1. Overview

The **Spartoo Integration for Magento 2** by CedCommerce, helps the Magento® 2 store owners to boost their business and generate the revenue as it interacts with Spartoo API's to connect the Magento® 2 store to Spartoo marketplace.

Admin gets the authority to create Spartoo Categories and the dependent attributes on the Magento 2 store. It also enables you to establish a mapping of the desired product category on the Magento 2 store for automatic submission of the selected product to the same category on Spartoo.com.

This extension provides an opportunity to cover a wide range of customers.

This extension interacts with the Spartoo Marketplace to integrate the synchronized product listing between Magento® 2 Store and the Spartoo.com retailers.

It enables the admin to manage the Spartoo orders on the seller's Magento® 2 stores without making any significant changes to operational functionalities.

Synchronizing orders, products, pricing, and inventory is possible through establishing the communication between Spartoo APIs and the Magento® 2 store.

Key Features are as follows:

- **Product Upload Based on Profile:** Enables the admin to create a profile based on single category, and then assign the products and upload on the basis of categories.
- **Bulk upload Methodology:** Admin gets the authority to upload bulk products on Spartoo but just selecting the products and upload in one go.
- **Magento Order creation:** The newly placed orders on Spartoo.com are automatically created in the Magento® 2 store with all the required details as it is on Spartoo.com.
- **Product Data Validation:** The extension enables validating of the product information in accordance with Spartoo standard and values.
- **Product category mapping:** Follows many-to-one category mapping philosophy. Admin can map many categories of the Magento® 2 stores to the single category of Spartoo.
- **Auto synchronization:** Auto synchronization of the product listing, order, inventory, return and refund, and pricing at regular intervals is established between Magento® 2 Store and Spartoo.com.
- **Email Notification:** Admin receives the notification through the mail on new order creation, low stock and if the product is rejected from Spartoo.
- **Auto-shipment procedure:*** Provides admin an ability to automate the process of shipment with Shipstation, Shipwork, Stamps.com, Linnworks, Xtento, ShipRush.

2. Spartoo Integration For Magento 2 Installation

To install the extension

1. Upload and Extract the Spartoo package and Integrator file inside the **<magento-root>/app/code/Ced/** directory and run the below command from magento root.

```
php -dmemory_limit=5G bin/magento setup:upgrade
php -dmemory_limit=5G bin/magento setup:di:compile
php -dmemory_limit=5G bin/magento setup:static-content:deploy -f
php -dmemory_limit=5G bin/magento index:reindex
php -dmemory_limit=5G bin/magento cache:clean
php -dmemory_limit=5G bin/magento cache:flush
```

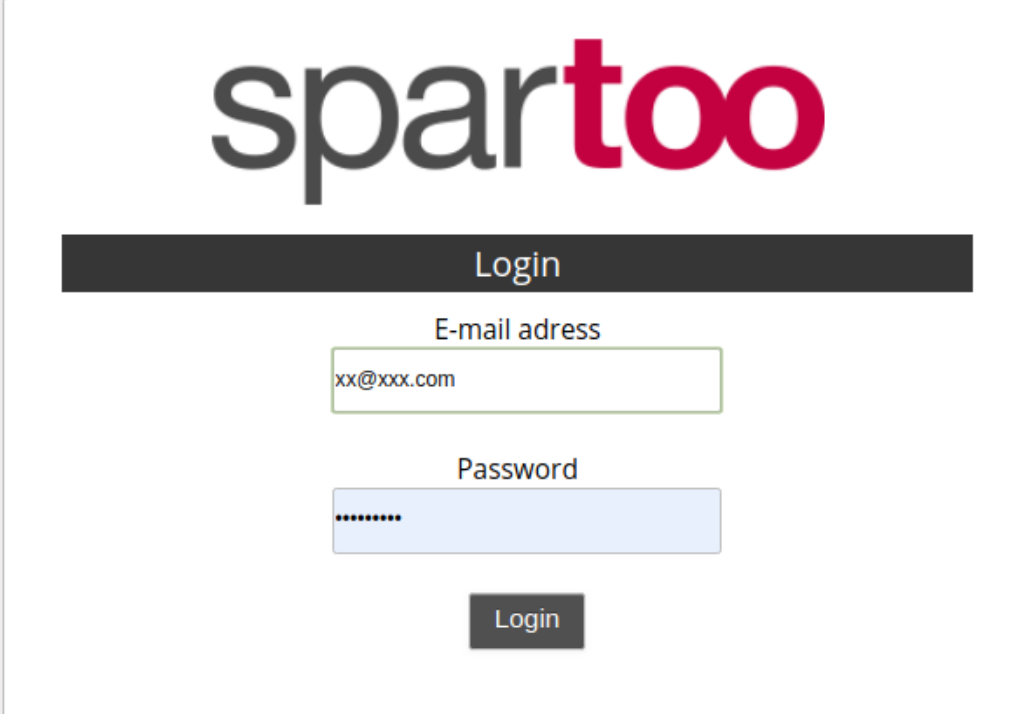

3. Retrieve API Credentials from Spartoo

Once the extension is successfully installed in the Magento 2 store, the merchant has to enter the **API Key details** in the respective fields displayed on the **Spartoo Configurations** page while setting up the configurations.

To get the API Key Details from the Spartoo

1. Go to the Spartoo Merchant(<http://www.spartoo.it/mp/>) link.

The page appears as shown in the following figure:

The image shows the Spartoo Merchant login page. At the top is the 'spartoo' logo in a sans-serif font, with 'spart' in grey and 'too' in red. Below the logo is a dark grey horizontal bar with the word 'Login' in white. Underneath this bar, the text 'E-mail adress' is centered above a white input field containing the placeholder text 'xx@xxx.com'. Below the email field, the text 'Password' is centered above a light blue input field filled with dots. At the bottom of the form is a dark grey button with the word 'Login' in white.

2. Enter login credentials including email and password and click on Login.
The page appears as shown in the following figure:

3. Click on the information and you will be redirected to the page containing all the relevant information regarding your account on Spartoo.

Information

Id Partner commerciale per webservice

Name of the company

Name of the company

Email address

Telephone number

Company address

Postal code

City

Logo:

VAT number

Return address

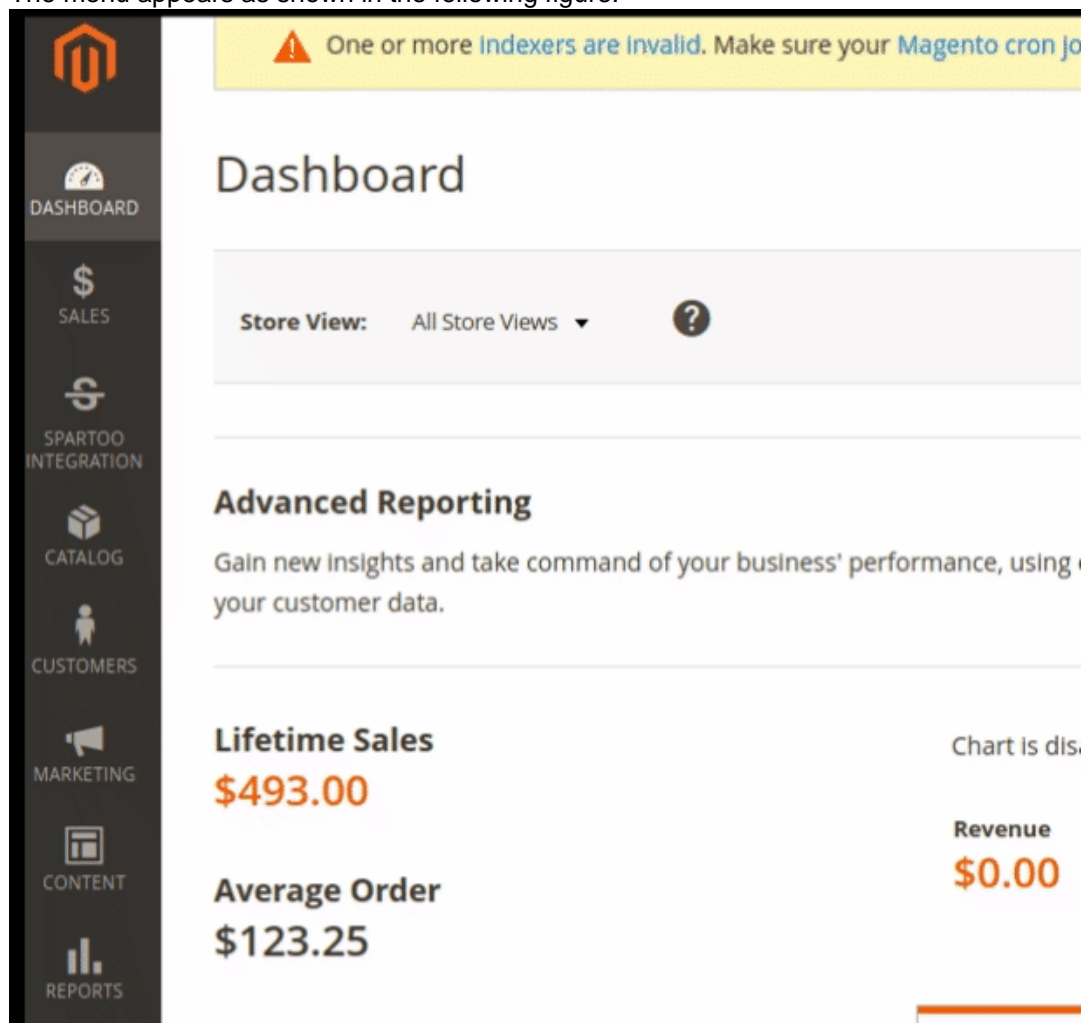

4. Retrieve the credentials from this page and move back to your Magento panel for further settings.

4. Spartoo Configuration Settings

Once the extension is successfully installed in the Magento 2 store, the **SPARTOO INTEGRATION** menu appears on the left navigation bar of the Magento 2 Admin panel. The merchant has to first create a seller account in the Spartoo seller panel. Once the seller account is created and is approved by Spartoo you can proceed with these settings.

To set up the configuration settings in the Magento 2 Admin panel

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **SPARTOO INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Configuration**.

4. The Spartoo Configuration page appears as shown in the following figure:

5. Scroll down to the **Spartoo Product Settings** tab, and then click the tab.
The **Spartoo Product Settings** tab is expanded and the expanded section appears as shown in the following figure:

Spartoo Product Settings

☐ Spartoo Price Settings

☐ Spartoo Inventory Settings

☐ Spartoo Product Gernal Settings

6. Under **Spartoo Product Settings**, do the following steps:

a. Click the **Spartoo Price Settings** tab.

The **Spartoo Price Settings** tab is expanded and the section appears as shown in the following figure:

☒ Spartoo Price Settings

Product Price [global]

Select to send a different product price to **Spartoo**

Currency Conversion [global]

Choose enable to convert the currency

b. Under **Spartoo Price Settings**, do the following step:

i. In the product **Price** list, select one of the following options:

Increase by Fixed Price: If selected, then the **Modify by Fix Price** field appears.

Product Price [global]

Select to send a different product price to **Spartoo**

Modify by Fix Price [global]

Increase by Fixed Percentage: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to increase the price of the Spartoo, product price by the entered value % of Magento 2 Store price.

Product Price [global]

Select to send a different product price to **Spartoo**

Modify by Percentage Price [global]

Numeric value Required for **Add/subtract % on Magento price** 5 for Example: Magento price +/- 5% of Magento price.

For Example,

Magento 2 price + 5% of Magento 2 price.

Magento 2 Price = 100

Select **Increase By Fixed Percentage** option

Modify by Percentage Price = 5

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, Spartoo Product Price = 105

Decrease by Fixed Price: If selected, then the **Modify by Fix Price** field appears.

Decrease by Fixed Percentage: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to decrease the price of the Spartoo product price by the entered value % of Magento 2 price

For Example,

Magento 2 price – 5% of Magento 2 price.

Magento 2 Price = 100

Select **Decrease By Fixed Percentage** option

Modify by Fix Price = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, Spartoo Product Price = 95

- ii. You can enable or Disable the **Currency Conversion** from the next section. By doing so
- c. Click the **Spartoo Inventory Settings** tab. Under the **Spartoo Inventory Settings** tab, do the following steps:
 - i. In the **Set Inventory on Basis of Threshold** list, select the **Enable** option if required to set the inventory based on a threshold.

⊖ Spartoo Inventory Settings

Set Inventory on Basis of Threshold [global] ▾

Choose enable to send inventory on spartoo by condition

Note: Only when the admin selects **Enable**, the other fields appear. Threshold Inventory is the minimum count of an item that the store owner wants to keep in stock. The section appears as shown in the following figure:

⊖ Spartoo Inventory Settings

Set Inventory on Basis of Threshold [global] ▾

Choose enable to send inventory on spartoo by condition

Inventory Threshold Value [global]

Set inventory quantity on which lesser and greater condition can control.

Send Inventory for Lesser Than Threshold Case [global]

Send Quantity to Spartoo for those products, whose inventory is LESSER than the inventory threshold.

Send Inventory for Greater Than Threshold Case [global]

Send Quantity to Spartoo for those products, whose inventory is GREATER than the inventory threshold.

- ii. In the **Inventory Threshold Value** box, enter the required threshold value for your inventory. This will decide the next two fields.
- iii. In the **Send Inventory for Lesser Than Threshold Case** box, enter the required value. If the number of products in your inventory reach below the threshold value, this number will be shown on the Spartoo marketplace.
- iv. In the **Send Inventory for Greater Than Threshold Case** box, enter the required value.

This value will show on the Spartoo marketplace when the products in the inventory is more than the threshold value.

- d. Click on **Spartoo Product General Setting** and the tab gets expanded as:

⌵ Spartoo Product Gernal Settings

Set Child Image On Parent <small>[global]</small>	Disable ▼
<small>Choose enable to set the child Image to parent .If image is not exist on parent.</small>	
Set Child price to parent <small>[global]</small>	Disable ▼
<small>Select enable to set the child price to parent .If price is not exist on parent.</small>	
Set Child colour to parent <small>[global]</small>	Disable ▼
<small>Select enable to set the child colour to parent .If price is not exist on parent.</small>	

- e. Under **Spartoo Product General Setting** do the following steps:

- Choose Enable or Disable in **Set Child Image On Parent**. By Enabling this If an image does not exist on parent product, the child image will be set as the parent.
- Choose Enable or Disable in **Set Child Price to Parent**. By Enabling this If the price of parent product is missing, the price of the child will be set as the parent.
- In **Set Child color to Parent**, select **Yes** to set the child color to parent.

- f. Scroll down to the **Spartoo Order Settings** tab, and then click the tab.

The tab is expanded and the section appears as shown in the following figure:

Spartoo Order Settings

Order Notification Email <small>[global]</small>	<input type="text"/>
Order Fetch Start date <small>[global]</small>	06/03/2019 <input type="button" value="Select Date"/>
Default Customer email <small>[global]</small>	<input type="text"/> <small>Enter the mail id by which you want to create your customer</small>
Order Fetch For Out Of Stock Product <small>[global]</small>	Yes ▼ <small>Order Create for out of stock products</small>
Create New Product (if Not Exist) on the time of order creation <small>[global]</small>	Yes ▼ <small>Create New Product if SKU not found in Magento Store on the time of Order Fetch</small>
Spartoo Order Id Prefix <small>[global]</small>	<input type="text"/> <small>Prefix for Spartoo Increment ID</small>

- g. Under **Spartoo Order Settings**, do the following steps:

- In the **Order Notification Email** box, enter the required email Id on which you wish to receive the notifications for any new orders recieved or canceled.

- ii. Enter the Date on which you wish to start fetching the orders in **Order Fetch Start Date**.
- iii. In the **Default Customer Email**, enter the email id of the default customer that you need to create for your orders.
- iv. If you wish to receive orders even when you run out of stock, Choose Yes in the **Order Fetch For Out Of Stock Product**.
- v. In case you come across a situation where New Product is found, then you can import the SKUs to your Magento store by selecting YES in **Create New Product (if Not Exist) on the time of order creation**.
- vi. In the **Spartoo Order Id Prefix**, enter the Prefix you wish to apply in front of the order number for your recognition.
- h. Scroll down to the **Spartoo Cron Settings** tab, and then click the tab.
The tab is expanded and the section appears as shown in the following figure:

Spartoo Cron Settings

The screenshot displays the 'Spartoo Cron Settings' section. It contains two settings, each with a label, a scope indicator '[global]', a value dropdown, and a description below it.

Setting Name	Scope	Value	Description
Order Cron	[global]	Enable	Order Fetch Cron
Inventory Price Cron	[global]	Enable	Inventory Sync Cron

- i. Under **Spartoo Cron Settings**, do the following steps:
 - i. In the **Order Cron** list, select the **Enable** option to enable the fetch order cron.
 - ii. In the **Inventory | Price Cron** list, select the **Enable** option to enable the Inventory & Price Sync cron.
- ii. Click the **Save Config** button to save the entered values.
The configuration settings are saved and a success message appears on the page.

5. Manage Accounts

To Manage Account On Spartoo

- Go to the Magento 2 admin panel.
- On the left navigation bar, click **Spartoo Integration**.

The screenshot shows the Magento 2 Dashboard interface. At the top, a yellow warning banner states: "One or more [Indexers](#) are invalid. Make sure your [Magento cron jobs](#) are running." Below this, the "Dashboard" title is displayed. A "Store View:" dropdown menu is set to "All Store Views" with a help icon. The main section is titled "Advanced Reporting" with the subtitle "Gain new insights and take command of your business' performance, using your customer data." Below this, there are two summary cards: "Lifetime Sales" showing "\$493.00" and "Average Order" showing "\$123.25". To the right, a "Revenue" card shows "\$0.00". A sidebar on the left contains navigation links: DASHBOARD, SALES, SPARTOO INTEGRATION, CATALOG, CUSTOMERS, MARKETING, CONTENT, and REPORTS. A "Chart is displayed" message is partially visible on the right.

One or more [Indexers](#) are invalid. Make sure your [Magento cron jobs](#) are running.

- Enter the value of the discount in the next section.
- Click on the **Save** button and the account will be created.

6. Manage Spartoo Profile

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento 2 store attributes to the Spartoo attributes. These attributes are applicable to all the products that are assigned to the profile.

Admin can do the following tasks:

- Add new profile
- Edit the existing profile
- Bulk Action on the Selected Profiles

6.1. Add A New Profile

Profile Edit To add a new profile

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **SPARTOO INTEGRATION** menu.

The screenshot displays the Magento 2 Dashboard interface. At the top, a yellow warning banner states: "One or more [Indexers](#) are invalid. Make sure your [Magento cron jobs](#) are running." Below this, the "Dashboard" title is prominently displayed. A "Store View" dropdown menu is set to "All Store Views" with a help icon. The "Advanced Reporting" section provides a brief overview: "Gain new insights and take command of your business' performance, using your customer data." The main content area features several key performance indicators (KPIs): "Lifetime Sales" at \$493.00, "Average Order" at \$123.25, and "Revenue" at \$0.00. A partially visible "Chart is displayed" message is also present. The left sidebar contains navigation links for Dashboard, Sales, Spartoo Integration, Catalog, Customers, Marketing, Content, and Reports.

One or more [Indexers](#) are invalid. Make sure your [Magento cron jobs](#) are running.

The **Actions** list appear as shown in the following figure:

3. Click the **Delete** option.
A confirmation dialog box appears.
4. Click the **OK** button.
The selected profiles are deleted.

To disable the selected profiles, do the following steps:

1. Select the required profiles.
2. Click the **Arrow** button next to the **Actions** field.
The **Actions** list appear as shown in the following figure:

3. Click the **Disable** option.
The selected profiles are disabled.

To enable the selected profiles, do the following steps:

1. Select the required profiles.
2. Click the **Arrow** button next to the **Actions** field.
The **Actions** list appear as shown in the following figure:

3. Click the **Enable** option.
The selected profiles are enabled.

7. Spartoo Products

On this page, admin can view, edit, and validate the individual product. Also, the admin can view the error message if any error exists in any product details. After uploading the product on Spartoo or after updating the product inventory or the product price, the user can check the status of the feed. Also, can view the feed error if any. The admin can also submit certain actions on the selected products available on the **Spartoo Product Listing** page.

This section covers the following topics:

- Edit the Spartoo Products
- Submit Bulk Action on the Selected Products

7.1. Edit Spartoo Products

To edit the product

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **SPARTOO INTEGRATION** menu.
The menu appears as shown in the following figure:

The screenshot displays the Magento 2 Dashboard interface. On the left is a dark sidebar with navigation icons and labels: DASHBOARD, SALES, SPARTOO INTEGRATION, CATALOG, CUSTOMERS, MARKETING, CONTENT, and REPORTS. The main content area has a light gray header with a warning message: "One or more Indexers are Invalid. Make sure your Magento cron jobs are running." Below this is the "Dashboard" title and a "Store View" dropdown set to "All Store Views". The "Advanced Reporting" section follows, with a description: "Gain new insights and take command of your business' performance, using your customer data." Below this are two summary cards. The first card, "Lifetime Sales", shows a value of "\$493.00" and a note "Chart is displayed". The second card, "Average Order", shows a value of "\$123.25". To the right of the "Average Order" card, there is a "Revenue" section showing a value of "\$0.00".

One or more [Indexers](#) are Invalid. Make sure your [Magento cron jobs](#) are running.

7. Scroll down to the required product row.

8. In the **Action** column of the respective row, click the **Edit Icon**.

9. Enter the required information, and then click the **Save** button.

The changes are saved and the success message appears on the Spartoo Product Listing page.

7.2. Bulk Actions On Selected Products

Admin can perform the following tasks through the Bulk Action feature:

- **Generate Product XML:** In order to create the product that could be uploaded on Spartoo marketplace, you first need to create an XML file. To do so in bulk you can do it from here only.
- **Sync Inventory:** To update the inventory of the selected products on Spartoo. This action completes the entire job related to the product inventory and also it manages the quantity related issues. *For example*, if the user has changed the product price on the Magento 2 store and also wants to change the price on Spartoo then this action is applicable. The price is updated when the user submits this action for the selected product.
- **Status Update on Spartoo:** In order to keep the status of the product on the Magento panel as well as on Spartoo you need to update the current status of the products. This action allows you to Update the status of the products on Spartoo.

To submit the selected bulk action on the selected products

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **SPARTOO INTEGRATION** menu.
The menu appears as shown in the following figure:

The screenshot shows the Magento 2 Dashboard interface. At the top, a yellow warning banner states: "One or more [Indexers](#) are invalid. Make sure your [Magento cron jobs](#) are running." Below this, the "Dashboard" title is displayed. A "Store View" dropdown menu is set to "All Store Views" with a help icon. The "Advanced Reporting" section is active, with a description: "Gain new insights and take command of your business' performance, using your customer data." The "Lifetime Sales" report shows a value of "\$493.00" and a note "Chart is displayed". The "Average Order" report shows a value of "\$123.25". The "Revenue" report shows a value of "\$0.00". The left sidebar contains navigation links for Dashboard, Sales, Spartoo Integration, Catalog, Customers, Marketing, Content, and Reports.

One or more [Indexers](#) are invalid. Make sure your [Magento cron jobs](#) are running.

5. To generate XML for the selected products, do the following steps:
- Select the check boxes associated with the required products.
 - In the **Actions** list, click the arrow button.

A list appears as shown in the figure:

- c. Click **Generate Product XML**.

A confirmation dialog box appears.

- d. Click the **OK** button.

The selected products are processed and the XML of the selected products are generated and the **Upload Products** page appears as shown in the following figure:

Uploading Status

- 💡 Starting Product upload execution, please wait...
- ⚠ Warning: Please do not close the window during uploading data
- ✅ Total 1 Batch(s) Found.
- ✅ 100% 1 Of 1 Processed.
- ✅ 0 Batch(s) Successfully Uploaded.
- 💡 Finished product uploading execution.

- e. If there is an error in the Generation process, then it appears on the page.

- f. Click the **Back** button to go back to the **Spartoo Product Listing** page.

- g. If there is an error, then correct the issues and upload the selected products again.

6. To sync the inventory for the selected products, do the following steps:

- a. Select the check boxes associated with the required products.

- b. In the **Actions** list, click the arrow button.

A list appears as shown in the figure:

- c. Click **Sync Inventory**.

A confirmation dialog box appears.

- d. Click the **OK** button.

The inventories and the prices of the selected products are processed for updation and the Price Inventory page appears.

If there is an error in the updation process, then it appears on the page.

- e. Click the **Back** button to go back to the **Spartoo Product Listing** page.

- f. If there is an error, then correct the issues and update price and inventories of the selected products again.

7. To update the status the selected products, do the following steps:

- a. Select the check boxes associated with the required products.

- b. In the **Actions** list, click the arrow button.

A list appears as shown in the figure:

- c. Click **Status Update on Spartoo**.
A confirmation dialog box appears.

- d. Click the **OK** button.
8. To *send the selected products to Spartoo*, do the following steps:
- Select the check boxes associated with the required products.
 - Click on the button **Send Products To Spartoo**

- c. A confirmation dialog box appears.
- d. Click the **OK** button.

9. To *Truncate the feed for the selected products on Spartoo*, do the following steps:
- Select the check boxes associated with the required products.
 - Click on the button **Truncate the Feed** located at the top right corner.

- A confirmation dialog box appears.
- Click the **OK** button.
- All the product feed will get truncated for that account.

8. Manage Spartoo Orders

Admin can do the following tasks while managing the Newegg orders:

- Fetch New Orders
- View Spartoo Orders
- Ship Orders
- Delete the Spartoo Orders

8.1. Fetch, View, Ship and Delete Spartoo Orders

The Magento 2 store owners can fetch the new orders and view all the order details fetched from Spartoo. They can also ship the required orders and can delete the orders those are no more required.

To fetch and view new orders

- Go to the **Magento 2 Admin** panel.
- On the left navigation bar, click the **SPARTOO INTEGRATION** menu.
The menu appears as shown in the following figure:

The screenshot shows the Magento 2 Dashboard interface. At the top, a yellow warning banner states: "One or more [Indexers](#) are invalid. Make sure your [Magento cron jobs](#) are running." Below this, the "Dashboard" title is displayed. A "Store View" dropdown menu is set to "All Store Views" with a help icon. The "Advanced Reporting" section follows, with a description: "Gain new insights and take command of your business' performance, using your customer data." Below this, a table of metrics is shown:

Metric	Value	Additional Info
Lifetime Sales	\$493.00	Chart is disabled
Average Order	\$123.25	
Revenue	\$0.00	

The left sidebar contains navigation links: DASHBOARD, SALES, SPARTOO INTEGRATION, CATALOG, CUSTOMERS, MARKETING, CONTENT, and REPORTS.

3. Click **Orders Listing**.

4. The **Spartoo Order List** page appears as shown in the following figure:

5. Click the **Fetch Spartoo Orders** button.

If the order is imported successfully then, a new record is found in the Orders Grid table as shown in the figure.

Notes:

- Orders are automatically imported through CRON in every 10 minutes.

- Whenever the latest orders are imported from Spartoo, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported into the Magento store admin panel.
- If no Order is imported, then check the Failed orders listed on the **Failed Order** reason column.
- Order are auto-rejected on Spartoo in the following conditions:
 - When Spartoo Product SKU does not exist in Magento store.
 - When Product is Out of Stock in Magento store.
 - When a product is disabled in Magento store.

To ship the order

Go to the **Magento 2 Admin** panel.

1. On the left navigation bar, click the **SPARTOO INTEGRATION** menu.
A menu appears.
2. Click **Orders Listing**.
The **Spartoo Order List** page appears as shown in the following figure:
