1. Overview

Fyndiq Integration for Magento 2 is a fabulous API integration that helps Magento® 2 store owners to synchronize inventory, price, and other product details for product creation and management between Magento 2 store and Fyndiq marketplace.

The **Fyndiq Integration for Magento 2** extension interacts with Fyndiq marketplace to integrate the synchronized product listing between Magento 2 and Fyndiq retailers. After the installation, the merchant can create Fyndiq categories and the dependent attributes on the Magento 2 store.

The process enables the merchant (admin) to configure the desired product category into Magento 2 for automatic submission of selected product on the same category on Fyndiq.

Key features are as follows:

- **Upload product based on profile:** An admin can create a profile, map the Fyndiq category and attributes to the Magento 2 category and attributes. Then, after assigning the product to the profile can easily upload the product to Fyndiq.
- **Attribute mapping:** The feature allows mapping the suitable existing attribute with Fyndiq attributes to one single category of Fyndiq.
- **Archive and Unarchive Products:** Merchants can close and reopen the products on Fyndiq.se using the Archive and Unarchive feature. Archive disables the products on Fyndiq.se and Unarchive enables the archived product.
- **Upload Products in Bulk:** The admin has the option to upload the products in any number of the bulk amount on Fyndiq website using this feature.
- **Profile Based Pricing:** Increase or decrease in price based on the profile.
- **Automated Synchronization:** The products listing, order, inventory return and refund, and pricing are automatically synchronized at regular interval of time.
- **Batch product request download:** You can create the batch product download request and fetch the status. Once it turns to finish status, the admin can process by one click.
- **Enable and disable of products:** A merchant can anytime open and close the products on Fyndiq using enable and disable the feature.
- **New Order Notifications:** Whenever a new order is fetched from Fyndiq.se, the admin receives a notification.
- **Rejected products notification:** If any product containing some invalid details is rejected, then its information is fetched from the auto synchronization request along with the error due to which it is rejected.
- **Low Stock Notifications:** Whenever Stock diminishes lower than a threshold, a notification is sent informing the status.
- **Simple and configurable product upload:** The admin can upload the simple and configurable type of Magento 2 product on the Fyndiq website.

2. Fyndiq Integration for Magento 2 Extension Installation

To install the extension

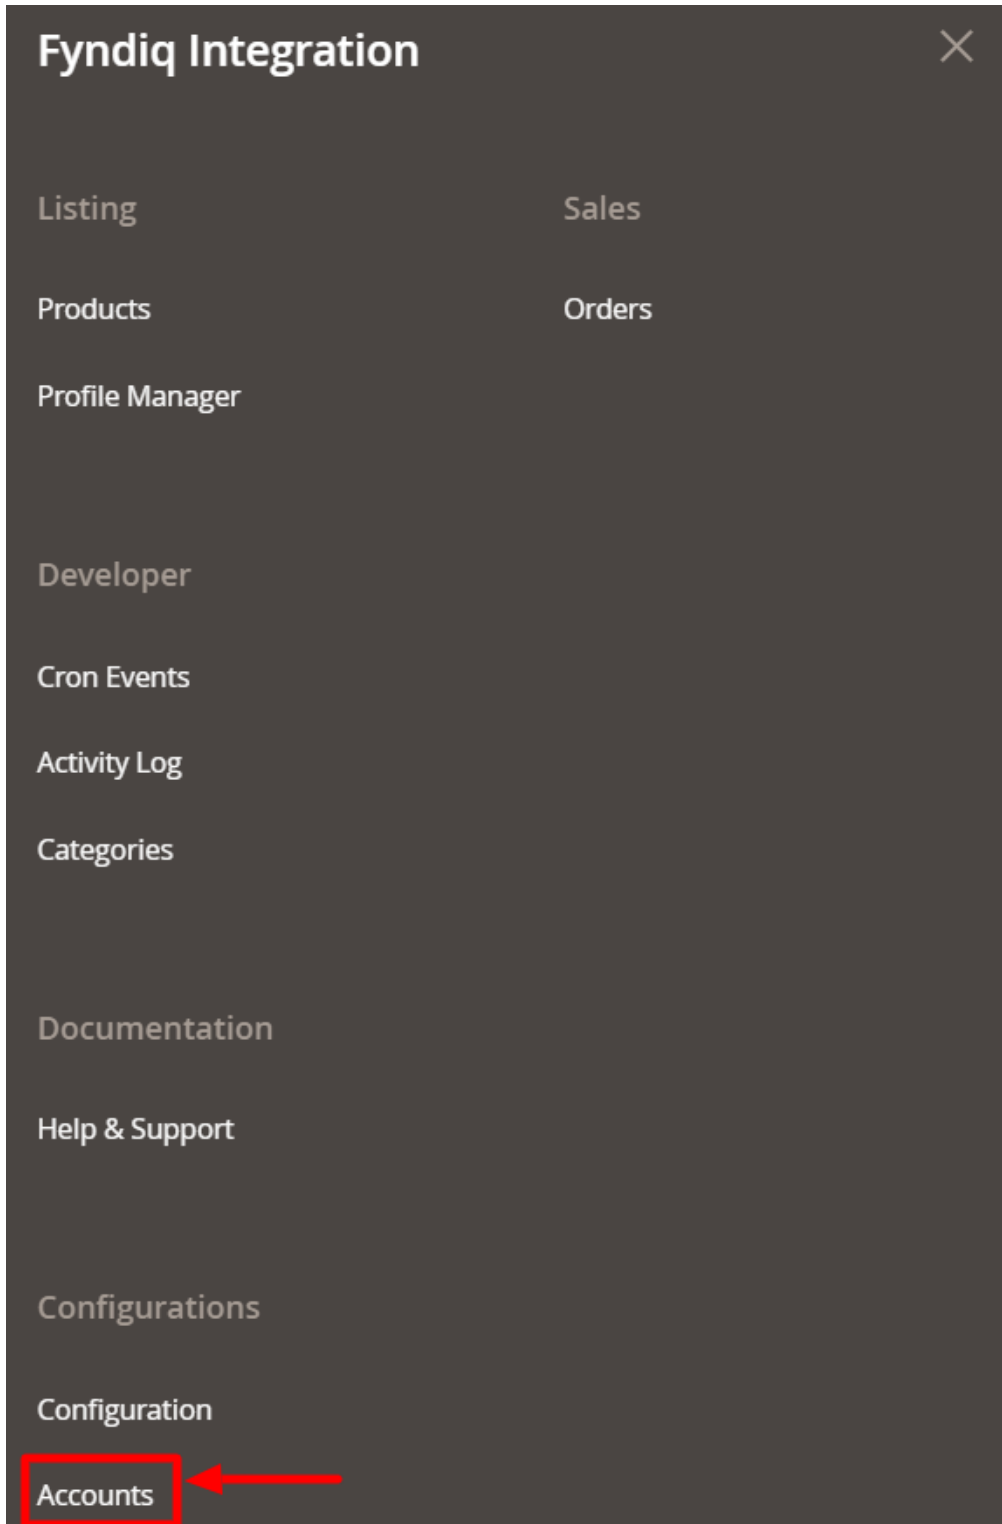

1. Log in the **ftp**, and then go to the Magento 2 root folder (generally present under the *public_html* folder).
2. Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
 - a. Upload or Drag and Drop *app/code/Ced/Fyndiq* directory.
 - b. After successfully uploading the directory, the extension will be installed/upgraded.
 - c. Now run the following upgrade command in *cmd*

```
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy -f  
php bin/magento indexer:reindex  
php bin/magento cache:flush
```

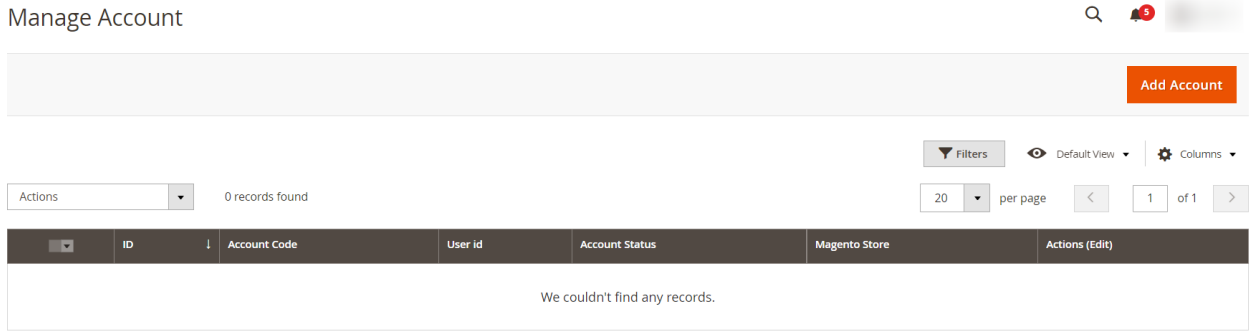

3. Account Settings

To manage accounts

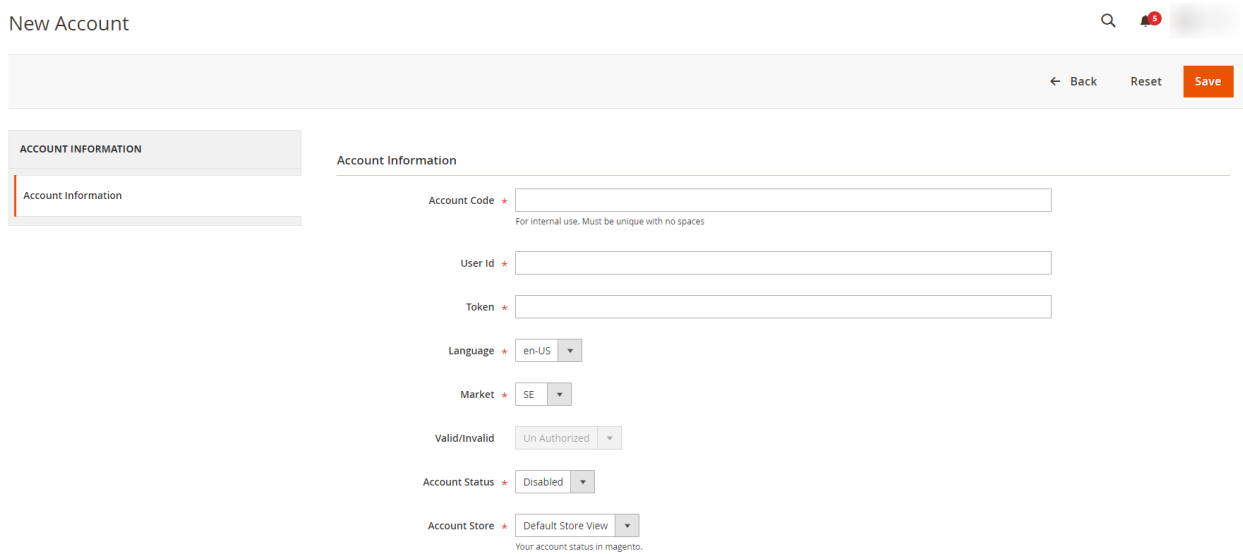

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu.

3. Click on **Accounts**.
The **Account** page appears as shown below:

4. To add a new account click on **Add Account**. The new account page appears as shown below:

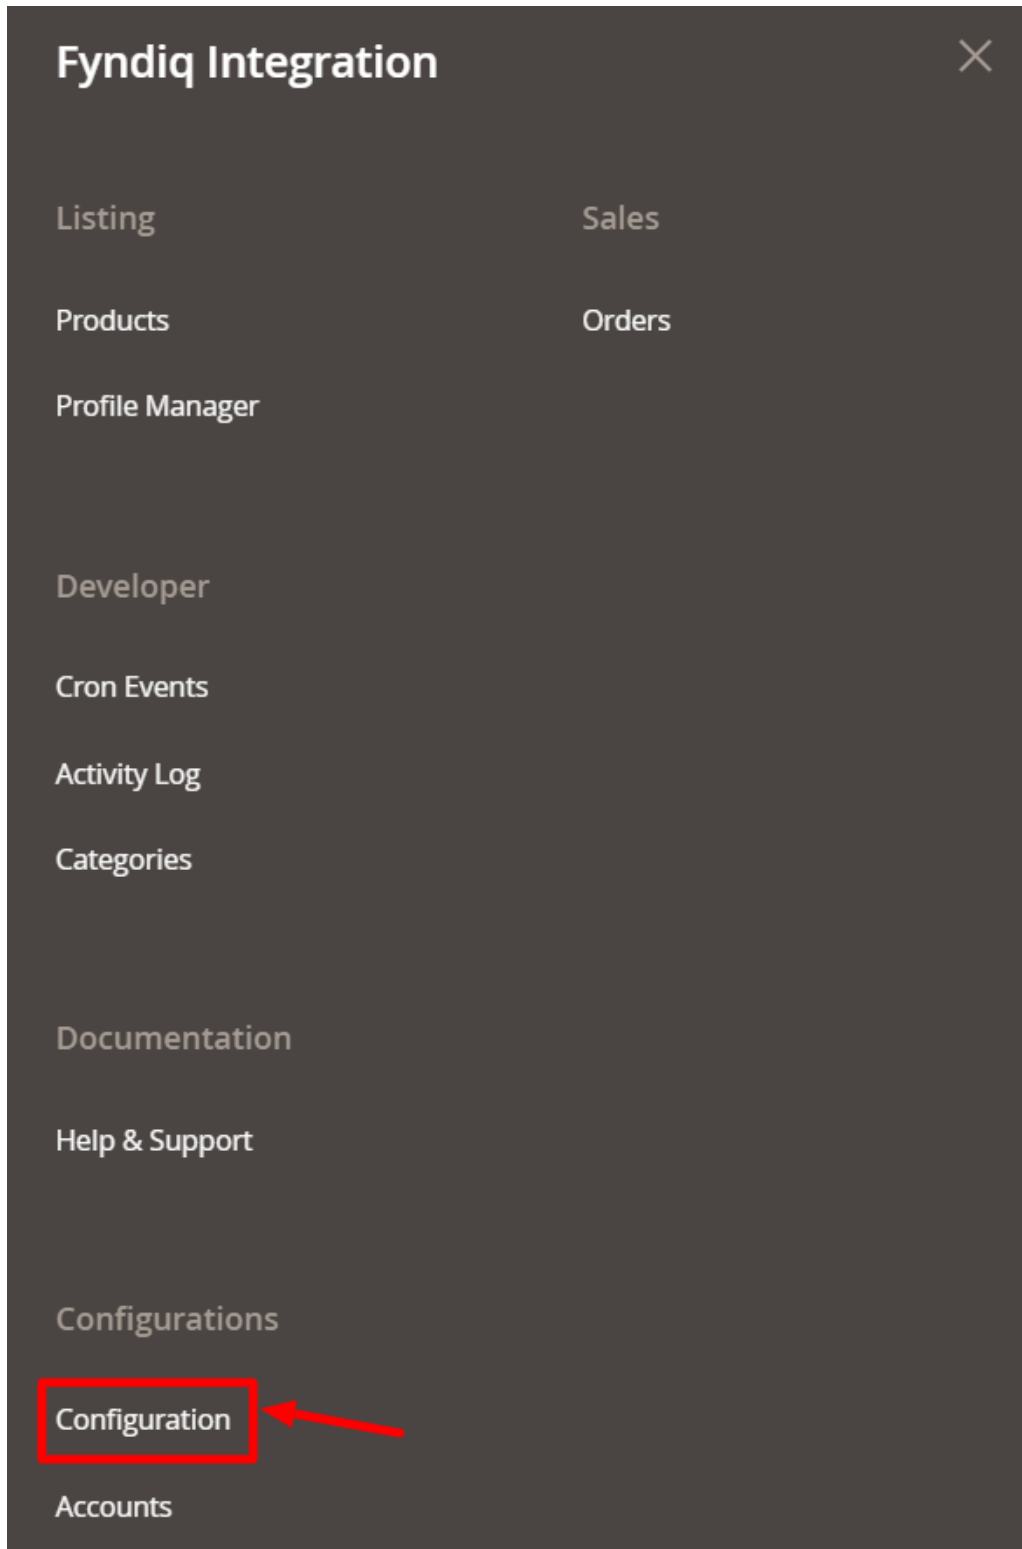

5. In **Account Code**, enter the unique code for the account.
6. In **User Id**, enter the Fyndiq User Id.
7. In **Token**, enter the fetched token on the Fyndiq panel.
8. In **Language**, select the language.
9. In **Market**, select the market.
10. In **Valid/Invalid**, if the details are valid it will display as authorized and if it is invalid then it will be unauthorized.
11. In **Account Status**, select **Enable** if you want to enable the account status.
12. In **Account Store**, select the store view.

4. Fyndiq Configuration Settings

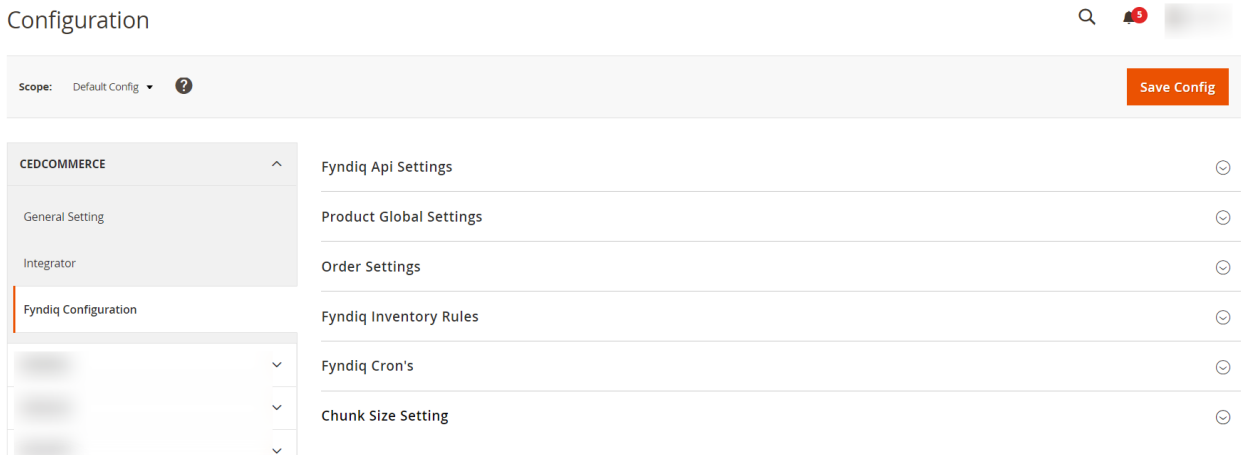

Once the extension is successfully installed in the Magento 2 store, the **FYNDIQ INTEGRATION** menu appears on the left navigation bar of the Magento 2 Admin panel. The merchant has to first create a seller account in the Fyndiq seller panel. Once the seller account is created and is approved by Fyndiq, then the Magento 2 store owner can use the **Fyndiq Username** and **Password** while setting up the Fyndiq Configuration settings in the **Magento 2 Admin** panel.

To set up the configuration settings in the Magento 2 Admin panel

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu.
The menu appears as shown in the following figure:

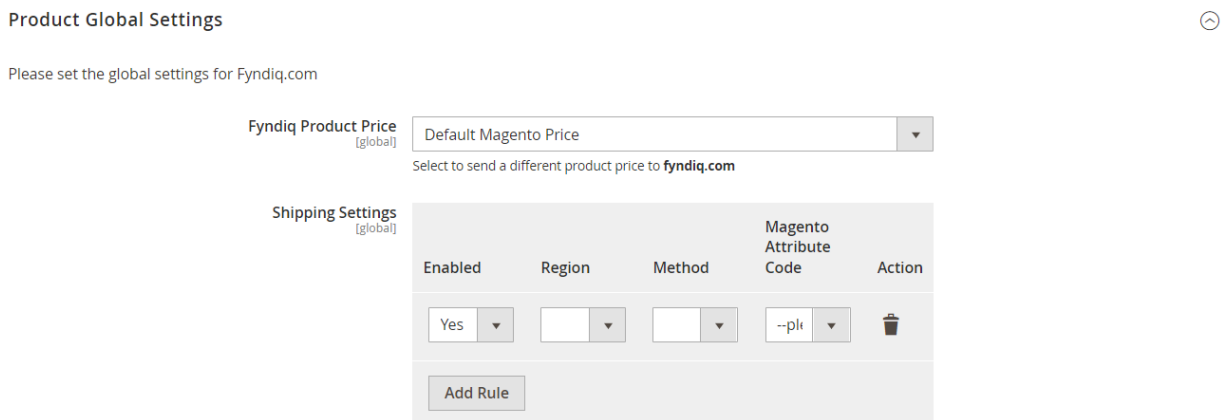

3. Click **Configuration**.
The page appears as shown in the following figure:

4. In the right panel, click on **Fyndiq Api Settings**. The section is expanded as shown below:

5. Under **Fyndiq Api Settings**, do the following steps:
 - a. In the **Enabled** list, select **Yes** to enable the extension features.
 - b. In **Debug Log**, select **Yes** if you want the logs to be created.
 - c. In **Select Store**, select the store view.
6. Click the **Save Config** button to save the entered values.
7. Scroll down to the **Product Global Settings** tab, and then click the tab. The section appears as shown in the following figure:

8. Under **Product Global Settings**, do the following steps:
 - a. In the **Fyndiq Product Price** list, select one of the following options:

- \. **Increase by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.
- \. **Increase by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.
Enter the numeric value to increase the price of the Fyndiq, product price by the entered value % of Magento 2 price.
- \. *For Example,*
 Magento 2 price + 5% of Magento 2 price.
 Magento 2 Price = 100
 Select **Increase By Fixed Percentage** option
Enter Percentage = 5
 $100 + 5\% \text{ of } 100 = 100 + 5 = 105$
 Thus, Fyndiq Product Price = 105
- \. **Decrease by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.
- \. **Decrease by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.
Enter the numeric value to decrease the price of the Fyndiq product price by the entered value % of Magento 2 price
- \. *For Example,*
 Magento 2 price – 5% of Magento 2 price.
 Magento 2 Price = 100
 Select **Decrease By Fixed Percentage** option
Enter Percentage = 5
 $100 - 5\% \text{ of } 100 = 100 - 5 = 95$
 Thus, Fyndiq Product Price = 95

b. In **Shipping Settings**, add the shipping method and region.

9. Now click on **Order Settings**, the section is expanded as shown below:

Order Settings ⌵

Create Product [global] ▼
Create Product if product Not exist in magento.

Fyndiq Order Id Prefix [global]
Prefix for Fyndiq Increment ID

Customer Email [global]
Enter the Email for which customer will be created for Fyndiq Orders.

10. Under **Order Settings**, do the following steps:

- a. In **Create Product**, select **Yes** if you want to create a product if it does not exist in Magento.
- b. In the **Fyndiq Order ID Prefix** box, enter the required prefix value.
For instance, enter *FY-* for *FY-10001*.
- c. In the **Customer Email**, enter the email for which the customer will be created for Fyndiq Orders.

11. Now click on **Fyndiq Inventory Rules**, the section is expanded as shown below:

Fyndiq Inventory Rules

Set Inventory on Basis of Threshold [global] ▼
 Choose yes to send inventory on fyndiq by condition

Inventory Threshold Value [global]
 Set inventory quantity on which lesser and greater condition can control.

Send Inventory for Lesser Than Threshold Case [global]
 Send Quantity to Fyndiq for those products, whose inventory is LESSER than the inventory threshold.

Send Inventory for Greater Than Threshold Case [global]
 Send Quantity to Fyndiq for those products, whose inventory is GREATER than the inventory threshold.

12. Under **Fyndiq Inventory Rules**, do the following steps:

- In the **Set Inventory on Basis of Threshold** list, select **Enable** to set the inventory based on the threshold.
Note: Only when the admin selects Enable, the other fields appear.
- In the **Inventory Threshold Value** box, enter the value which you consider to be the minimum for your inventory.
- In the **Send Inventory for Lesser Than Threshold Case** box, enter the value that needs to be visible on Fyndiq in case your inventory is lesser than the threshold value that you have set in the earlier parameter.
- In the **Send Inventory for Greater Than Threshold Case** box, enter the value that needs to be visible on Fyndiq in case your inventory is more than the threshold value that you have set.

13. Scroll down to the **Fyndiq Cron's** tab, and then click the tab.

The tab is expanded and the relevant field appears as shown in the following figure:

Fyndiq Cron's

Order Cron [global] ▼
 Order Fetch Cron

Price Cron [global] ▼
 Price Sync Cron

Inventory Cron [global] ▼
 Inventory Sync Cron

Shipment Cron [global] ▼
 This will automatically generate

14. Under **Fyndiq Cron Settings**, do the following steps:

- In the **Fyndiq Order Cron** list, select **Enable** to enable the fetch order cron.
- In the **Fyndiq Price Cron** list, select **Enable** to enable the Price Sync cron.
- In the **Fyndiq Inventory Cron** list, select **Enable** to enable the Inventory Sync cron.
- In **Fyndiq Shipment Cron**, select **Enable** if you want to automatically generate the shipment.

15. Scroll down and click on **Chunk Size Setting**, the section is expanded as shown below:

Chunk Size Setting

Validation Size <small>[global]</small>	<input type="text" value="10"/>	Chunk size for validate Product .
Upload <small>[global]</small>	<input type="text" value="10"/>	Chunk size for Upload Product .
Inventory Update <small>[global]</small>	<input type="text" value="1"/>	Chunk size for Inventory Update .
Price Update <small>[global]</small>	<input type="text" value="10"/>	Chunk size for Price Update .
Sync Status <small>[global]</small>	<input type="text" value="10"/>	Chunk size for Product Status Sync.

16. Under **Chunk Size Setting**, do the following steps:

- In the **Validation Size** field, enter the chunk size for the products. The products that will get validated before being uploaded on Fyndiq would be the same as the number you enter in this field.
- In the **Upload** field, enter the number of products that you want to upload in one go from Magento to Fyndiq.
- In the **Inventory Update** field, enter the chunk size of the products. The inventory will be updated in one batch for the number of products that you enter in this field.
- In the **Price Update** field, enter the chunk size for the number of products. The price will be updated in one batch for the number of products that you enter in this field.
- In the **Sync Status** field, enter the chunk size of the products. The number of products that you will be able to sync the status for would be the same as the number that you enter in this field.

17. Click the **Save Config** button.

5. Manage Fyndiq Profile

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento 2 attributes to the Fyndiq attributes. These attributes are applicable to all the products that are assigned to the profile.

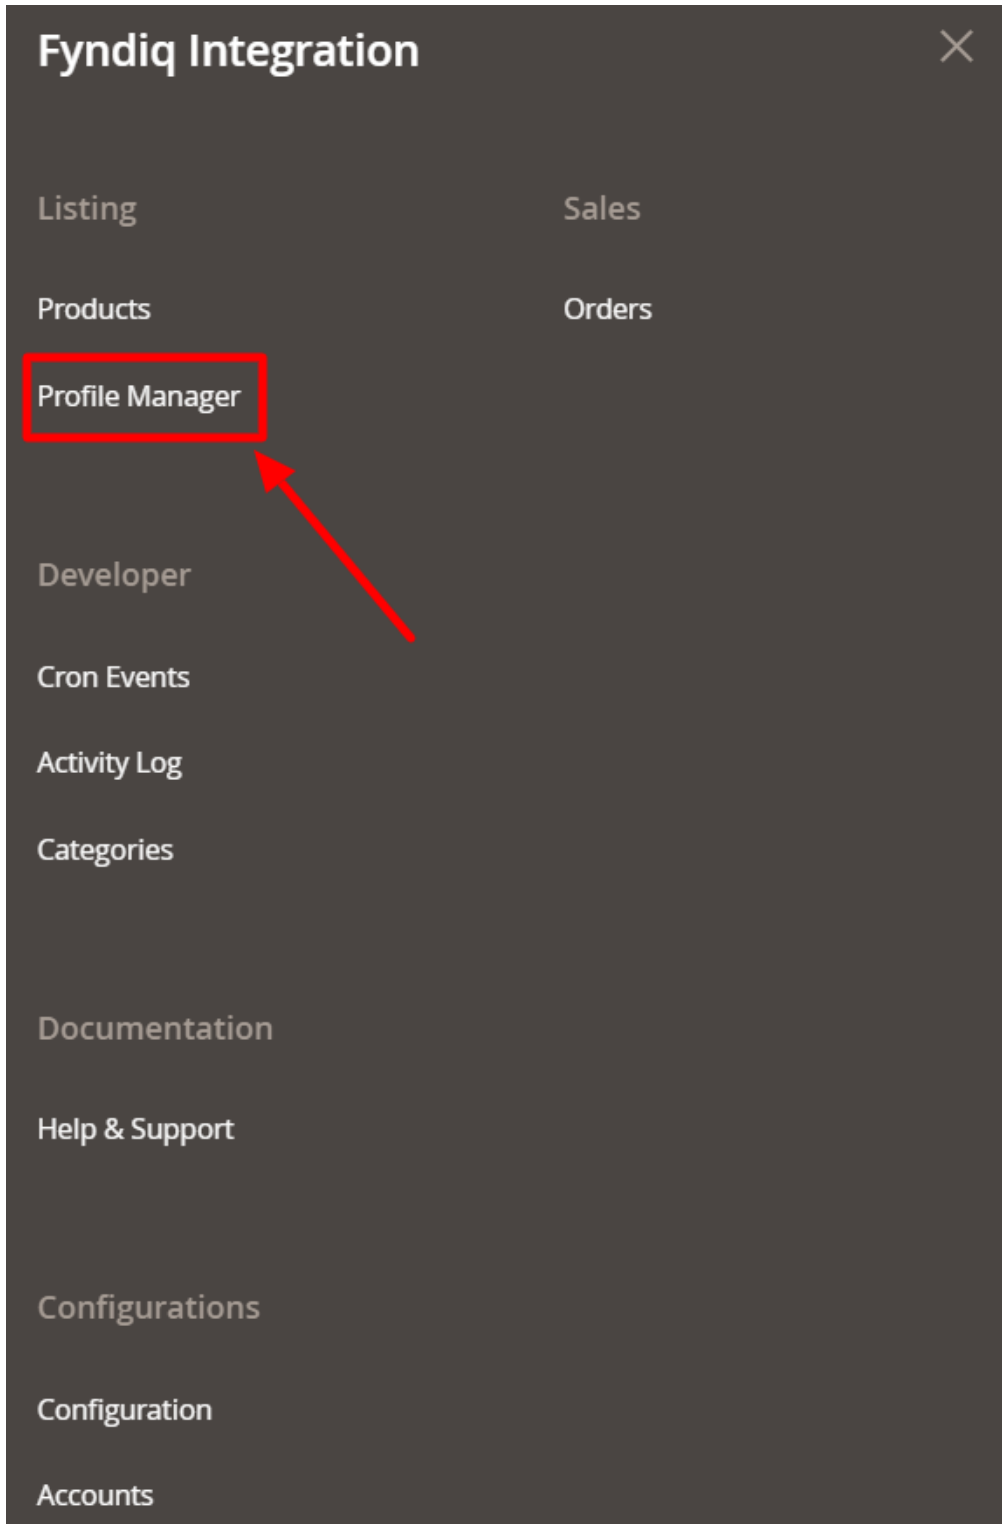

Admin can do the following tasks:

- Add new profile
- Edit the existing profile
- Delete the profiles
- Enable or Disable the Selected Profiles
- Manage the Product Assigned to the Profile

5.1. Add A New Profile

To add a new profile

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu.

3. Click on **Manage Profile**.

The **Manage Profile** page appears as shown in the following figure:

Manage Profile

2 records found

ID	Profile Code	Profile Name	Status	Product Count	Action
1	fyndiq_test_profile1	fyndiq_test_profile1	Enabled	2	Select
2	njmkhj	gkjhj	Disabled	0	Select

- Click the **Add New Profile** button as highlighted with the red color. The **New Profile** page appears as shown in the following figure:

Profile Information

Profile Code *
For internal use. Must be unique with no spaces

Profile Name *

Profile Status * Disabled
Specific store view information of products will send to fyndiq

- In the right panel, under **Profile Information**, do the following steps:
 - In the **Profile Code** box, enter a profile code.
Note: It is only for the internal use. Use the unique profile code with no spaces. Start with small letters.
 - In the **Profile Name** box, enter the name of the profile.
Note: Use the unique name to identify the profile.
 - In the **Profile Status** list, select **Enabled** to enable the profile.
Note: The Inactive option disables the profile.
- Click the **Save and Continue Edit** button.
- In the left navigation panel, click the **Category/Attribute Mapping** menu. In the right panel, the page appears as shown in the following figure:

New Profile

PROFILE INFORMATION

Profile info

Category/Attribute Mapping

Profile Products

Category Mapping

Root Level Category * ▼

Search Category

8. Under **Category Mapping**, do the following steps:

- In the **Root Level Category** list, select the required category to map.

OR

In the **Search Category** box, enter the category initials to search for the required category.

A list appears with the suggested categories. Select the required one. Once selected the category appears in the **Root Level Category** field.

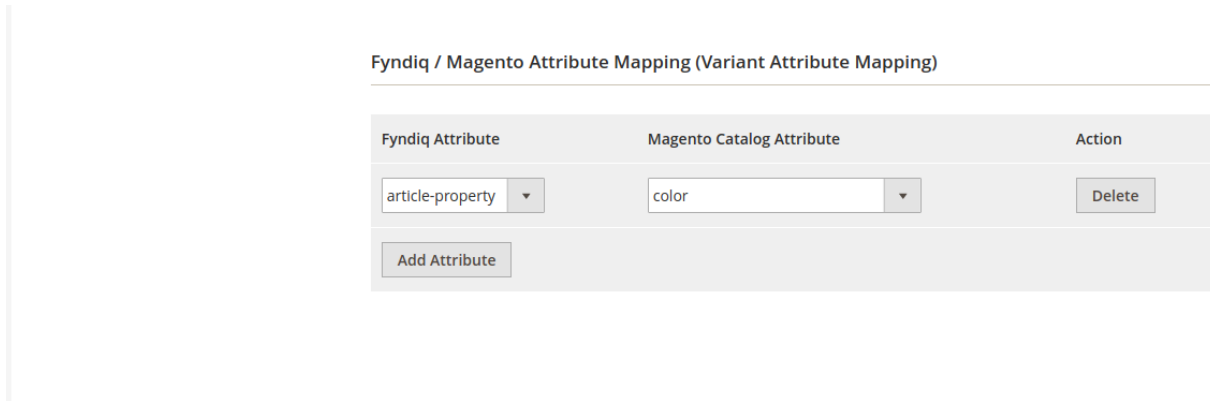

9. Scroll down to the **Fyndiq / Magento Attribute Mapping (Required/Optional mapping)** section.

The section appears as shown in the following figure:

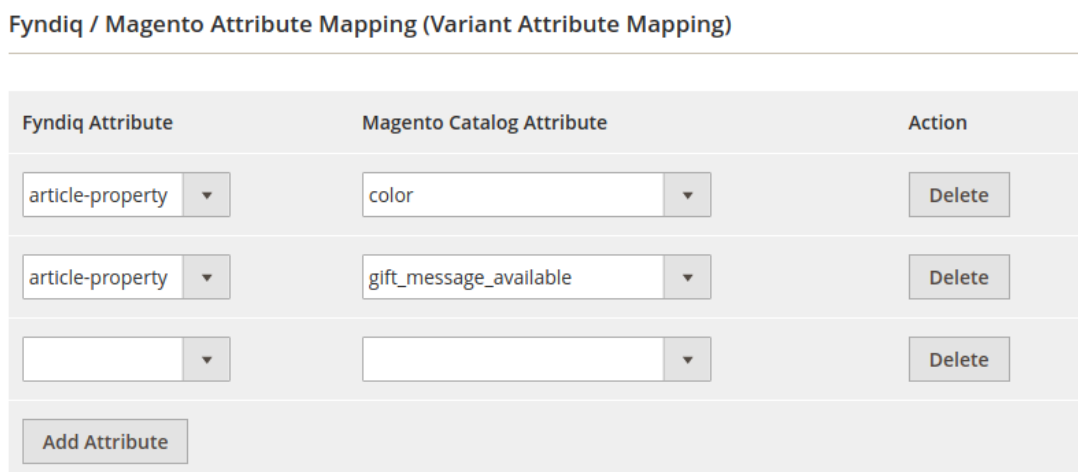

Fyndiq / Magento Attribute Mapping (Required/Optional mapping)

Fyndiq Attribute	Magento Catalog Attribute	Default Value	Action
<input type="text" value="product-id"/> ▼	<input type="text" value="sku"/> ▼		
<input type="text" value="product-title"/> ▼	<input type="text" value="name"/> ▼		
<input type="text" value="product-description"/> ▼	<input type="text" value="description"/> ▼		
<input type="text" value="product-price"/> ▼	<input type="text" value="price"/> ▼		
<input type="text" value="product-oldprice"/> ▼	<input type="text" value="price"/> ▼		
<input type="text" value="product-vat-percent"/> ▼	<input type="text" value="fyndiq-vat-percent"/> ▼		
<input type="text" value="product-image-1-url"/> ▼	<input type="text" value="image"/> ▼		
<input type="text" value="article-sku"/> ▼	<input type="text" value="sku"/> ▼		
<input type="text" value="article-quantity"/> ▼	<input type="text" value="quantity_and_stock_status"/> ▼		
<input type="text" value="article-name"/> ▼	<input type="text" value="name"/> ▼		
<input type="text" value="article-ean"/> ▼	<input type="text" value="ean"/> ▼		

10. Under **Fyndiq / Magento Attribute Mapping (Required/Optional mapping)**, do the following steps:
 - a. In the **Magento Catalog Attribute** column, select the required Magento attribute from the corresponding list to map it with the corresponding Fyndiq attribute.
Note: In case the required attribute does not exist in the corresponding list, then select **-Set Default value-** from the corresponding list. A text box appears in the Default Value column next to corresponding **Magento Catalog Attribute** column.
 - b. Repeat the mapping of all the required or optional Magento attributes listed with the corresponding Fyndiq attributes.
 - c. Click the **Add Attribute** button to add more attributes if required.
11. Scroll down to the **Fyndiq / Magento Attribute Mapping (Variant Attribute mapping)** section. The section appears as shown in the following figure:

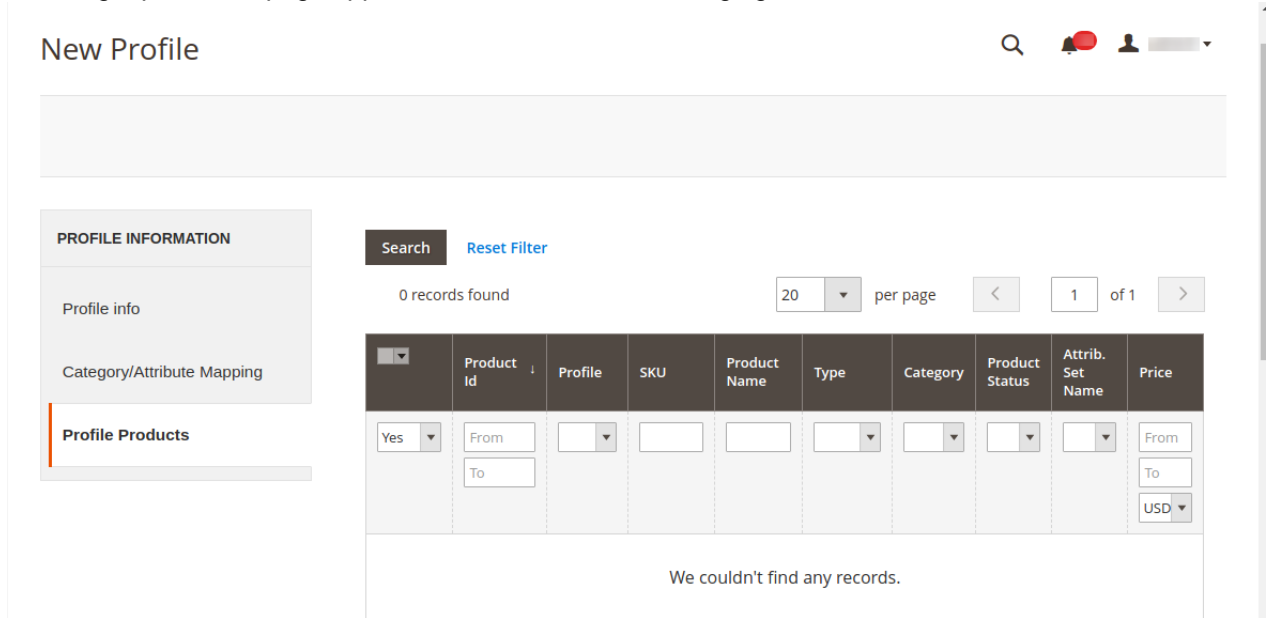

12. Under **Fyndiq / Magento Attribute Mapping (Variant Attribute mapping)**, do the following steps:
 - a. Click the **Add Attribute** button to add attributes if required.
 - b. In the **Fyndiq Attribute** column, select the required Fyndiq attribute to map it with the corresponding Magento attribute.
 - c. In the **Magento Catalog Attribute** column, select the required Magento attribute.
13. Scroll down to the **Fyndiq / Magento Attribute Mapping (Optional mapping)** section. The section appears as shown in the following figure:

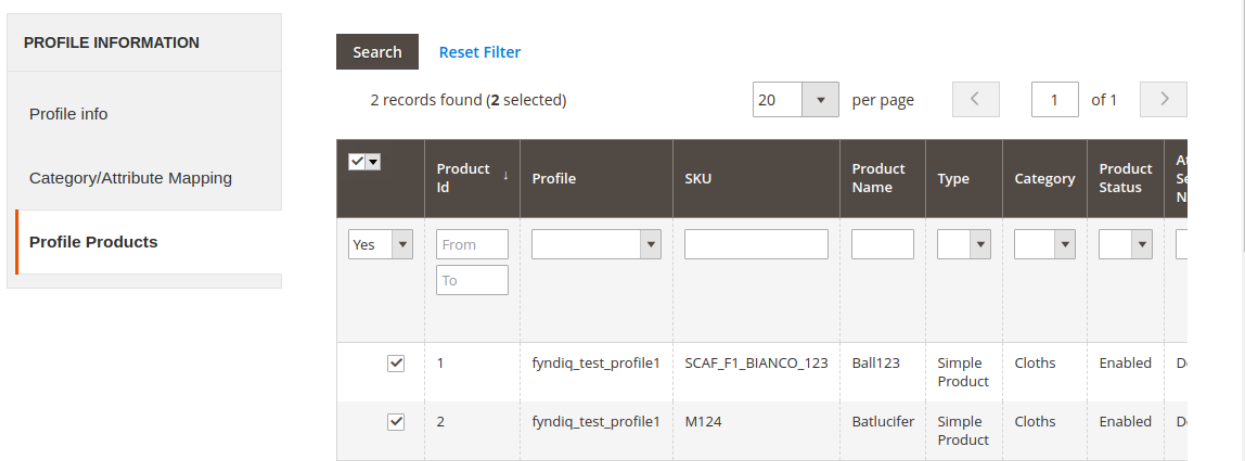

14. Similarly, under **Fyndiq / Magento Attribute Mapping (Optional mapping)**, do the following steps if required:

- a. Click the **Add Attribute** button to add attributes if required.
 - b. In the **Fyndiq Attribute** column, select the required Fyndiq attribute to map it with the corresponding Magento attribute.
 - c. In the **Magento Catalog Attribute** column, select the required Magento attribute.
15. Click the **Save and Continue Edit** button.
16. In the left navigation panel, click the **Profile Products** menu.
- In the right panel, the page appears as shown in the following figure:

17. Since no products are assigned to the profile, there are no products listed in the table.
18. Click the **Reset Filter** link.
- All the products are listed in the table as shown in the following figure:

19. In the right panel, do the following step:
- Select the check boxes associated with the required products those the admin wants to assign to the new profile.
- Note:** Admin can assign one product to one profile only. It means, admin can assign multiple products to the same profile but can associate a product only with one profile at one time. To assign a product to another profile, the admin has to remove that product from the currently assigned profile.

20. Click the **Save Profile** button.

The created profile is saved and listed on the **Manage Profile** page.

Or

Click the **Save and Continue Edit** button to save the created profile and continue editing, if required.

Or

Click the **Save and Manage Product** button to save the profile and make ready to upload the product to Fyndiq.

The assigned products are listed on the **Manage Products** page as shown in the following figure:

Manage Products

2 records found per page of 1

<input type="checkbox"/>	Fyndiq Profile	ID	Thumbnail	Name	Type	SKU	Price	Visibility	Status	Fyndiq Product Status	Validation	config_color
<input type="checkbox"/>	fyndiq_test_profile1	1		Ball123	Simple Product	SCAF_F1_BIANCO_123	\$20.00	Catalog, Search	Enabled	Uploaded	VALID	Red
<input type="checkbox"/>	fyndiq_test_profile1	2		Batlucifer	Simple Product	M124	\$20.00	Catalog, Search	Enabled	Uploaded	VALID	Red

5.2. Edit the Existing Profile

To edit the existing profile

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu.

3. Click on **Manage Profile**.

The **Manage Profile** page appears as shown in the following figure:

Manage Profile

The screenshot shows the 'Manage Profile' interface. At the top right, there is a search icon, a notification bell with '2' alerts, and a user profile icon. Below this is a white bar with an orange 'Add New Profile' button. Underneath are 'Filters', 'Default View', and 'Columns' options. A table shows two records:

ID	Profile Code	Profile Name	Status	Product Count	Action
1	test	test	Enabled	0	Select
2	test_profile_3	Test Profile 3	Enabled	2	Select

A dropdown menu is open for the 'Action' of the second record, showing 'Edit' and 'Manage Products' options.

On this page, all the available profiles are listed.

4. Click the required row of the profile that the admin wants to edit.

OR

In the **Action** column, click the arrow button, and then click **Edit**.

The page appears as shown in the following figure:

The screenshot shows the 'New Profile' page. At the top right, there is a search icon, a notification bell, and a user profile icon. Below this is a white bar with buttons: 'Back', 'Delete', 'Reset', 'Save and Continue Edit', 'Save and Manage Product', and an orange 'Save Profile' button. The main content area is divided into a sidebar and a main form.

5.3. To Perform Bulk Actions on Profiles

To perform the selected actions on profiles in bulk

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu.

3. Click on **Manage Profile**.

The **Manage Profile** page appears as shown in the following figure:

Manage Profile

Add New Profile

Filters Default View Columns

ID	Profile Code	Profile Name	Status	Product Count	Action
1	fyndiq_test_profile1	fyndiq_test_profile1	Enabled	2	Select
2	njmkhj	gkjhj	Disabled	0	Select

On this page, all the available profiles are listed.

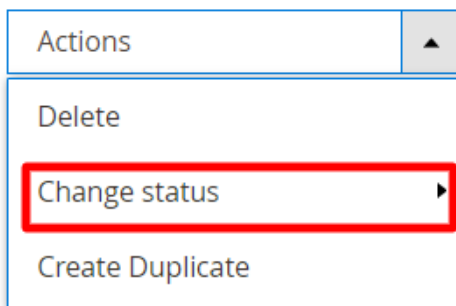

- Select the check boxes associated with the profiles that are no more required.
- In the **Actions** list, select the **Delete** option.

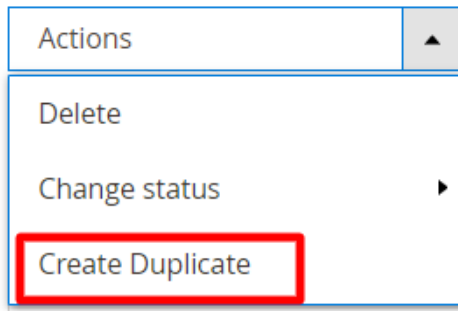

A confirmation dialog box appears.

- Click the **OK** button.
The selected profiles are deleted.

- To change the status of the profile, click on **Changes Status** in the **Actions** list.

- Select the required status **Enable/Disable**.
The status of the selected profile will be changed.
- To create a duplicate profile, click on **Create Duplicate** in the **Actions** list.

10. The duplicate profile will be created for the selected profile.

6. Manage Fyndiq Products

This feature of the integration extension enables the admin to manage all the products available in the Magento 2 store and uploaded on Fyndiq.com.

Hence, after getting redirected to the **Manage Products** page from the **Manage Products** menu, the store owners can perform the similar tasks as they can perform on the **Manage Products** page after getting redirected from the **Manage Profile** page.

The only difference here is the display of the products on the **Manage Products** page.

The differences are as follows:

- **Display of the Products on the Manage Products page after getting redirected from the Manage Profile page:** Only those products that are assigned to the selected profile are listed.
- **Display of the Products on the Manage Products page after getting redirected from the Manage Products menu:** All the products of all the profiles are listed.

Hence, there are two ways to open or go to the Manage Products page:

Option 1: Through the **Manage Profile** page:

1. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu, and then click **Manage Profile**. The **Manage Profile** page appears as shown in the following figure:

Manage Profile

<input type="checkbox"/>	fyndiq_test_profile1	2		Batlucifer	Simple Product	M124	\$20.00	Catalog, Search	Enabled	Uploaded	VALID	Red

All the available products assigned to all the profiles are listed.

The admin can perform the following tasks on the Manage Products page:

- View and edit the product information
- Upload a single product
- View the validation error details if any error exists in any product details
- Submit certain actions on the selected products

6.1. View and Edit the Product Information

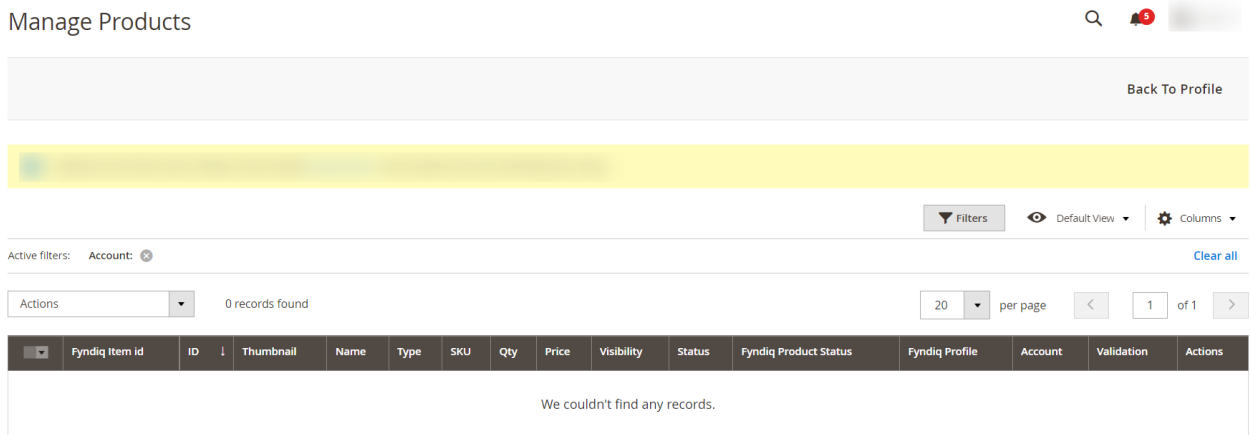

To view and edit the product information

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu.

3. Click on **Products**.

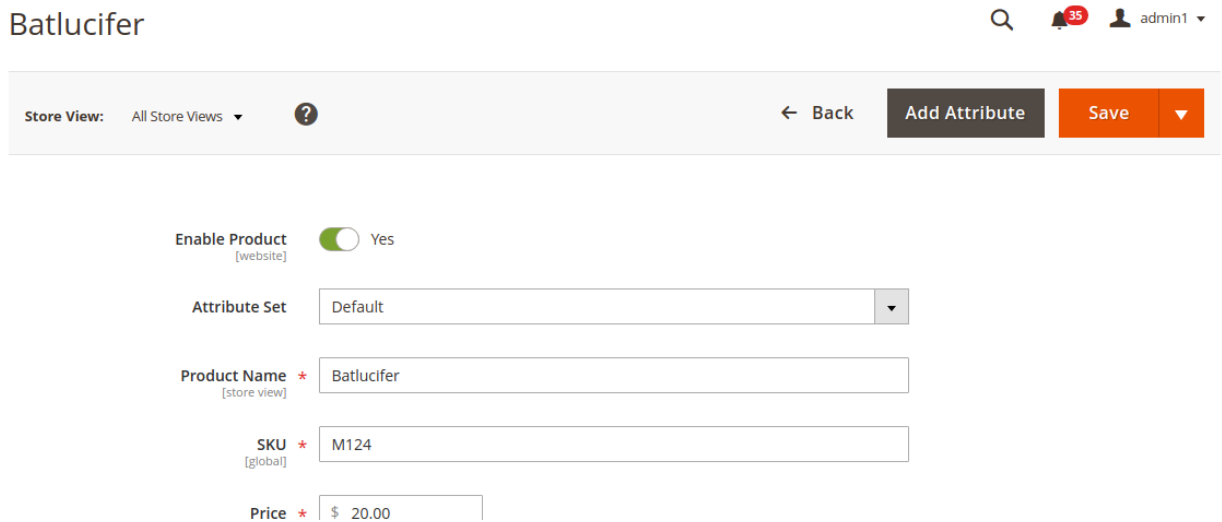

The **Manage Product** Page appears as shown below:

4. Scroll down to the required product.
5. In the **Action** column, click the **Select** link associated with the required product. The menu appears as shown in the following figure:

6. Click **Edit**. The selected product information page appears as shown in the following figure:

7. Scroll down to the **Fyndiq** tab, and then click the tab. The tab is expanded and the relevant fields appear as shown in the following figure:

Fyndiq

8. On this page, make the required changes, and then click the **Save** button.
The changes are saved and a success message appears on the **Manage Products** page.

6.2. Upload a Single Product

To upload a single product

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu.

3. Click on **Products**.

The **Manage Product** Page appears as shown below:
