Order' button. A dropdown menu for 'Additional Fields' is open, with 'Email' selected. The table below lists three orders:

Meta Order ID	Manager	Date	Customer	Email	Status	Total
527160268851881	Order not created on salesforce	1st Apr, 2022	Satya Prakash	p.satyaprakash.viet.2009@gmail.com	PENDING	\$156.04
1180631926084217	Order not created on salesforce	30th Mar, 2022	Satya Prakash	p.satyaprakash.viet.2009@gmail.com	PENDING	\$56.37
767352130918231	Order not created on salesforce	28th Mar, 2022	Sonali Saxena	shubhanganigam@cedcommerce.com	PENDING	\$38.97

- All the Additional Fields for a day-end quick summary.

The screenshot shows the 'Orders' section of the app. At the top, there are buttons for 'Facebook' and 'Instagram Setup Now'. Below that, the 'Orders' title is followed by a search bar and a 'Fetch Order' button. A dropdown menu for 'Additional Fields' is open, with 'Items' and 'Email' selected. The table below lists two orders:

Meta Order ID	Manager	Date	Customer	Email	Status	Items	Total
527160268851881	Order not created on salesforce	1st Apr, 2022	Satya Prakash	p.satyaprakash.viet.2009@gmail.com	PENDING	2	\$156.04
1180631926084217	Order not created on salesforce	30th Mar, 2022	Satya Prakash	p.satyaprakash.viet.2009@gmail.com	PENDING	1	\$56.37

7.6. How to fetch orders?

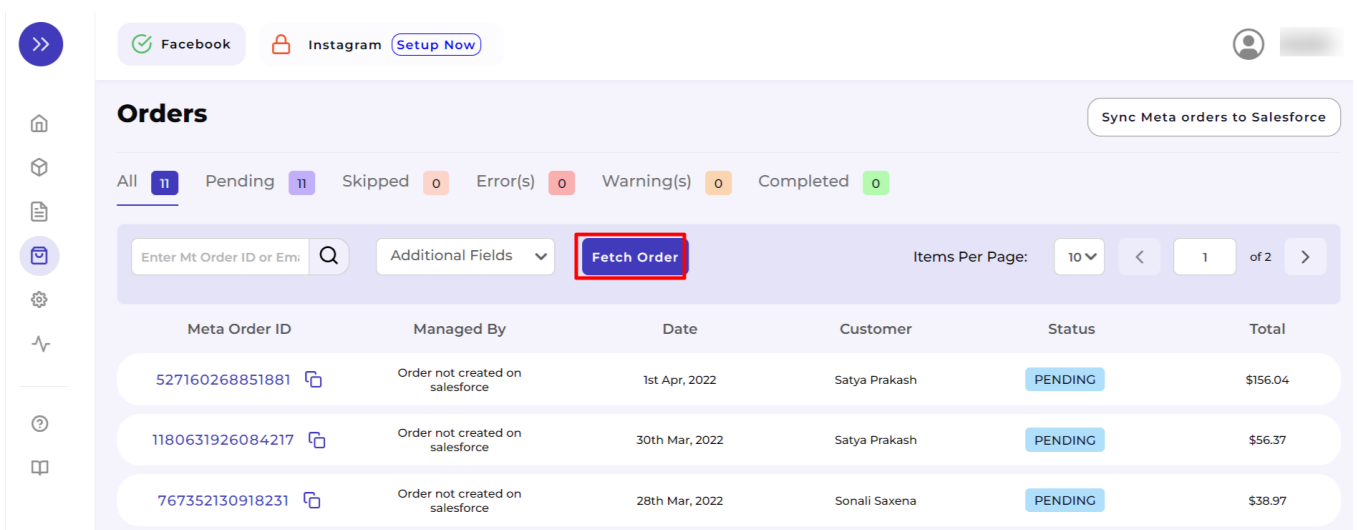

You have to fetch an order when that particular order does not get synced in the app from Meta Commerce Platforms.

It usually occurs due to server/network issues that sometimes delay syncing between the app and Meta Commerce Platforms.

To cope with the same, we have provided this feature where you just need to copy your Meta Order ID to fetch the order and create that order on your Salesforce Store.

Below we have explained the same step by step.

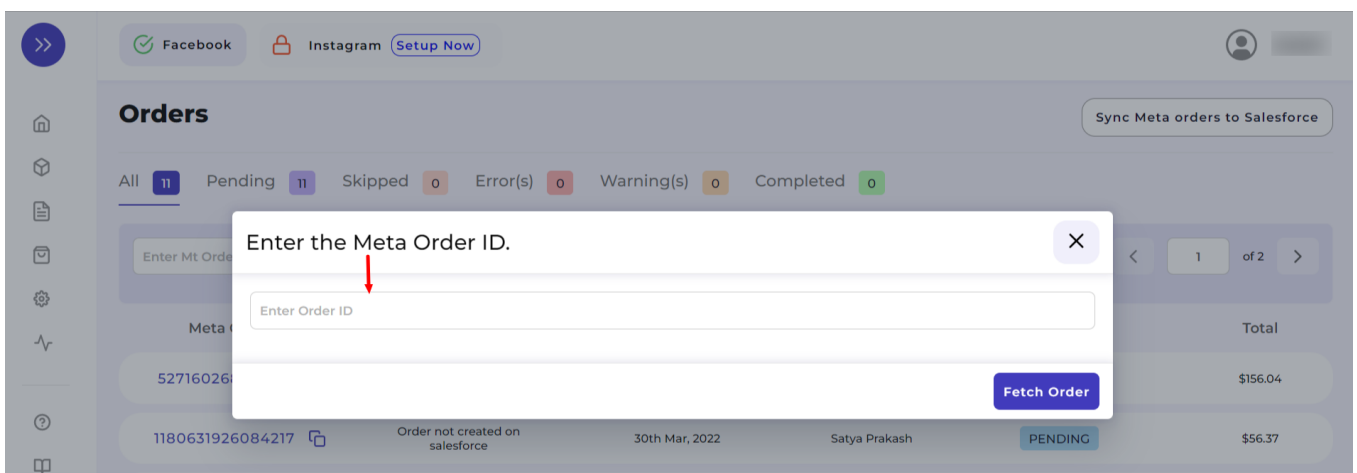

- Click on the “Fetch Order” button as shown below:

The screenshot shows the 'Orders' section of the Facebook & Instagram Shopping interface. At the top, there are tabs for 'Facebook' and 'Instagram' with a 'Setup Now' button. Below this, the 'Orders' title is displayed along with a 'Sync Meta orders to Salesforce' button. A status bar shows counts for 'All' (11), 'Pending' (11), 'Skipped' (0), 'Error(s)' (0), 'Warning(s)' (0), and 'Completed' (0). A search bar contains the text 'Enter Mt Order ID or Em:'. To the right of the search bar is a dropdown menu labeled 'Additional Fields' and a blue button labeled 'Fetch Order' which is highlighted with a red box. Further right, there is a pagination control showing 'Items Per Page: 10' and '1 of 2'. Below the search bar is a table with the following columns: 'Meta Order ID', 'Managed By', 'Date', 'Customer', 'Status', and 'Total'. The table contains three rows of data:

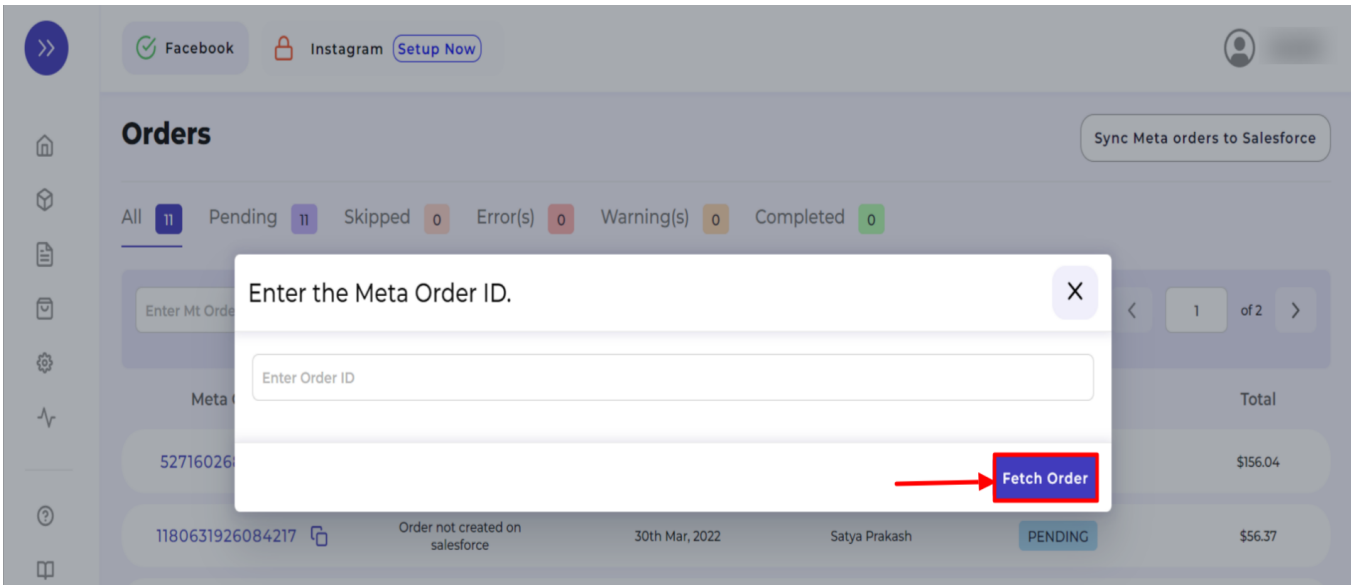

Meta Order ID	Managed By	Date	Customer	Status	Total
527160268851881	Order not created on salesforce	1st Apr, 2022	Satya Prakash	PENDING	\$156.04
1180631926084217	Order not created on salesforce	30th Mar, 2022	Satya Prakash	PENDING	\$56.37
767352130918231	Order not created on salesforce	28th Mar, 2022	Sonali Saxena	PENDING	\$38.97

- Enter the Meta Order ID over here.

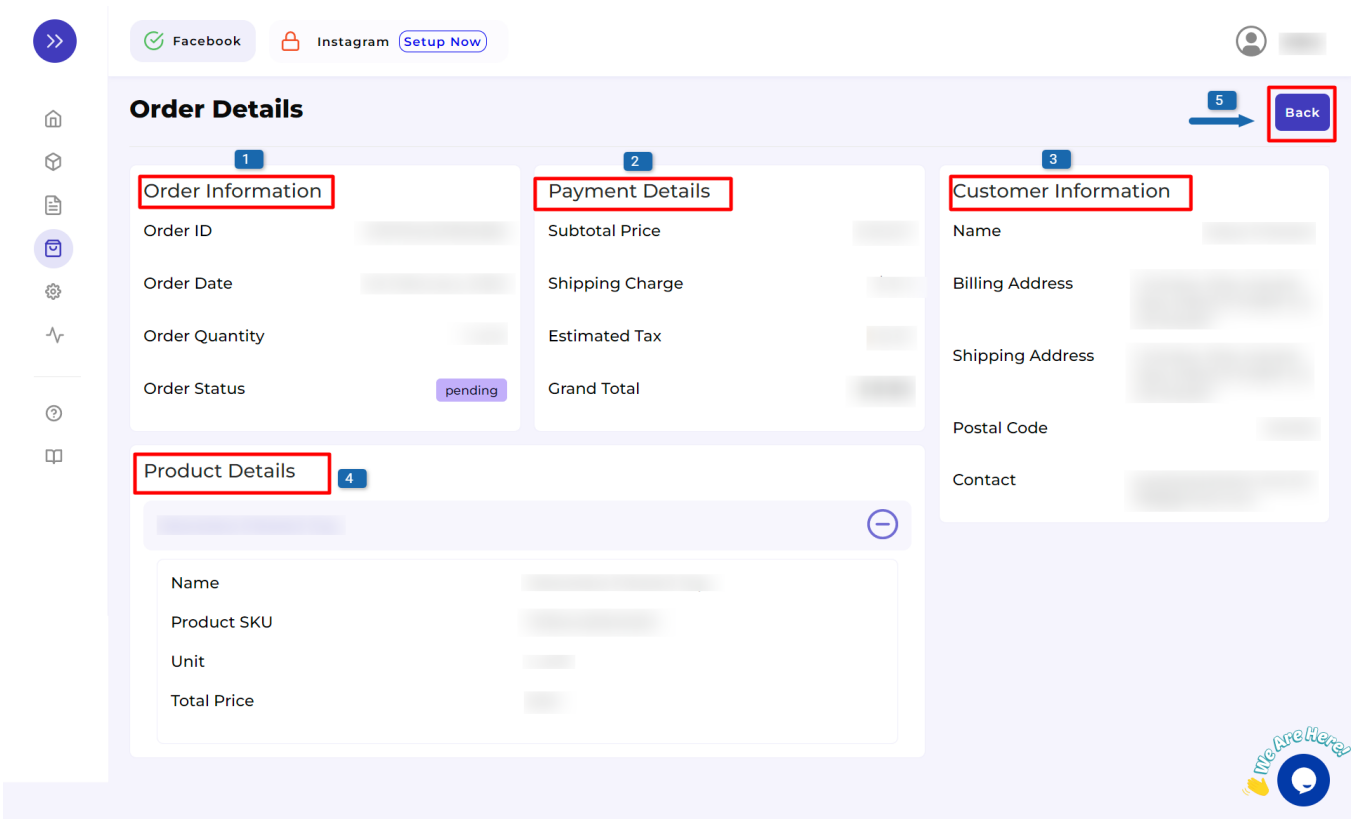

The screenshot shows the same 'Orders' section as above, but with a modal dialog box open. The dialog box has the title 'Enter the Meta Order ID.' and a close button (X). Inside the dialog, there is a text input field with the placeholder text 'Enter Order ID'. A red arrow points to the input field. At the bottom right of the dialog, there is a blue button labeled 'Fetch Order'.

- Submit the Order ID by clicking on the button “Fetch Order”.

7.7. What is displayed under Order Details?

The *Order Details* tab furnishes the following:

- **Order Information** – The unique Order ID, the date of the order created, the total quantity, and the current status of the order.
- **Payment Details** – The price of the order placed, the shipping charges applicable, the estimated tax as per the product ordered, and hence, the total price value paid by the customer.
- **Customer Information** – Customer Name, the billing address, the shipping address along with the postal code, and email address as contact information.
- **Product Details** – The name of the product ordered, inventory detail as SKU, total units ordered, and the total price.

7.8. How to map skipped orders?

The *skipped orders* are those that need to be managed and fulfilled from the merchant end. Such type of condition arises when the order placed for the product(s) is:

- unavailable on the Salesforce Store,
- deleted from Salesforce Store but is available on the Meta Catalogue, or
- directly created on the Meta Catalogue & is not synced to Salesforce Store.

For these skipped orders, you need to *map it with the similar kind of new product available in your Salesforce Store*.

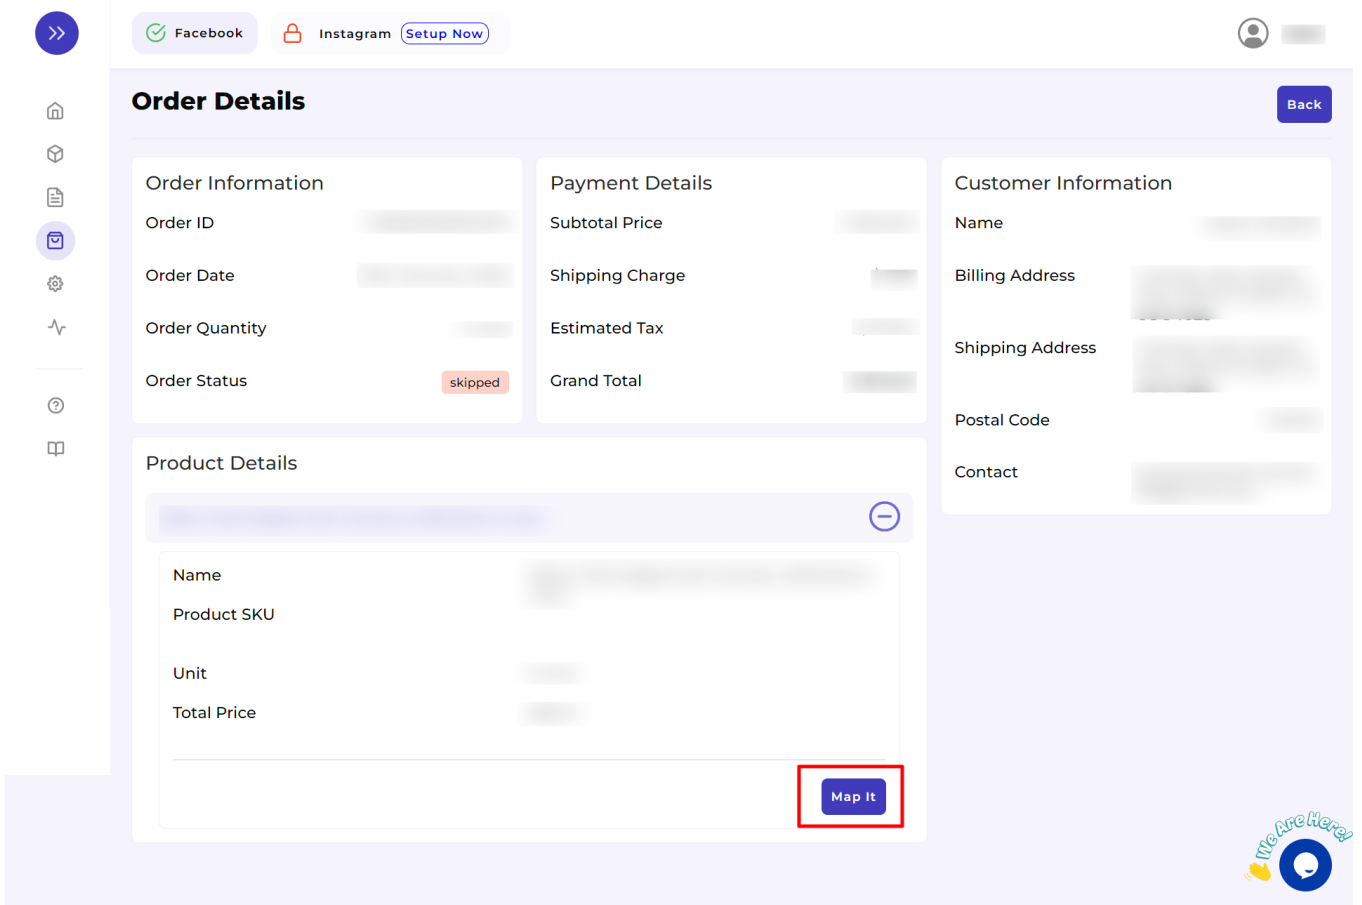

Let's show you how to practically do it.

- Please refer to the screenshot below displaying an **order which is not created on Salesforce Store** and thus, flagged as **Skipped**.

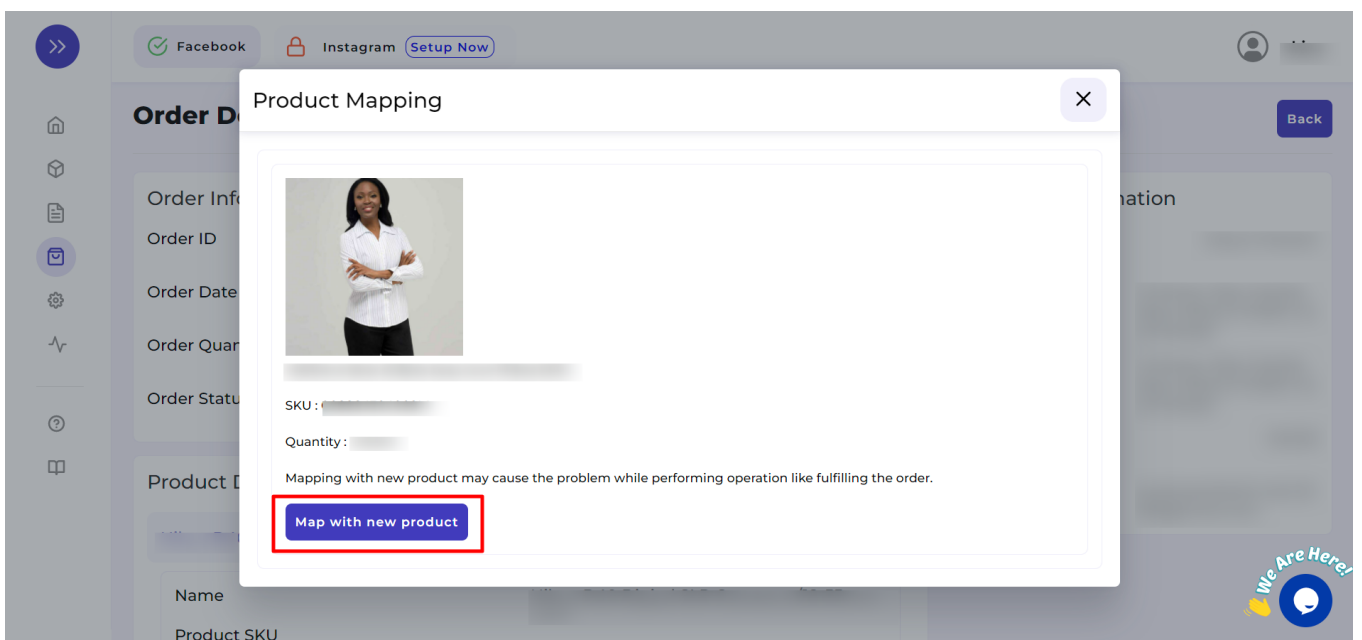

The screenshot shows the 'Orders' section of the Facebook/Instagram Shopping interface. At the top, there are links for 'Facebook' and 'Instagram' with a 'Setup Now' button. Below this is a search bar with the placeholder 'Enter Mt. Order ID or Em:' and a 'Fetch Order' button. A table lists several orders with columns for 'Meta Order ID', 'Managed By', 'Date', 'Customer', 'Status', and 'Total'. The first row shows a 'Skipped' status, with a red arrow pointing to the 'Skipped' label and another red arrow pointing to the 'Managed By' field which contains the text 'Order not created on salesforce'. The other three rows show 'PENDING' status.

Meta Order ID	Managed By	Date	Customer	Status	Total
527160268851881	Order not created on salesforce	1st Apr, 2022		Skipped	
1180631926084217	Order not created on salesforce			PENDING	
767352130918231	Order not created on salesforce			PENDING	
944886059559105	Order not created on salesforce			PENDING	

- Now, you need to **click on that particular Order ID** and after that, you will be **redirected to its Order Details Page**.
- Scroll down below to **Product Details** and Click on the button **“Map it”**.

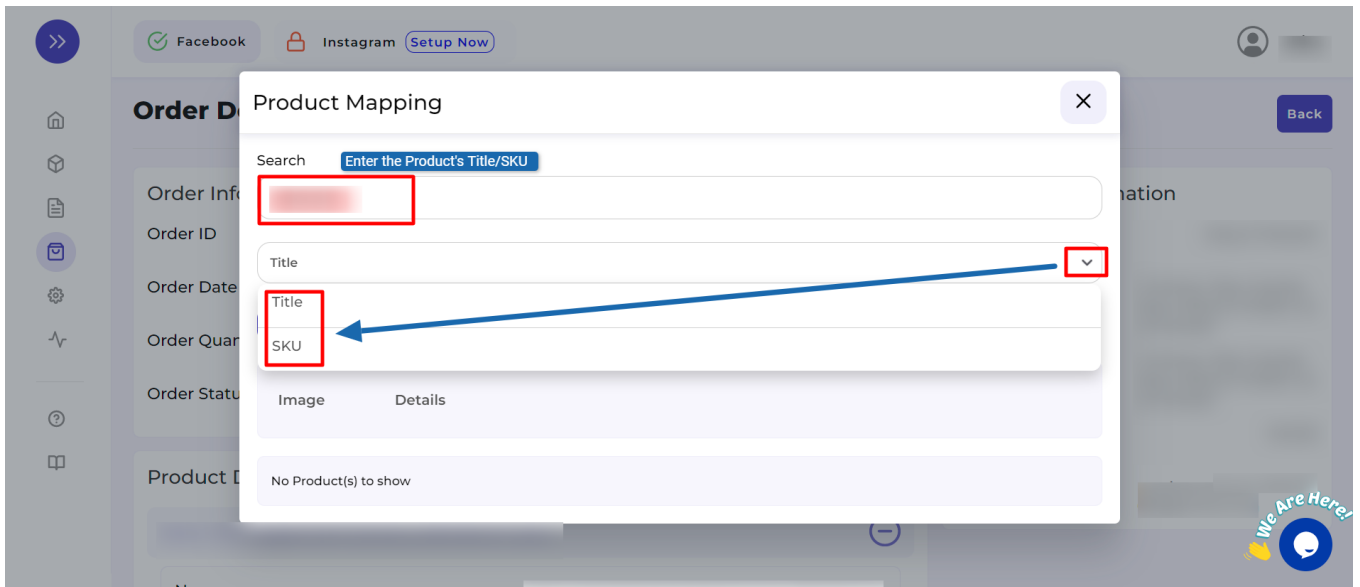

- A window of **Product Mapping** will appear in front of you. Here, you need to click on the button “**Map with new product**”.

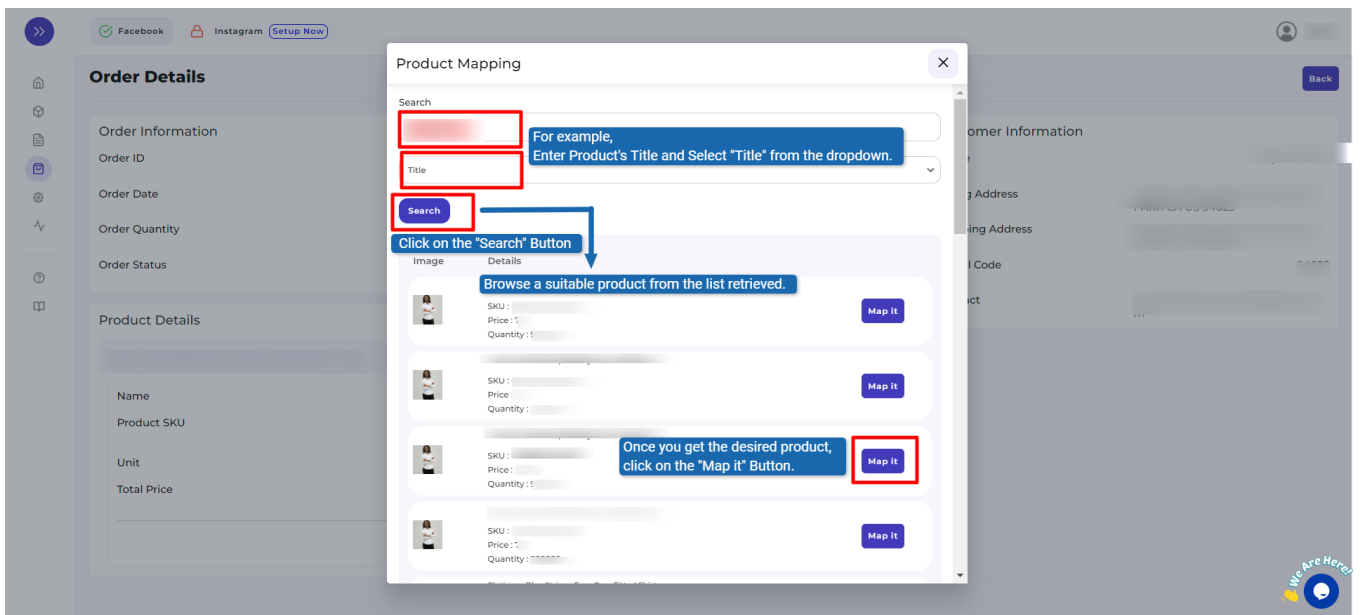

- Next, you have to **search** for a similar kind of product through its **Title or SKU**. If you are searching for a product with the help of its Title, select “Title” from the dropdown menu. Similarly, if you are searching

through SKU, select "SKU" in the dropdown.

- For your convenience, we have explained it through a sample as shown below:

7.9. How to manage pending orders?

The *pending orders* are those that need to be fulfilled from your end i.e. from the merchant side. Also, the product ordered is available both on Salesforce Store as well as the app.

The screenshot shows the 'Orders' section of the app. At the top, there are buttons for 'Facebook' and 'Instagram Setup Now'. Below that, the 'Orders' title is displayed along with a 'Sync Meta orders to Salesforce' button. A search bar contains 'Enter Mt Order ID or Em:' and a 'Fetch Order' button. To the right, 'Items Per Page' is set to 10, and the current page is 1 of 2. The table below lists three orders:

Meta Order ID	Managed By	Date	Customer	Status	Total
527160268851881	Order not created on salesforce	1st Apr, 2022	Satya Prakash	PENDING	\$156.04
1180631926084217	Order not created on salesforce	30th Mar, 2022	Satya Prakash	PENDING	\$56.37
767352130918231	Order not created on salesforce	28th Mar, 2022	Sonalí Saxena	PENDING	\$38.97

For such types of orders, the app automatically acknowledges the order from Meta Commerce Platforms and creates it on Salesforce Store.

8. Configurations Tab

Configuration Tab furnishes the below mentioned merchant details:

- Username and Email ID that you used to register with CedCommerce API
- Facebook and Instagram Shop Set-Up
- Category and Attribute Mapped
- Facebook Settings
- Salesforce Settings
- Reset Meta Business Manager Account Connected and Facebook Page

For a seamless and clear user experience, the tab is divided into four divisions:

- [General Setting](#)
- [Facebook Settings](#)
- [Salesforce Settings](#)
- [Account Connection](#)

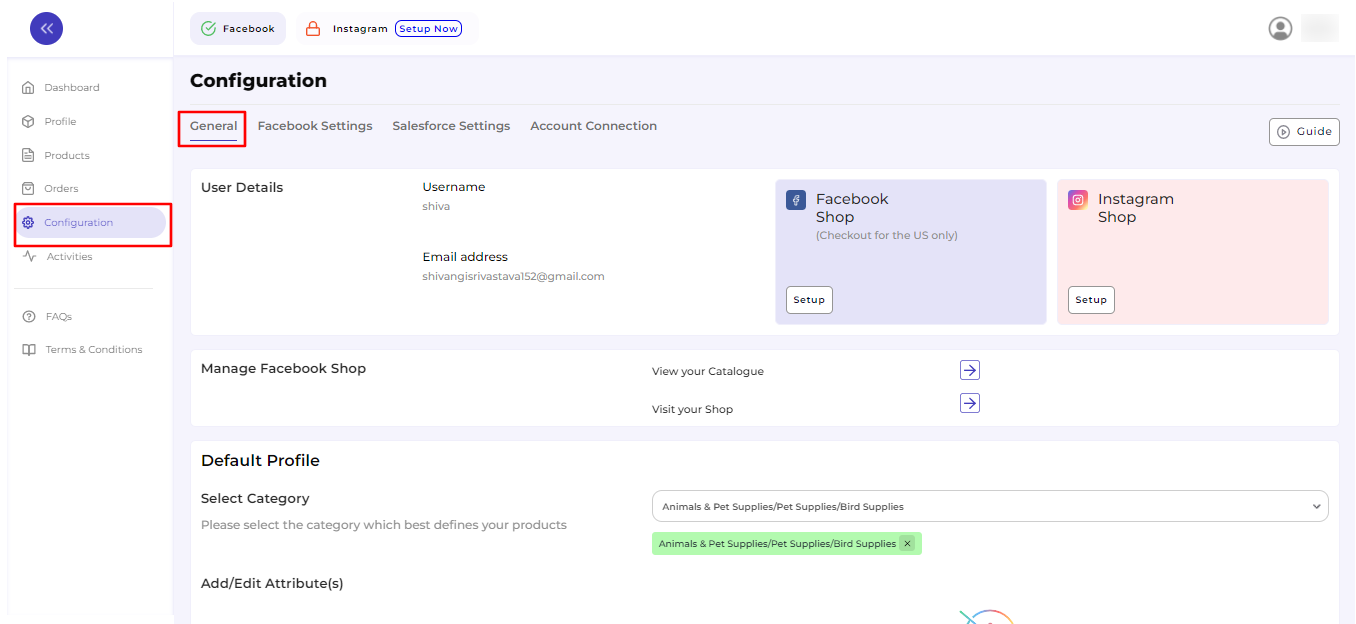

8.1. General Settings

Here you can manage –

- Your user details – username and email ID
- Connected Facebook and Instagram Shops
- Can View your Shops and Product Catalogue

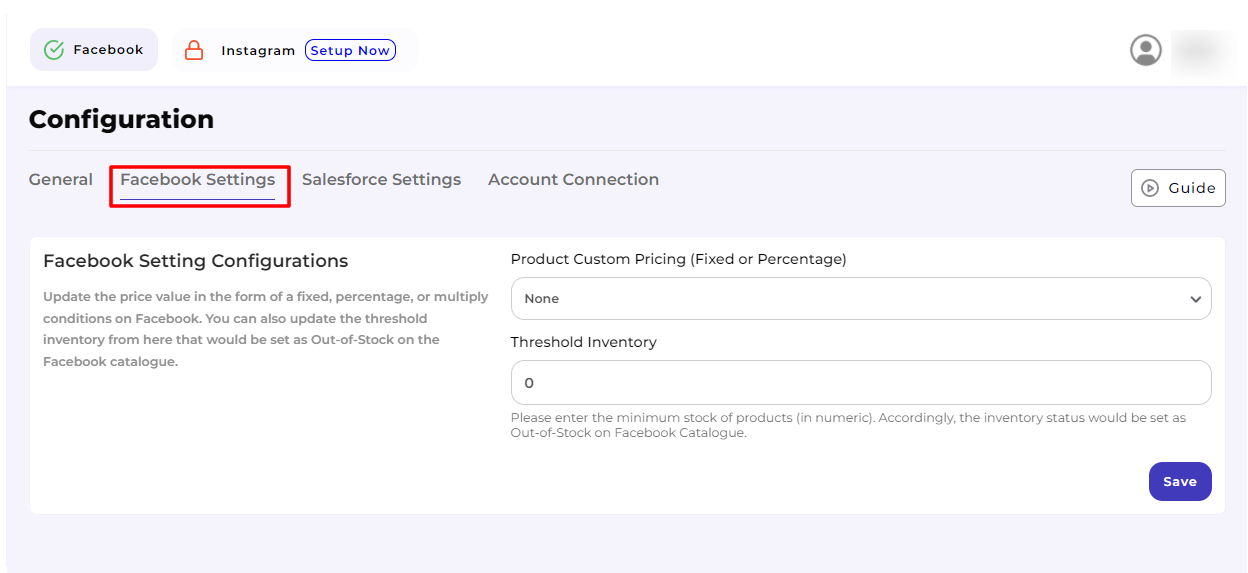

- Current category and corresponding attributes mapped.
- Changes – any updations

Make sure to click on the “**Save**” button in case of any changes made.

8.2. Facebook Settings

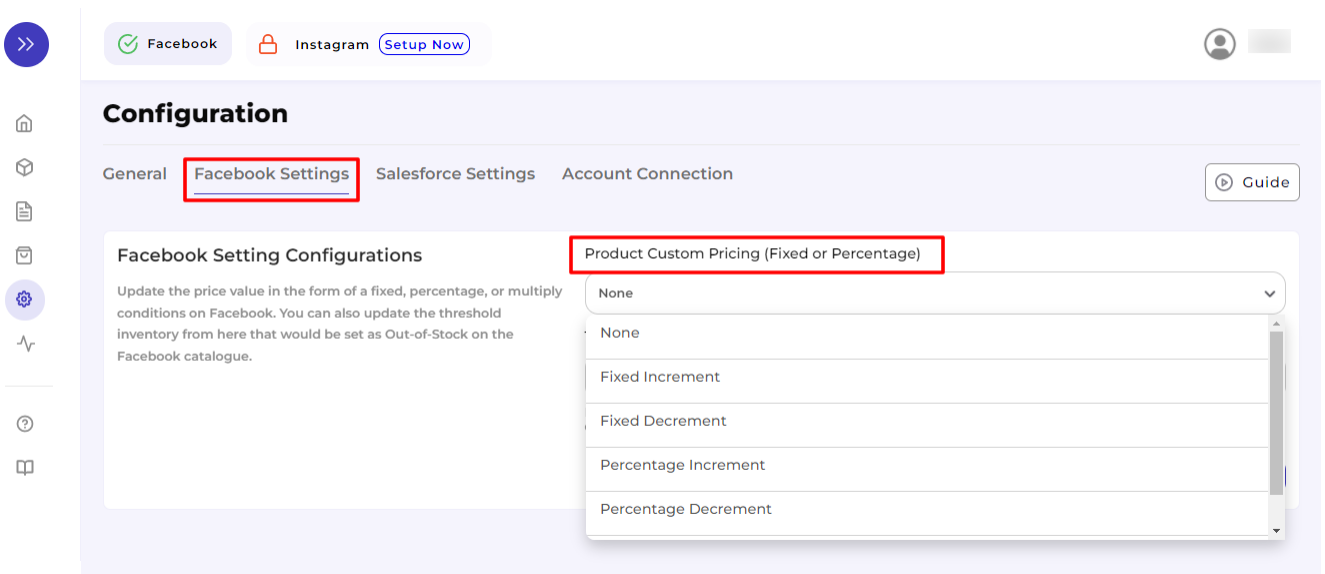

In Meta Setting Configurations, you can manage **Price Update** and **Threshold Inventory** as explained in the below steps:

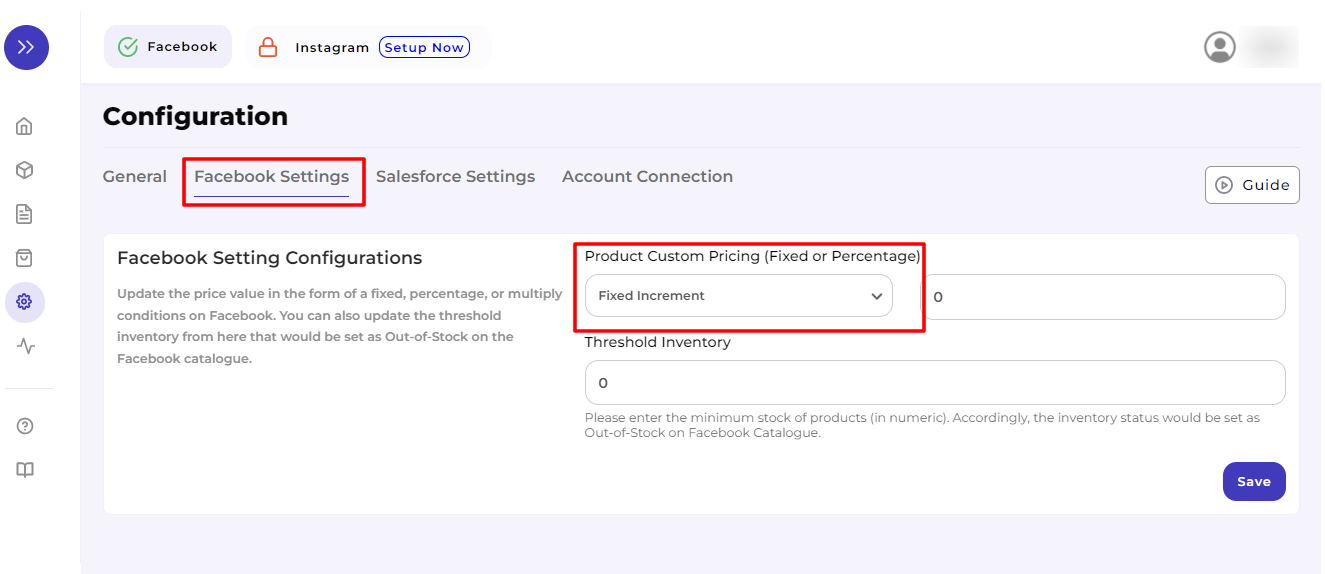

Step 1

Select “**Price Update**” from the dropdown options – Fixed Increment, Fixed Decrement, Percent Increment,

Percentage Decrement, and Multiply.

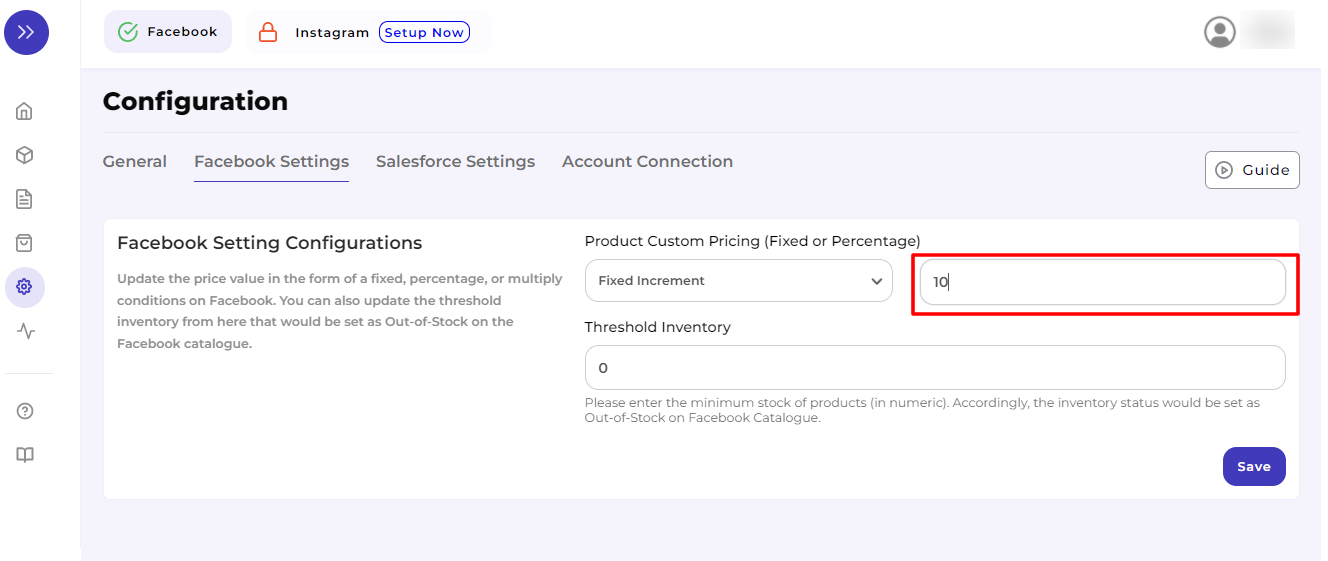

For a better understanding of it, we have attached a sample below:

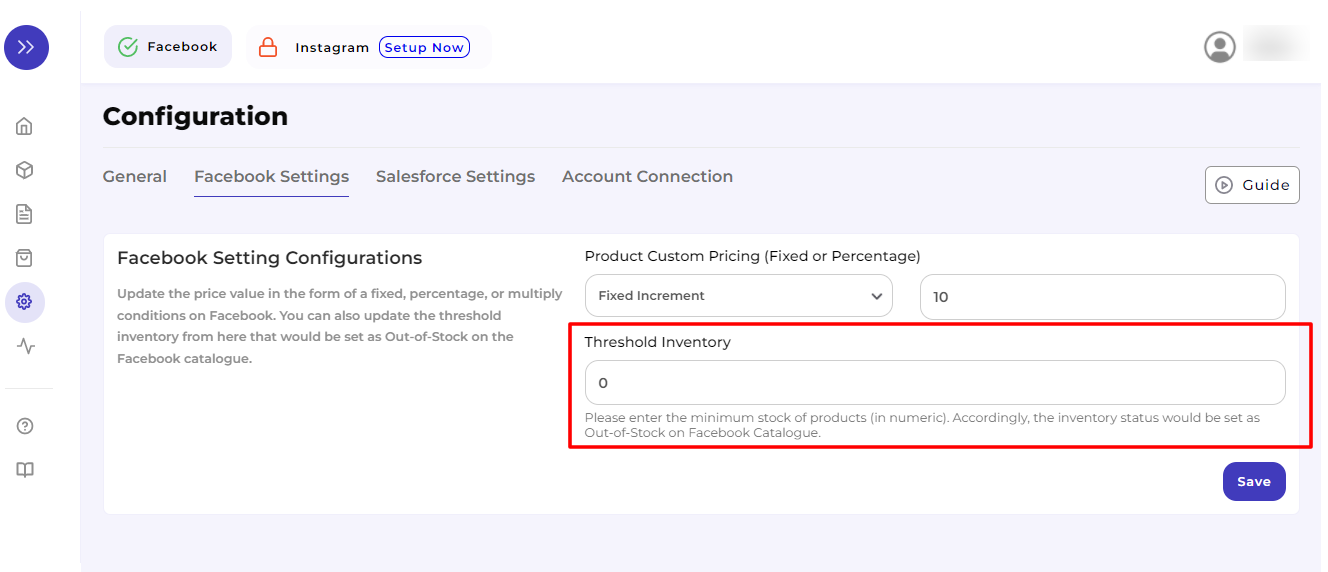

Step 2

Enter the **value** of the price to be updated.

Step 3

Enter the **minimum Threshold Inventory**. By assigning the threshold value, you trigger product inventory on Facebook & Instagram Shops as **out-of-stock**.

Step 4

Check the details entered and click on **“Save.”**

Configuration

General Facebook Settings Salesforce Settings Account Connection [Guide](#)

Facebook Setting Configurations

Update the price value in the form of a fixed, percentage, or multiply conditions on Facebook. You can also update the threshold inventory from here that would be set as Out-of-Stock on the Facebook catalogue.

Product Custom Pricing (Fixed or Percentage)

Fixed Increment 10

Threshold Inventory

0

Please enter the minimum stock of products (in numeric). Accordingly, the inventory status would be set as Out-of-Stock on Facebook Catalogue.

[Save](#)

After saving the Meta Settings, you need to re-upload the products so that the changes made here reflect on your connected Meta Catalogue.

8.3. Salesforce Settings

Under this setting, you will get your Salesforce Commerce Account information that you registered during Onboarding Step 1 – Details Authorization.

Configuration

General Facebook Settings Salesforce Settings Account Connection [Guide](#)

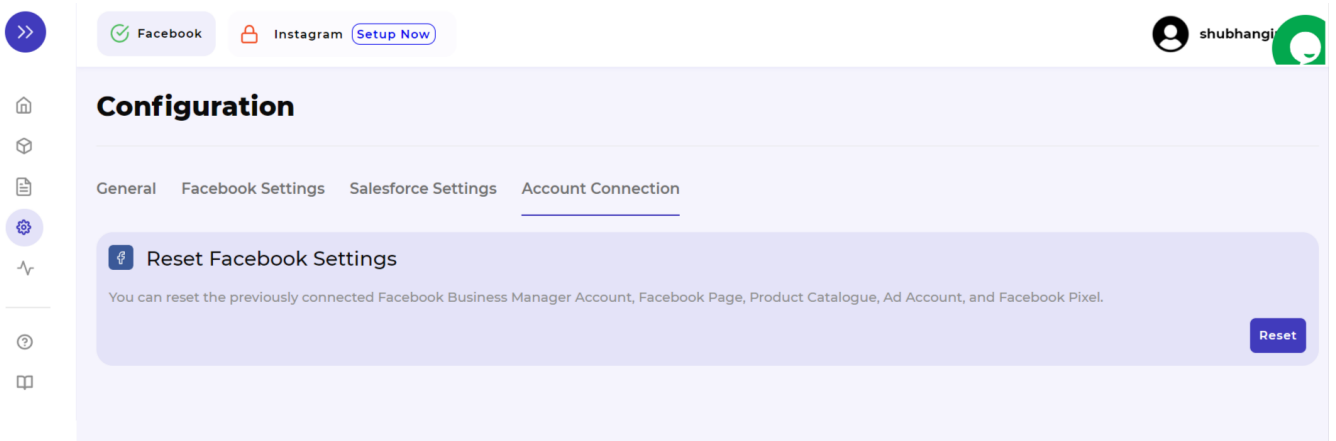

Reset Meta Settings

You can reset the previously connected Meta Business Manager Account, Facebook Page, Product Catalogue, Ad Account, and Meta Pixel.

[Reset](#)

8.4. Account Connection

In account connection, you can **reset the Meta Settings** -Meta Business Manager Account, Facebook Page, Product Catalogue, Ad Account, and Meta Pixel connected during Onboarding Step 2 – Connect Facebook Account.

9. Activities Tab

The Activities tab updates about **the real-time progress of your ongoing and recent operations performed**, like product synchronization, importing or uploading of products, profile creation, changes made in product attributes, details, and status, etc.

We have attached a sample below to provide you with a clear understanding of it.
