1. Overview: CedCommerce Amazon Integration

About CedCommerce

CedCommerce is a leading multichannel enabler that helps online merchants expand their business to international marketplaces like Amazon, Amazon, Walmart, and Google via secure, optimized, and scalable integration tools and technologies.

With 50+ sales channel tools for Shopify, WooCommerce, Magento, BigCommerce, OpenCart, and Prestashop, over 40,000 merchants across the globe have benefited from CedCommerce's multichannel capabilities.

Highly recommended by G2, Trustpilot, Capterra, Web retailer, Cuspera, and Serchen, CedCommerce enables smooth merchant onboarding and streamlined product data feed flow.

CedCommerce Amazon Integration

CedCommerce Amazon Integration is an endeavor to make 'selling' a profitable experience on the leading shopping destination 'Amazon marketplace' globally. The integration extends a 360-degree convenience with features that automate, manage, and streamline all the operations between your Shipline store and Amazon marketplace.

Expedited Authentication Process

The solution has a rapid and easy authentication process. Ensure the prerequisites and connect your Shipline store with Amazon in just a few minutes.

Automated Feed Synchronisation across channels

Goodbye to manual syncing. Built with the power of automation, the app ensures real-time listing, order, shipment, and currency sync between your Shipline store and Amazon marketplace via the app.

Simplified Order and Shipment Management

Enjoy flexible control over syncing and managing your shipment and order details between channels. Get your marketplace orders created on the Shipline store for timely fulfillment.

One-click Tracking Space

Get all the Product, Order, and Feed-related statuses on dedicated tabs of the app. With minimum manual effort, churn optimum results.

Dynamic and Flexible Listing Optimization

Create, Edit, and Manage product templates for varied listings. Set Global settings for listings and map suitable attributes for better visibility on the Amazon marketplace.

Alert Notifications preventing financial losses

Enable Alert Notifications and get all the necessary messages and alerts related to your new orders, successful feeds, stocks, return requests, and shipping statuses.

Eliminating manual calculations with Global Currency Converter

Selling cross-border poses currency problems. With this no-cost feature, you can simply set your currency and get all the prices automatically calculated for every listing.

24*7 Assistance by Solution Experts

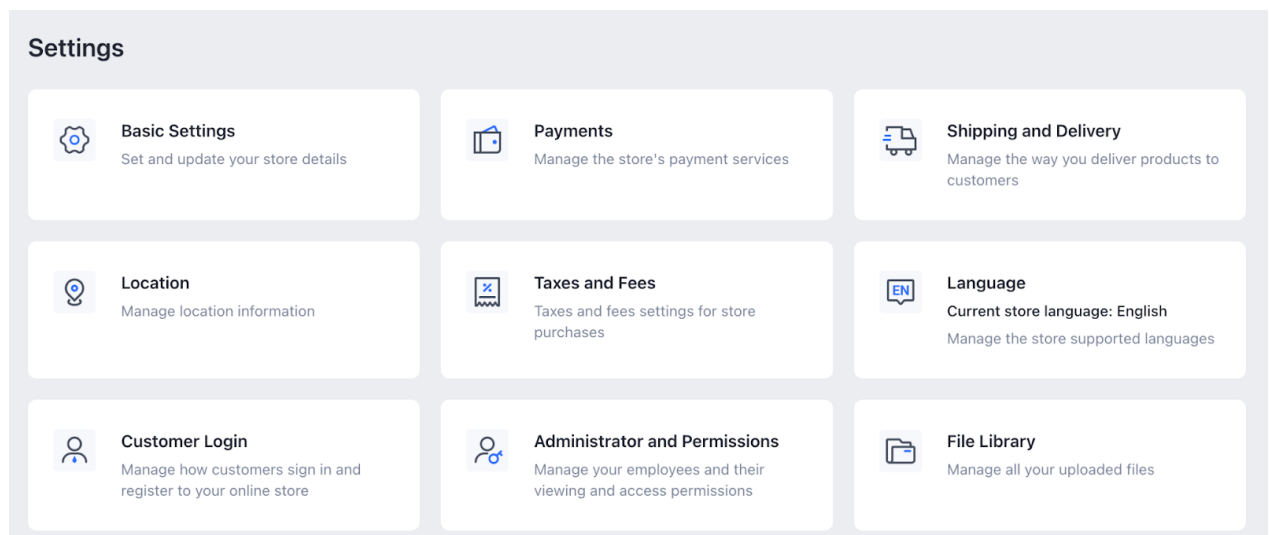

Facing any glitches while operating the app? Reach out to the solution experts anytime, any day. Additionally, get expert tips to sell profitably on the marketplace.

2. How to create Custom Payment Method in Shopline?

One of the outstanding features of the integration is to help merchants streamline and sync orders from marketplace to Shopline. To successfully create Orders on Shopline from marketplace via app, you must ensure creating and updating a Custom Payment Method.

Here are easy steps to create your Custom Payment Method.

- Enter into admin login of the Shopline store.
- Click on the **'Payments'** section under the settings.

- Navigate to the **'Custom Payment Method'**.

[←](#) **Payments**

Payment service provider
Select a third-party payment service provider to collect direct credit card payments

[Add a payment service provider](#)

Other payment methods
Select a third-party payment service provider to collect local payment, installations, etc.

[Add other payment methods](#)

 **PayPal**

 Highly suggest to use a previously used PayPal account, reducing the chance of hitting transaction risk management.

[One-Click To Authorize/Register](#)

Custom payment method
Payments made outside your online shop. If customers pay using this method, you are required to approve their orders before shipment.

[Add a custom payment method ▾](#)

Cash On Delivery [Edit](#)

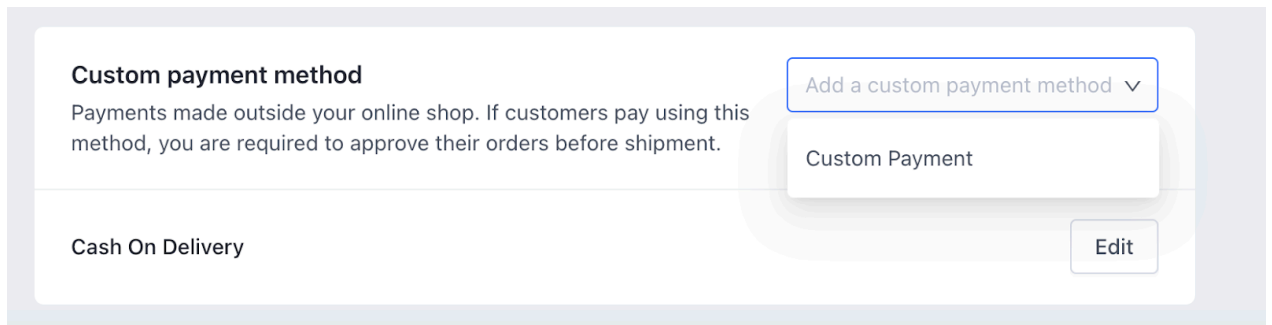

- Click on **'Add a custom payment method.'**

Custom payment method
Payments made outside your online shop. If customers pay using this method, you are required to approve their orders before shipment.

[Add a custom payment method ▾](#)

Cash On Delivery [Edit](#)

- Click on a **'Custom Payment.'**

- Fill Payment method name and Description

The screenshot shows the "Add Custom Payment" form. At the top left, there is a back arrow and the title "Add Custom Payment". The form contains the following fields and options:

- Payment method name:** A text input field with the placeholder text "Enter the payment method name".
- Payment method introduction:** A text area with the placeholder text "Enter the introduction, if you have multiple contents, please divide them into different paragraphs, e.g.,". Below the text area, there are two numbered lines: "1. Payment descriptions to be aware of ..." and "2.". A character count "0/500" is displayed at the bottom right of the text area.
- Additional options:** Two checkboxes are present:
 - Customers don't need to enter billing address
 - Customers need to upload voucher

Below the form, there is a blue button labeled "Activate Custom Payment". A note at the bottom of the form reads: "* You can make your contents more clarified by describing in multiple points, sections or limited characters for each paragraph, etc." and a link "Learn more about display effect" is provided.

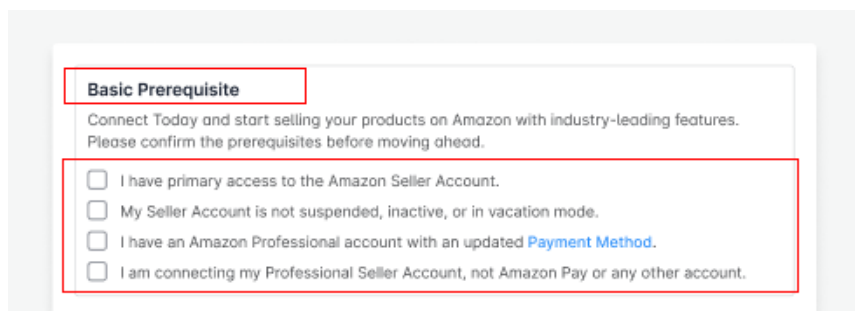

- Finally, click on **'Activate Custom Payment'** button.

3. How to Onboard the App?

Before we start automating your operations, the following are crucial steps you must perform to connect your Amazon and Shopline account with the App.

Make sure you fulfill all the prerequisites

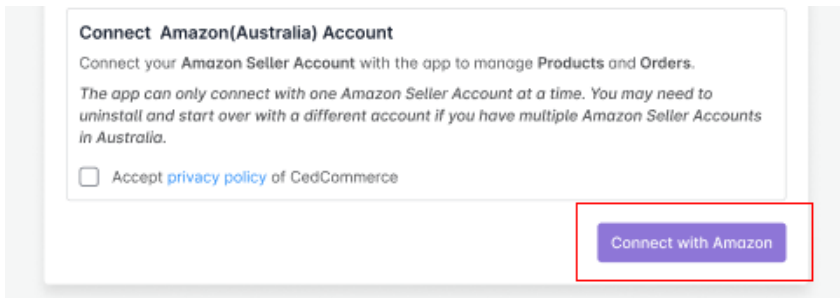

- You have Primary access to Amazon Seller Account.
- Your Amazon account should not be Inactive, suspended, or in vacation mode.
- You have Professional Seller Account with updated Payment methods.

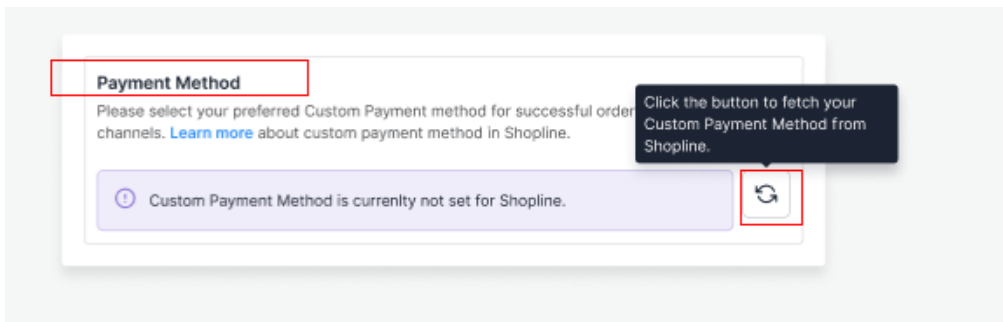

Agree with CedCommerce's Business Terms & Conditions.

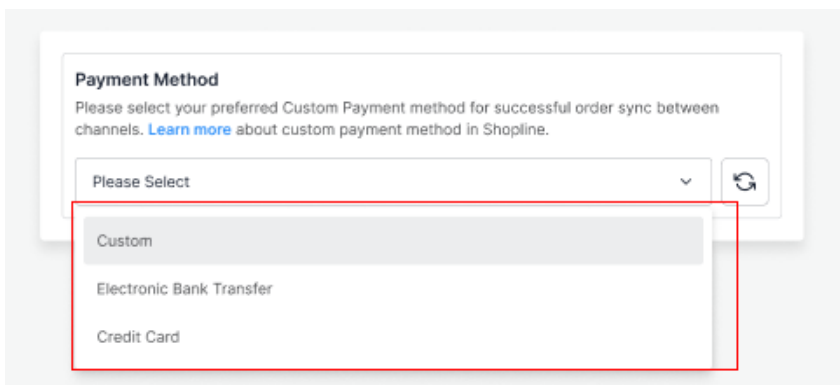

Click on the 'Connect with Amazon' button.

Update Payment Method

- Click on the Fetch button to fetch all the supported Payment methods you can choose from.

And here you Go! Now enjoy selling on Amazon with seamless integration features.

4. What does the App Dashboard show?

The dashboard helps sellers get an overview of all the crucial operations and updates. The dashboard's unique feature of updating statuses under each tab lets merchants quickly know what needs their attention.

Let's check each section in detail.

Dashboard Refresh

Get an overview of all the recent updates on all your crucial operations and activities.

Product Status View all

Active 0 View Products	Incomplete 0 View Products	Inactive 0 View Products	Errors 0 View Products
--	--	--	--

Order Status View all

Today's Order 0 View Order	Cancelled 0 View Order	Fulfilled 0 View Order	Failed 0 View Order
--	--	--	---

Activities View all

Ongoing Activities

Product upload initiated
06 Seconds Ago

Product Status

The Products status helps you understand how many of your listings are Active and Inactive on the Amazon marketplace. You can also look at Incomplete and Error listings and resolve the problems per business requirements.

Product Status View all

Active 0 View Products	Incomplete 0 View Products	Inactive 0 View Products	Errors 0 View Products
--	--	--	--

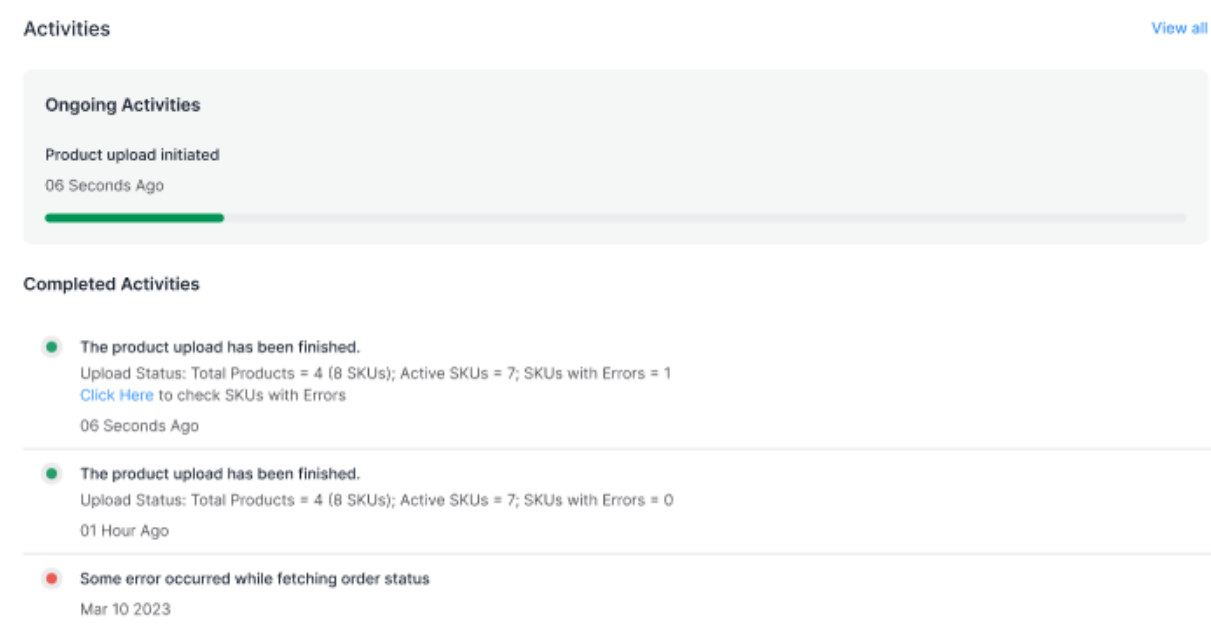

Order Status

Orders are crucial for a successful business. To help you with the latest updates on your orders without switching between channels, the dashboard will display counts under Today's Order, Fulfilled, Cancelled, and Failed. You can take a look and dive straight into how to handle the orders per your business requirements.

Activities

The section will help you with all the Ongoing and Completed activities.

To view all the Activity logs, click in the icon as shown below and you will be redirected to the Activities section of the app.

 A screenshot of the "Activities" section in a web interface. The section is titled "Activities" and has a "View all" link in the top right. It is divided into two main sections: "Ongoing Activities" and "Completed Activities".

5. Category Template

Category Templates simplify the process of uploading and managing new products on Amazon. They allow you to apply price settings, map attributes, and create custom settings for your listings all in one place.

The tab contains two sections Setup Template and Edit Template.

Set up Template

The section will help you create new templates for your listings. Start selecting and setting your preferences and mapping Shopline and Amazon attributes. You can also assign rules to help you apply the settings on products in bulk.

< Setup Template
Save

Let's begin creating a new Category Template.

Template Name *

Enter a unique name for the product template you wish to create.

Enter Template Name

Template name should not exceed 80 characters.

Barcode/GTIN Exemption

Enable this option if you have a GTIN Exemption for your products.

If products that you want to upload to Amazon, don't have valid barcodes/ GTIN, kindly apply for the GTIN exemption [here](#) ↗

Select Listing Category *

Select a Listing Category for this template, and further map Amazon attributes with Shopline attributes or set a custom value.

Attribute Settings *

Map Amazon Category attributes to your Shopline Product attributes or Set a Custom value based on the Amazon Product category selected. Attributes are of two kinds- Required (Must Fill) and Optional.

- Required:** These are a set of Amazon attributes that you must map product attributes. You can also set a Custom Valid value for the same as per your requirement.
- Optional:** This is an optional set of attributes you may or may not map per your requirements.

Amazon Attributes

Required *

- ✓ Amazon 1
- ✓ Amazon 2
- ✓ Amazon 3
- ✓ Amazon 4

Shopline Attributes *

Please Select ▼

Please Select ▼

Please Select ▼

Edit Template

The section will enable you to edit and make necessary changes to your existing templates per your business requirements.

< Edit Template
Save

Start editing your existing Category Template.

Template Name *

Enter a unique name for the product template you wish to create.

Enter Template Name

Template name should not exceed 80 characters.

Barcode/GTIN Exemption

Enable this option if you have a GTIN Exemption for your products.

If products that you want to upload to Amazon, don't have valid barcodes/ GTIN, kindly apply for the GTIN exemption [here](#)

Attribute Settings *

Map Amazon Category attributes to your Shopline Product attributes or Set a Custom value based on the Amazon Product category selected. Attributes are of two kinds- Required (Must Fill) and Optional.

- **Required:** These are a set of Amazon attributes that you must map product attributes. You can also set a Custom Valid value for the same as per your requirement.
- **Optional:** This is an optional set of attributes you may or may not map per your requirements.

Amazon Attributes	Shopline Attributes *
<p>Required *</p> <ul style="list-style-type: none"> <li style="margin-bottom: 5px;"><input checked="" type="checkbox"/> Amazon 1 <li style="margin-bottom: 5px;"><input checked="" type="checkbox"/> Amazon 2 <li style="margin-bottom: 5px;"><input checked="" type="checkbox"/> Amazon 3 <li style="margin-bottom: 5px;"><input checked="" type="checkbox"/> Amazon 4 	<div style="border: 1px solid #ccc; padding: 2px; margin-bottom: 5px; display: flex; justify-content: space-between; align-items: center;"> Please Select ▼ </div> <div style="border: 1px solid #ccc; padding: 2px; margin-bottom: 5px; display: flex; justify-content: space-between; align-items: center;"> Please Select ▼ </div> <div style="border: 1px solid #ccc; padding: 2px; margin-bottom: 5px; display: flex; justify-content: space-between; align-items: center;"> Please Select ▼ </div> <div style="border: 1px solid #ccc; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> Please Select ▼ </div>

5.1. How to Create or Edit Category Template

Creating a new template is easy. Remember to fill in the details carefully.

Let's see how to create a new template.

Template Name

Begin with naming your template per your listings requirements.

Template Name *

Enter a unique name for the product template you wish to create.

Enter Template Name

Template name should not exceed 80 characters.

Select Listing Category

Here you can tick the setting for all your products that do not have Barcode. Additionally, select your listing Category from the drop-down that best defines your products.

Select Listing Category *

Select a Listing Category for this template, and further map Amazon attributes with Shopline attributes or set a custom value.

Barcode/GTIN Exemption

Enable this option if you have a GTIN Exemption for your products.

If products that you want to upload to Amazon, don't have valid barcodes/ GTIN, kindly apply for the GTIN exemption [here](#)

🔍 Search Category

Attribute Settings

Map Amazon attributes with Shopline attributes for seamless syncing of products on Amazon. You select between Amazon's recommended attributes or create custom attributes. Moreover, to enhance your listings, you can also map optional attributes.

Attribute Settings *

Map Amazon Category attributes to your Shopline Product attributes or Set a Custom value based on the Amazon Product category selected. Attributes are of two kinds- Required (Must Fill) and Optional.

- **Required:** These are a set of Amazon attributes that you must map product attributes. You can also set a Custom Valid value for the same as per your requirement.
- **Optional:** This is an optional set of attributes you may or may not map per your requirements.

Amazon Attributes**Shopline Attributes *****Required ***

✔ Amazon 1

Please Select

✔ Amazon 2

Please Select

✔ Amazon 3

Please Select

✔ Amazon 4

Please Select

Optional

Add Attributes

🕒 Optional Attributes can be added by clicking 'Add Attributes' above.

There are three kinds of attributes:

- **Required Attributes:** These are a set of attributes that you must fill in. You can also set valid custom values for the same as per your requirements.
- **Amazon Recommended Attributes:** If you don't have any relevant attributes on Shopline to map with Amazon, you can choose to go with recommended attributes that Amazon provides.
- **Optional Attributes:** You can also add optional attributes for better listing enhancements.
- **Note*:** Based on your listing category, you may or may not get optional attributes to map.

Setting Rule Groups

In order to apply specific conditions to certain products using a particular template, rule groups are crucial.

Assign Rule to the Template *

You can create a Rule Group or query for your products by allowing specific filter options that can be applied to the template. These Rules help to apply settings on specific products.

- Select **Any Condition** to fetch the products fulfilling any of the conditions created.
- Select **All Condition** to fetch the products fulfilling all the conditions created.
- Click on **Add More** to add multiple conditions in the Rule Group.
- Click on **Run Query** to fetch the number of the products on the basis of the Rule Groups created.

Rule Group

Override Listings
Select this option if you wish to override listings with templates already assigned.

Product Must Match Any Condition All Conditions

Category Equals Shirt

{ Category Equals Motorola }

📌 Total 9 products affected [View Products](#)

To retrieve products that meet certain conditions, you can

- Select “Any Condition” to fetch products that meet at least one of the conditions created.
- Select “All Condition” to fetch products that meet all conditions.
- You can add multiple conditions to the Rule Group by clicking “Add More.”
- To retrieve the number of products based on the Rule Groups created, click on “Run Query.”

Override Listings

Enabling the “Override Listings” option allows the app to assign a specific template to products that already have a template assigned. This means that if this option is enabled for a particular template, a product may have multiple templates assigned to it.

Once done, just click on **Save** on your top right.

Setup Template

Let's begin creating a new Category Template.

Template Name *

Enter a unique name for the product template you wish to create.

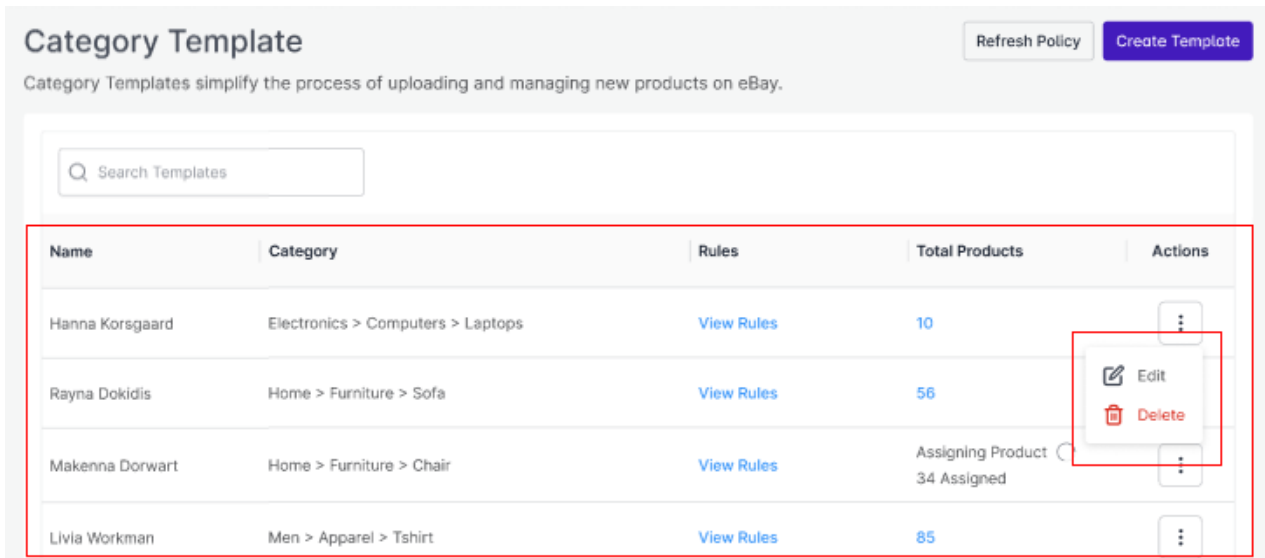

Template name should not exceed 80 characters.

Select Listing Category *

Select a Listing Category for this template, and further map Amazon attributes with Shopline attributes or set a custom value.

Barcode/GTIN Exemption
Enable this option if you have a GTIN Exemption for your products.
If products that you want to upload to Amazon, don't have valid barcodes/ GTIN, kindly apply for the GTIN exemption [here](#)

Once you are through creating a template, you will find it added to the main Category Template window. In case you want to edit or delete a template. you can click on 'Actions' and choose to delete or edit your existing template.

Category Template Refresh Policy Create Template

Category Templates simplify the process of uploading and managing new products on eBay.

<input type="checkbox"/>		Centerino Men's 3392 Casual Shoes SKU: 12066160 Barcode: 8432154789650	\$200	6 in Stock	Uploaded	In Progress 1 task in progress	View
<input type="checkbox"/>		Nike Legacy Women's Shoes SKU: 215454642 Barcode: 215454642	\$200	6 in Stock	Inactive	In Progress 1 task in progress	View

Let's take a closer look at each section:

Product Status

Products More Actions Bulk Upload

Product List lets you manage and sort all your Amazon listings, including bulk syncing and importing actions.

The product count displayed in the menu below includes both the base product and its variants.

All **100** Active **30** Inactive **10** Not Listed **15** Incomplete **20** Errors **15**

Product status helps you get no. of listings under different stages. Each status has a different meaning to convey:

All: Total no. of products.

Active: Total no. of products listed in the Amazon marketplace.

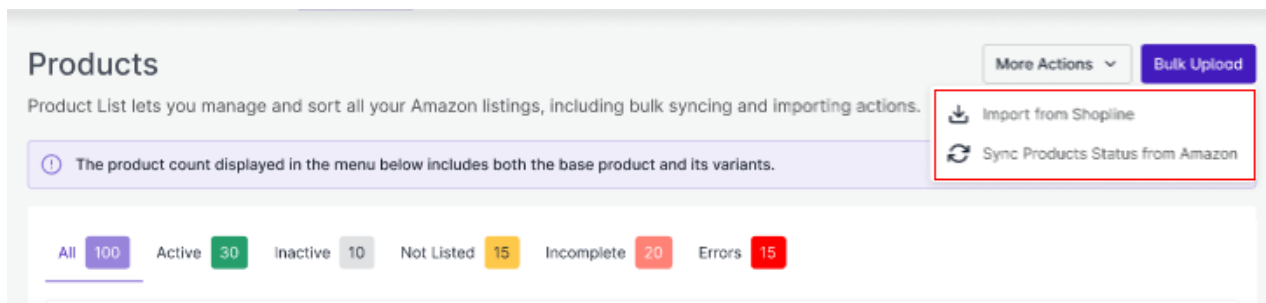

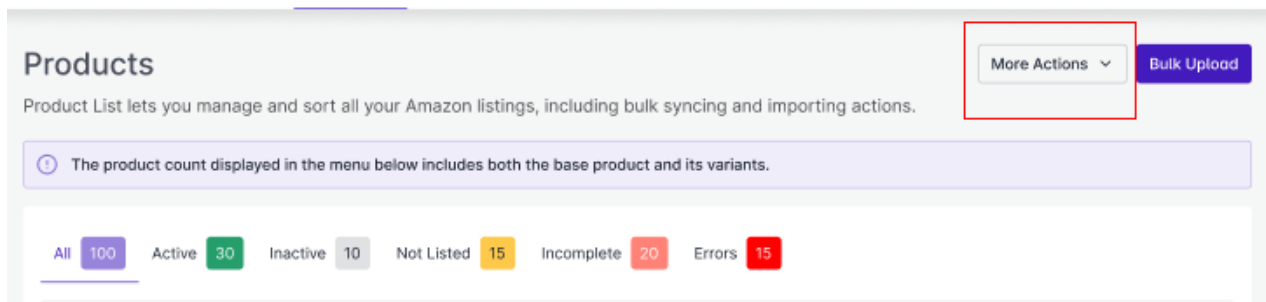

Inactive: No. of products uploaded from the app to the marketplace but are out of stock.

Not Listed: Total no. of products imported from Shoptline to the app but not uploaded in the Amazon marketplace.

Incomplete: Total no. of products that are uploaded on Amazon but are not active.

Errors: Total no. of products with errors that need to be corrected.

More Actions

By clicking on More Actions, you can

- **Import from Shoptline:** You can import all your products from Shoptline to Amazon via the app.
- **Sync Products Status from Amazon:** When a product is uploaded from the app on Amazon, a feed is sent to Amazon for approval based on which products change their status. With the feature, You can sync the status of your products from Amazon to avoid any confusion.

Bulk Upload

The feature helps you upload all the selected products from the app to Amazon in bulk. This reduces the manual effort of linking and uploading products individually.

Products More Actions **Bulk Upload**

Product List lets you manage and sort all your Amazon listings, including bulk syncing and importing actions.

The product count displayed in the menu below includes both the base product and its variants.

All **100** Active **30** Inactive **10** Not Listed **15** Incomplete **20** Errors **15**

Enter Title, ID or SKU Customize Grid Filter Amazon Lookup

<input type="checkbox"/>	Image	Title	Price	Quantity	Status	Activity	Actions
<input type="checkbox"/>		Long Sleeve Swing Shirt SKU: 79066160 Barcode: 5632154789655	\$200	6 in Stock	Inactive	Errors 1 task in progress	View

Follow the steps:

- Select the products
- Assign it a particular category
- Click on Upload on Amazon button
- Track the status on the Feed.
- Track the ongoing process in the Activities section.

Customize Grid

By customizing the grid, you can get a list of products for a particular option that you select, enabling you to fetch the products quickly.

Products More Actions **Bulk Upload**

Product List lets you manage and sort all your Amazon listings, including bulk syncing and importing actions.

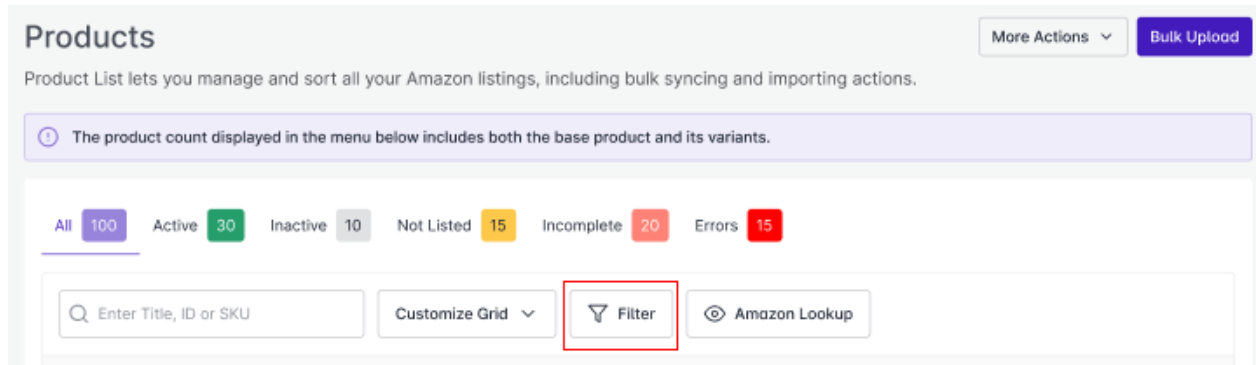

The product count displayed in the menu below includes both the base product and its variants.

All **100** Active **30** Inactive **10** Not Listed **15** Incomplete **20** Errors **15**

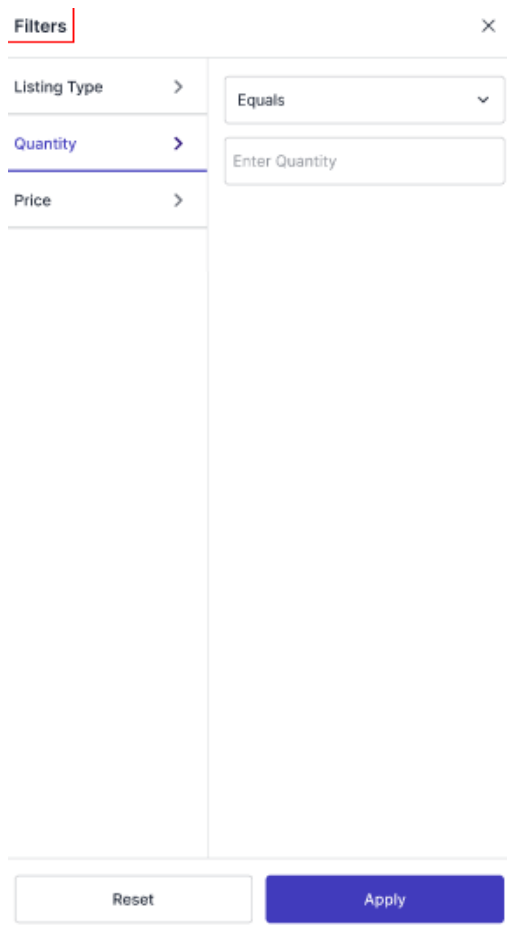

Enter Title, ID or SKU **Customize Grid** Filter Amazon Lookup

Filters

As not all the products are visible in the grid at a time, applying filters can quickly fetch the products falling under a specific condition. For example, if you are looking for products that are out of stock, you can simply apply a filter of Quantity and equal it with '0'. Hence, the app will display all the products that are out of stock.

The screenshot shows the 'Products' management interface. At the top, there's a 'Products' header with 'More Actions' and 'Bulk Upload' buttons. Below the header, a description states: 'Product List lets you manage and sort all your Amazon listings, including bulk syncing and importing actions.' A notification bar indicates: 'The product count displayed in the menu below includes both the base product and its variants.' The status summary shows: All 100, Active 30, Inactive 10, Not Listed 15, Incomplete 20, Errors 15. The filter bar includes a search input 'Enter Title, ID or SKU', a 'Customize Grid' dropdown, a 'Filter' button (highlighted with a red box), and an 'Amazon Lookup' button.

The screenshot shows the 'Filters' dialog box. It has a title bar 'Filters' with a close button 'X'. The dialog is divided into a left sidebar and a main content area. The sidebar lists filter categories: Listing Type, Quantity, Price, and an unlabeled category. The main content area shows the 'Quantity' filter selected, with a dropdown menu set to 'Equals' and an input field for 'Enter Quantity'. At the bottom, there are 'Reset' and 'Apply' buttons.

Amazon Lookup

Amazon Look up helps the app to check if the barcodes/ASIN allotted to your product category are unique or are already available on Amazon. If your Barcode is not unique, the product status will show Not Listed: Offer instead of Not Listed.
