1. Overview

Google Shopping is a service by Google allowing customers to search, view, and compare products. It was launched as Froogle on February 12, 2002. Google Shopping is a service and program that allows customers to search, compare and shop for physical products across different retailers who have paid to advertise their products. For the longest time, around a decade to be more accurate, Google Shopping was simply a place where products were simply indexed based on Keywords.

Magento Integration for Google Shopping Feed is a solution for sellers to help boost their business growth. This innovative integration is the tool for all the sellers to automate their selling process with its exclusive features. Uploading your products, managing inventory, and much more is possible on a single dashboard with this handy tool.

Key Features:

- The sellers can easily upload/update products in bulk on the Google Shopping marketplace.
- The sellers can easily manage simple products easily via profiles with Google Shopping Feed integration.
- The feed section helps sellers to track the products sent to Google.
- Managing multiple google account stores from a single Magento 2 store is now much easier.
- The embedded crons automatically synchronize the inventory and price of the products at a regular interval of time.
- Deleting of product in bulk is now easier with the Google Shopping Feed integration for Magento

2. Google Shopping Feed Extension Installation

To install extension

1. Please upload & extract the extension file in app/code/Ced/ directory.

2. Run the below command from the Magento root directory. composer require google/apiclient php -dmemory_limit=-1 bin/magento setup:upgrade php -dmemory_limit=-1 bin/magento setup:di:compile php -dmemory_limit=-1 bin/magento setup:static-content:deploy -f php bin/magento index:reindex php -dmemory_limit=-1 bin/magento cache:clean php -dmemory_limit=-1 bin/magento cache:flush

3. Configure Merchant Account

To configure your Merchant Account

Please

visit http://console.cloud.google.com/apis/credentials(http://console.cloud.google.com/apis/credentials) link to configure it with your merchant account,

1. Go to above link Create a new project,

Select a project	NEW PROJECT
Search projects and folders	
RECENT ALL	
Name	ID
VIProject 55934	caramel-gate-249106

CANCEL OPEN

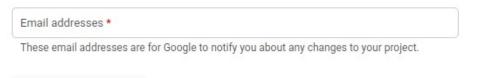

2. Select OAuth consent screen.

OAuth consent screen
Choose how you want to configure and register your app, including your target users. You can only associate one app with your project.
User Type
◯ Internal @
Only available to users within your organization. You will not need to submit your app for verification. Learn more
◯ External ❷
Available to any test user with a Google Account. Your app will start in testing mode and will only be available to users you add to the list of test users. Once your app is ready to push to production, you may need to verify your app. Learn more
CREATE

3. In **User Type** select **External.** The tab appears as shown in the following figure:

4. Configuration Settings

To set up the Configuration Settings,

- 1. Go to the Magento 2 admin panel.
- 2. On the left navigation bar, click on the **Google Shopping Feed Integration** option. The menu appears as shown below:

3. Click on **Configuration**.

The **Configuration** page appears as shown below:

Configuration		Q 🌲 🛓 admin
Scope: Default Config 👻 🕜		Save Config
CEDCOMMERCE	Google Shopping Redirect/Account Settings	G
General Setting	Google Shopping Cron Settings	6
Integrator	Google Shopping Product Upload Setting	e
Google Shopping Configuration		
Google Shopping Configuration		

4. Click on Google Shopping Redirect/Account Settings. The tab expands as:

Google Shopping Redirect/Accoun	nt Settings			\odot
Google Shopping Redirect URL name [global]				
	You need to enter same url in Redirect URI on https://console.cloud.google.com/apis/credentials			
Primary Account [global]	Please select the Account	•	0	
	Create Merchant Account			
	Enable Shopping Api			

- 5. Under Google Shopping Redirect/Account Settings do the following steps:
 - In **Google Shopping Redirect URL Name**, the URL will be displayed that you will be copying in your seller account.
 - In **Primary Account**, a Profile will automatically create for the selected account. Different profiles are created for different accounts so if you are creating a new profile then you have to select the dedicated account for that profile.
 - Click on Create Merchant Account, to create a new merchant account.
 - Click on Enable Shopping Api, to enable the Shopping API from the merchant center.
- 6. Scroll down to Google Shopping Cron Settings, the tab is expanded as:

Google Shopping Cron Settings			\odot
AutoUpload Cron [global]	Enable	•	

- 7. Under Google Shopping Cron Settings, do the following steps:
- In Auto Upload Cron, select Enable if you want to enable the upload cron automatically.
- 8. Now scroll down and click on Google Shopping Product Upload Setting, the tab is expanded as:

Upload Format [global]	CSV Format	•
Debug Mode [giobal]	Yes	•
Product Price [global]	Default Magento Price Select to send different product price to shopping.google.com	•
Product Chunk Size [giobal]	10 Enter the size of a chunk	
Exclude Out of stock [global]	Yes	•
Sale Price [global]	Yes	¥
Sale Price Expires on [global]	2022-01-13	
Tax Price Settings [global]	Yes	٠
Tax Percentage Rate [global]	5 enter Tax Rates applied on shipping (in %)	
Force products to be in stock [giobal]	No if enabled, we will send all products as in stock over google	•
Exclude Disable Products [global]	No	¥
Use MSI Feature For Inventory [giobal]	If enabled, we will exclude disabled products Yes Use MSI feature to send the Inventory to google Adwords , By default :	Ŧ
Use Buffer Quantity For Inventory [giobai]	Pefault Stock is used. Yes	•
Buffer Attribute [website]	google_profile_id Map Product Identifier for Adwords	•
Custom Name [website]	Yes format should be like ##attribute## Text ##attribute## - ##attribut on profile mapping with name	▼ e##

9. Under Google Shopping Product Upload Setting do the following steps:

In **Upload Format**, select the format in which you want to upload the product.

In the **Debug mode**, select **Yes** if you want to enable the debugging mode to create logs. In **Product Price**, select one of the following options:

Increase by Fixed Price: If selected, then the Modify by Fix Price field appears. **Increase by Fixed Percentage:** If selected, then the Modify by Percentage Price field appears.

Enter the numeric value to increase the price of Google Shopping Feed product price by the entered value % of Magento 2 store price.

For Example,

Magento 2 price + 5% of Magento 2 price.

Magento 2 Price = 100

Select Increase By Fixed Percentage option

Modify by Percentage Price = 5

100 + 5% of 100 = 100 + 5 = 105

Thus, Google Shopping Feed Product Price = 105

Decrease by Fixed Price: If selected, then the Modify by Fix Price field appears.

Decrease by Fixed Percentage: If selected, then the Modify by Percentage Price field appears.

Enter the numeric value to decrease the price of the Google Shopping Feed product price by the entered value % of Magento 2 store price

For Example,

Magento 2 price - 5% of Magento 2 price.

Magento 2 Price = 100

Select Decrease By Fixed Percentage option

Modify by Fix Price = 5

100 - 5% of 100 = 100 - 5 = 95

Thus, Google Shopping Feed Product Price = 95

In the Product Chunk Size, enter the default size of a chunk.

In **Exclude Out of stock**, if you select **Yes** then out-of-stock products if will not be uploaded but if you select **No** then the out stock products will also be uploaded along with the other products.

In Sale Price, select Yes if you want to enable the sale price (special price).

In Sale Price Expires on, enter the date on which the special price will end.

In the **Tax Price Settings**, select **Yes** if you want to enable the tax on the price. In the **Tax Percentage Rate**, enter the tax rates.

Next comes **Force products to be in stock** option, Here if enabled, we will send all products will be sent to google as in-stock irrespective of their actual status.

In **Use MSI Feature For Inventory**, select **Yes** if you want o send the inventory to Google Adwords.

In **Use Buffer Quantity For Inventory**, select **Yes** if want buffer quantity. **NOTE:** The selected Buffer Quantity attribute you mention here is subtracted from the default Magento Qty attribute.

Map Product Identifier for Adwords

Then in **Buffer Attribute**, select the buffer attribute to map product identifier for the Google Adwords.

You can also use **Custom Name** for attributes of products being uploaded on Google Shopping. This value can be input in the set default option.

Note: Make sure to use the right format which is that all attribute values must be written

enclosed in ## and name in simple text.

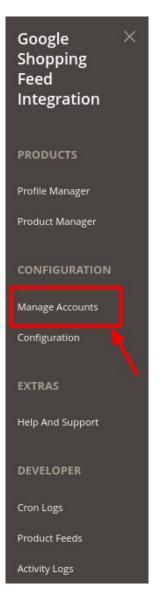

Example: ##attribute## Text ##attribute## – ##attribute##

10. Click on **the Save Config** button. The configuration will be saved.

5. Manage Google Shopping Feed Account

To Manage Accounts

- 1. Go to the Magento 2 admin panel.
- 2. On the left navigation bar, click on the **Google Shopping Feed Integration** option. The menu appears as shown below:

3. Click on Manage Accounts.

The **Manage Account** page appears as shown below:

Man	age A	Account					۹ 🖡	•
