1. Overview

AliExpress is a retail branch of the Alibaba Group. AliExpress has more than 111 million quality deals on computer electronics, toys, tools, accessories, home decor, gardening, and many more. It also comes in the top 10 e-commerce marketplaces around the world.

It is the first Chinese e-retailer to open up the Chinese market for the people from all over the world.

To enable the e-commerce enthusiasts who aspire to turn a profit in the world of e-commerce, CedCommerce brings the **AliExpress Dropship Extension**. It enables the Magento users to connect with AliExpress Dropship program to advertise or offer its products on their website and earn commissions.

With the help of this extension, the store owner can easily set up different prices offered at AliExpress, such as Sale Price, Offer Price, or Regular Price. In the case of product variations, this extension provides flexibility to fetch all the variants of the products such as color, size, fabric, and so on.

This extension, in accordance with Dropship APIs of AliExpress enables the Magento 2 store owners to perform all the activities that facilitate the fetching of the AliExpress product data to their websites, advertising the products, and then redirecting the purchase process back to the AliExpress website.

Hence provides a very good opportunity to earn the commissions through the advertisements.

Key features:

- Imports items information such as description and images.
- Enables fetching of Product variation data such as color, size, fabric, and so on.
- Enables products import in bulk from AliExpress.
- Synchronization of product price, image, description, and availability of products.
- Imports products based on Product URL.

2. Extension Installation

To install the extension

- Upload and Extract the AliexpressDropship package and Integrator file inside the `<magento-root>/app/code/Ced/` directory and run the below command from Magento root.

```
php -dmemory_limit=5G bin/magento setup:upgrade
php -dmemory_limit=5G bin/magento setup:di:compile
php -dmemory_limit=5G bin/magento setup:static-content:deploy -f
php -dmemory_limit=5G bin/magento index:reindex
php -dmemory_limit=5G bin/magento cache:clean
php -dmemory_limit=5G bin/magento cache:flush
```

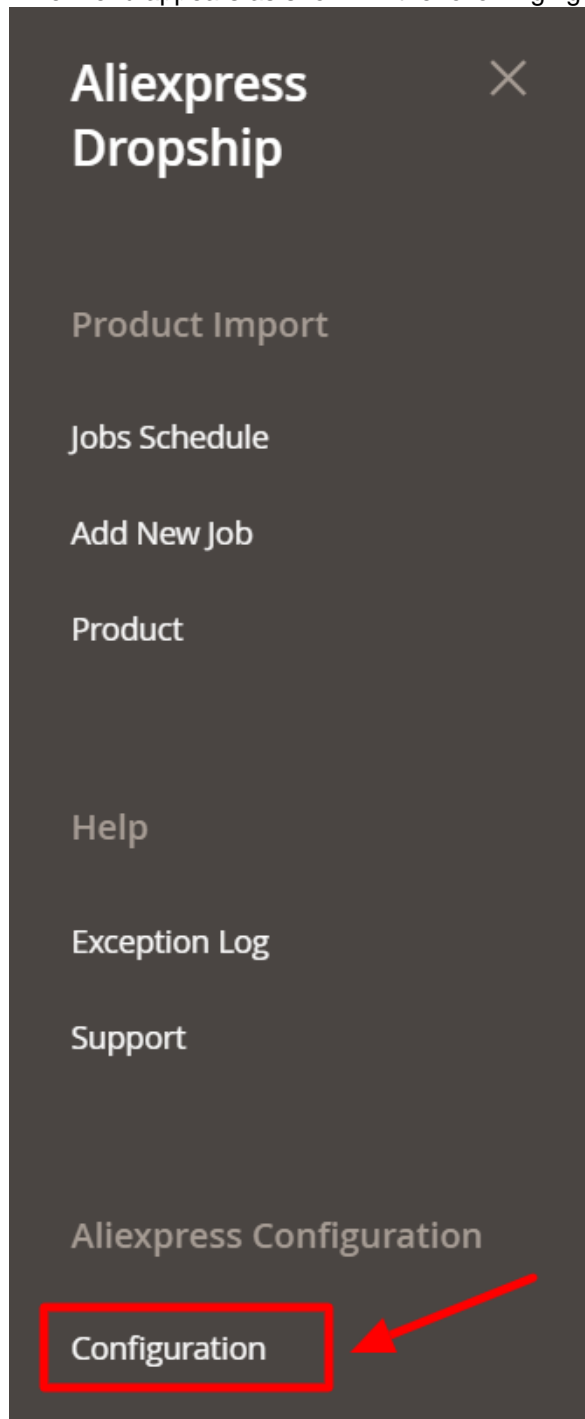

3. AliExpress Configuration Settings

After retrieving the AliExpress Dropshipping API credentials, the store owner can use them while setting up the configurations through the Admin panel.

To set up the AliExpress Dropshipping Configuration

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **ALIEXPRESS DROPSHIP** menu.

The menu appears as shown in the following figure:

3. Click on **Configuration**.

The **Configuration** page appears as shown in the following figure:

Configuration

Scope: Default Config ▾ ?

Save Config

CEDCOMMERCE ^

Aliexpress Dropship Settings ⌵

Product Import Settings ⌵

Cron Settings ⌵

Translate Product Data ⌵

4. In the right panel, click the **Aliexpress Dropship Settings** tab.
The tab is expanded and the section appears as shown in the following figure:

Aliexpress Dropship Settings ⌴

Client Id [global] Client Secret [global] Country [global] ▾☒ Use system value

Product from which county please select

Langauge [global]

Please insert language code like en for sync English

Get Code

Code [global]

That will auto fill if not getting from frontend you can fill after click get Code button

5. Under **AliExpress Dropship Settings**, do the following steps:
- In **Client Id**, you need to copy here the client Id that you had fetched in the Aliexpress Dropship account.
 - In **Client Secret** also copy the secret key that you had generated in the Aliexpress Dropship account.
 - In **Country**, select the country from the dropdown from which the products belong. Also, you can use system values to select the country by default.
 - In **Language**, enter the Language Code based on the country selected for synchronisation.
 - In **Code**, you can fill it manually by clicking on Get Code button if the code is not filled automatically.
- 6.

Now scroll down and Click on the **Product Import Settings** tab.
The tab is expanded and the section appears as shown in the following figure:

Product Import Settings

Imported Product Price <small>[global]</small>	<div>Default Aliexpress Price ▼</div> <div>Select to set a different product price in your store</div>	
Set Default Qty for Products <small>[global]</small>	<div>10</div>	<input type="checkbox"/> Use system value
Enable Imported Products <small>[global]</small>	<div>Yes ▼</div>	<input type="checkbox"/> Use system value
Set Product Visibility <small>[global]</small>	<div>Catalog, Search ▼</div>	<input type="checkbox"/> Use system value
English Store <small>[global]</small>	<div>Default Store View ▼</div>	<input type="checkbox"/> Use system value
Root Category <small>[global]</small>	<div>Default Category ▼</div> <div>Root Default Category, Default root category is id is 2</div>	

7.

Under **Product Import Settings**, do the following steps:

a.

In the **Imported Product Price** list, select one of the following options:

- `. **Increase by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.
- `. **Increase by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.
Enter the numeric value to increase the price of the AliExpress, product price by the entered value % of Magento 2 price.
For Example,
Magento 2 price + 5% of Magento 2 price.
Magento 2 Price = 100
Select **Increase By Fixed Percentage** option
Enter Percentage = 5
 $100 + 5\% \text{ of } 100 = 100 + 5 = 105$
Thus, AliExpress Product Price = 105
- `. **Decrease by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.
- `. **Decrease by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.
Enter the numeric value to decrease the price of the AliExpress product price by the entered value % of Magento 2 price
For Example,
Magento 2 price – 5% of Magento 2 price.
Magento 2 Price = 100
Select **Decrease By Fixed Percentage** option
Enter Percentage = 5
 $100 - 5\% \text{ of } 100 = 100 - 5 = 95$
Thus, AliExpress Product Price = 95

b. In **Set Default Qty for products**, you can set the number of products to be imported in one go.
This will be a default value that will be used every time products are imported.

c.

In the **Enable Imported Products** list, select the **Yes** option for the products that you want to be imported to enable.

d.

In the **Set Product Visibility** list, select the required option to set the area for which you want the product to be visible.

e. In the **English Store**, select the type of store view that you want for your store.

f. In the **Root Category**, select the different root categories from the menu for the products imported.

8. Scroll down and click on the **Cron Settings** tab.

The tab is expanded and the section appears as shown in the following figure:

Cron Settings

Product Import Enable [global] Yes ☐ Use system value

Product Status Sync Enable [global] Yes ☐ Use system value

9. Under **Cron Settings**, do the following steps:

- In **Product Import Enable**, select **Yes** to automatically import the products at regular intervals of time by running the crons.
- In **Product Status Sync Enable**, select **Yes** to automatically sync the status of the imported products at regular intervals of time with the crons.

10. Move to the next section & Click on **Translate Product Data**.

Translate Product Data

Enable Translation [global] Yes ☐ Use system value

Google translation Api key [global]

Api key which is used for translation . If you not having translation Api Key, Then you can register for translation api over here <https://cloud.google.com/translate/pricing>

Language [global] Default (English) ☐ Use system value

Please select translation language .

Product Attribute [global] Name, Description, Short Description

Please select those attribute, which you want to translate.

11. Under **Translate Product Data**, do the following steps:

- In **Enable Translation**, select **Yes** to translate the imported product data.
- In **Google translation API Key**, enter the translation key for the product data. The API key is used for translation. If you do not have a translation API Key, then you can register for translation API over here <https://cloud.google.com/translate/pricing>

- In **Language**, select the language from the list in which you want the product data to be translated.
 - Choose the **Product Attributes** for the imported products for your store.
12. Click the **Save Config** button.
The Configuration settings are saved.

a.

The inventory price job will be added for the selected products.

7. AliExpress Logs

To view error logs

1.
Go to the **Magento Admin** panel.
2. On the left navigation bar, click the **ALIEXPRESS DROPSHIP** menu.
The menu appears as shown in the following figure:

3. Click on **Exception Log**.

The **Log** page appears as shown below:

Aliexpress Error Log							Truncate
	Id	Log Type	Log Date	log sub type	Log Comment	log_value	
We couldn't find any records.							

4. The errors log along with its details will be displayed in the grid.

5. To delete any log, click on the **Truncate** button. The selected logs will be deleted.

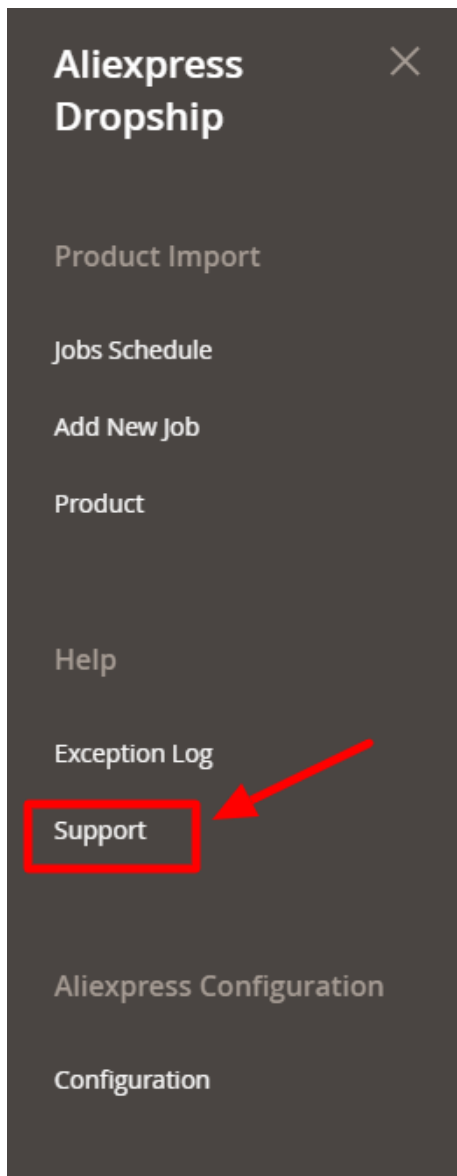

8. Help and Support

To view help and support

1.

Go to the **Magento Admin** panel.

2. On the left navigation bar, click the **ALIEXPRESS DROPSHIP** menu.
The menu appears as shown in the following figure:

3. Click on **Support**.

The **Help and Support** page appears as shown below:

4. You can connect CedCommerce via **Call**, **email**, or **Skype**.
5. To download the user guide of AliExpress Dropship Extension, click on **Aliexpress User Guide By CedCommerce** under **Documentation**.

9. How to set up Chrome Module

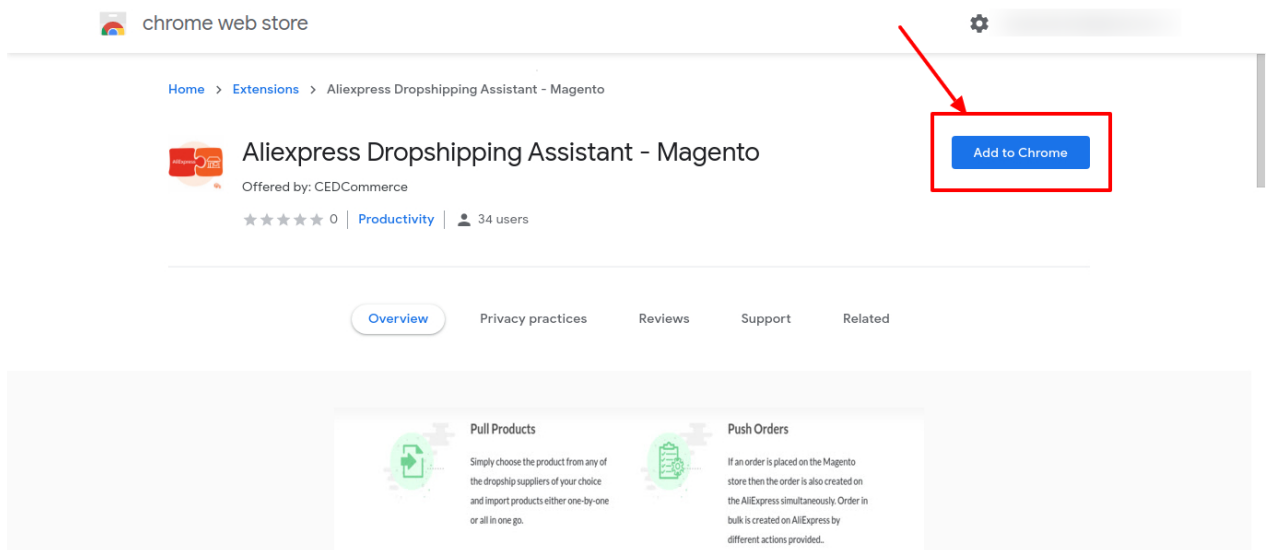

To setup chrome module extension.

The chrome extension can be downloaded in two ways:

1. Directly by Link
2. Package provided by CedCommerce Team

Case 1- Download Directly by Link:

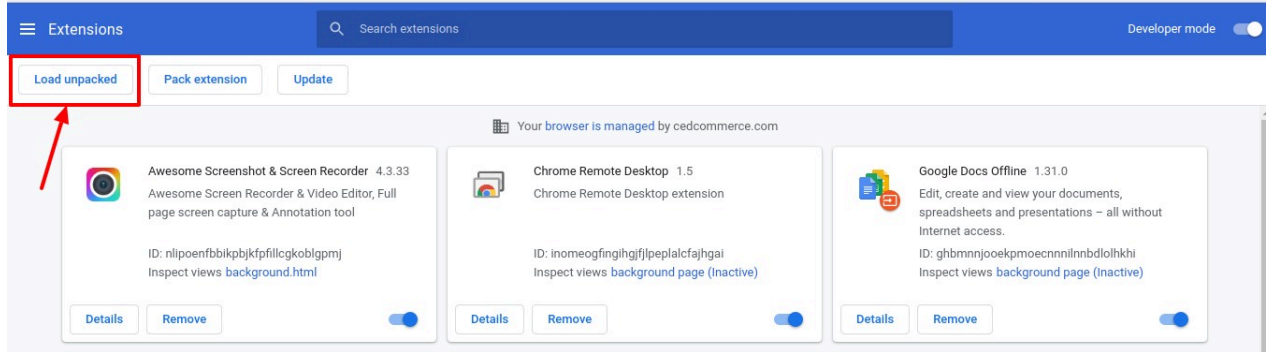

- To download the extension directly by link, click the link below:
<https://chrome.google.com/webstore/detail/aliexpress-dropshipping-a/dlcnmeglfjggpfmndpogabjhocffbam>
<https://chrome.google.com/webstore/detail/aliexpress-dropshipping-a/dlcnmeglfjggpfmndpogabjhocffbam>
- The link will open the page shown below, where you to click on **Add to Chrome** button to install the extension.

- The extension will be added.

Case 2- Download with the Package provided by CedCommerce Team

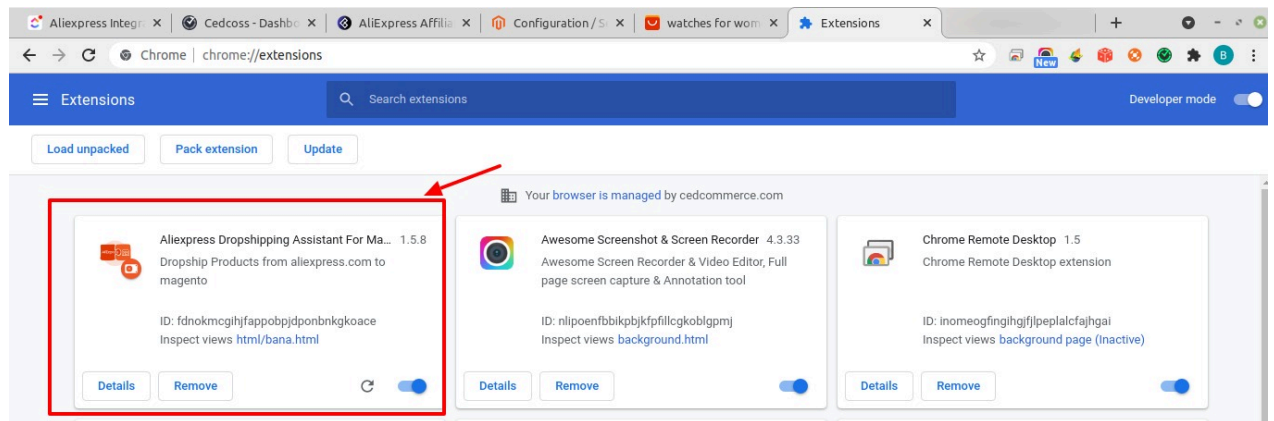

- Once the CedCommerce team provides you with the package then you need to open `chrome://extensions/(chrome://extensions/)` Url in your chrome browser. The following page will be opened:

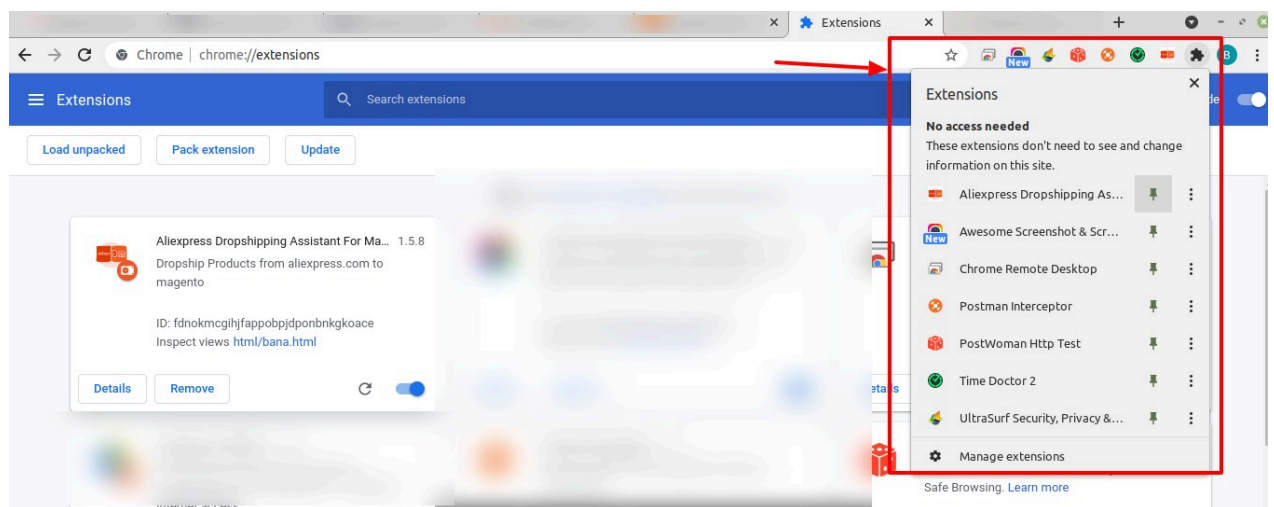

- Here you need to click on the **Load Unpacked** button. Then select the package from your system as shown below:

- The package will be installed and displayed in your existing extensions.

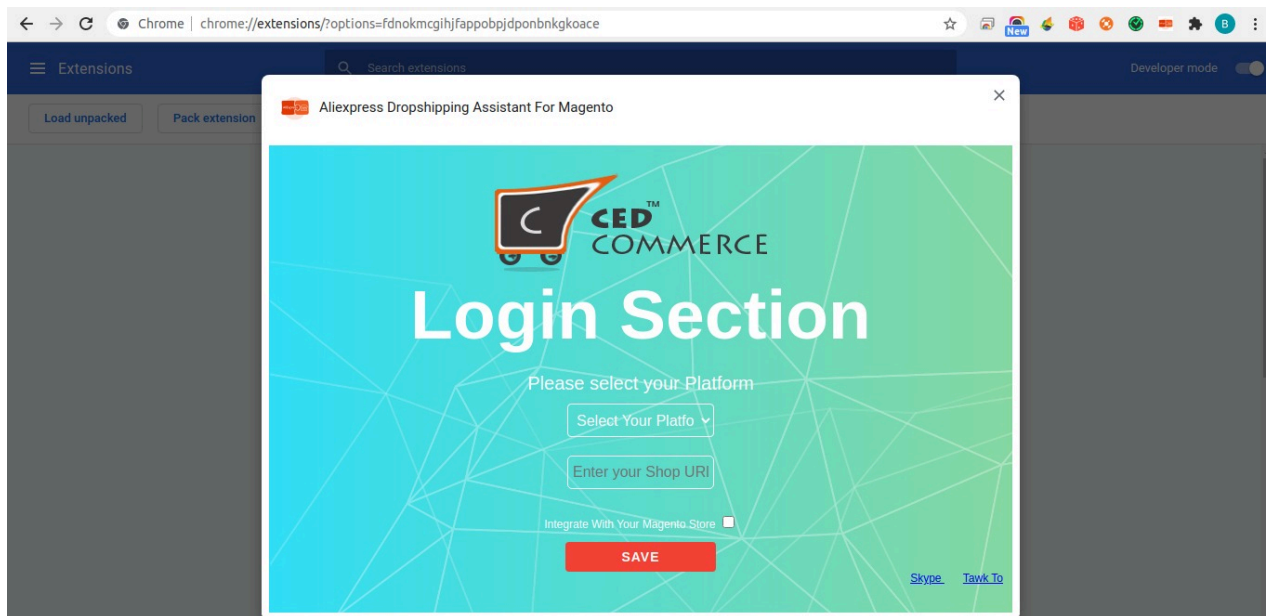

- The extension icon will be displayed in the chrome extensions list as shown below:

- Click on the **Aliexpress chrome extension** and pop up will appear as shown below to choose your platform:

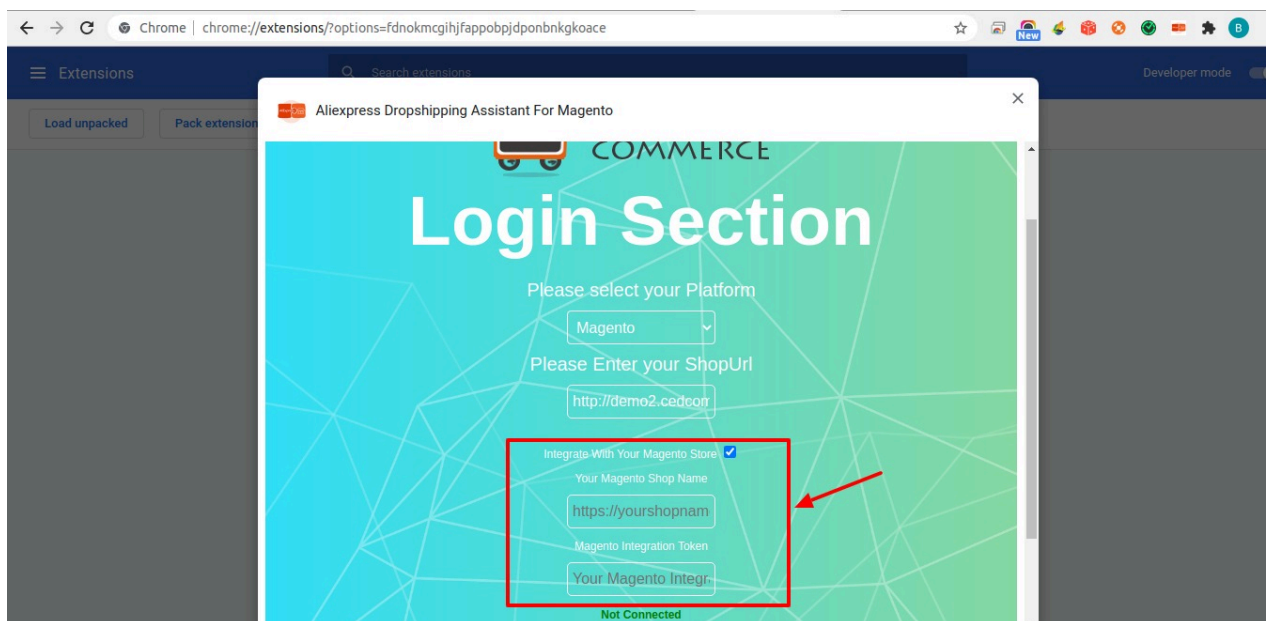

- Click on the **Select Your Platform** button, you will be navigated to the following page:

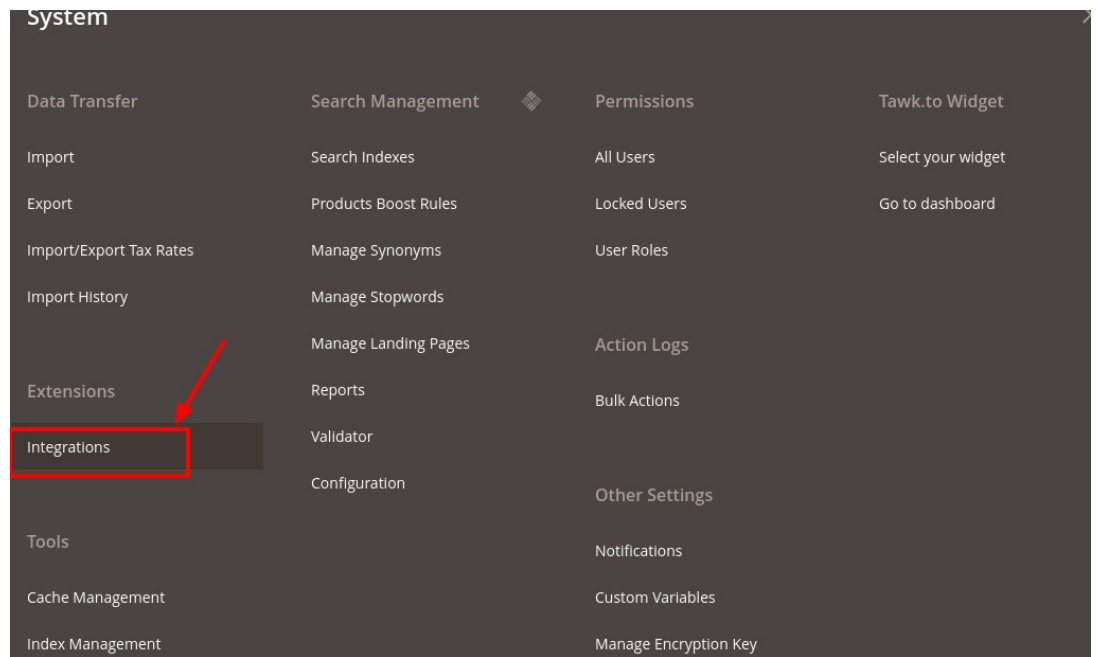

- In **Select your Platform**, select **Magento** as the platform and then **enter your shop Url** in the next field.
- If you want to integrate your store with Magento then checkbox the block next to it else if you do not want then skip it and click on the **Save** button. If you let this checkbox be **disabled** then you will continue getting the zip files but if it is **Enabled** then zip files won't be created and the products will be directly added to the Magento.

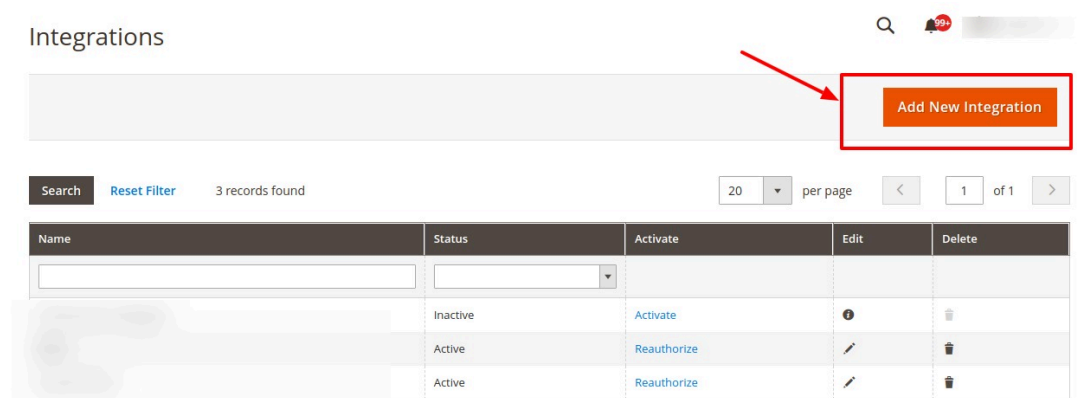

If the checkbox is Enabled then two more options appear in the **Login menu** as shown below:

- In the **Shop Name** box, enter the name of your **Magento Shop**.
- In **Magento Integration Token**, you need to mention the integration **Token Id** that you have created in your Magento store.
 - **Steps to fetch Magento Token-**
 - In Magento Panel Goto **Admin -> System -> Extensions -> Integrations**.

- You will be redirected to the **Integration Page**. Then click on **Add New Integration** button:

- The **Add New Integration Page** appears as shown below:
