1. Overview

The Bay is one of the largest online marketplaces based in Canada offering a huge consumer base of about 5.7 million loyal customers to sellers. It further offers a wide selection of products & brands online where the marketplace alone accounts for about 3.7 percent share in the apparel market.

The Bay Integration for Magento by CedCommerce is an automated eCommerce solution that helps sellers connect their stores and marketplace accounts. So, they can manage and monitor everything from a centralized platform. It further saves sellers' time and reduces workload by converting manual repetitive tasks into automated ones.

Key Features-

1. **Profile Based Product Upload-** Sellers can upload products based on the profiles created by mapping the attributes and categories.
2. **Synchronised Inventory-** The inventory status and stocks at the marketplace are automatically updated at regular intervals of time using crons.
3. **Bulk Upload System-** The extension uploads products in bulk on the marketplace with just a single click, saving the seller's time and effort.
4. **Rejected Products Update-** The seller is updated about the products that get rejected along with the details of the error due to which it is rejected.
5. **Streamline Order Processing-** The extension automates end-to-end sales & purchase, order import, and shipment processes.

2. Extension Installation

To Install the Extension,

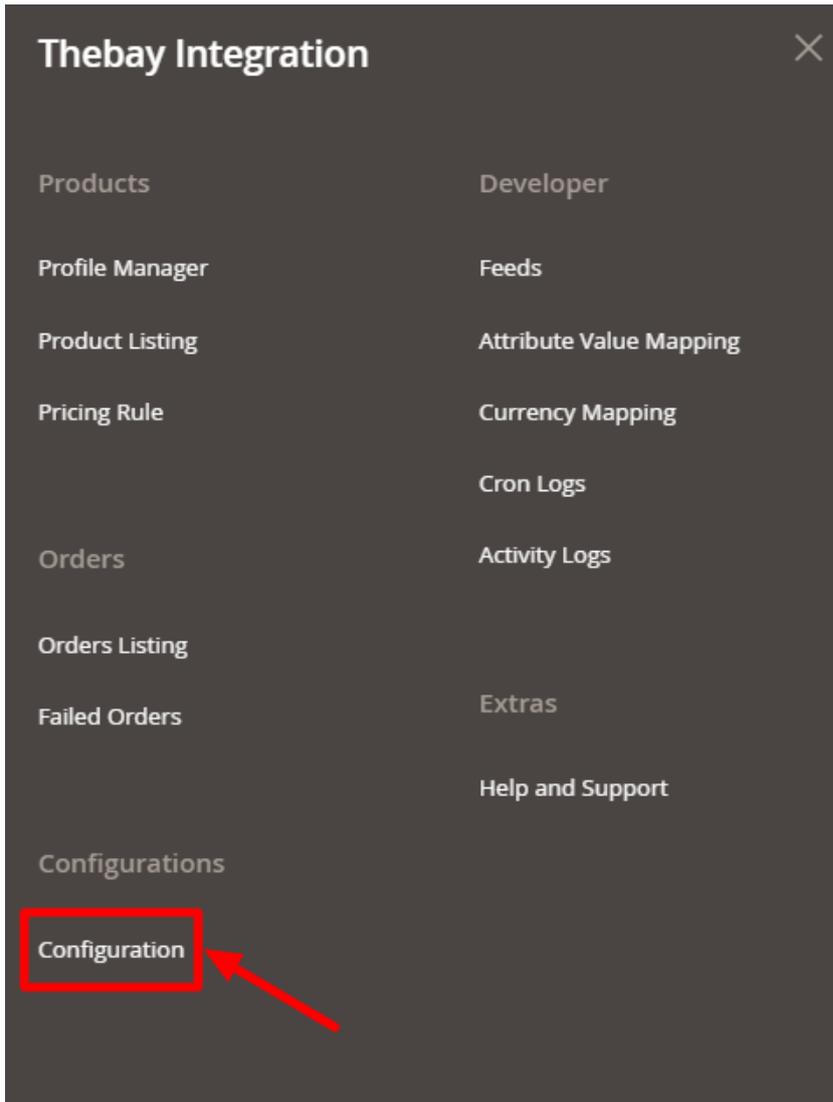

- Log in to the **FTP**, and then go to Magento 2 root folder (generally present under the *public_html* folder).
- Create a new folder named *code* under the *app* folder; under the *code* folder, create a folder named *Ced*.
- Upload or Drag and Drop Thebay and Integrator inside the *app/code/Ced/ directory*.
- After successfully uploading the directory, the extension will be installed/upgraded.
- Now run the following upgrade command in cmd:

```
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy -f
php bin/magento indexer:reindex
php bin/magento cache:flush
```

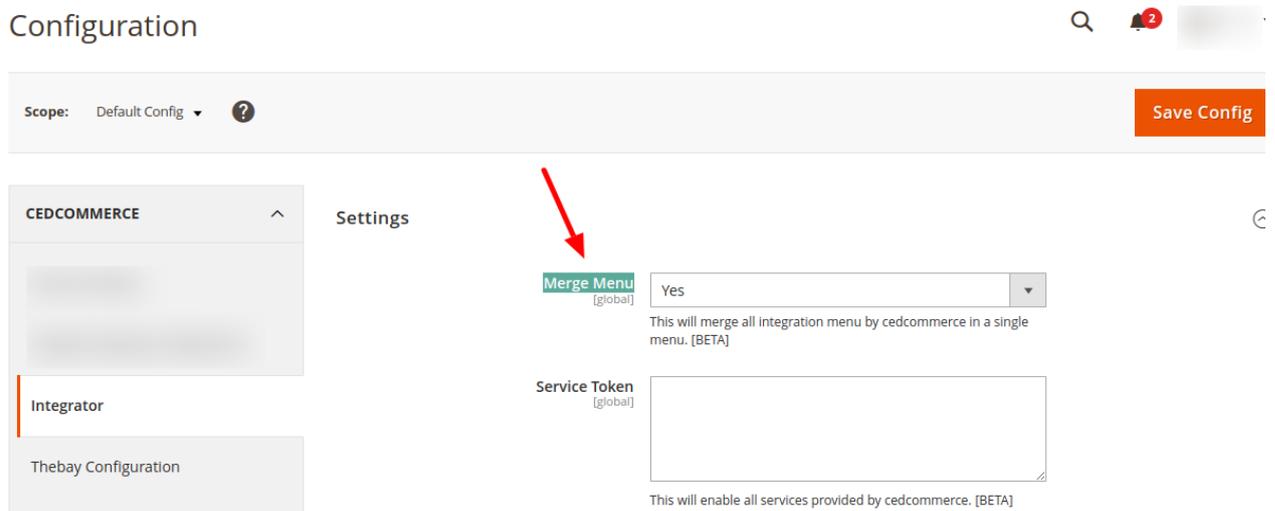

3. Configuration Settings

To configure the extension,

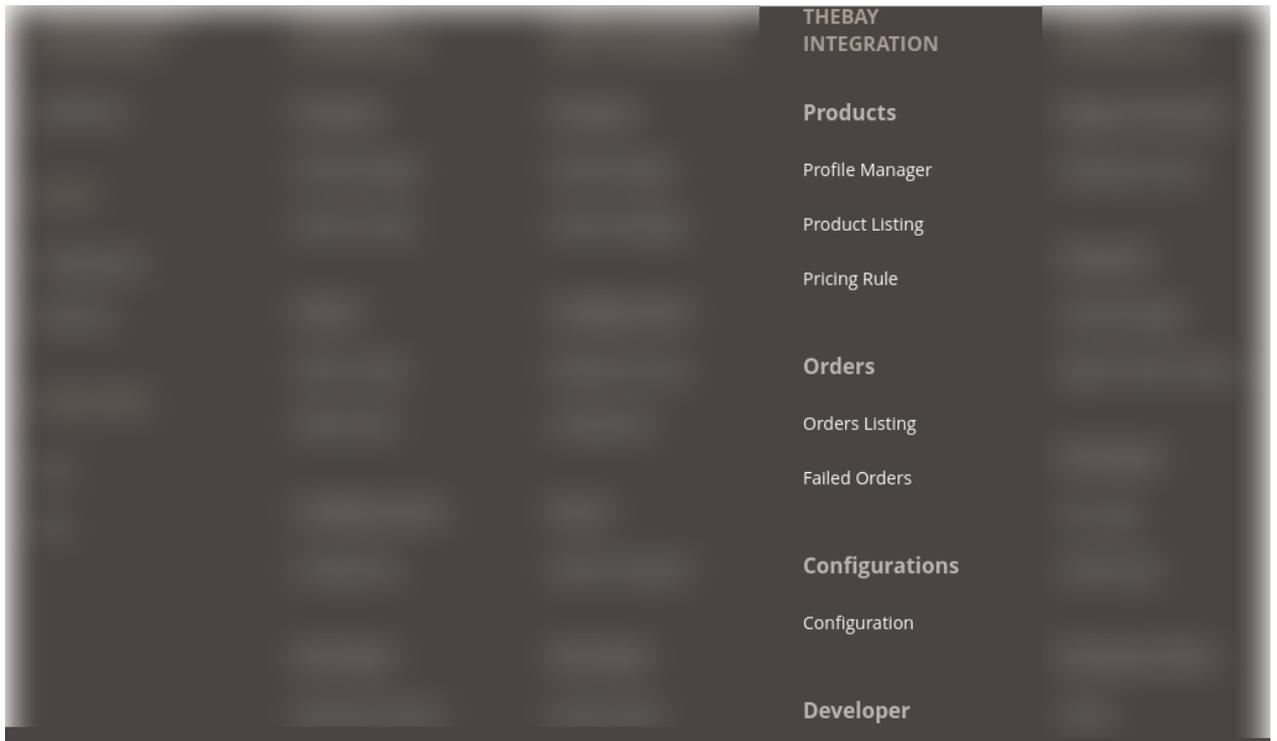

1. Go to the **Magento 2 Admin Panel**.
2. On the left navigation bar, click on **The Bay Integration** menu.
The menu appears as shown below:

Note: To merge the menu of all the CedCommerce modules, you can enable it by selecting the Yes option in the integrator as shown below:

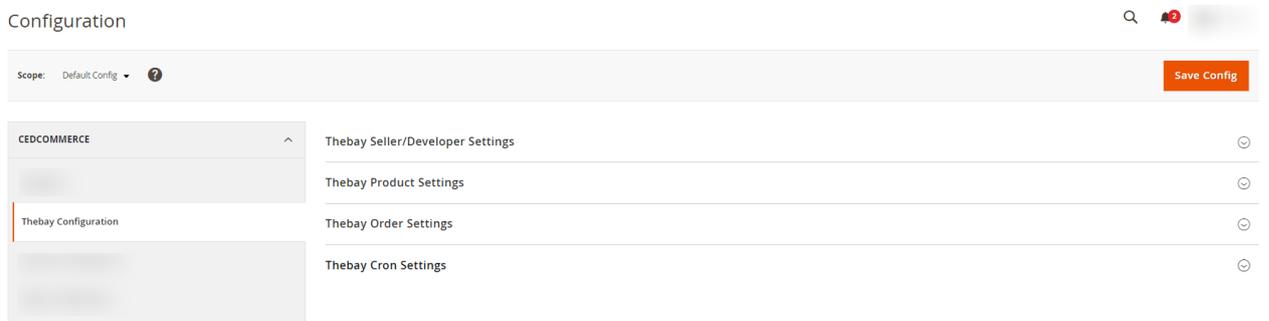

The menu will then appear as:

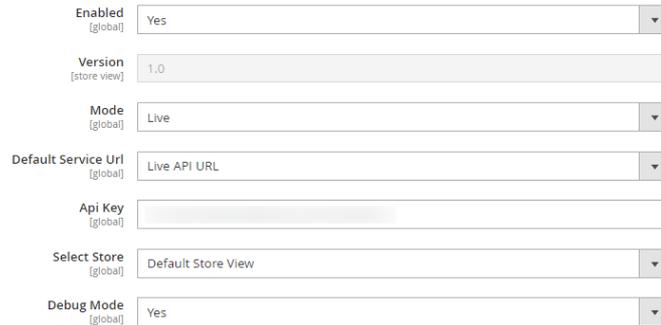

3. Click on **Configuration**.

The **Configuration** settings page appears as shown below:

4. Click on **Thebay Seller/Developer Settings**. The section is expanded as shown below:

Thebay Seller/Developer Settings

Enabled [global] Yes

Version [store view] 1.0

Mode [global] Live

Default Service Url [global] Live API URL

Api Key [global]

Select Store [global] Default Store View

Debug Mode [global] Yes

5. Under **Thebay Seller/Developer Settings** do the following steps:

- In the **Enabled** list, select the **Yes** option.
- In the **Mode** list, select the mode of store **Sandbox/Live**.
- In **Default Service Url**, enter the store Url if you have selected Sandbox then sandbox URL else the Live Url.
- In **Api Key**, copy the API Key generated on the Seller page and paste it here.
Note: To fetch the API Key, click here(<https://hudsonsbayus-prod.mirakl.net/mmp/shop/user/api>)
- In the **Select Store** list, select the required store.
- In **Debug Mode**, select **Yes** if you want the logs to be created.

6. Now scroll down and click on **Thebay Product Settings**. The section is expanded as shown below:

Thebay Product Settings

- ⊖ Thebay Price Settings
- ⊖ Thebay Inventory Settings
- ⊖ Other Product Settings
- ⊖ Attribute Translation Settings

7. Under **Thebay Product Settings** do the followings steps:

- Click on **Thebay Price Settings**, the section is expanded as shown below:

⊖ Thebay Price Settings

Product Price [global] Default Magento Price

Select to send a different product price to Thebay

- Under **Thebay Price Settings** do the following steps:
 - In the **Product Price** list, select one of the following options:
 - a. Select **Default Magento Price**, if you want to set the price as default.
 - b. **Increase by Fixed Price**: If selected, then the Modify by Fix Price field appears.
 - c. **Increase by Fixed Percentage**: If selected, then the Modify by Percentage Price field appears.
 Enter the numeric value to increase the price of The Bay, product price by the

entered value % of Magento 2 price.

For Example,

Magento 2 price + 5% of Magento 2 price.

Magento 2 Price = 100

Select the Increase By Fixed Percentage option

Modify by Percentage Price = 5

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, The Bay Product Price = 105

d. **Decrease by Fixed Price:** If selected, then the Modify by Fix Price field appears.

e. **Decrease by Fixed Percentage:** If selected, then the Modify by Percentage Price field appears.

Enter the numeric value to decrease the price of The Bay product price by the entered value % of Magento 2 price

For Example,

Magento 2 price – 5% of Magento 2 price.

Magento 2 Price = 100

Select Decrease By Fixed Percentage option

Modify by Fix Price = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, The Bay Product Price = 95

- Click on **Thebay Inventory Settings**, the section is expanded as shown below:

⊖ Thebay Inventory Settings

Set Inventory on Basis of Threshold [global] 
Choose yes to send inventory on thebay by condition

Inventory Threshold Value [global]
Set inventory quantity on which lesser and greater condition can control.

Send Inventory for Lesser Than Threshold Case [global]
Send Quantity to Thebay for those products, whose inventory is LESSER than the inventory threshold.

Note- To fetch the carrier code which you will use to map click here(<https://hudsons-bayus-prod.miraki.net/mmp/shop/platform-setting/shipping/carrier>)

8. Scroll down and click on **Thebay Order Settings**. The section is expanded as shown below:

Thebay Order Settings

The screenshot displays the 'Thebay Order Settings' configuration page. It includes several settings:

- Order Status To Fetch**: A dropdown menu with 'WAITING_ACCEPTANCE' selected. Other options include STAGING, WAITING_DEBIT, WAITING_DEBIT_PAYMENT, SHIPPING, SHIPPED, TO_COLLECT, RECEIVED, CLOSED, and REFUSED.
- Use Thebay Order Id as Magento Increment Id**: A dropdown menu set to 'Yes'. A note below states: 'NO to use Magento formatted increment Id eg. 100012345, Yes for Thebay order Id as increment id eg. C17000000-A'.
- Thebay Order Id Prefix**: A text input field containing 'THEBAY-'. A note below says: 'Prefix for Thebay Increment ID'.
- Order Notification Email**: A text input field containing 'a@a.com'.
- Auto Accept Order**: A dropdown menu set to 'Yes'.
- Enable Default Customer**: A dropdown menu set to 'Yes'.
- Default Customer Email**: An empty text input field.
- Refund Order On Thebay**: A dropdown menu set to 'Yes'. A note below says: 'Complete item will refund on thebay.' There is a help icon to the right.
- Refund Reason For Thebay**: A dropdown menu set to '--Please Select Reason--'. A note below says: 'This reason will be applied for all refund items.'
- Carrier Mapping**: A table with columns 'Magento Carrier', 'Thebay Carrier', and 'Action'. Below the table is an 'Add Carrier' button. A note below says: 'Map Shipping Carrier for Shipment'.

9. Under **Thebay Order Settings**, do the following steps:
- In **Order Status to Fetch**, select the status of the order for fetching.
 - In **Use Thebay Order Id as Magento Increment Id**, if you want The Bay and Magento Increment Id to be used as same.
 - In **Thebay Order Id Prefix** box, enter the required order Id prefix.
 - In the **Order Notification Email** box, enter the required email Id.
 - In **Auto Order Accept**, select **Yes** if you want the orders to be accepted automatically.
 - In the **Enable Default Customer** list, select the **Yes** option to enable the default customer.
 - In **Default Customer Email**, enter the mail id of the default customer.
 - In **Refund Order on Thebay**, select **Yes** for the item refund on The Bay marketplace.
 - In **Refund Reason for Thebay**, select the reason that will be applied for the refund items.

- In **Carrier Mapping**, map the Magento carriers with Thebay carriers.
10. Now scroll down and click on **Thebay Cron Settings**, the section is expanded as shown below:

Thebay Cron Settings ⊞

Order Cron <small>(global)</small>	Enable	Order Fetch Cron
Order Sync Cron <small>(global)</small>	Enable	Order Sync Cron
Order Count For Order Sync Cron <small>(global)</small>	50	
Inventory Price Cron <small>(global)</small>	Enable	Inventory Sync Cron
Feed Cron <small>(global)</small>	Enable	Feed Sync Cron
Full Offer Sync Cron <small>(global)</small>	Enable	Full Offer Sync Cron
Product Offer Sync Cron <small>(global)</small>	Enable	This cron will auto upload/update all your assigned products.
Price Rule Offer Sync Cron <small>(global)</small>	Enable	
Product Sync Cron <small>(global)</small>	Enable	This will update all product information which are recently change in Magento.
Order Shipment Cron <small>(global)</small>	Enable	Completed magento order will automatically ship

11. Under **Thebay Cron Settings**, do the following steps:
- In the **Order Cron** list, select the **Enable** option to enable the fetch order cron.
 - In **Order Sync Cron**, select **Enable** to enable the order syncing cron.
 - In **Order Count For Order Sync Cron**, enter the quantity for order syncing.
 - In the **Inventory |Price Cron** list, select the **Enable** option to enable the Inventory & Price Sync cron.
 - In **Feed Cron**, select **Enable** option to enable the feeds syncing through cron.
 - In **Full Ofer Sync Cron**, select **Enable** option to full offer syncing through cron.
 - In **Product Offer Sync Cron**, select **Enable** to upload/update the assigned products.
 - In **Price Rule Sync Cron**, select **Enable** to synchronise the product price.
 - In **Product Sync Cron**, select **Enable** to synchronise the products.
 - In **Order Shipment Cron**, select **Enable** Option to ship Magento orders automatically.
12. Click the **Save Config** button to save the entered values.

4. Manage The Bay Profiles

You can create a new profile and assign the required products to the profile. While creating and editing the profile, you can map the Magento 2 attributes to The Bay attributes. These attributes are applicable to all the products that are assigned to the profile.

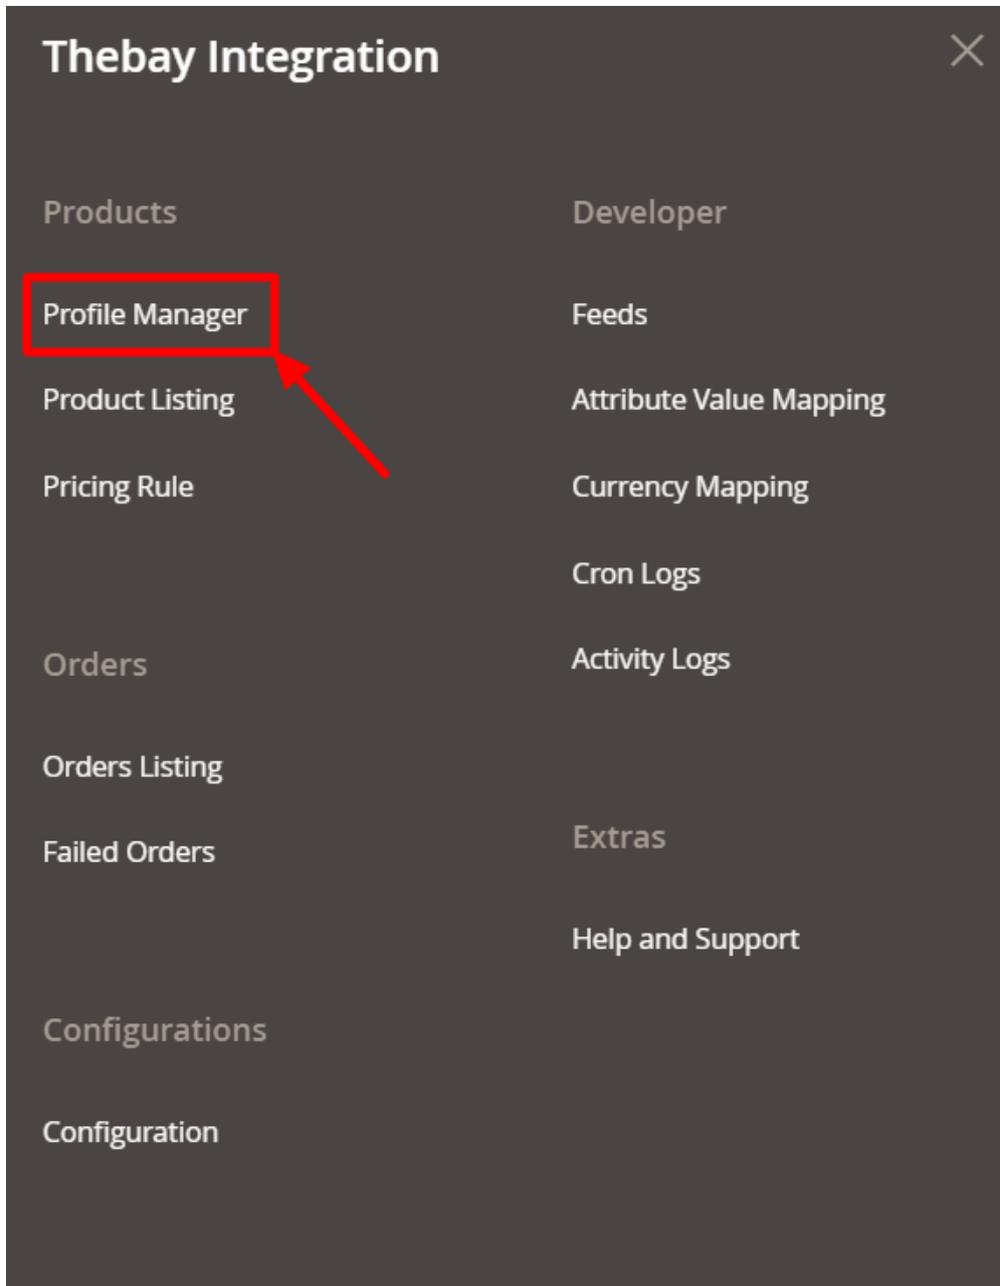

You can do the following tasks:

- Add new profile
- Edit the existing profile
- Bulk Action on the Selected Profiles

4.1. Add a New Profile

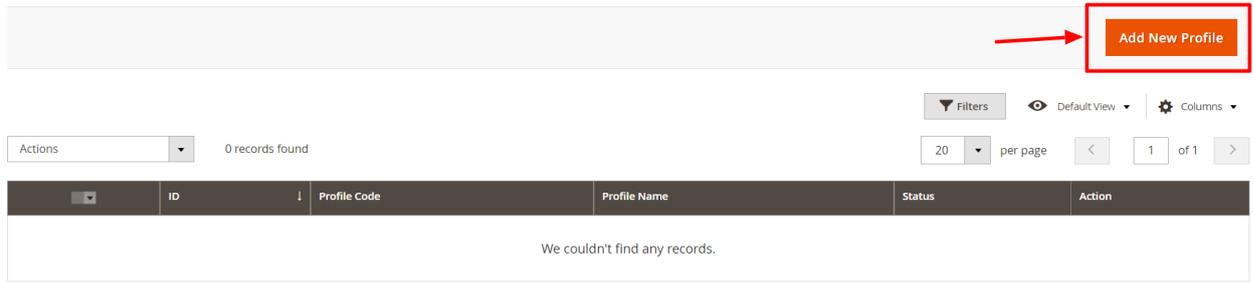

To add a new profile,

1. Go to the **Magento 2 Admin Panel**.
2. On the left navigation bar, click on **The Bay Integration** menu.
The menu appears as shown below:

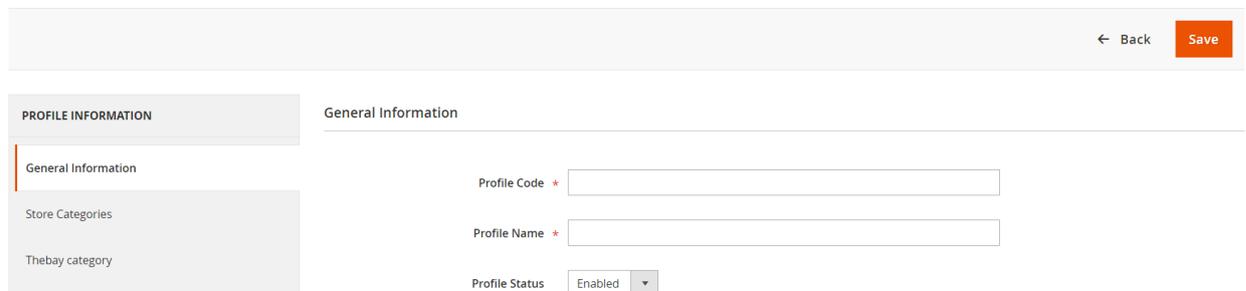

3. Click on **Profile Manager**.
The **Manage Profile** Page appears as shown below:

Manage Profile

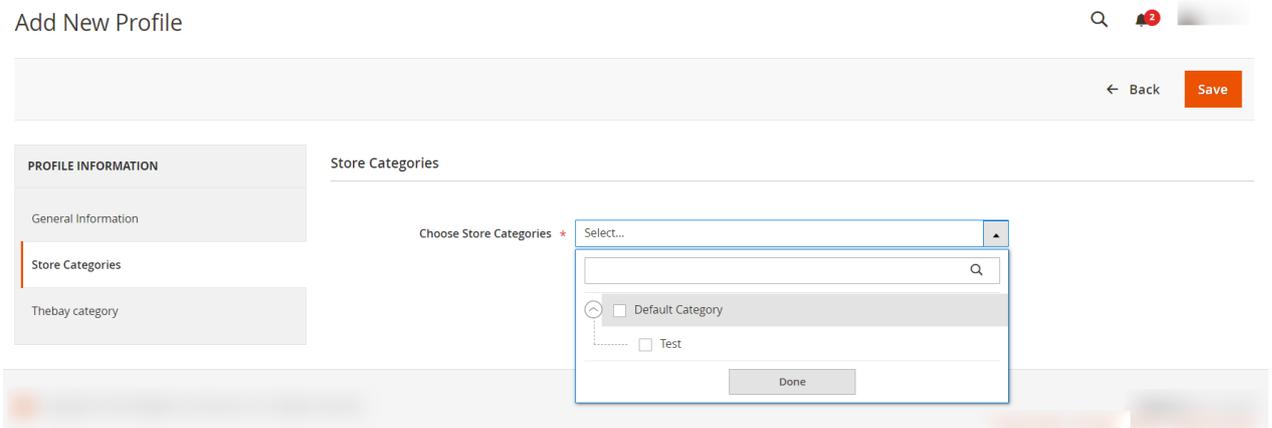

4. To add a new profile, click on **Add New Profile**.
The **New Profile** page appears as shown below:

Add New Profile

5. In the right panel, under **General Information**, do the following steps:
- In the **Profile Code** box, enter a profile code.
Note: It is only for internal use. Use the unique profile code with no spaces. Start with small letters.
 - In the **Profile Name** box, enter the name of the profile.
Note: Use the unique name to identify the profile.
 - In the **Profile Status** list, select Enabled to enable the profile.
Note: The Disabled option disables the profile.
6. In the left navigation panel, click the **Store Categories** menu.

Add New Profile

7. Choose the required Magento store categories from the menu.
8. Then in the left navigation panel, click on **Thebay Category**.

9. Here map all the required/optional Thebay attributes with the Magento attributes.
10. Click the **Save** button.
The profile gets created and listed on the Manage Profile page.

4.2. Edit Existing Profile

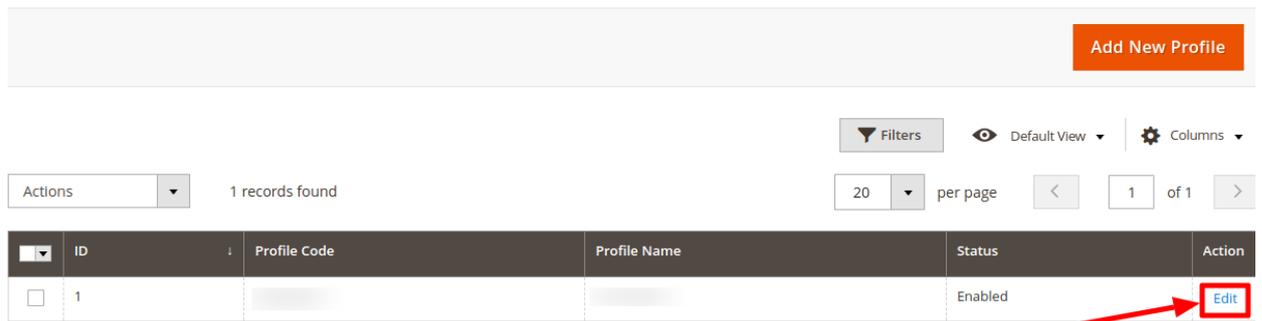

To edit a profile,

1. Go to the **Magento 2 Admin Panel**.
2. On the left navigation bar, click on **The Bay Integration** menu.
The menu appears as shown below:

3. Click on **Profile Manager**.
The **Manage Profile** Page appears as shown below:

Manage Profile

1 records found

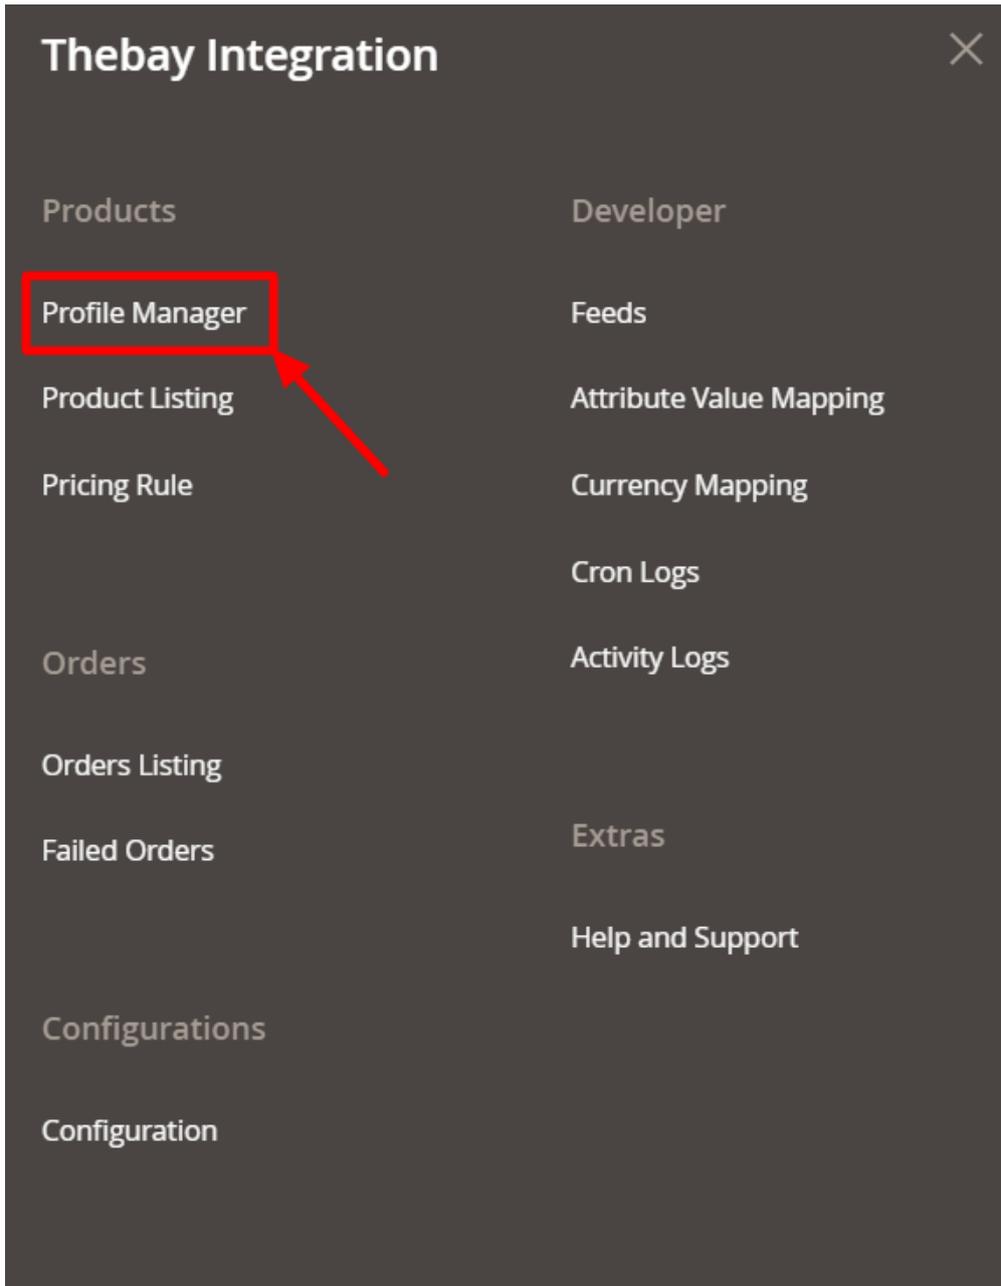

ID	Profile Code	Profile Name	Status	Action
1			Enabled	Edit

4. Scroll down to the required profile row.
5. In the **Action** column of the respective row, click the **Edit** link.
6. The Edit Profile Page will appear, do the required changes and Save.

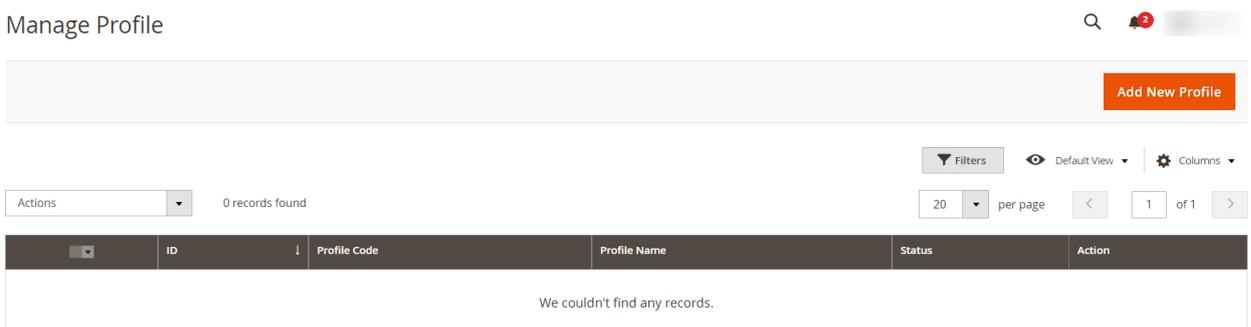

4.3. Submit Bulk Actions on Profiles

To perform bulk actions on profiles,

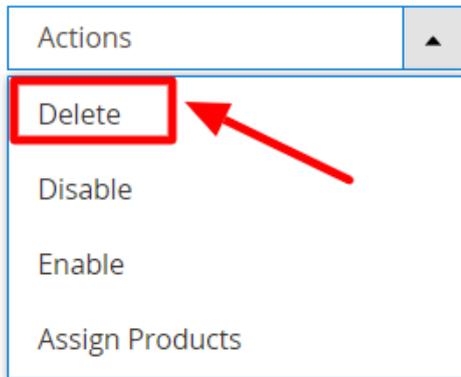

1. Go to the **Magento 2 Admin Panel**.
2. On the left navigation bar, click on **The Bay Integration** menu.
The menu appears as shown below:

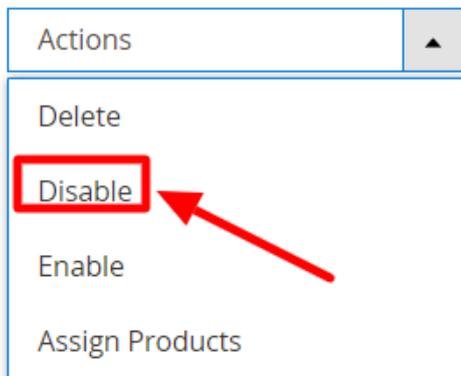

3. Click on **Profile Manager**.
The **Manage Profile** Page appears as shown below:

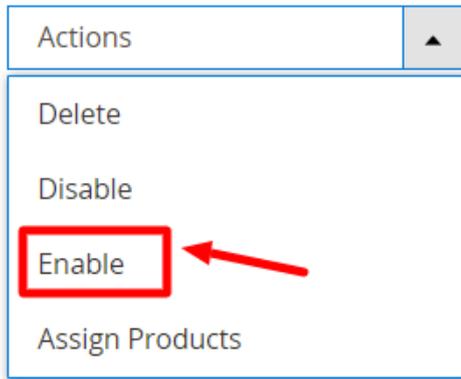

4. On this page, all the available profiles are listed.
5. To delete the selected profiles, do the following steps:
 - Select the profiles that are no more required.
 - Click the **Arrow** button next to the **Actions** field.
 The **Actions** list appears as shown in the following figure:

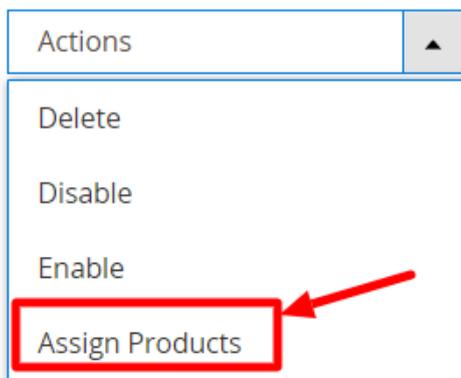

- Click the **Delete** option.
A confirmation dialog box appears.
 - Click the **OK** button.
The selected profiles are deleted.
6. To disable the selected profiles, do the following steps:
 - Select the required profiles.
 - Click the **Arrow** button next to the **Actions** field.
 The Actions list appears as shown in the following figure:

- Click the **Disable** option.
The selected profiles are disabled.
7. To enable the selected profiles, do the following steps:
 - Select the required profiles.
 - Click the **Arrow** button next to the **Actions** field.
 The **Actions** list appears as shown in the following figure:

- Click the **Enable** option.
The selected profiles are enabled.
8. To assign products to the selected profiles, do the following steps
- Select the required profiles.
 - Click the **Arrow** button next to the **Actions** field.
The **Actions** list appears as shown in the following figure:

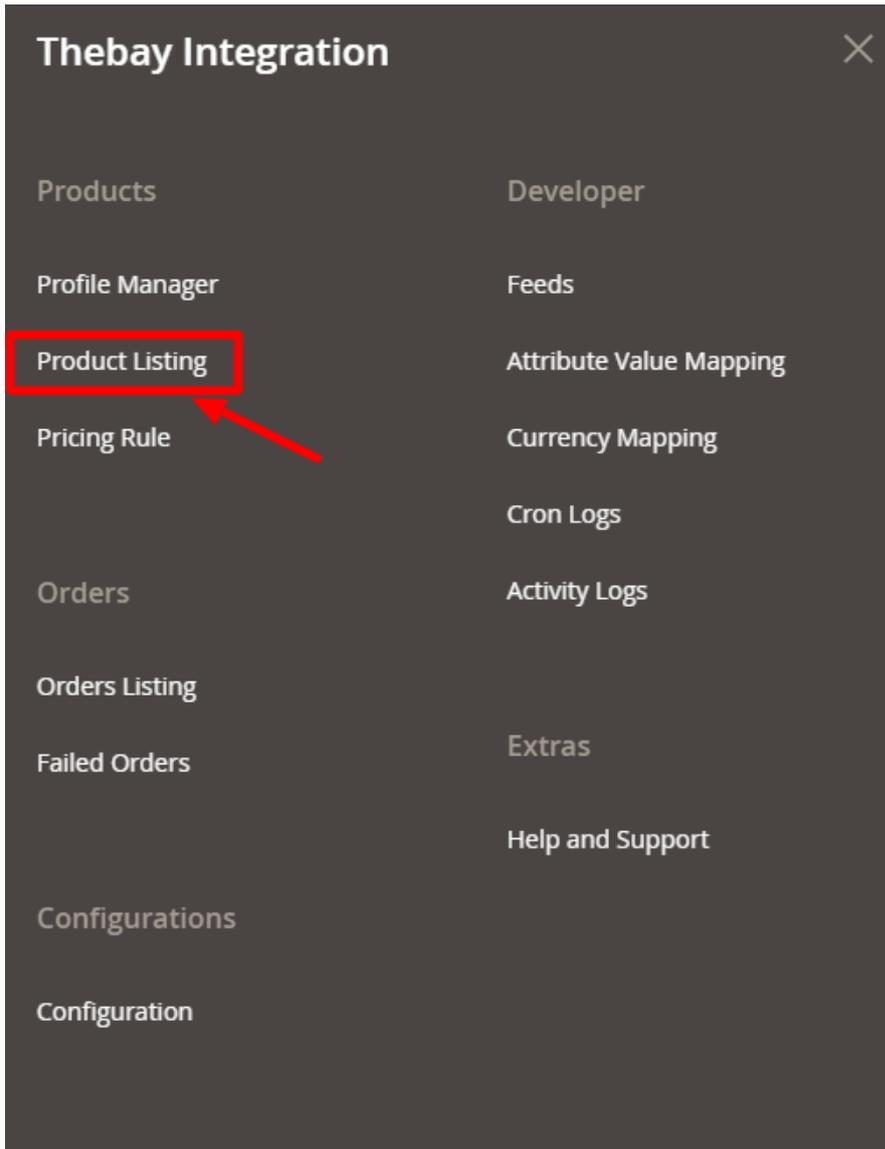

- Click on **Assign Products**.
The products will be assigned in bulk on the selected profiles.

5. Manage Products

To manage products,

1. Go to the **Magento 2 Admin Panel**.
2. On the left navigation bar, click on **The Bay Integration** menu.
The menu appears as shown below:

3. Click on **Product Listing**.
The **Product Listing** page appears as shown below:

Thebay Product Listing

If the product is validated successfully and a success message appears on the top of the page.

8. If there is an error, then an **INVALID** button appears in the Validation column of the respective product row.

Submit Bulk Actions on Products,

1. Select the checkboxes associated with the required products.
2. In the **Actions** list, click the arrow button.
A list appears as shown in the figure:

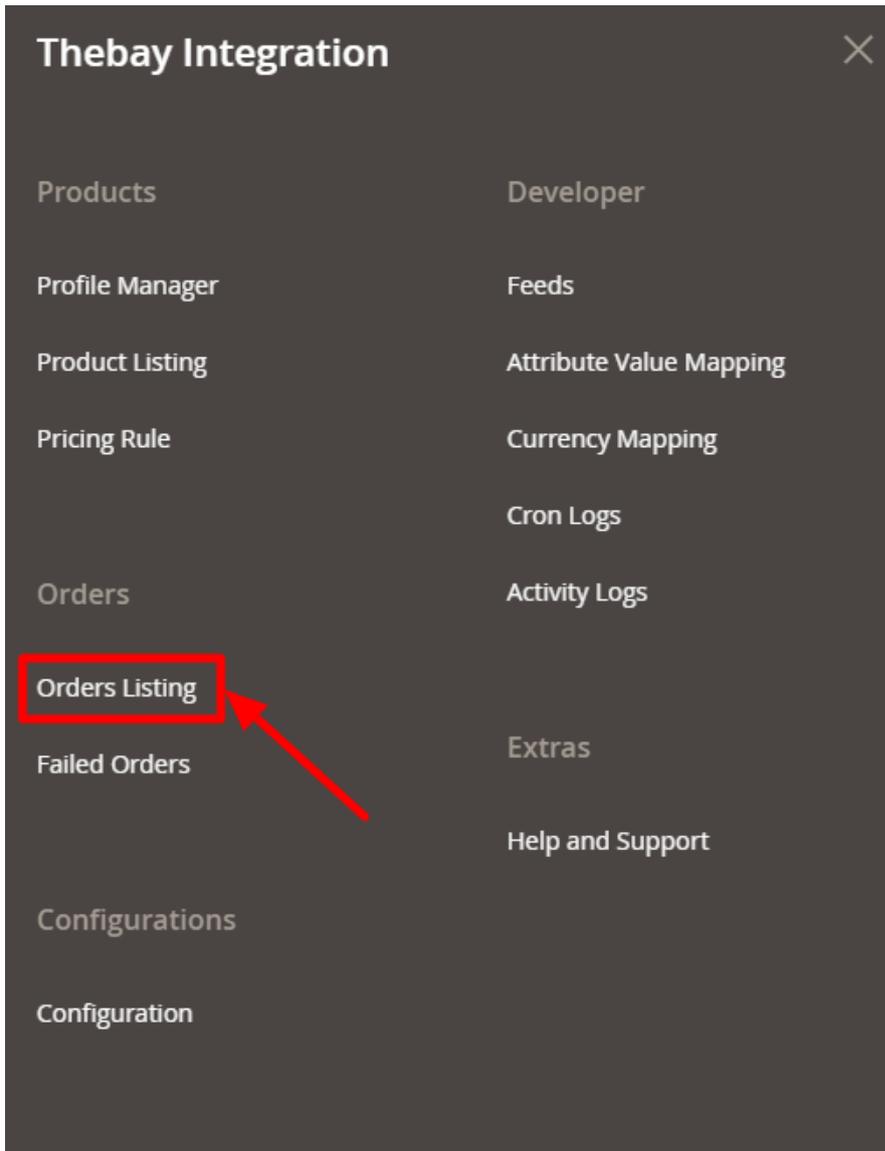

3. To validate the products in bulk, click on **Validate Product**. The selected products will be validated.
4. To upload the products, click on **Upload Product(s)**. The selected products will be uploaded.
5. To update the inventory and price of products click on **Update Inventory & Price**. The price and inventory will be updated for selected products.
6. To upload the products with an offer, click on **Upload Product with Offer**.
7. To deactivate the out of stock products, click on **Inactive(OutOfStock) on Thebay**.
8. To translate the attributes, click on **Translate Attribute**.

6. Manage Orders

To manage orders,

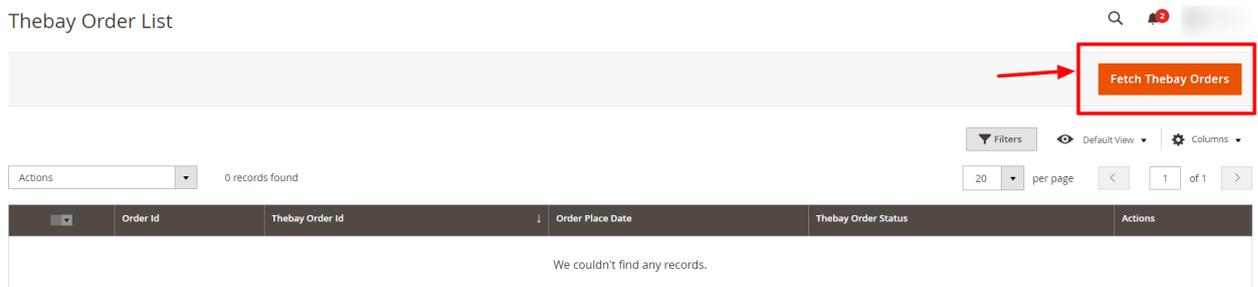

1. Go to the **Magento 2 Admin Panel**.
2. On the left navigation bar, click on **The Bay Integration** menu.

The menu appears as shown below:

3. Click on **Order Listing**.

The **Order Listing** page appears as shown below:

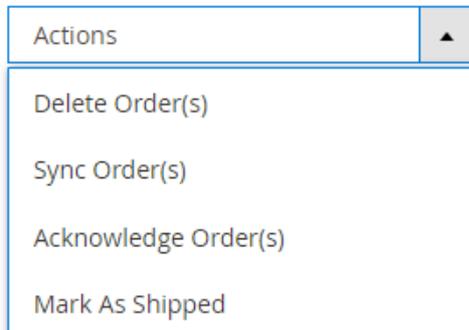

4. Click the **Fetch Thebay Orders** button.

If the order is imported successfully then, a new record is found in the Orders Grid table.

To perform bulk actions on the orders-

1. Select the checkboxes associated with the orders to perform specific actions.
2. Click the **Arrow** button next to the **Actions** list.
A menu appears as shown in the following figure:

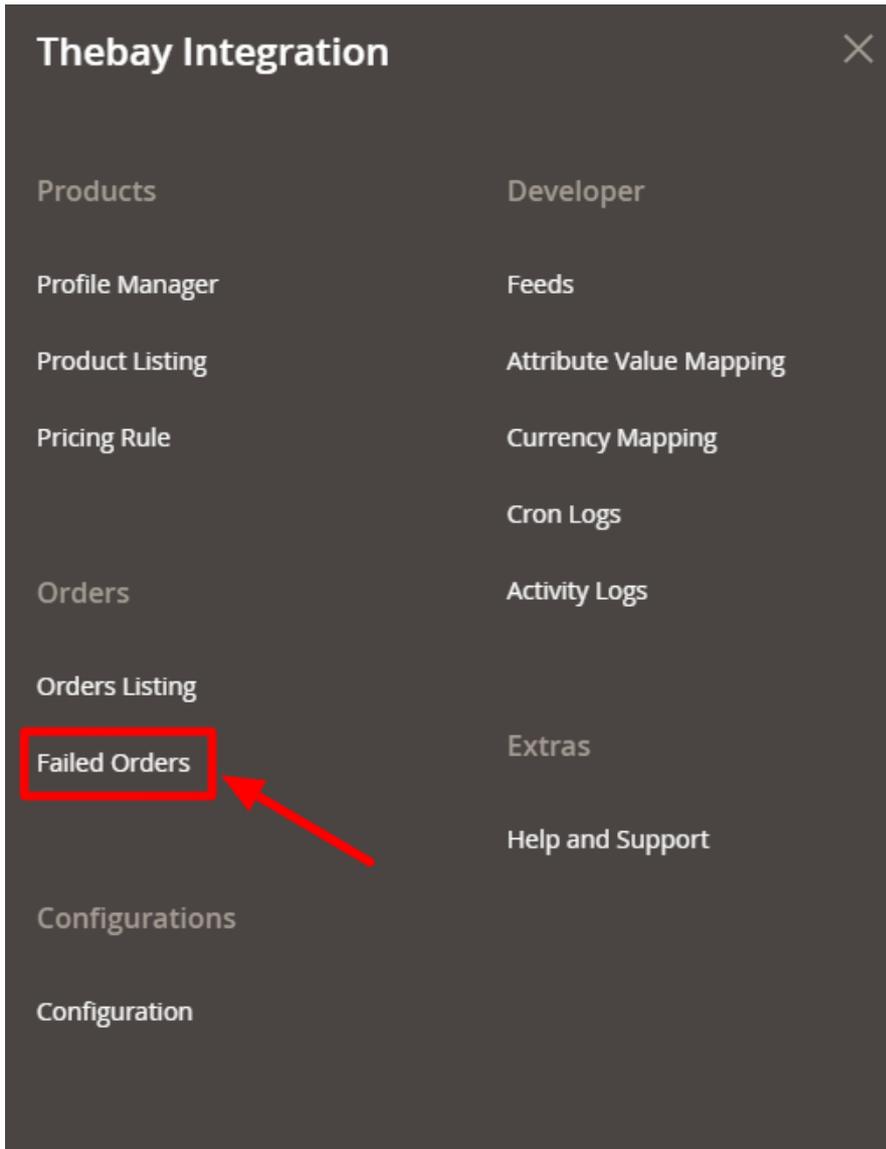

3. To delete the orders, click on **Delete Order(s)**. The selected orders will be deleted.
4. To synchronise the orders, click on **Sync Order(s)**. The orders will be synced.
5. To acknowledge the orders, click on **Acknowledge Order(s)**. The selected orders will be acknowledged.
6. To mark the orders as shipped, click on **Mark As Shipped**. The selected orders will be marked shipped.

7. Manage Failed Orders

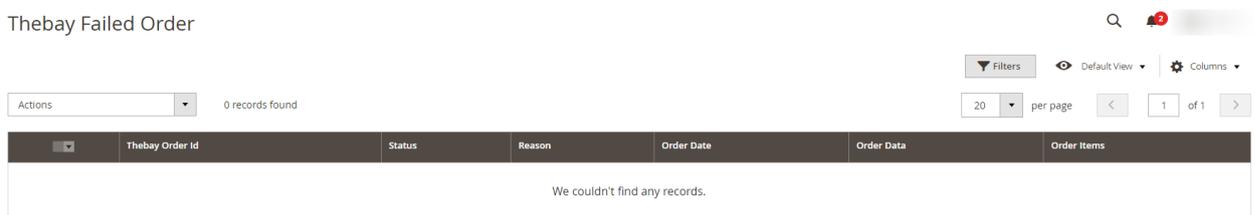

To manage failed orders,

1. Go to the **Magento 2 Admin Panel**.
2. On the left navigation bar, click on **The Bay Integration** menu.
The menu appears as shown below:

3. Click on **Failed Orders**.

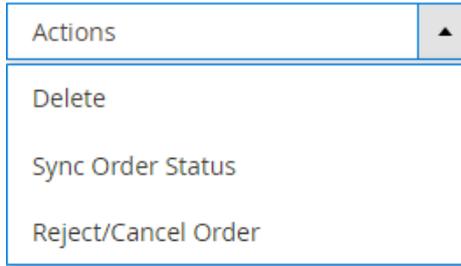

The **Failed Orders** page appears as shown below:

4. The failed orders along with their details will be displayed in the grid.

5. Click the **Actions** list Arrow button.

A menu appears as shown in the following figure:

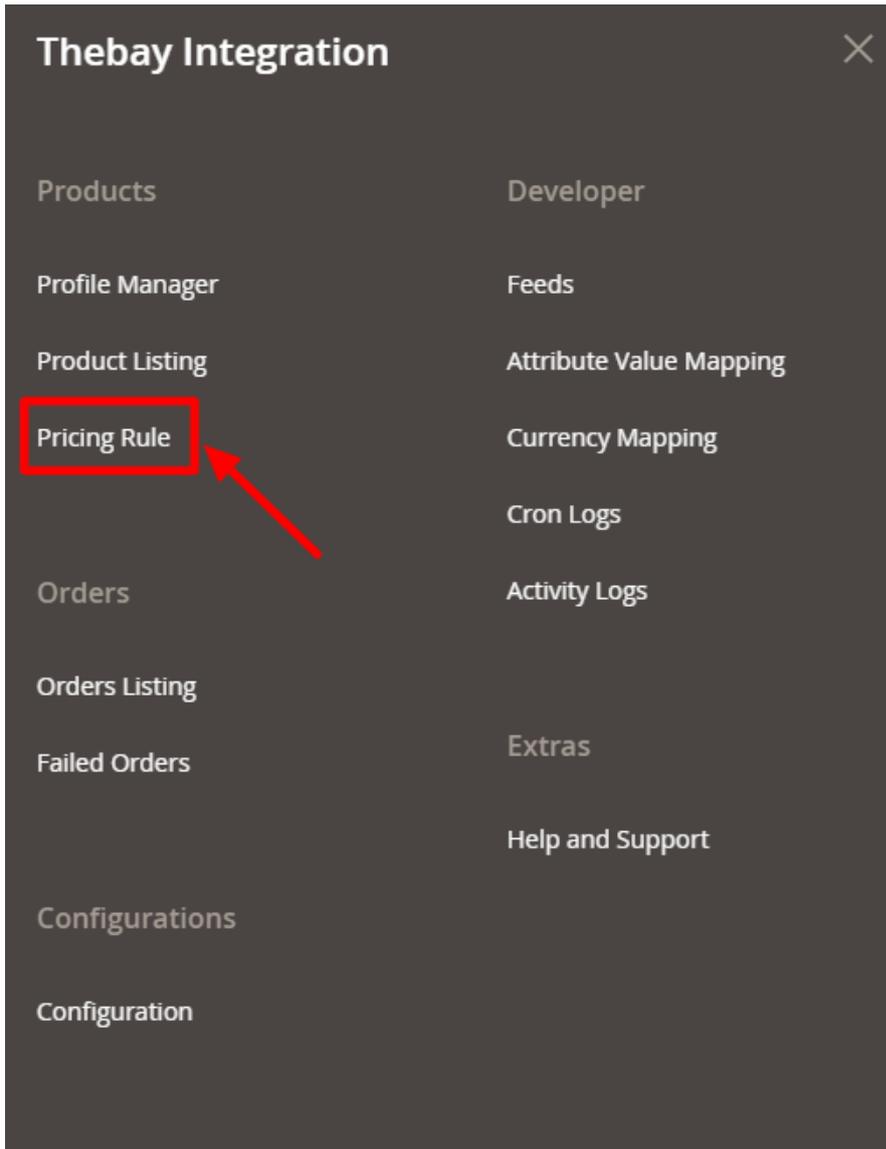

6. To delete the failed orders, click on **Delete**. The selected failed orders will be deleted.
7. To synchronise the order status of failed orders, click on **Sync Order Status**. The order status will be synced for failed orders.
8. To reject or cancel the orders, click on **Reject/Cancel**. The selected failed orders will be rejected.

8. Pricing Rule

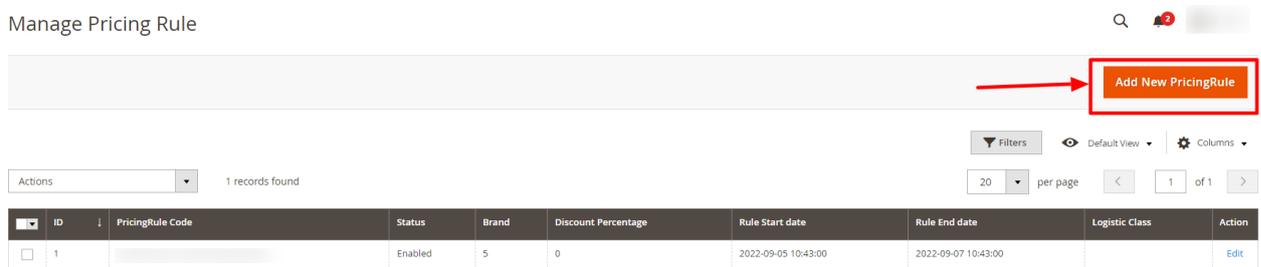

In the Pricing rule section, you can provide discounts brand wise on your store and manage them.

To manage pricing rules,

1. Go to the **Magento 2 Admin Panel**.
2. On the left navigation bar, click on **The Bay Integration** menu.
The menu appears as shown below:

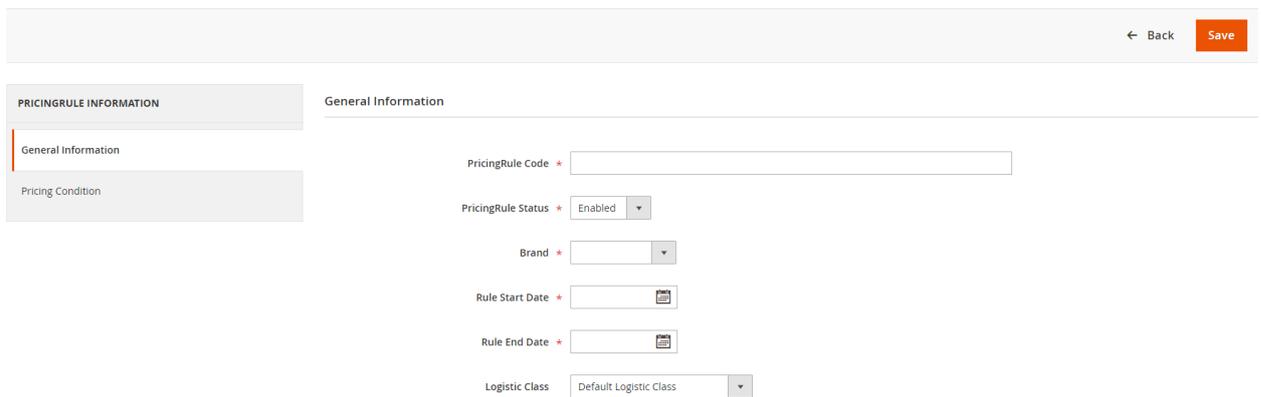

- 3. Click on **Pricing Rule**.
The **Pricing Rule** Page appears as shown below:

- 4. To add a new discount, click on **Add New Pricing Rule** button. The page appears as shown below:

Add New Pricing Rule
