## 1. Overview

CedCommerce brings you **TradeMe Magento® 2 Integration**, you can easily list your Magento® 2 store products on the TradeMe Web site to sell the products and earn ample revenue. It is a solution that enables you to synchronize the inventory, price, and other product details between the Magento® 2 store and the TradeMe website.

Integration also offers management of inventory, with greater flexibility, providing you with several ways to manage it at discrete levels with TradeMe Order cancellations from the customer's end are retrieved simultaneously to cancel the order ensuring that you don't ship items that were canceled.

### **Key Features of TradeMe Integration Extension by CedCommerce:**

- **Update information:** As products get synchronized, any changes made in the Magento 2 store get reflected on TradeMe.
- **Bulk Upload:** To reduce your effort it provides you the facility to select the products in bulk and upload them in one go.
- **Product Listing & Status Sync:** All the products of your Magento 2 store get copied to the extension. You can synchronize your product status between TradeMe and Magento 2 store.
- **Consolidate orders & Cron Management:** It allows you to manage your orders from your Magento 2 store panel. Cron job automates the process for Inventory, Price and Order management.
- **Profile Based Pricing:** Increase or decrease in price based on profile.
- **New Order Notifications:** Whenever a new order is fetched from TradeMe.com, the admin receives a notification.

## 2. TradeMe Integration Installation Extension

### **To install the extension**

1. Log in the **FTP**, and then go to Magento 2 root folder (generally present under the *public\_html* folder).
2. Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
  - Upload or Drag and Drop *app/code/Ced/TradeMe*
  - After successfully uploading the directory, the extension will be installed or upgraded.
  - Now run the following upgrade command in *cmd*

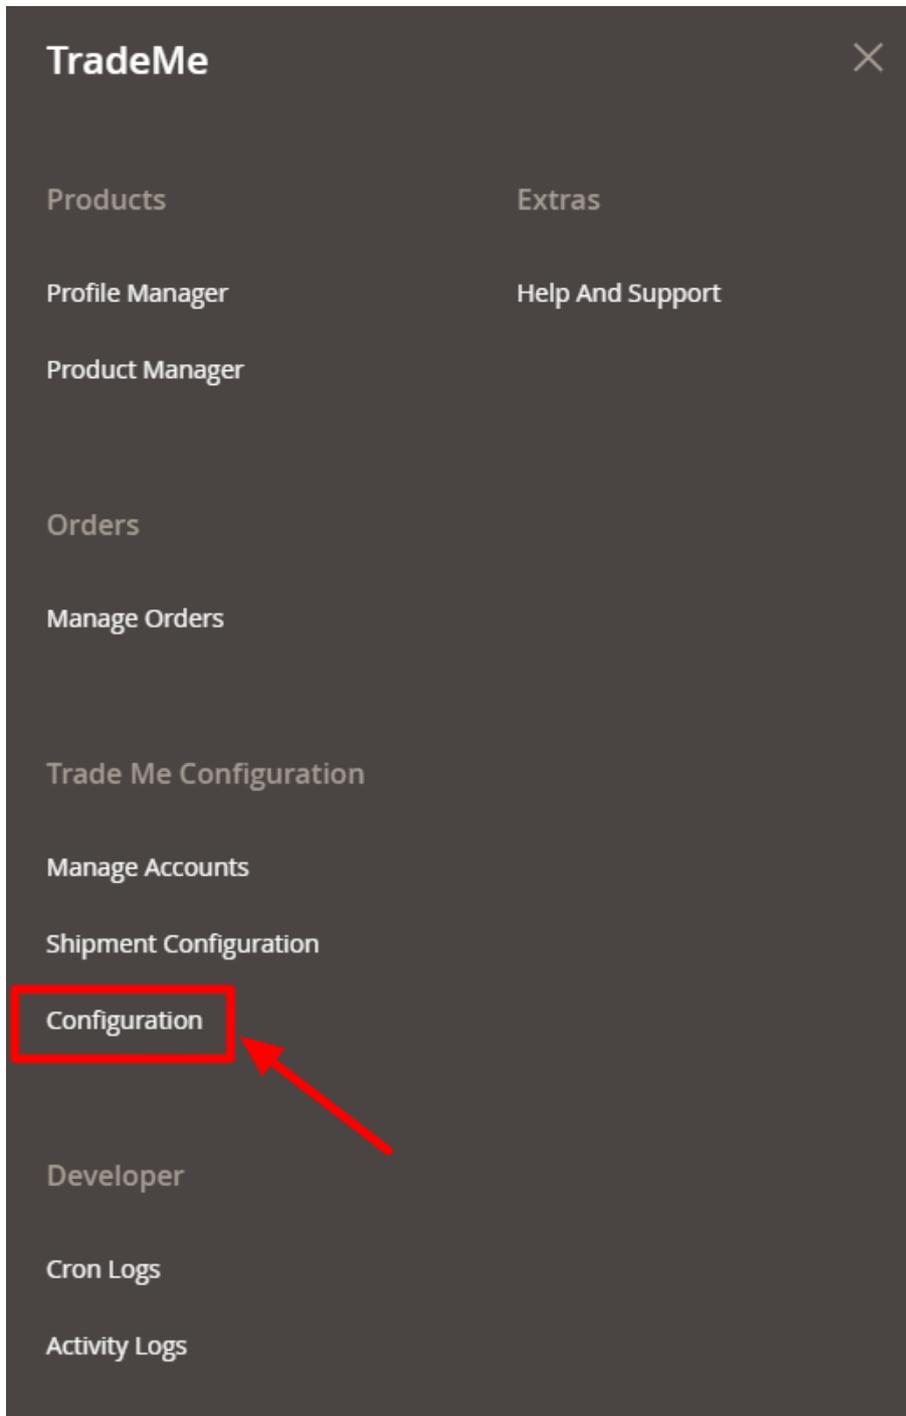

```
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
chmod -R 777 generated/
chmod -R 777 pub/
chmod -R 777 var/
```

## 3. TradeMe Configuration Settings

Once the extension is successfully installed in the Magento 2 store, the **TradeMe Integration** menu appears on the left navigation bar of the Magento 2 Admin panel. The merchant has to first create a seller account in the TradeMe seller panel. As well as the merchant has to create a TradeMe app also. Once the seller account and TradeMe app is created and is approved by TradeMe, the Magento 2 store owners have to obtain the Callback URL from the TradeMe, and then the Magento® 2 store owners have to paste it in the respective field displayed on the **TradeMe Configuration** page of the admin panel.

### **To set up the configuration settings in the Magento 2 Admin panel**

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **TradeMe Integration** menu.  
The menu appears as shown in the following figure:

3. Click **Configuration**.  
The Configuration page appears as shown in the following figure:

## Configuration

Store View: Default Config ? Save Config

<p><a href="#">Edit details</a>   <a href="#">Disable</a></p>	
<p><input type="button" value="Delete"/></p>	

---

[Register a new application](#)

[Learn more about developing Trade Me applications](#)

- g. Click on **Edit details**.  
The page appears as shown in a figure:

**cedcommerce-sandboxV application details**

\* Required field.

Access details	
Consumer key	
Consumer secret	
Application details	
Application name *	<input type="text"/>
Application image Maximum size 500kB.	<input type="button" value="Choose file"/> No file chosen Current image (delete)  
Public description *	<p>CedCommerce is the e-commerce arm of Indian e-commerce software development company Cedcoss . The company was founded in 2010, is privately owned and based in Lucknow</p> <p>What does your application do? Why would people use it? This will be displayed to Trade Me members when authorising your application.</p>
Application website	<input type="text"/> This should be a public URL that provides more information on the application.
Company name	<input type="text"/>
Company website	<input type="text"/>
Application type *	<input checked="" type="radio"/> Browser Default Callback URL:(case sensitive) <input type="text"/> <input type="radio"/> Client Does your application run in a web browser or as a standalone client?
Callback Domains	<input type="text"/> <input type="button" value="Add"/> <input type="button" value="Delete"/> Add extra domains here for when you want to use a callback URL which is not your default callback URL. Maximum 100. Must be HTTPS.
Approval information	
This information is used for our internal application approval process. Once submitted it is not editable. If the scope of your application changes after it has been approved you will need to contact us directly.	
Business area *	<input type="button" value="Other"/> ▾ Which area of the business will your application need access to? If you select 'other' please include an explanation in 'Developer description'.
Developer description *	<p>Access data to create a solution for merchants to ease the selling process.</p> <p>From the selected area above, what information will you want to access &amp; what will you do with it?</p>
Usage *	<input type="button" value="Personal"/> ▾ Will your application be for personal or commercial use?
Who will be using your application? *	<p>Sellers</p> <p>Please give a description of the target audience for your application.</p>
<input type="button" value="Cancel"/> <input type="button" value="Update"/>	

h. Copy the **Callback URL** from the configuration settings and paste it in the **Application type** section.

5. Under **TradeMe Product Price**, do the following step:

a. In the **Product Price** list, select one of the following options:

\. **Increase by Fixed Price**: If selected, then the **Modify by Fix Price** field appears.

\. **Increase by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to increase the price of the **TradeMe**, product price by the entered value % of Magento 2 price.

TradeMe Product Price [global]

Select to send different product price to TradeMe

Modify by Percentage Price [global]

Numeric value Required for **Add/subtract % on Magento price** 5 for Example: Magento price +/- 5% of Magento price.

\. *For Example,*

Magento 2 price + 5% of Magento 2 price.

Magento 2 Price = 100

Select **Increase By Fixed Percentage** option

**Modify by Percentage Price** = 5

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, TradeMe Product Price = 105

\. **Decrease by Fixed Price**: If selected, then the **Modify by Fix Price** field appears.

\. **Decrease by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to decrease the price of the **TradeMe** product price by the entered value % of Magento 2 price.

\. *For Example,*

Magento 2 price – 5% of Magento 2 price.

Magento 2 Price = 100

Select **Decrease By Fixed Percentage** option

**Modify by Fix Price** = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, TradeMe Product Price = 95

b. In the **TradeMe Product Quantity** box, select “**Yes**” for different quantity attribute if **Yes** then please map attribute in profile’s optional attribute mapping section.

c. In the **Select Payment Methods** option, select your preferred payment methods.

d. In the **Select Shipping Options** box, select the Shipment options.

e. In the **Shipping Price(For Custom Type Only)** option, enter the price of a custom shipping type.

f. In the **Shipping Method(For Custom Type Only)** option, enter the custom shipping type only.

g. In the **Chunk Size(Product Upload)** box, enter the number accordingly for the chunks of Products Upload.

h. In the **Select Withdraw Type** option, select Withdraw Type For Withdraw Auction.

i. In the **Withdraw Reason** box, enter the reason for withdrawing.

j. In the **Primary Account** option, select your primary account.

6. Then Click on **TradeMe Order Settings**,

The tab appears as shown in the following figure:

## Order Settings

**Select Order Filter** [global]

Select Order Filter to get Trademe Orders.

**Order Notification Email** [global]

**Shipping Method of Trade Me Orders** [global]

**Payment Method of Trade Me Orders** [global]

**Fetch Order For Out Of Stock Product** [global]

**Customer Group** [global]

**Trade Me Order Id Prefix** [global]

Prefix for Trade Me Order Increment ID

7. Under the **Order Settings**, do the following steps:

- In the **Select Order Filter** option, choose the option to filter the TradeMe orders.
- In the **Order Notification Email** box, enter the email for order notification.
- In the **Shipping Method of Trade Me Orders** box, choose the shipment method of Trademe orders.
- In the **Payment Method of Trade Me Orders** box, choose the payment method of Trademe orders.
- In the **Fetch Order For Out Of Stock Product** box, select **Yes** option, to fetch orders for out of stock products.
- In the **Customer Group** option, select your customer group option.
- In the **Trade Me Order Id Prefix** box, enter the Trademe order id Prefix.

## 8. Click on Trademe Cron Settings,

The tab appears as shown in the figure:

## TradeMe Cron Settings

**Order Cron** [global]

**Product Syncing Cron** [global]

**Inventory And Price Syncing Cron** [global]

## 9. Under the Cron Settings, do the following steps:

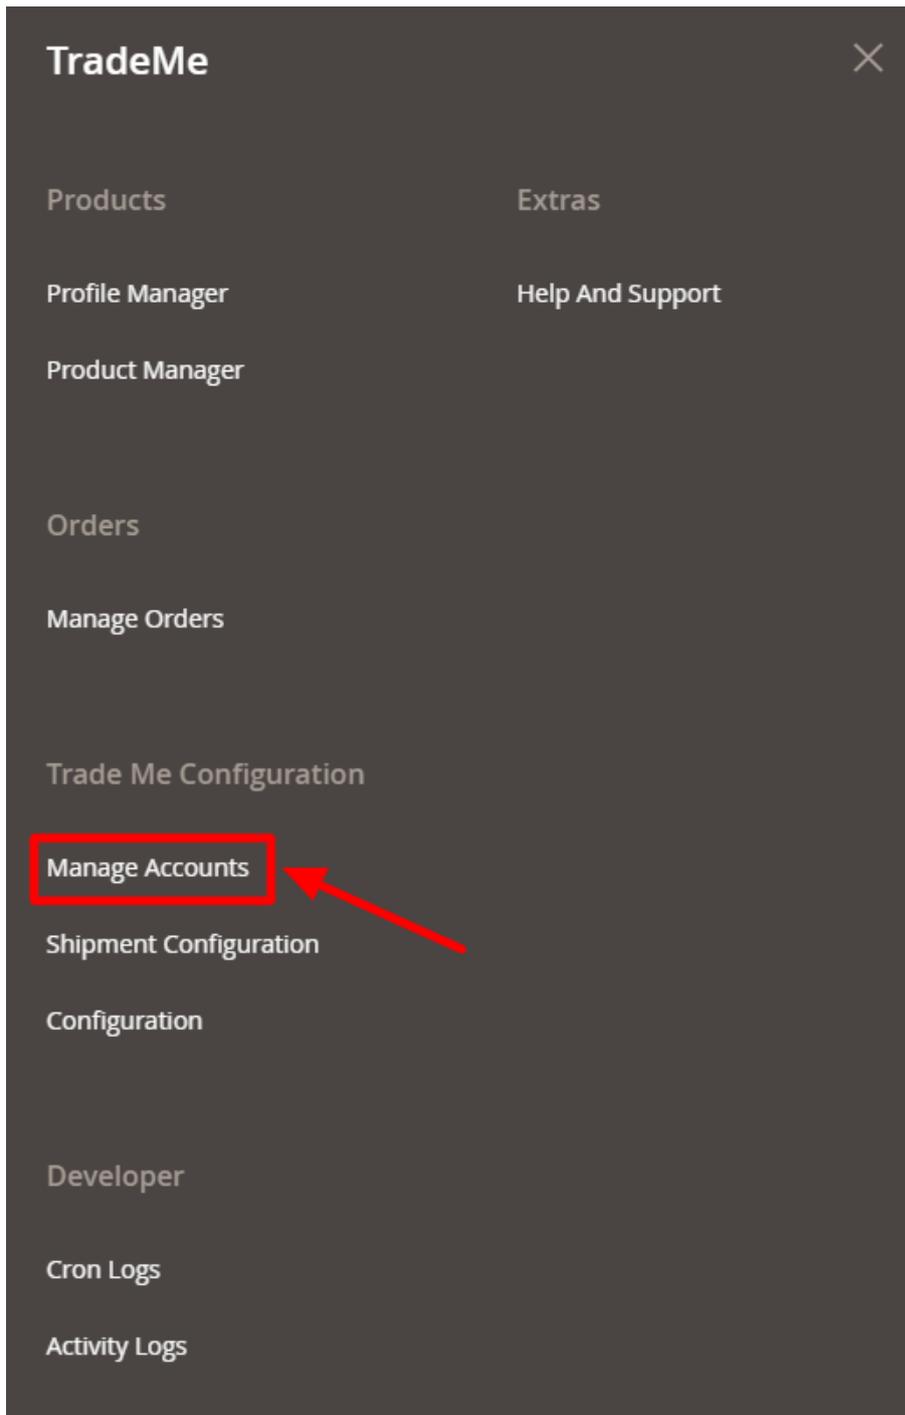

- In the **Order Cron** box, select **Enable** option to enable the order cron.
- In the **Product Syncing Cron** box, select the **Enable** option to enable the product syncing cron.

- c. In the **Inventory and Price Syncing cron** box, select the **Enable** option to enable the inventory and price syncing cron.
10. Click on **Save Config** button to save the configuration information.

## 4. Account Management Settings

### *To Manage Accounts*

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **TRADEME INTEGRATION** menu.  
A menu appears as shown in the following figure:

3. Click on **Manage Accounts**.

The page appears as shown in the following figure:

## Manage Account

<input type="button" value="Add"/>				

Handling Time \*

Order cut-off \*

6. Enter the **Configuration Code** according to you.
7. In the **Shipping Services**, select Destination, Carrier, Product, and Cost.
8. In the **Handling Time**, select the shipment handling time.
9. In **Order Cut Off**, select, the time.

## 6. Profile Management TradeMe

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento 2 attributes to the TradeMe attributes. These attributes are applicable to all the products that are assigned to the profile.

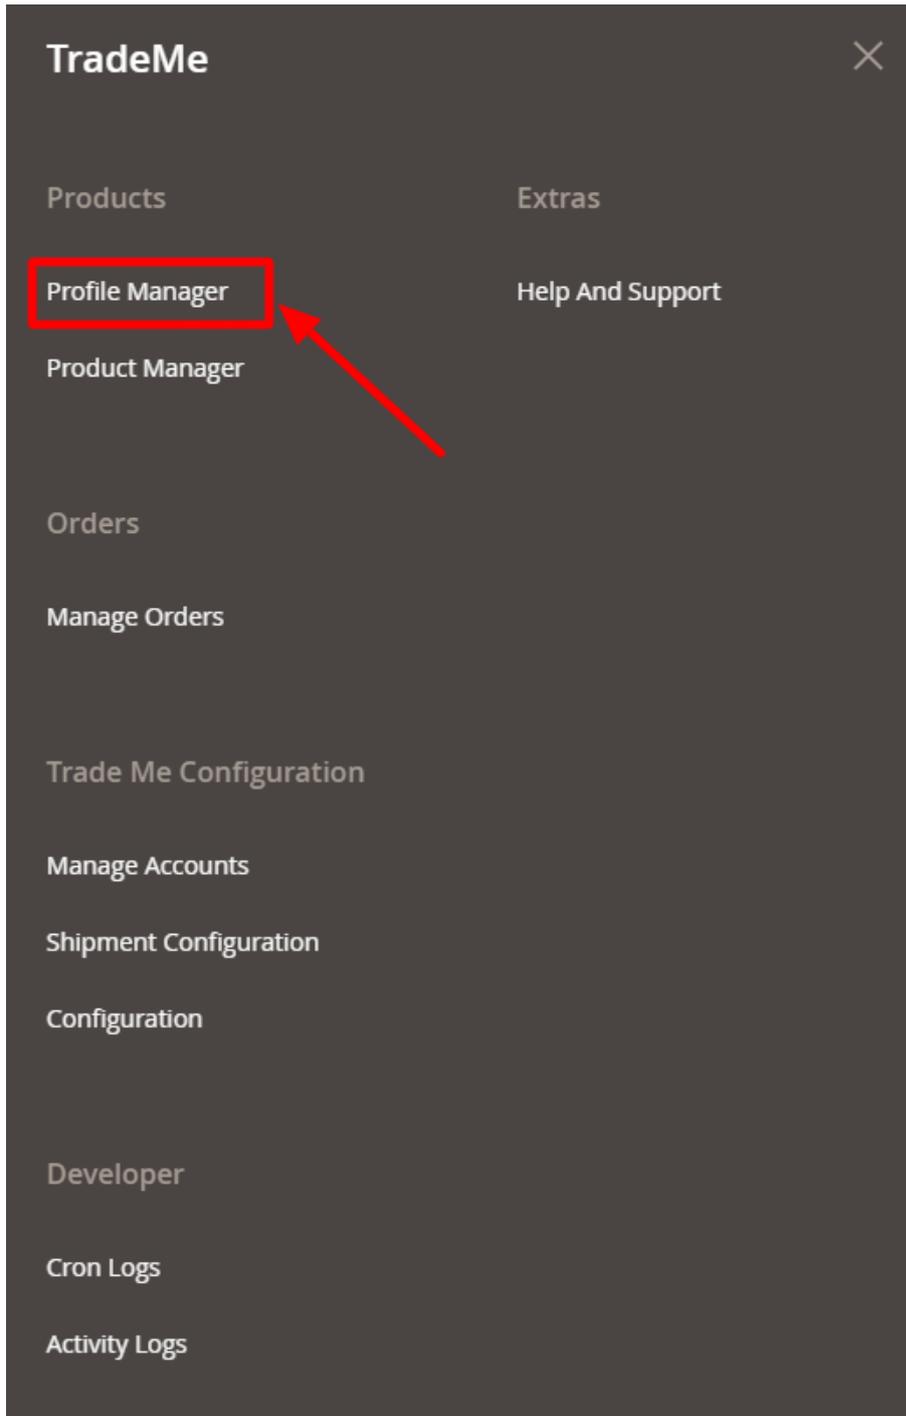

***Admin can do the following tasks:***

- Add new profile
- Edit the existing profile
- Bulk Action on the Selected Profiles

## **6.1. Add a New Profile**

***To add a new profile***

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **TRADEME INTEGRATION** menu.  
A menu appears as shown in the following figure:

3. Click on **Profile Manager**.  
The **Manage Profile** page appears as shown in the following figure:

## Manage Profile

The screenshot shows the 'Manage Profile' interface. At the top right, there are search, notification (11), and user icons. Below the header is a light gray bar with an orange 'Add New Profile' button. Underneath are controls for 'Filters', 'Default View', and 'Columns'. A table header is visible with columns: ID, Profile Code, Profile Name, Status, Product Count, and Actions. Below the header, a message states 'We couldn't find any records.' The table also shows '0 records found' and '20 per page'.

4. Click the **Add New Profile**

The **Add New Profile** page appears as shown in the following figure:

The screenshot shows the 'New Profile' form. At the top right, there are search, notification (11), and user icons. Below the header is a light gray bar with buttons: 'Back', 'Reset', 'Save and Continue Edit', and an orange 'Save' button. On the left is a sidebar with 'PROFILE INFORMATION' and sub-items: 'Profile info', 'Category & Attribute', and 'Profile Products'. The main area is titled 'Profile Information' and contains three fields: 'Profile Code \*' (with a note: 'For internal use. Must be unique with no spaces'), 'Profile Name \*', and 'Profile Status' (set to 'Disabled').

5. In the left panel, under **Profile Information**, do the following steps:

- a. In the **Profile Code** box, enter the Profile Code.

**Note: Please use only letters (a-z or A-Z), numbers (0-9) or underscore (\_) in this field, and the first character should be a letter.**

For internal use. Must be unique with no spaces

- b.

In the **Profile Name** box, enter the name of the profile,

- c.

In the **Profile Status** box, select the **Enable** option to enable the profile status.

6. Then Click on **Category & Attribute**.

The **Category&Attribute** page appears as shown in the following figure:

[← Back](#)[Reset](#)[Save and Continue Edit](#)[Save](#)

3. On this page, all the available profiles are listed.
4. *To delete the selected profiles*, do the following steps:
  - a. Select the profiles those are no more required.
  - b. Click the **Arrow** button next to the **Actions** field.  
 The **Actions** list appear as shown in the following figure:

- c. Click the **Delete** option.  
A confirmation dialog box appears.
- d. Click the **OK** button.  
The selected profiles are deleted.
- e. *To disable the selected profiles, do the following steps:*
  - i. Select the required profiles.
  - ii. Click the **Arrow** button next to the **Actions** field.  
The **Actions** list appear as shown in the following figure:

- iii. Click the **Disable** option.  
The selected profiles are disabled.
- iv. *To enable the selected profiles, do the following steps:*
  - i. Select the required profiles.
  - ii. Click the **Arrow** button next to the **Actions** field.  
The **Actions** list appear as shown in the following figure:

- iii. Click the **Enable** option.  
The selected profiles are enabled.

## 7. TradeMe Product Settings

On this page, admin can view, edit, and validate the individual product. Also, the admin can view the error message if any error exists in any product details. After uploading the product on TradeMe or after updating the product inventory or the product price, the user can check the status of the feed, Also, can view the feed error if

any. The admin can also submit certain actions on the selected products available on the **TradeMe Product Listing** page.

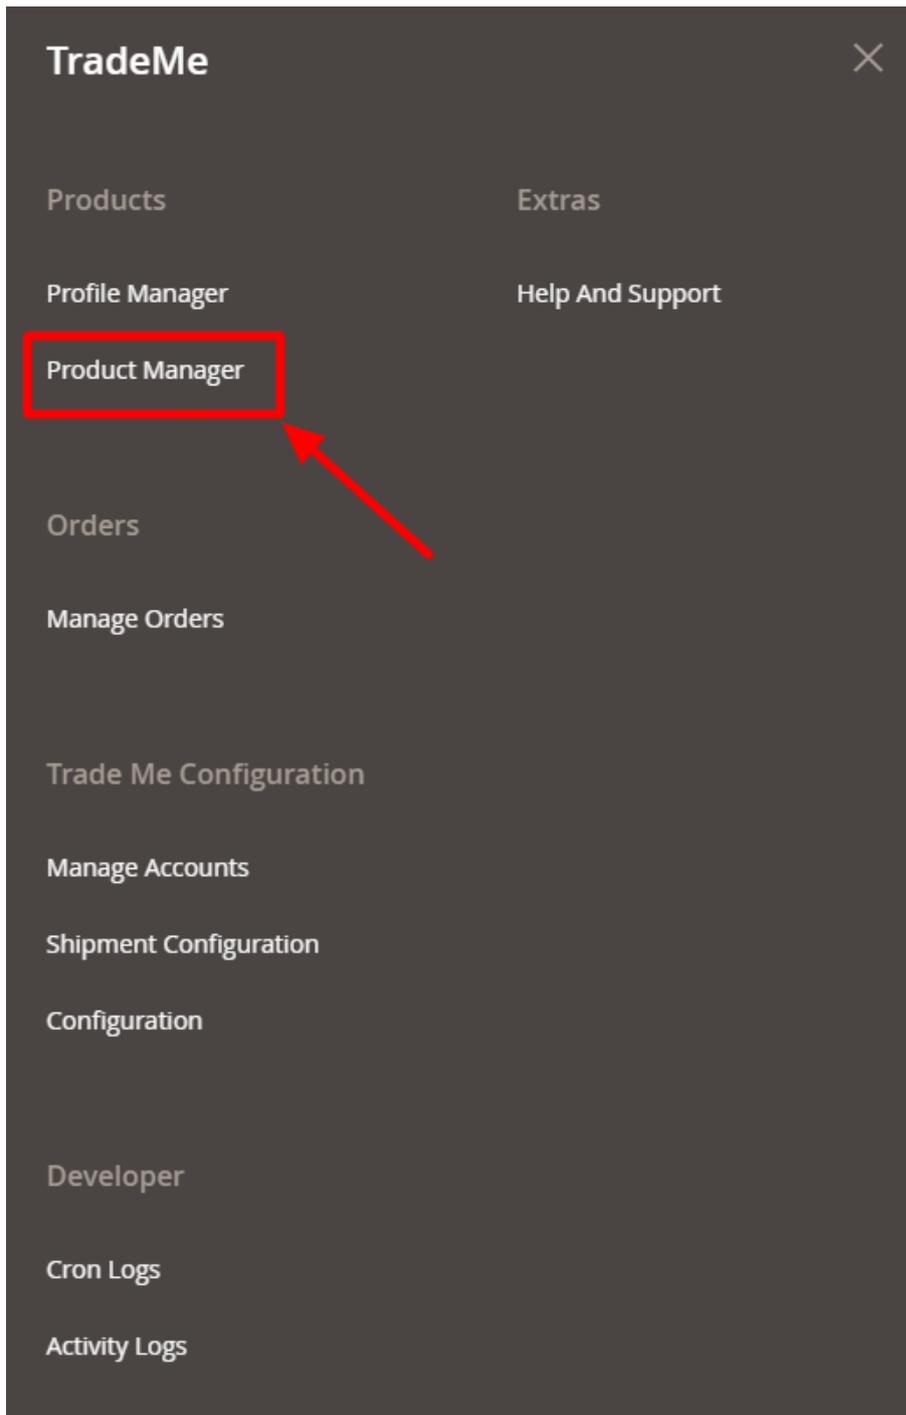

*This section covers the following topics:*

- View the Product Details
- Edit the TradeMe Products
- Submit Bulk Action on the Selected Products

## 7.1. Edit the TradeMe Product

*To edit the TradeMe product details*

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **TRADEME INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Product Listing**.

The **TradeMe Product Listing** page appears as shown in the following figure:

## 8. Order Settings TradeMe

*Admin can do the following tasks while managing the TradeMe orders:*

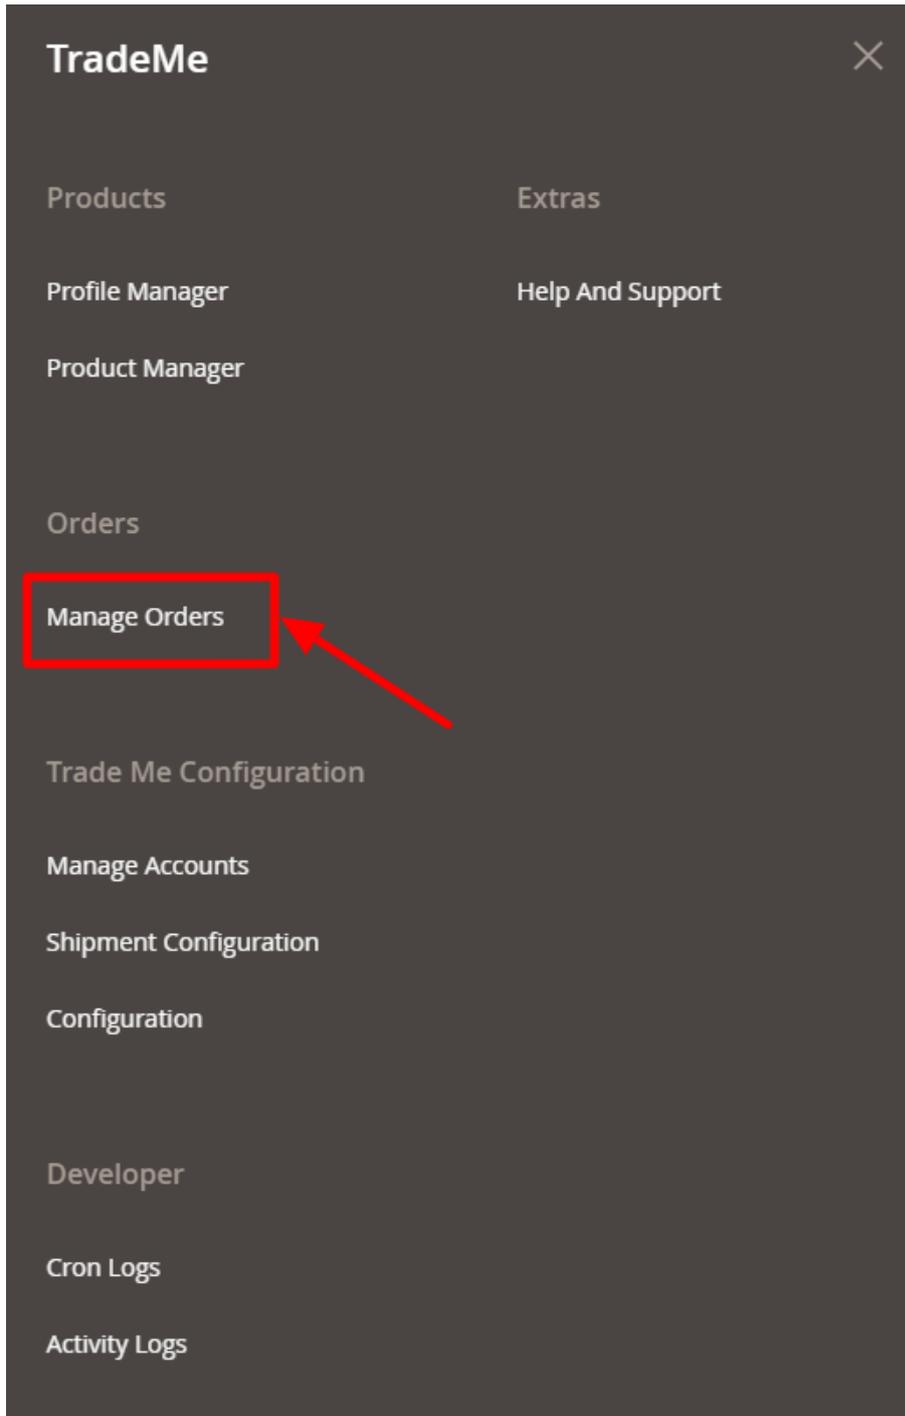

- Fetch, View, Ship, and delete the TradeMe Orders

### 8.1. Fetch and Delete the TradeMe Orders

The Magento 2 store owners can fetch the new orders and view all the order details fetched from TradeMe. They can also ship the required orders and can delete the orders those are no more required.

#### *To fetch and view new orders*

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **TRADEME INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Manage Orders**.

The **TradeMe Order List** page appears as shown in the following figure:

## Order Fetch Status

-  Starting Order Fetch execution, please wait...
-  Warning: Please do not close the window during order fetch
-  Total 1 Batch(s) Found.
-  100% 1 Of 1 Processing
-  Finished order fetch execution.

## 5. If the order is imported successfully then, a new record is found in the Orders Grid table as shown in the figure.

**Notes:**

- Orders are automatically imported through CRON in every 10 minutes.
- Whenever the latest orders are imported from TradeMe, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported in the Magento 2 store admin panel.
- If no Order is imported, then check the Failed orders listed on the **TradeMe Failed Order** page.
- Orders are auto-rejected on TradeMe in the following conditions:
  - When TradeMe Product SKU does not exist in Magento 2 store.
  - When Product is Out of Stock in Magento 2 store.
  - When a product is disabled in Magento 2 store.

6. **To delete the Trade Me orders**

- a. Go to the **Magento 2 Admin** panel.
- b. On the left navigation bar, click the **TRADEME INTEGRATION** menu, and then click **Orders Listing**.

The **TradeMe Order List** page appears as shown in the following figure:

c. To delete the single order, do the following steps:

- i. Scroll down to the order row no more required.
- ii. In the **Action** column of the respective row, click the **Delete**

icon.

A confirmation dialog box appears.

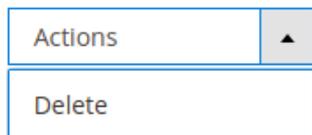

- iii. Click the **OK** button.

The order is deleted from the TradeMe Marketplace.

d. To delete the selected TradeMe orders in bulk, do the following steps:

- i. Select the checkboxes associated with the orders those are no more required.
- ii. Click the **Arrow** button next to the **Actions** list.

A menu appears as shown in the following figure:

- iii. Click **Delete Order(s)**.

A confirmation dialog box appears.

- iv. Click the **OK** button.

The selected orders are deleted from the TradeMe Marketplace.

## 9. Developer Options

*The developer section of TradeMe contains the following settings:*

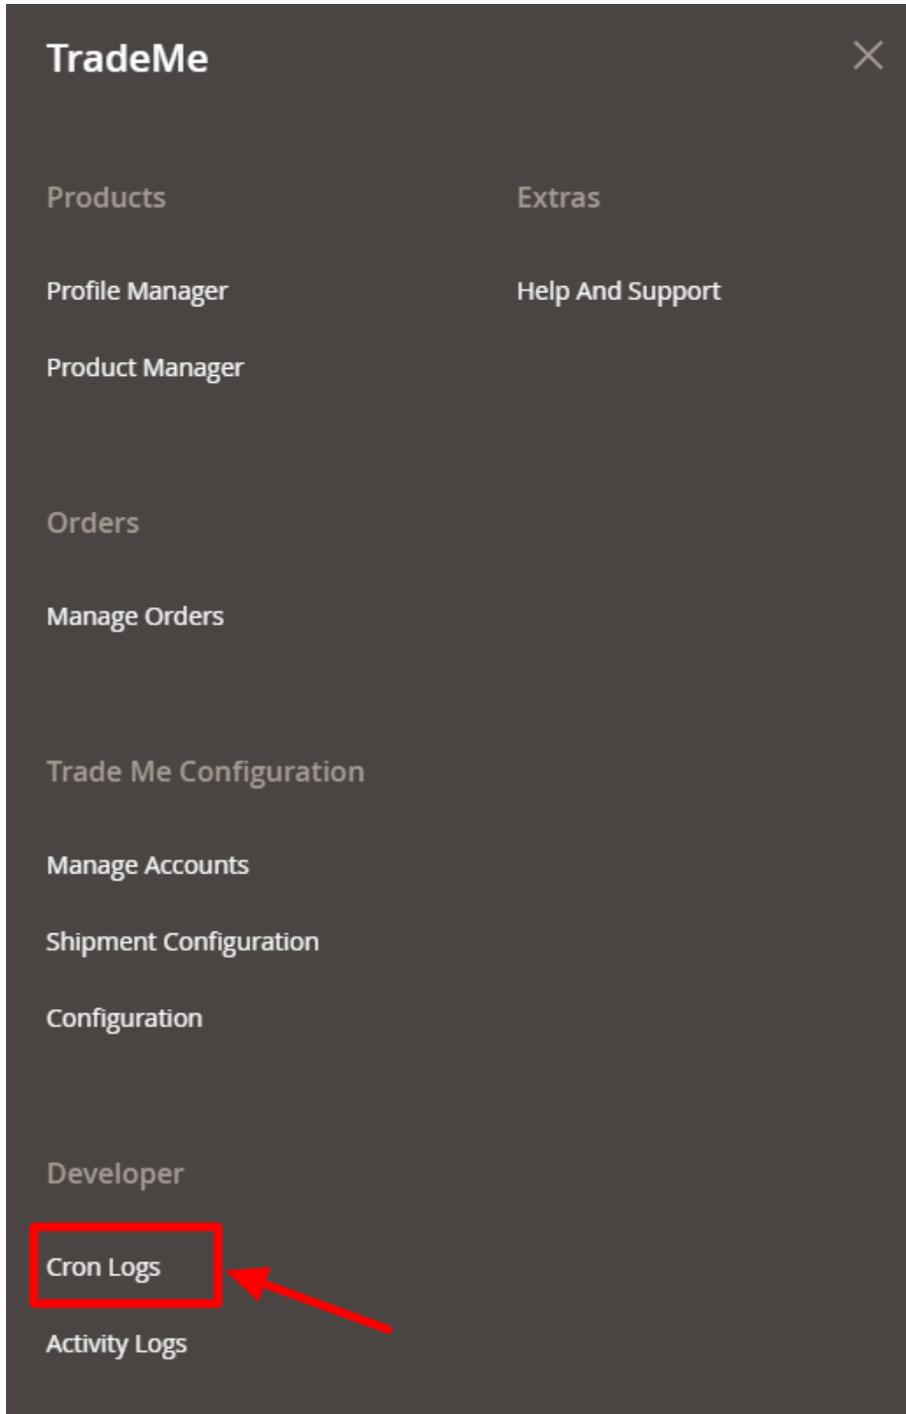

- Cron Log Settings
- Activity Log Settings

### 9.1. Cron Logs

Here you can see all cron details information like Product inventory Cron, Product Pricing Cron, Order Cron details, Shipment Cron information. If you are thinking to take a fresh start ahead, then Click on the **Truncate** button to delete all the previous information.

**To view TradeMe Cron Details**

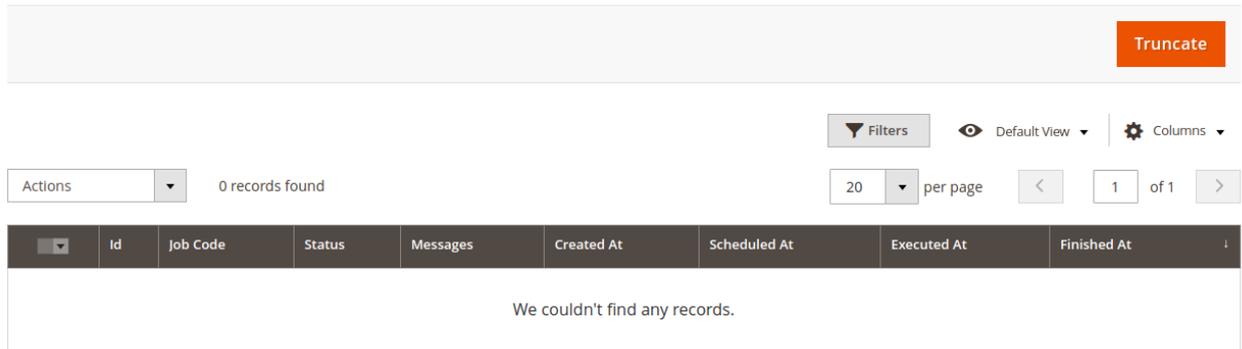

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **TRADEME INTEGRATION** menu.  
A menu appears as shown in the following figure:

3. Click **Cron Logs**.  
The **TradeMe Cron** page appears as shown in the following figure:

## TradeMe Cron Logs

Q 🔔 👤 admin ▾

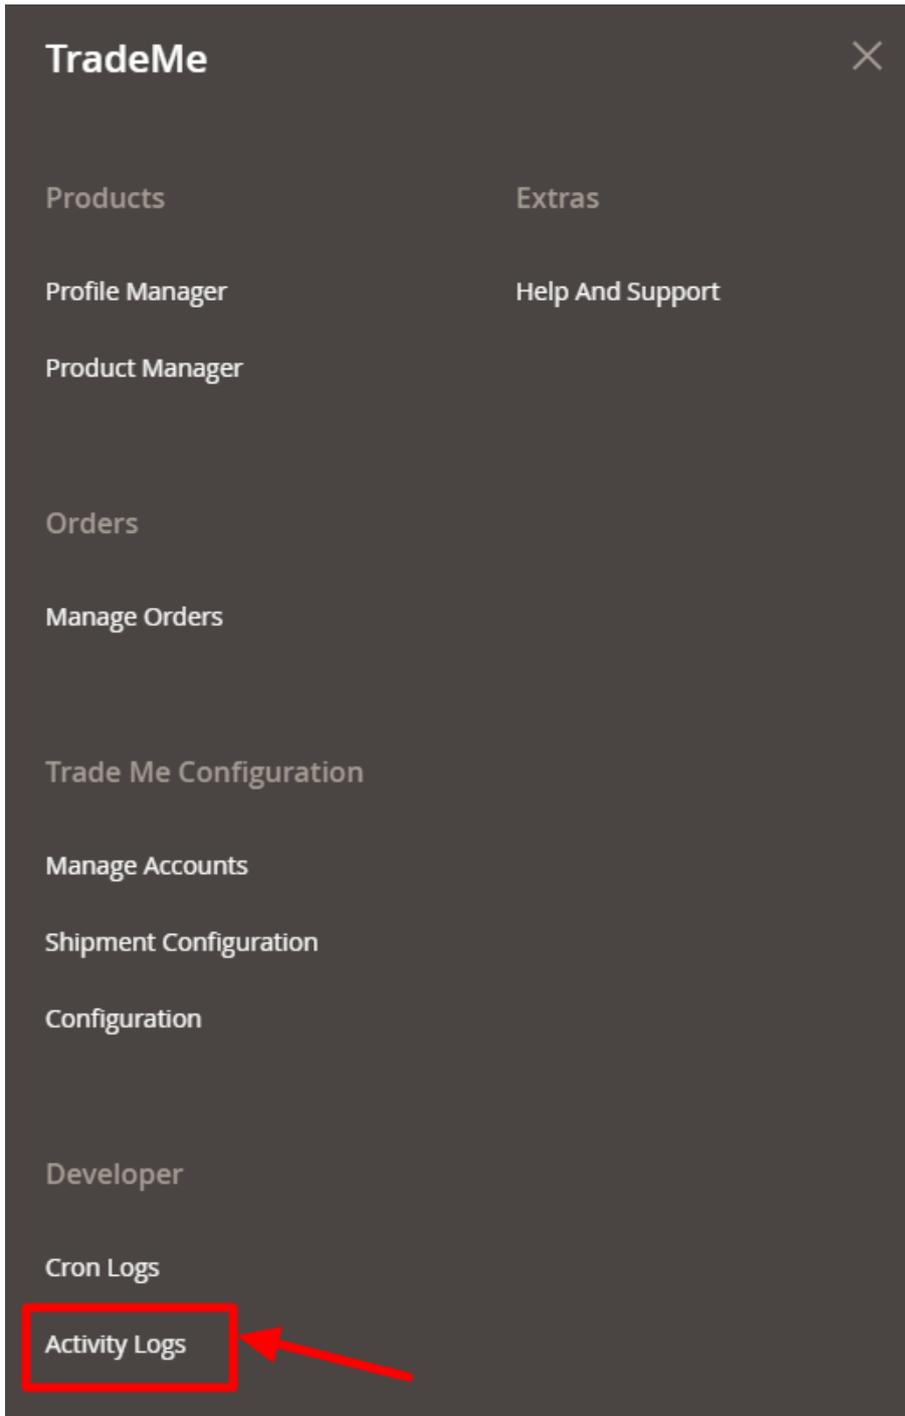

The screenshot shows the TradeMe Cron Logs interface. At the top right, there is a search icon, a notification bell, and a user profile icon labeled 'admin'. Below this is a 'Truncate' button. The main area contains a table with the following columns: Id, Job Code, Status, Messages, Created At, Scheduled At, Executed At, and Finished At. The table is currently empty, displaying the message 'We couldn't find any records.' Above the table, there are controls for filters, default view, and columns. Below the table, there is an 'Actions' dropdown menu, a '0 records found' status, a '20 per page' selector, and pagination controls showing '1 of 1'.

4. To delete all the cron logs, click the **Truncate** button.

## 9.2. Activity Logs

### *To view TradeMe Cron Details*

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **TRADEME INTEGRATION** menu.  
A menu appears as shown in the following figure:

3. Click **Activity Logs**.

The **TradeMe Activity logs** page appears as shown in the following figure:
