1. Overview: CedCommerce Catch Integration

About CedCommerce

CedCommerce is a leading multichannel enabler that helps online merchants expand their business to international marketplaces like Amazon, eBay, Walmart, and Google via secure, optimized, and scalable integration tools and technologies.

With 50+ sales channel tools for Shopify, WooCommerce, Magento, BigCommerce, OpenCart, and Prestashop, over 40,000 merchants across the globe have benefited from CedCommerce's multichannel capabilities.

Highly recommended by G2, Trustpilot, Capterra, Web retailer, Cuspera, and Serchen, CedCommerce enables smooth merchant onboarding and streamlined product data feed flow.

CedCommerce Catch Integration

CedCommerce Catch Integration is an endeavor to make 'multichannel selling' a profitable journey on Shopline and Catch marketplace' with a powerful integration tool. The integration extends a 360-degree convenience with features that automate, manage, and streamline all the operations between your Shopline store and Catch marketplace.

Expedited Authentication Process

The solution comes with a rapid and easy authentication process. Ensure the prerequisites and connect your Shopline store with Catch in just a few minutes.

Automated Feed Synchronization across channels

Goodbye to manual syncing. Built with the power of automation, the app ensures real-time listing, order, shipment, and currency sync between your Shopline store and Catch marketplace via the app.

Simplified Order and Shipment Management

Enjoy flexible control over syncing and managing your shipment and order details between channels. Get your marketplace orders created on the Shopline store for timely fulfillment.

One-click Tracking Space

Get all the Product, Order, and Feed-related statuses on dedicated tabs of the app. With minimum manual effort, churn optimum results.

Dynamic and Flexible Listing Optimization

Create, Edit, and Manage product templates for varied listings. Set Global settings for listings and map suitable attributes for better visibility on the Catch marketplace.

Alert Notifications Preventing Financial Losses

Enable Alert Notifications and get all the necessary messages and alerts related to your new orders, successful feeds, stocks, return requests, and shipping statuses.

Eliminating manual calculations with Global Currency Converter

Selling cross-border poses currency problems. With this no-cost feature, you can simply set your currency and get all the prices automatically calculated for every listing.

24*7 Assistance by Solution Experts

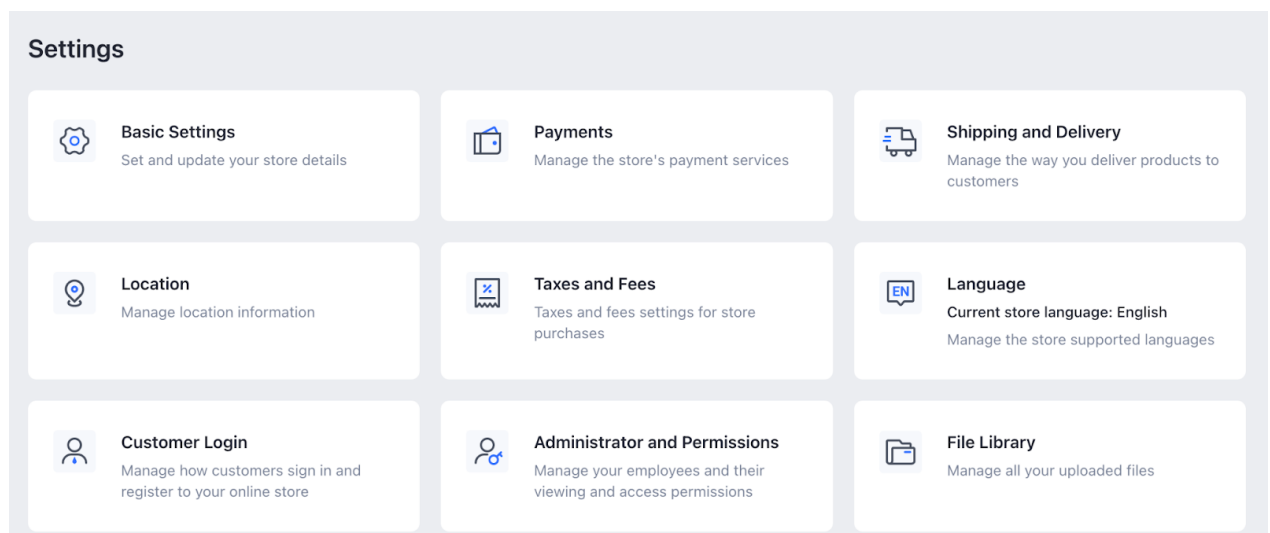

Facing any glitches while operating the app? Reach out to the solution experts anytime, any day. Additionally, get expert tips to sell profitably on the marketplace.

2. How to create Custom Payment Method in Shopline?

One of the outstanding features of the integration is to help merchants streamline and sync orders from marketplace to Shopline. To successfully create Orders on Shopline from marketplace via app, you must ensure creating and updating a Custom Payment Method.

Here are easy steps to create your Custom Payment Method.

- Enter into admin login of the Shopline store.
- Click on the **'Payments'** section under the settings.

- Navigate to the **'Custom Payment Method'**.

[←](#) **Payments**

Payment service provider
Select a third-party payment service provider to collect direct credit card payments
[Add a payment service provider](#)

Other payment methods
Select a third-party payment service provider to collect local payment, installations, etc.
[Add other payment methods](#)

 Highly suggest to use a previously used PayPal account, reducing the chance of hitting transaction risk management.
[One-Click To Authorize/Register](#)

Custom payment method
Payments made outside your online shop. If customers pay using this method, you are required to approve their orders before shipment.
[Add a custom payment method ▾](#)

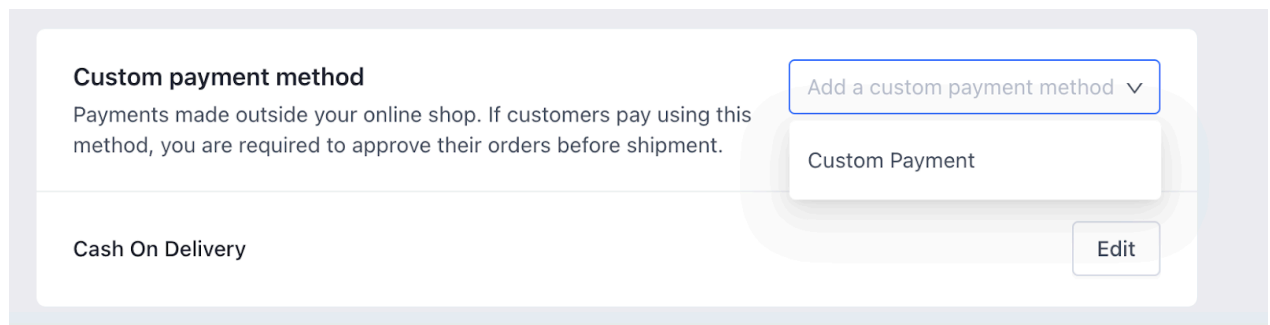

Cash On Delivery [Edit](#)

- Click on **'Add a custom payment method.'**

[Add a custom payment method ▾](#)

Cash On Delivery [Edit](#)

- Click on a '**Custom Payment.**'

- Fill Payment method name and Description

A screenshot of a web form titled 'Add Custom Payment'. The form has a back arrow icon and a title. It contains two main input sections: 'Payment method name' with a text input field, and 'Payment method introduction' with a larger text area. The introduction field has a placeholder text and a character count '0/500'. Below the introduction field, there is a note: '* You can make your contents more clarified by describing in multiple points, sections or limited characters for each paragraph, etc.' followed by a link 'Learn more about display effect'. At the bottom of the form, there are two checkboxes: 'Customers don't need to enter billing address' and 'Customers need to upload voucher'. A blue button labeled 'Activate Custom Payment' is located at the bottom right of the form.

- Finally, click on '**Activate Custom Payment**' button.

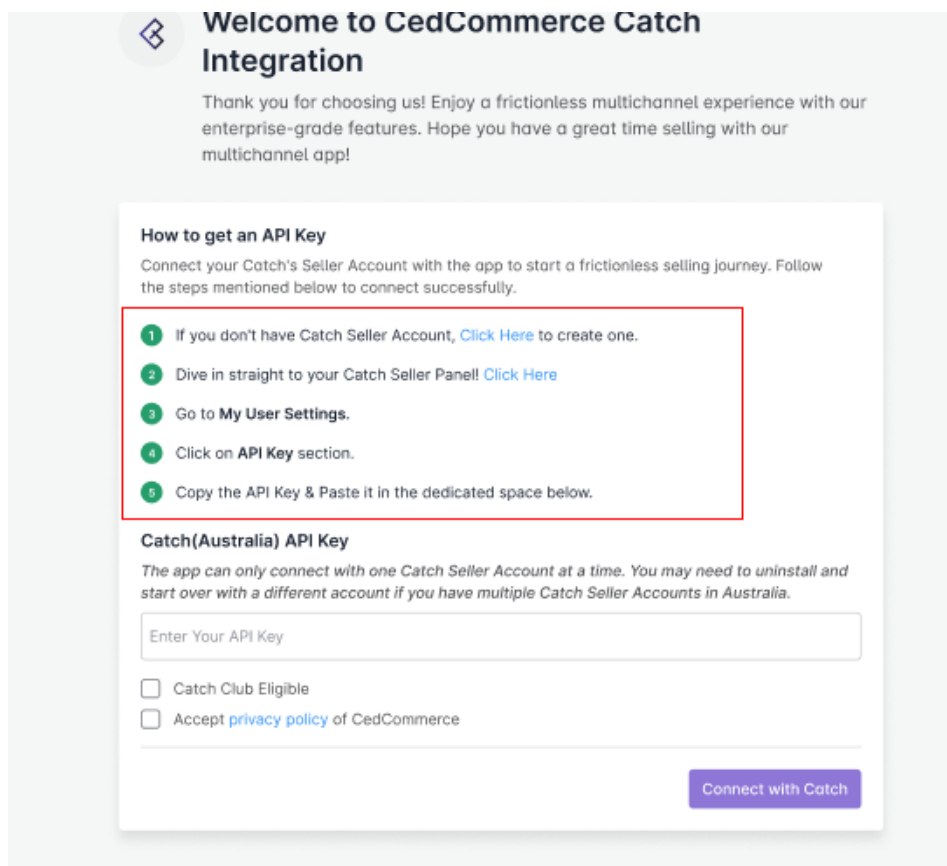

3. How to Onboard the App

Before we start automating your operations, the following are crucial steps you must perform to connect your Catch and Shopline account with the App.

Catch API Authentication

You must connect your Catch account with the app. To do so, create your Seller Account on Catch if you don't have it yet. To start integrating your Shopline store with the Catch marketplace, you must have an Active Catch Seller account.

Follow the instructions for fetching your API Key.

- Go to Catch's Seller Panel
- Go to 'My User Settings.'
- Click on the 'API Key' section
- Copy the API from the section

Now enter your API Key.

Catch(Australia) API Key

The app can only connect with one Catch Seller Account at a time. You may need to uninstall and start over with a different account if you have multiple Catch Seller Accounts in Australia.

Enter Your API Key

Catch(Australia) API Key

The app can only connect with one Catch Seller Account at a time. You may need to uninstall and start over with a different account if you have multiple Catch Seller Accounts in Australia.

Connect with Catch

Agree with Our Company's T&C.

Now, click the **Connect with Catch** button, and your Catch Seller account will connect to the app.

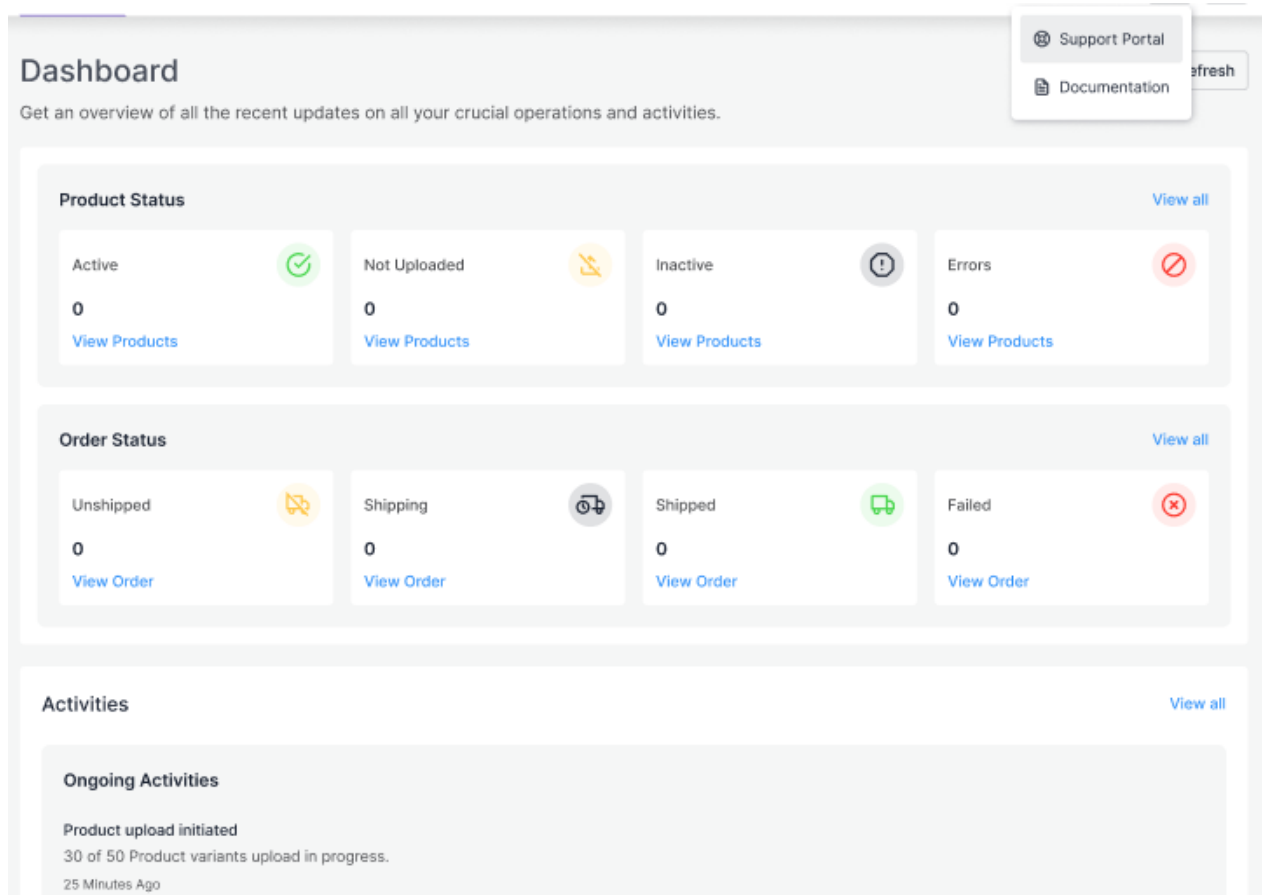

Set your Payment Method.

And here you Go! Now enjoy selling on Catch with seamless integration features.

4. What does the App Dashboard show?

The Dashboard helps sellers get an overview of all the crucial operations and updates. The dashboard's unique feature of updating statuses under each tab lets merchants quickly know what needs their attention.

Let's check each section in detail.

Product Status

The Products status helps you understand how many of your listings are active and inactive on the Catch marketplace. You can also look at Not Uploaded and Error listings and resolve the problems per business requirements.

Product Status				View All
Active 0 View Products	Not Uploaded 515 View Products	Inactive 0 View Products	Errors 0 View Products	

Order Status

Orders are crucial for a successful business. To help you with the latest updates on your orders without switching between channels, the dashboard will display counts under Unshipped, Shipping, Shipped, and Failed. You can take a look and dive straight into how to handle the orders per your business requirements.

Order Status				View All
Unshipped 0 View Orders	Shipping 0 View Orders	Shipped 0 View Order	Failed 0 View Order	

Activities

The section will help you with all the ongoing and completed activities.

5. Category Template

Category Templates simplify the process of uploading and managing new products on Catch. They allow you to apply price settings, map attributes, and create custom settings for your listings all in one place.

The tab contains two sections Setup Template and Edit Template.

Set up Template

The section will help you create new templates for your listings. Start selecting and setting your preferences and mapping Shopline and Catch attributes. You can also assign rules to help you apply the settings on products in bulk.

<

Setup Template

Save

Let's begin creating a new Category Template.

Template Name *
Enter a unique name for the product template you wish to create.

Template name should not exceed 80 characters.

Select Logistic Class *
For a seamless fulfillment process, select your logistic class according to the dimensions of your products.

Please Select

Select Listing Category *
Select a Listing Category for this template, and further map Catch attributes with Shopline attributes or set a custom value.

Attribute Settings *
Map Catch Category attributes to your Shopline Product attributes or Set a Custom value based on the Catch Product category selected. Attributes are of two kinds- Required (Must Fill) and Optional.

- Required:** These are a set of Catch attributes that you must map product attributes. You can also set a Custom Valid value for the same as per your requirement.
- Optional:** This is an optional set of attributes you may or may not map per your requirements.

Catch Attributes

6. How to Create or Edit a Category Template

Creating a new template is easy. Remember to fill in the details carefully.

Let's see how to create a new template.

Template Name: Begin with naming your template per your listings requirements.

Template Name *
Enter a unique name for the product template you wish to create.

Enter Template Name

Template name should not exceed 80 characters.

Select Logistics: Select and define your logistics based on the dimensions and weight of your products.

Select Logistic Class *
 For a seamless fulfillment process, select your logistic class according to the dimensions of your products.

Select Listing Category *
 Select a Listing Category for this template, and further map Catch attributes with Shopline attributes or set a custom value.

Please Select ^

- Flat Rate
- Small - Light Weight
- Small - Medium Weight
- Small - Heavy Weight
- Medium - Light Weight
- Medium - Medium Weight

Select Listing Category: Search or select your Category from the drop-down.

Select Listing Category *
 Select a Listing Category for this template, and further map Catch attributes with Shopline attributes or set a custom value.

Or

Browse and Select Category

- Adult >
- Health & Beauty >
- Home & Living >
- Pet Supplies >

Attribute Settings: Map Catch attributes with Shopline attributes for seamless syncing of products on Catch. You select between Catch's recommended attributes or create custom attributes. Moreover, to enhance your listings, you can also map optional attributes.

Attribute Settings *

Map Catch Category attributes to your Shopline Product attributes or Set a Custom value based on the Catch Product category selected. Attributes are of two kinds- Required (Must Fill) and Optional.

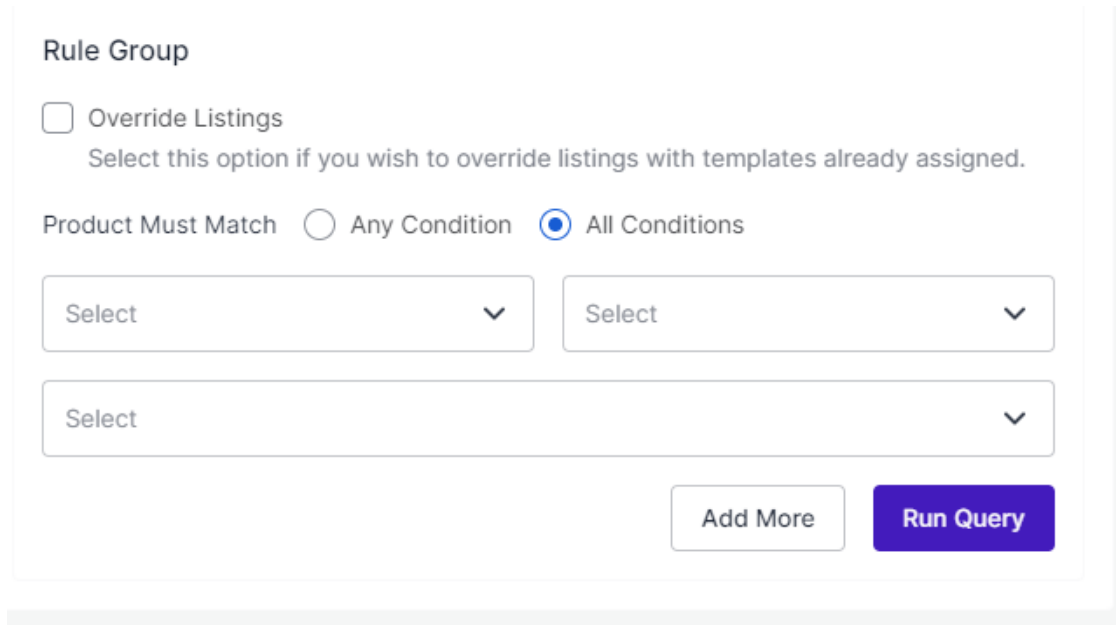

- **Required:** These are a set of Catch attributes that you must map with your Shopline store product attributes. You can also set a Custom Valid value for the same as per your requirement.
- **Optional:** This is an optional set of attributes you may or may not map per your requirements.

Catch Attributes	Shopline Attributes
Required *	
<input checked="" type="checkbox"/> Contains Button Cell Batteries	Set Catch Recommended Attrib... ▼ No ▼
Optional	
<input type="button" value="Add Attribute"/>	
ⓘ Optional Attribute cannot be created on the selected listing category	

There are three kinds of attributes:

- **Required Attributes:** These are a set of attributes that you must fill in. You can also set valid custom values for the same as per your requirements.
- **Catch Recommended Attributes:** If you don't have any relevant attributes on Shopline to map with Catch, you can choose to go with recommended attributes that Catch provides.
- **Optional Attributes:** You can also add optional attributes for better listing enhancements.
- **Note*:** Based on your listing category, you may or may not get optional attributes to map.

Setting Rule Groups: In order to apply specific conditions to certain products using a particular template, rule groups are crucial.

Rule Group

☐ **Override Listings**
Select this option if you wish to override listings with templates already assigned.

Product Must Match ☐ Any Condition ☒ All Conditions

Select ▼ Select ▼

Select ▼

Add More Run Query

To retrieve products that meet certain conditions, you can

- Select “Any Condition” to fetch products that meet at least one of the conditions created.
- Select “All Condition” to fetch products that meet all conditions.
- You can add multiple conditions to the Rule Group by clicking “Add More.”
- To retrieve the number of products based on the Rule Groups created, click on “Run Query.”

Override Listings: Enabling the “Override Listings” option allows the app to assign a specific template to products that already have a template assigned. This means that if this option is enabled for a particular template, a product may have multiple templates assigned to it.

Once done, just click on **Save** on your top right.

<

Setup Template

Save

Let's begin creating a new Category Template.

Template Name *
Enter a unique name for the product template you wish to create.

Template name should not exceed 80 characters.

Select Logistic Class *
For a seamless fulfillment process, select your logistic class according to the dimensions of your products.

Select Listing Category *
Select a Listing Category for this template, and further

Once you are through creating a template, you will find it added to the main Category Template window.

Category Template

Create Template

Category Templates simplify the process of uploading and managing new products on Catch.

Name	Category	Rules	Total Products	Actions
test template	apparel & footwear > boys > specialty apparel	View	3	⋮

Items : Showing 1 - 1 of 1
< 1 of 1 >

You can click Actions from there to delete or edit your existing template.

Name	Category	Rules	Total Products	Actions
test template	apparel & footwear > boys > specialty apparel	View	3	⋮ <div> Edit Delete </div>

Items : Showing 1 - 1 of 1

Once you are through creating a template, you can easily upload your products on Catch through Product List tab.

7. Product List

Product List lets you manage and sort all your Catch listings, including bulk syncing and importing actions with your Shoplevel store.

Dashboard Category Template **Product List** Order List Feed Configuration

Products More Actions Bulk Upload

Product List lets you manage and sort all your Catch listings, including bulk syncing and importing actions.

The product count displayed in the menu below includes both the base product and its variants.

All **109** Active **1** Not Uploaded **106** In Progress **1** Inactive **0** Errors **1**

Search: Enter Title or SKU Customize Grid Filter

<input type="checkbox"/>	Image	Title	Price	Quantity	Status	Template	Product Type	Actions
<input checked="" type="checkbox"/>		A.p.c. grace mini bag	\$382.43	9 in Stock 1 variants	1 In Progress	test template	variation	View

Let's take a closer look at each section:

Product Status

Products More Actions Bulk Upload

Product List lets you manage and sort all your Catch listings, including bulk syncing and importing actions.

The product count displayed in the menu below includes both the base product and its variants.

All **515** Active **0** Not Uploaded **515** In Progress **0** Inactive **0** Errors **0**

All: Total no. of products.

Active: No. of products listed on the Catch marketplace.

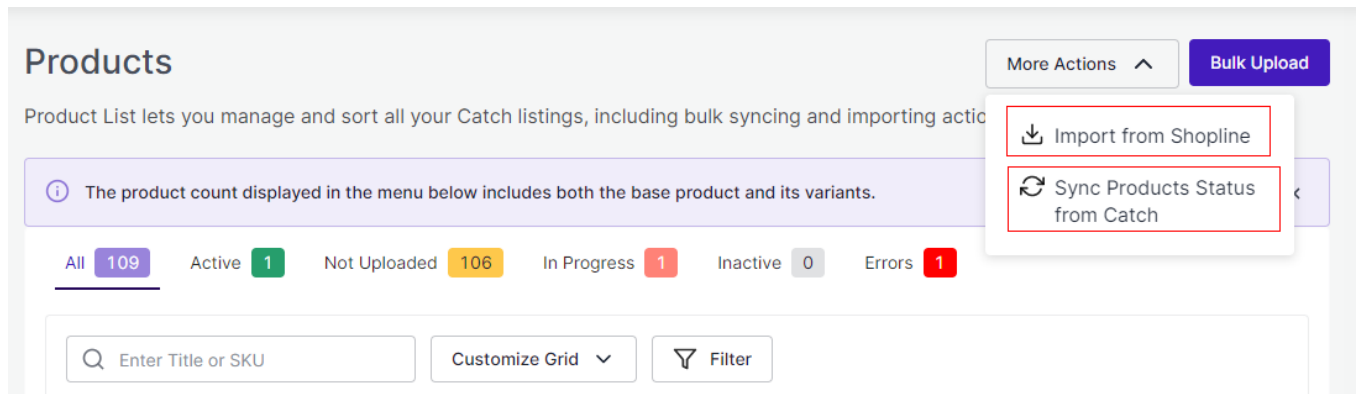

Not Uploaded: No. of products imported from Shoplevel to the app but not uploaded on the Catch marketplace.

In Progress: No. of products sent for review on the Catch marketplace.

Inactive: No. of products uploaded from the app to the marketplace but is out of stock.

Errors: Total no. of products with errors that need to be corrected.

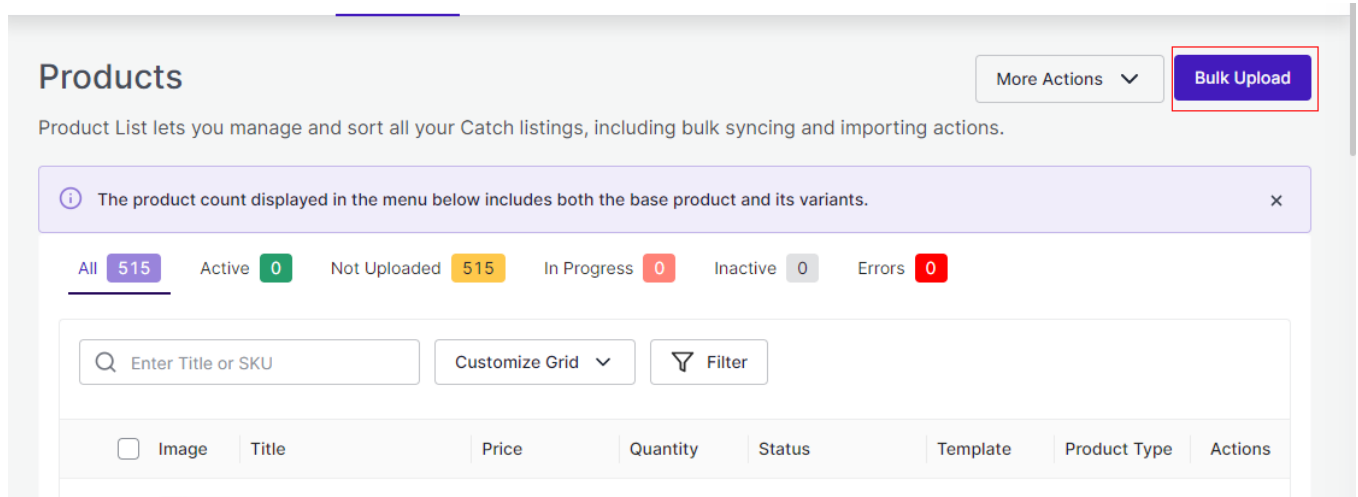

More Actions

By clicking on More Actions, you can

- **Import from Shipline:** You can import all your products from Shipline to the app.
- **Sync Products Status from Catch:** When a product is uploaded from the app on Catch, a feed is sent to Catch for approval based on which products change their status. With the feature, You can sync the status of your products from Catch to avoid any confusion.

Bulk Upload

The feature helps you upload all the selected products from the app to Catch in bulk. This reduces the manual effort of linking and uploading products individually.

Follow the steps:

- Select the products
- Assign it a particular category
- Click on Bulk Upload Button
- Track the status on the Feed
- Track the ongoing process in the Activities section

Customise Grid

The screenshot shows the 'Customize Grid' dropdown menu with the following options checked:

- Image
- Title
- Price
- Quantity
- Status
- Template

The background grid displays the following data:

Image	Title	Quantity	Status	Template	Product Type	Actions
	A.p.c. grace mini bag	9 in Stock 1 variants	1 In Progress	test template	variation	View
	A.p.c. grace small bag	100 in Stock 1 variants	1 Errors	NA	variation	View
	A.p.c. grace small bag	11 in Stock 1 variants	1 Not Unloaded	NA	variation	View

By customizing the grid, you can get a list of products for a particular option that you select, enabling you to fetch the products quickly.

Filters

The screenshot shows the 'Filters' sidebar with the following filters applied:

- Product Type: Equals
- Quantity: Enter Price
- Price: Enter Price

The background grid displays the following data:

Image	Title	Price	Quantity
	A.p.c. grace mini bag	\$382.43	9 in Stock 1 variants
	A.p.c. grace small bag	\$396.35	100 in Stock 1 variants
	A.p.c. grace small bag	\$396.35	11 in Stock 1 variants

As not all the products are visible in the grid at a time, applying filters can quickly fetch the products falling under a specific condition. For example, if you are looking for products that are out of stock, you can simply apply a filter of Quantity and equal it with '0'. Hence, the app will display all the products that are out of stock.

View Product Details

<input type="checkbox"/>	Image	Title	Price	Quantity	Status	Template	Product Type	Actions	
✓	<input type="checkbox"/>		A.p.c. grace mini bag	\$382.43	9 in Stock 1 variants	1 In Progress	test template	variation	View
✓	<input type="checkbox"/>		A.p.c. grace small bag	\$396.35	100 in Stock 1 variants	1 Errors	NA	variation	View
✓	<input type="checkbox"/>		A.p.c. grace small bag	\$396.35	11 in Stock 1 variants	1 Not Uploaded	NA	variation	View
✓	<input type="checkbox"/>		Acne studios gingham linen viscose blazer	\$504.00	4 in Stock 2 variants	2 Not Uploaded	NA	variation	View

You can complete Product details by clicking the 'View' button on the extreme right.

8. Order List

Order settings enable you to instantly fetch orders from Catch Marketplace and create them on your Shopline store. Additionally, the feature helps you fetch all the orders with a real-time update at an interval of 15 minutes.

10. Configuration

While operating a multichannel business, you must set your product, order, currency, and shipping preferences. Based on your preferences, the app will help you with all the automated functionalities between your Catch account and Shopline store.

The tab contains five important sections, each with specified needs and settings.

- **Account Setting**

Get an overview of your active account credentials.

- **Product Setting**

Set your preferences for products' attribute syncing on the Catch marketplace.

- **Order Setting**

Set your preferences for Orders' syncing between your Shopline store and Catch marketplace.

- **Payment Setting**

Set your preferred Payment method for successfully syncing your orders from the marketplace to Shopline via the app.

- **Currency Setting**

This setting lets you choose a common ground when dealing with different currencies on the Catch marketplace and Shopline store.

Let's check them one by one.

Account Setting

Through this setting, you can overview your connected account credentials.

The screenshot shows the 'Accounts' section of the settings interface. On the left is a sidebar with 'Account Settings' selected. The main area is titled 'Accounts' with a subtitle 'Get an overview of your active account credentials.' Below this, there are two account entries: 'Catch' and 'Shoptline'. The 'Catch' entry shows a flag for Australia and 'Seller ID: 2154'. The 'Shoptline' entry shows a Shopline logo and two email addresses: 'eepzkv2fmbfvmcp7.myshoptline.com' and 'pushpanjalishukla@cedcommerce.com'.

Product Settings

The screenshot shows the 'Product Settings' section. The sidebar on the left has 'Product Settings' selected. The main area is titled 'Product Settings' with a subtitle 'Set your preferences for products' attribute syncing on Catch marketplace.' and a 'Save' button. There are two toggle switches: 'Enable Barcode Exemption' and 'Product Syncing', both of which are currently turned off. Below the 'Product Syncing' toggle, there is a note: 'When switched to Yes, Selected attributes of the product will be synced from Shoptline to App. You can disable any attribute if you don't want to sync its value.' Under this note, there is a 'Select All' checkbox which is checked. Below that is a grid of 12 checkboxes, all of which are checked: Title, Weight, Vendor, Image, Price, Description, Barcode, Sku, Weight Unit, Tags, Product Type, and Compare at Price.

Through this setting, you can enable barcode exemption if your products do not have Barcode so they seamlessly sync with the Catch marketplace. You can also specify the attributes you want to sync from Shoptline to the app.

Order Settings

Through order settings, you can automate crucial functionalities:

Order Settings

Enable Order Syncing from App

Receive Email alerts for Failed Orders

Shipment Sync
 The **Shipment Sync** button allows you to enable the option to synchronize the shipment information from Shipline to Catch. When enabled, the app will automatically update the shipment status and tracking details on Catch when an order is fulfilled on Shipline.

Sync Tracking Details
 Sync order fulfillment and tracking details with Shipline. If you fulfill orders without tracking, 'disable' the option.

Mapping of Shipping Carrier
 Map Shipline shipping carriers with Catch shipping, including the carrier names and served countries.

Add Shipping Carrier

Shipline Carrier: ODM Express

Catch Carrier: Toll Ipec

- **Enable order syncing from the app:** By enabling the button, you allow the app to sync all the orders from Catch to Shipline via the app. However, you can disable it anytime you want.
- **Receive email alerts for Failed orders:** The app facilitates automated alert email to notify you whenever your order fails to get created on Shipline.
- **Shipment Sync:** Enabling shipment details will sync Tracking details and shipment status from Shipline to Catch in real-time. This reduces manual juggling for updating shipments on Catch.
- **Sync Shipping Carriers:** If you wish, you can map shipping carriers between Shipline and Catch. Additionally, you can add more shipping carriers by filling in the requested details.

Payment Settings

You must choose the Payment method for completing order syncing between Shipline and Catch. From the drop-down given, select your preferred payment method.

Payment Method
 Please select your preferred Custom Payment method for successful order sync between channels. [Learn more](#) about custom payment method in Shipline.

 **Currency Settings**

Currency Converter

Enabling this setting automates currency conversion from your Shoplevel store to your Catch account. This saves time and ensures accurate pricing for cross-border sales, eliminating the need for manual rate calculations when creating listings.

Please note that your Shoplevel store currency is USD, with this feature the app will automatically convert it to Catch AUD currency.
