1. Overview

The **Spartoo Integration for Magento 2** by CedCommerce, helps the Magento® 2 store owners to boost their business and generate the revenue as it interacts with Spartoo API's to connect the Magento® 2 store to Spartoo marketplace.

Admin gets the authority to create Spartoo Categories and the dependent attributes on the Magento 2 store. It also enables you to establish a mapping of the desired product category on the Magento 2 store for automatic submission of the selected product to the same category on Spartoo.com.

This extension provides an opportunity to cover a wide range of customers.

This extension interacts with the Spartoo Marketplace to integrate the synchronized product listing between Magento® 2 Store and the Spartoo.com retailers.

It enables the admin to manage the Spartoo orders on the seller's Magento® 2 stores without making any significant changes to operational functionalities.

Synchronizing orders, products, pricing, and inventory is possible through establishing the communication between Spartoo APIs and the Magento® 2 store.

Key Features are as follows:

- **Product Upload Based on Profile:** Enables the admin to create a profile based on single category, and then assign the products and upload on the basis of categories.
- Bulk upload Methodology: Admin gets the authority to upload bulk products on Spartoo but just selecting the products and upload in one go.
- Magento Order creation: The newly placed orders on Spartoo.com are automatically created in the Magento® 2 store with all the required details as it is on Spartoo.com.
- **Product Data Validation:** The extension enables validating of the product information in accordance with Spartoo standard and values.
- **Product category mapping:** Follows many-to-one category mapping philosophy. Admin can map many categories of the Magento® 2 stores to the single category of Spartoo.
- Auto synchronization: Auto synchronization of the product listing, order, inventory, return and refund, and pricing at regular intervals is established between Magento® 2 Store and Spartoo.com.
- Email Notification: Admin receives the notification through the mail on new order creation, low stock and if the product is rejected from Spartoo.
- Auto-shipment procedure:* Provides admin an ability to automate the process of shipment with Shipstation, Shipwork, Stamps.com, Linnworks, Xtento, ShipRush.

2. Spartoo Integration For Magento 2 Installation

To install the extension

1. Upload and Extract the Spartoo package and Integrator file inside the <magento-root>/app/code/Ced/ directory and run the below command from magento root.

php -dmemory_limit=5G bin/magento setup:upgrade

php -dmemory_limit=5G bin/magento setup:di:compile

php -dmemory_limit=5G bin/magento setup:static-content:deploy -f

php -dmemory_limit=5G bin/magento index:reindex

php -dmemory_limit=5G bin/magento cache:clean

php -dmemory_limit=5G bin/magento cache:flush

3. Retrieve API Credentials from Spartoo

Once the extension is successfully installed in the Magento 2 store, the merchant has to enter the **API Key details** in the respective fields displayed on the **Spartoo Configurations** page while setting up the configurations.

To get the API Key Details from the Spartoo

1. Go to the Spartoo Merchant(http://www.spartoo.it/mp/) link.

The page appears as shown in the following figure:

spartoo
Login
E-mail adress xx@xxx.com
Password
Login

2. Enter login credentials including email and password and click on Login. The page appears as shown in the following figure:

Spartoo
Home
Accueil
Information
Orders

4. Retrieve the credentials from this page and move back to your Magento panel for further settings.

4. Spartoo Configuration Settings

Once the extension is successfully installed in the Magento 2 store, the **SPARTOO INTEGRATION** menu appears on the left navigation bar of the Magento 2 Admin panel. The merchant has to first create a seller account in the Spartoo seller panel. Once the seller account is created and is approved by Spartoo you can proceed with these settings.

To set up the configuration settings in the Magento 2 Admin panel

- 1. Go to the Magento 2 Admin panel.
- 2. On the left navigation bar, click the **SPARTOO INTEGRATION** menu. The menu appears as shown in the following figure:

Û	One or more indexers are invalid. Make sure your Magento cron jo

Installed Extensions		

5. Scroll down to the Spartoo Product Settings tab, and then click the tab. The Spartoo Product Settings tab is expanded and the expanded section appears as shown in the following figure:

Spartoo Product Settings	$\overline{\bigcirc}$
⊘ Spartoo Price Settings	
⊙ Spartoo Inventory Settings	
⊘ Spartoo Product Gernal Settings	
6. Under Spartoo Product Settings, do the following steps: a. Click the Spartoo Price Settings tab. The Spartoo Price Settings tab is expanded and the section appears as shown in the fol figure:	lowing
Spartoo Price Settings	

Product Price [global]	Default Magento Price	•
	Select to send a different product price to Spartoo	
Curreny Conversion	Disable	•
LD	Choose yes to convert the currency	

b. Under **Spartoo Price Settings**, do the following step:

i. In the product **Price** list, select one of the following options: Increase by Fixed Price: If selected, then the **Modify by Fix Price**field appears.

Product Price [global]	Increase By Fixed Price	
	Select to send a different product price to Spartoo	
Modify by Fix Price [global]		

Increase by Fixed Percentage: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to increase the price of the Spartoo, product price by the entered value % of Magento 2 Store price.

Thus, Spartoo Product Price = 105

Decrease by Fixed Price: If selected, then the Modify by Fix Price field appears. Decrease by Fixed Percentage: If selected, then the Modify

by Percentage Price field appears.

Enter the numeric value to decrease the price of the Spartoo product price by the entered value % of Magento 2 price

For Example, Magento 2 price – 5% of Magento 2 price. Magento 2 Price = 100

Select Decrease By Fixed Percentage option

Modify by Fix Price = 5

100 - 5% of 100 = 100 - 5 = 95Thus, Spartoo Product Price = 95

ii. You can enable or Disable the **Currency Conversion** from the next section.By doing so c. Click the **Spartoo Inventory Settings** tab.

The **Spartoo Inventory Settings** tab is expanded and the section appears as shown in the following figure:

Spartoo Inventory Settings

Set Inventory on Basis of Threshold [global]

Disable

•

Choose yes to send inventory on spartoo by condition

i. Under Spartoo Inventory Settings tab, do the following steps:

i. In the **Set Inventory on Basis of Threshold** list, select the **Enable** option if required to set the inventory based on a threshold.

Note: Only when the admin selects **Enable**, the other fields appear. Threshold Inventory is the minimum count of an item that the store owner wants to keep in stock.

The section appears as shown in the following figure:

⊘ Spartoo Inventory Settings

Set Inventory on Basis of Threshold [global]	Enable
	Choose yes to send inventory on spartoo by condition
Inventory Threshold Value [global]	
	Set inventory quantity on which lesser and greater condition can control.
Send Inventory for Lesser Than Threshold Case	
[global]	Send Quantity to Spartoo for those products, whose inventory is LESSER than the inventory threshold.
Send Inventory for Greater Than Threshold Case	
[global]	Send Quantity to Spartoo for those products, whose inventory is GREATER than the inventory threshold.

- ii. In the **Inventory Threshold Value** box, enter the required threshold value for your inventory. This will decide the next two fields.
- iii. In **the Send Inventory for Lesser Than Threshold Case** box, enter the required value. If the number of products in your inventory reach below the threshold value, this number will be shown on the Spartoo marketplace.
- iv. In **the Send Inventory for Greater Than Threshold Case** box, enter the required value. This value will show on the Spartoo marketplace when the products in the inventory is more than the threshold value.
- 4. Click on Spartoo Product General Setting and the tab gets expanded as:

Spartoo Product General Settings

Set Child Image On Parent ^[global]	Disable	•
	Choose yes to set the child Image to parent .If image is exist on parent.	s not
Set Child price to parent [global]	Disable	•
	Select yes to set the child price to parent .lf price is no on parent.	t exist
Enable currency converter [global]	Disable	•
	If you enable the currency convte we convert your cur price and send it to parket place.	rent

- i. Choose Enable or Disable in **Set Child Image On Parent**. By Enabling this If an image does not exist on parent product, the child image will be set as the parent.
- ii. Choose Enable or Disable in **Set Child Price to Parent.** By Enabling this If the price of parent product is missing, the price of the child will be set as the parent.
- iii. If you wish to convert your current price and send it to market place, Choose Enable in the **Enable Currency converter.**

5. Scroll down to the **Spartoo Order Settings** tab, and then click the tab. The tab is expanded and the section appears as shown in the following figure:

Order Notification Email [global]	
Order Fetch Start date [global]	06/03/2019
	Select Date
Default Customer email [global]	Enter the mail id by which you want to create your customer
Order Fetch For Out Of Stock Product [global]	Yes Order Create for out of stock products
Create New Product (if Not Exist) on the time of oreder creation [global]	Yes Create New Product if SKU not found in Magento Store on the time of Order Fetch
Spartoo Order Id Prefix [global]	Prefix for Spartoo Increment ID

Spartoo Order Settings

6. Under Spartoo Order Settings, do the following steps:

- i. In the **Order Notification Email** box, enter the required email Id on which you wish to receive the notifications for any new orders recieved or canceled.
- ii. Enter the Date on which you wish to start fetching the orders in Order Fetch Start Date.
- iii. In the **Default Customer Email**, enter the email id of the default customer that you need to create for your orders.

The field appears as shown in the following figure:

- iv. If you wish to receive orders even when you run out of stock, Choose Yes in the Order Fetch For Out Of Stock Product.
- v. In case you come across a situation where New Product is found, then you can import the SKUs to your Magento store by selecting YES in **Create New Product (if Not Exist) on the time of order creation.**
- vi. In the **Spartoo Order Id Prefix**, enter the Prefix you wish to apply in front of the order number for your recognization.
- 7. Scroll down to the Spartoo Cron Settings tab, and then click the tab.

The tab is expanded and the section appears as shown in the following figure:

Spartoo Cron Settings

Order Cron [global]	Enable	
	Order Fetch Cron	
Inventory Price Cron [global]	Enable	•
	Inventory Sync Cron	

i. Under Spartoo Cron Settings, do the following steps:

- i. In the **Order Cron** list, select the **Enable** option to enable the fetch order cron.
- ii. In the **Inventory | Price Cron** list, select the **Enable** option to enable the Inventory & Price Sync cron.
- ii. Click the **Save Config** button to save the entered values.

The configuration settings are saved and a success message appears on the page.

5. Manage Accounts

To Manage Account On Spartoo

- Go to the Magento 2 admin panel.
- On the left navigation bar, click Spartoo Integration.

• When the menu appears, click Manage Accounts.

• On clicking it, you will be navigated to the page as shown below:

	Discount Rate *	Enter the discount rate			

- Choose Enable in **Discount Enable** section to allow discounts for the products of the selected account. As soon as you do so additional discount settings options will show up.
- In **Discount Start Date** enter the date from which the discount is applicable.
- In **Discount End Date** enter the date from which the discount ends.
- From the **Discount Type** select the type of discount you wish to apply. You can either select the fixed discount or you can set a rate of discount.
- Enter the value of the discount in the next section.
- Click on the **Save** button and the account will be created.

6. Manage Spartoo Profile

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento 2 store attributes to the Spartoo attributes. These attributes are applicable to all the products that are assigned to the profile.

Admin can do the following tasks:

- Add new profile
- Edit the existing profile
- Bulk Action on the Selected Profiles

6.1. Add A New Profile

Profile Edit To add a new profile

- 1. Go to the Magento 2 Admin panel.
- 2. On the left navigation bar, click the SPARTOO INTEGRATION menu.

3. Then click Profile Manager.

4. The **Manage Profile** page appears as shown in the following figure: Manage Profile

7.2. Bulk Actions On Selected Products

Admin can perform the following tasks through the Bulk Action feature:

- Generate Product XML: In order to create the product that could be uploaded on Spartoo marketplace, you first need to create an XML file. To do so in bulk you can do it from here only.
- Sync Inventory: To update the inventory of the selected products on Spartoo. This action completes the

entire job related to the product inventory and also it manages the quantity related issues. *For example*, if the user has changed the product price on the Magento 2 store and also wants to change the price on Spartoo then this action is applicable. The price is updated when the user submits this action for the selected product.

• Status Update on Spartoo: In order to keep the status of the product on the Magento panel as well as on Spartoo you need to update the current status of the products. This action allows you to Update the status of the products on Spartoo.

To submit the selected bulk action on the selected products

- 1. Go to the Magento 2 Admin panel.
- 2. On the left navigation bar, click the **SPARTOO INTEGRATION** menu.

The menu appears as shown in the following figure:

- c. A confirmation dialog box appears.
- d. Click the **OK** button.
- e. All the product feed will get truncated for that account.

8. Manage Spartoo Orders

Admin can do the following tasks while managing the Newegg orders:

- Fetch New Orders
- · View Spartoo Orders
- Ship Orders
- Delete the Spartoo Orders

8.1. Fetch, View, Ship and Delete Spartoo Orders

The Magento 2 store owners can fetch the new orders and view all the order details fetched from Spartoo. They can also ship the required orders and can delete the orders those are no more required.

To fetch and view new orders

- 1. Go to the Magento 2 Admin panel.
- 2. On the left navigation bar, click the **SPARTOO INTEGRATION** menu.
 - The menu appears as shown in the following figure:

3. Click Orders Listing.

Ŵ	Spartoo Integration	×		
CASHBOARD	Configurations	Developer		
\$ SALES	Configuration	Feeds		
÷	Manage Accounts	Activity Logs		
SPARTOO INTEGRATION		Cron Logs		
CATALOG	Products	Inventory/Price Cron Scheduler		
R	Profile Manager			
CUSTOMERS	Product Listing	Extras		
MARKETING		Help and Support		
CONTENT	Orders			
REPORTS	Orders Listing			

4. The **Spartoo Order List** page appears as shown in the following figure:

Spai	rtoo Orders	Q 📫	3 💄 admin 🗸							
	Fetch Sparto									
	Filters Oefault View Columns									
Action	is • 1 reco	ords found			20 • p	ber page <	1 of 1 >			
	Magento Increment Id	Account Id	Order Place Date	Spartoo Order Status	Failed Order Reason	Spartoo Order Id	Actions			
	00000004	test	2013-02-12	Completed		90D813EA1A2365A8	0/i			

5. Click the Fetch Spartoo Orders button.

If the order is imported successfully then, a new record is found in the Orders Grid table as shown in the figure.

Notes:

• Orders are automatically imported through CRON in every 10 minutes.

- Whenever the latest orders are imported from Spartoo, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported into the Magento store admin panel.
- If no Order is imported, then check the Failed orders listed on the Failed Order reason column.
- Order are auto-rejected on Spartoo in the following conditions:
 - When Spartoo Product SKU does not exist in Magento store.
 - When Product is Out of Stock in Magento store.
 - When a product is disabled in Magento store.

To ship the order

Go to the Magento 2 Admin panel.

- 1. On the left navigation bar, click the **SPARTOO INTEGRATION** menu. A menu appears.
- 2. Click Orders Listing.

The Spartoo Order List page appears as shown in the following figure:

Spai	too Orders	Q 📫	3 🧘 admin 🗸				
		Fetch Spa	artoo Orders				
Action	Filters Default View Columns Actions • 1 records found 20 • per page 1 of 1
