1. Overview

ChatGPT AI Content Generator for Magento 2 is the best product description generator tool developed by CedCommerce. This extension works by simply integrating ChatGPT with sellers' Magento 2 store. It helps sellers instantly create multiple forms of content, such as short & long product descriptions, meta titles, meta descriptions, etc., on given instructions. This further helps sellers save time and reduce workload as they don't have to add/edit product content on the store manually. Furthermore, they can select single or multiple products and generate their content all at the same time.

Features at Glance

- **Detailed SEO Content Generation:** Sellers can use this tool to automatically generate product meta titles, descriptions, keywords, and URLs with the AI tool.
- **Bulk Content Upload:** This extension enables sellers to select multiple products on the Magento 2 store and create their content all at once.
- **Instant Content Generation:** ChatGPT AI tool allow sellers to instantly generate product content once they add relevant product topic.
- **Attribute-Specific Content Creation:** Sellers can use this ChatGPT extension to select specific attributes for the product and get content for the same.
- **Content Creation for Newly Added Attributes:** Sellers can also add new attribute types to the store and instruct this extension to generate product content for the same. (Sellers can set the attribute and description length from the configuration setting)

2. Extension Installation

To install the extension,

- Log in to the **FTP**, and then go to the Magento 2 store root folder (generally present under the [public_html](#) folder).
- Create a new folder named [code](#) under the [app](#) folder; under [code](#) folder, create a folder named [Ced](#).
- Upload or Drag and Drop [app/code/Ced/ChatGPT](#) directory.
- After successfully uploading the directory, the extension will be installed/upgraded.
- Now run the following upgrade command in [cmd](#)

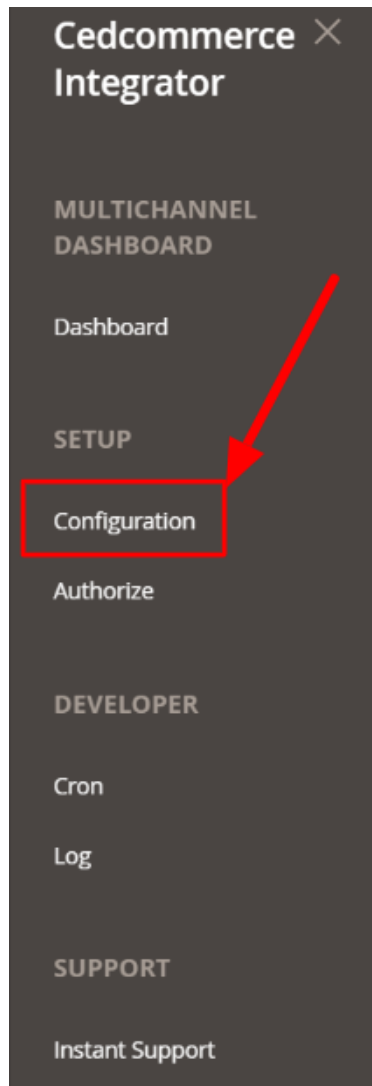

```
php bin/magento setup:upgrade
php bin/magento di:compile
php bin/magento setup:static-content:deploy
php bin/magento indexer:reindex
php bin/magento cache:flush
```

3. Configuration Settings

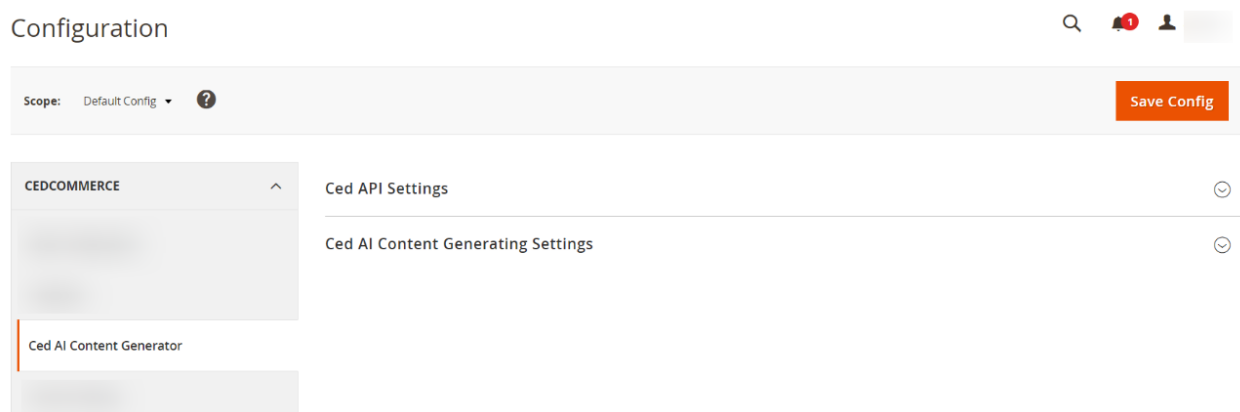

Once the sellers have installed the extension, they can proceed with configuration settings.

To configure the extension,

1. Go to your **ChatGPT Magento 2 admin panel**.
2. On the left navigation bar, click on **CedCommerce Integrator**.
The menu appears as shown below:

3. Click on **Configuration**, and you will be navigated to the configuration page as shown below:

4. Click on the **Ced API Settings**, and the section will expand as follows:

Ced API Settings

Enabled [global]

Api Key [global]

Get ChatGPT API key from:- <https://platform.openai.com/account/api-keys>

Validate [global]

Validation Status [global]

- In **Enabled**, select **Yes** to enable the extension.
 - In **API Key**, enter the key which you get from OpenAI.
Note: If you don't have the ChatGPT API key, click on the link below(<https://platform.openai.com/account/api-keys>) and fetch it from your account.
 - Once you enter the API key, click on **Validate** to validate your account.
 - In **Validation Status**, you can see if the credentials are valid or not.
5. Click on **Ced AI Content Generating Settings**, and the section will expand as follows:

Ced AI Content Generating Settings

Select Attributes [website]

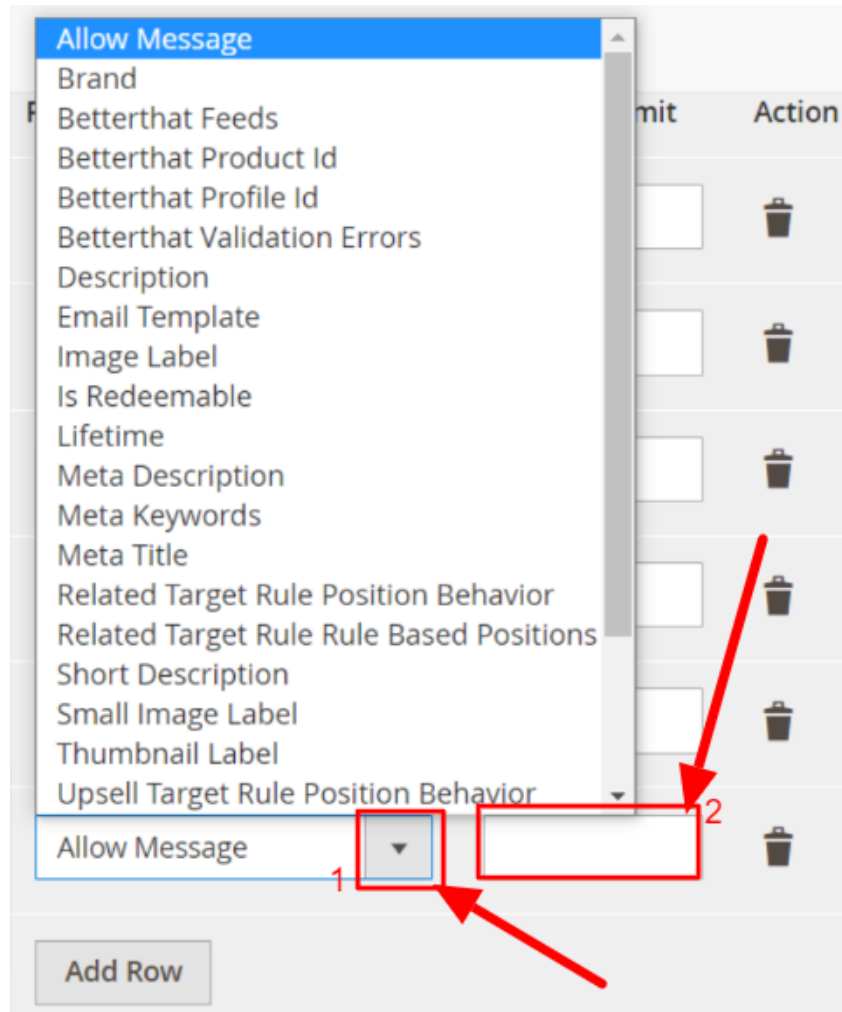

AI Generate The Content Based On This selected Attributes.

Product Attributes [store view]

Product Attribute	Charater Limit	Action
<input type="text" value="Meta Description"/>	<input type="text" value="500"/>	<input type="button" value="🗑️"/>
<input type="text" value="Meta Keywords"/>	<input type="text" value="500"/>	<input type="button" value="🗑️"/>
<input type="text" value="Meta Title"/>	<input type="text" value="500"/>	<input type="button" value="🗑️"/>
<input type="text" value="Description"/>	<input type="text" value="500"/>	<input type="button" value="🗑️"/>
<input type="text" value="Short Description"/>	<input type="text" value="500"/>	<input type="button" value="🗑️"/>
<input type="button" value="Add Row"/>		

AI Generate The Content Only For These Selected Product Attributes.

- In **Select Attributes**, AI generates the content for selected attributes
- In **Product Attributes**, you can select the attributes for which you want AI to generate product content
