1. Migrating from Shopify eBay App to Integration for eBay App

Hello!

The eBay sales app is scheduled to be down on 31st December 2022. In an effort to assist Shopify sellers in selling on eBay, CedCommerce is offering free migration facilities.

You can now shift from Shopify's eBay App to CedCommerce's Integration for eBay App instantly without losing any of their listings. All you need to do is follow a few simple steps to transfer your Shopify listings to CedCommerce's Integration for eBay & link them to existing product listings on eBay.

Step 1

Install the Integration for eBay app by visiting the Shopify app store.

Use the Link: [https://apps.shopify.com/eBay-integration/\(https://apps.shopify.com/eBay-integration/\)](https://apps.shopify.com/eBay-integration/(https://apps.shopify.com/eBay-integration/))

Step 2

Complete the onboarding steps of the app.

Step 3

Once registered, your Shopify products start appearing in our app.

The screenshot shows the CedCommerce eBay integration dashboard. The interface includes a sidebar with navigation options like Dashboard, Products, Orders, Business policy, Templates, Profiles, Configuration, Activities, Help, Choose a plan, Contact us, and Connect on Skype. The main content area displays a list of products under the 'Products' tab. The 'All' filter is selected, and the list shows 423 products. The first few products are:

<input type="checkbox"/>	Camp Stool STOOLNB	10 in stock for 1 variant 78	Crossfire-Copy-9969 Title	
<input type="checkbox"/>	Canvas Lunch Bag	50 in stock for 3 variants	Auction	

Step 4

The app matches the existing eBay products with the Shopify listings once the products are successfully imported.

NOTE: In order to match the existing listings you need to make sure either of the given two conditions get fulfilled.

- **TITLE ON SHOPIFY** should be same as **TITLE ON EBAY.**
- **SKU ON SHOPIFY** should be same as **CUSTOM LABEL(SKU) ON EBAY.**

The screenshot shows the eBay integration dashboard. The left sidebar contains navigation options: Dashboard, Products (highlighted with a red box), Orders, Business policy, Templates, Profiles, Configuration, Activities, Help, Choose a plan, Contact us, and Connect on Whatsapp. The main content area is titled 'Products' and has tabs for 'All', 'Uploaded' (highlighted with a red box), 'Not Uploaded', 'Ended', and 'Error'. Below the tabs, there are filters and a table of products. The table has columns for 'Image', 'Title/ SKU', 'Inventory/ Price', 'Profile/ Variant Attributes', and 'eBay Status/Item ID'. The 'eBay Status/Item ID' column is highlighted with a red box and contains 'Uploaded' status and item IDs for several products.

Step 5

The app then matches your products based on the criteria mentioned above. And your inventory and price will start getting synced.

NOTE: As the products were initially listed on eBay through the Shopify sales channel app, **Integration for eBay app can only sync the Price, Inventory, and Orders due to API restrictions.**

Please connect with our support team to Sync any other fields or know more about the migration process.
