1. Overview: CedCommerce eBay Integration

About CedCommerce

CedCommerce is a leading multichannel enabler that helps online merchants expand their business to international marketplaces like Amazon, eBay, Walmart, and Google via secure, optimized, and scalable integration tools and technologies.

With 50+ sales channel tools for Shopify, WooCommerce, Magento, BigCommerce, OpenCart, and Prestashop, over 40,000 merchants across the globe have benefited from CedCommerce's multichannel capabilities.

Highly recommended by G2, Trustpilot, Capterra, Web retailer, Cuspera, and Serchen, CedCommerce enables smooth merchant onboarding and streamlined product data feed flow.

CedCommerce eBay Integration

CedCommerce eBay Integration by is an endeavor to make 'selling' a profitable experience on the leading shopping destination 'eBay marketplace' globally. The integration extends a 360-degree convenience with features that automate, manage, and streamline all the operations between your Shopline store and eBay marketplace.

Expedited Authentication Process

The solution has a rapid and easy authentication process. Ensure the prerequisites and connect your Shopline store with eBay in just a few minutes.

Automated Feed Synchronisation across channels

Goodbye to manual syncing. Built with the power of automation, the app ensures real-time listing, order, shipment, and currency sync between your Shopline store and eBay marketplace via the app.

Simplified Order and Shipment Management

Enjoy flexible control over syncing and managing your shipment and order details between channels. Get your marketplace orders created on the Shopline store for timely fulfillment.

One-click Tracking Space

Get all the Product, Order, and Feed-related statuses on dedicated tabs of the app. With minimum manual effort, churn optimum results.

Dynamic and Flexible Listing Optimization

Create, Edit, and Manage product templates for varied listings. Set Global settings for listings and map suitable attributes for better visibility on the eBay marketplace.

Alert Notifications preventing financial losses

Enable Alert Notifications and get all the necessary messages and alerts related to your new orders, successful feeds, stocks, return requests, and shipping statuses.

Eliminating manual calculations with Global Currency Converter

Selling cross-border poses currency problems. With this no-cost feature, you can simply set your currency and get all the prices automatically calculated for every listing.

24*7 Assistance by Solution Experts

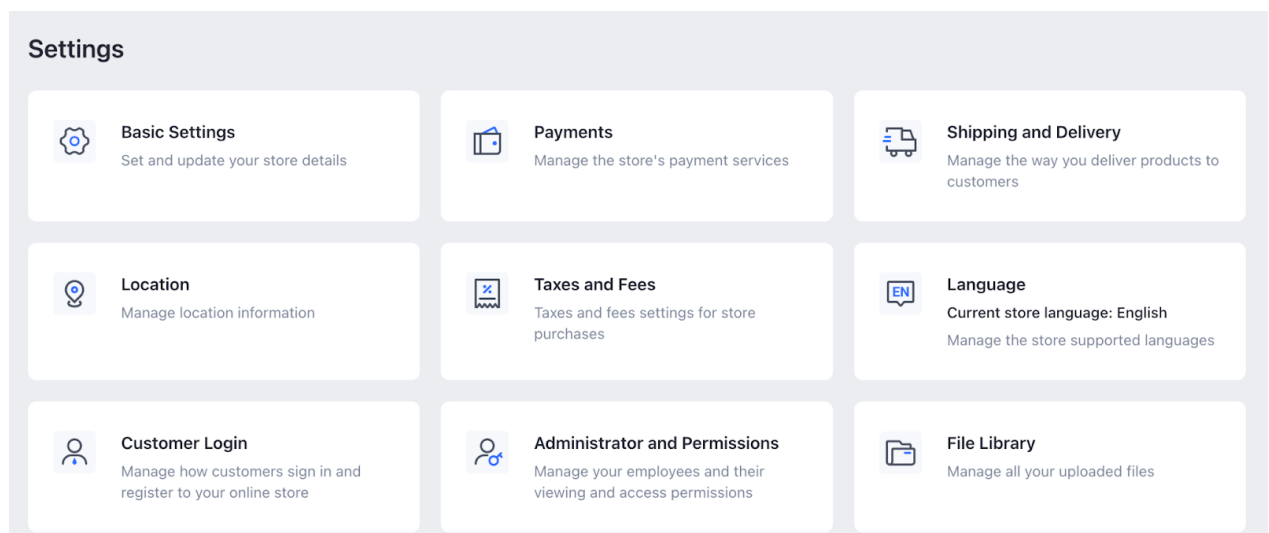

Facing any glitches while operating the app? Reach out to the solution experts anytime, any day. Additionally, get expert tips to sell profitably on the marketplace.

2. How to create Custom Payment Method in Shopline?

One of the outstanding features of the integration is to help merchants streamline and sync orders from marketplace to Shopline. To successfully create Orders on Shopline from marketplace via app, you must ensure creating and updating a Custom Payment Method.

Here are easy steps to create your Custom Payment Method.

- Enter into admin login of the Shopline store.
- Click on the **'Payments'** section under the settings.

- Navigate to the **'Custom Payment Method'**.

[←](#) **Payments**

Payment service provider
Select a third-party payment service provider to collect direct credit card payments
[Add a payment service provider](#)

Other payment methods
Select a third-party payment service provider to collect local payment, installations, etc.
[Add other payment methods](#)

 Highly suggest to use a previously used PayPal account, reducing the chance of hitting transaction risk management.
[One-Click To Authorize/Register](#)

Custom payment method
Payments made outside your online shop. If customers pay using this method, you are required to approve their orders before shipment.
[Add a custom payment method ▾](#)

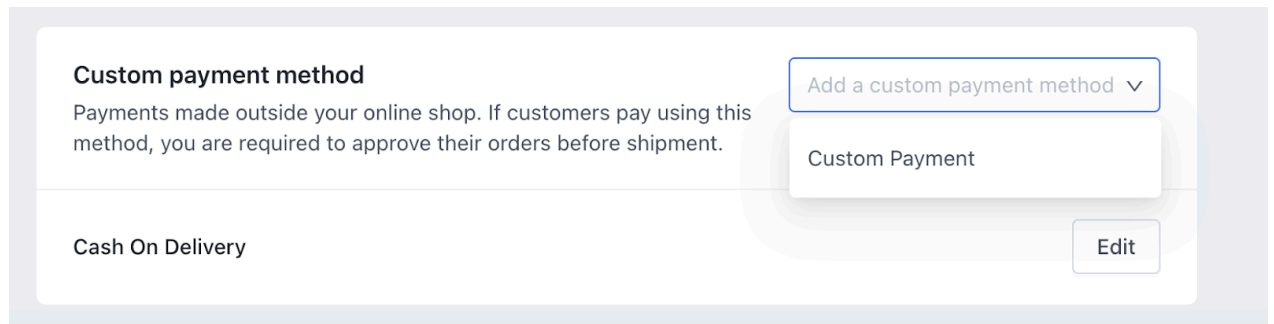

Cash On Delivery [Edit](#)

- Click on **'Add a custom payment method.'**

☐ Customers don't need to enter billing address

☐ Customers need to upload voucher

Activate Custom Payment

- Finally, click on '**Activate Custom Payment**' button.

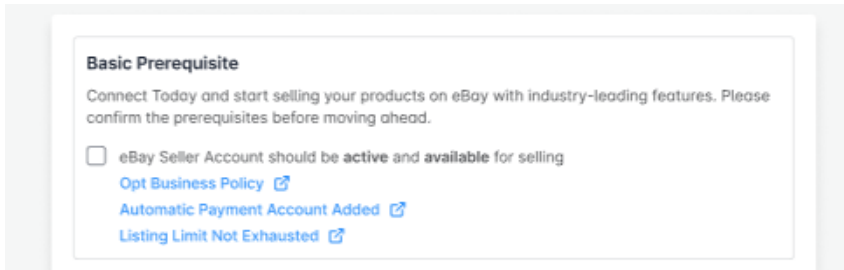

3. How to Onboard the App?

Before we start automating your operations, the following are crucial steps you must perform to connect your eBay and Shoptline account with the App.

Make sure you fulfill all the prerequisites as mentioned:

- Your eBay account should be Active and available for selling.
- Ensure opting for eBay's Business policy.

- Ensure the Payment methods are added.
- The listing limit is not exhausted.

Basic Prerequisite

Connect Today and start selling your products on eBay with industry-leading features. Please confirm the prerequisites before moving ahead.

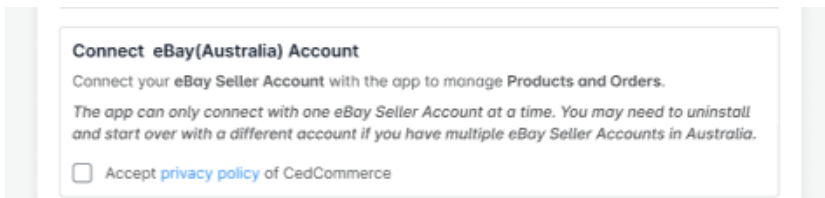

☐ eBay Seller Account should be **active** and **available** for selling

[Opt Business Policy](#)

Electronic Bank Transfer

Credit Card

And here you Go! Now enjoy selling on eBay with seamless integration features.

4. What does the App Dashboard show?

The dashboard helps sellers get an overview of all the crucial operations and updates. The dashboard's unique

feature of updating statuses under each tab lets merchants quickly know what needs their attention.

Let's check each section in detail.

Dashboard Category Template Product List Order List Feeds Configuration

Get an overview of all the Completed and Ongoing Activities here.

5. Category Template

Category Templates simplify the process of uploading and managing new products on eBay. They allow you to apply price settings, map attributes, and create custom settings for your listings all in one place.

The tab contains two sections Setup Template and Edit Template.

Set up Template

The section will help you create new templates for your listings. Start selecting and setting your preferences and mapping Shopline and eBay attributes. You can also assign rules to help you apply the settings on products in bulk.

[<](#) **Setup Template** [Save](#)

Let's begin creating a new Category Template.

Template Name *
Enter a unique name for the product template you wish to create.

Template name should not exceed 80 characters.

Assign Business Policy *
Select your Payment, Shipping, and Return Policy to experience a frictionless selling experience.

Payment Policy *

Shipping Policy *

Return Policy *

Select Listing Category *
Select a Listing Category for this template, and further map eBay attributes with Shopline attributes or set a custom value.

Edit Template

The section will enable you to edit and make necessary changes to your existing templates per your business requirements.

[<](#)
Edit Template

Please Select ▼

Select Listing Category *
Select a Listing Category for this template, and further map eBay attributes with Shopline attributes or set a custom value.

5.1. How to Create or Edit Category Template

Creating a new template is easy. Remember to fill in the details carefully.

Let's see how to create a new template.

Template Name

Begin with naming your template per your listings requirements.

Template Name *
Enter a unique name for the product template you wish to create.

Template name should not exceed 80 characters.

Select Business Policies

Select and define Business Policies that includes Payment Policies, Shipping policy where you choose your logistics based on the dimensions and weight of your products and Return policies to help customers with your return policies.

Assign Business Policy *

Select your Payment, Shipping, and Return Policy to experience a frictionless selling experience.

Payment Policy *

Please Select

Shipping Policy *

Please Select

Return Policy *

Please Select

Select Listing Category

Search or select your Category from the drop-down.

Select Listing Category *

Select a Listing Category for this template, and further map eBay attributes with Shopline attributes or set a custom value.

 Search Category

Attribute Settings

Map eBay attributes with Shopline attributes for seamless syncing of products on eBay. You select between eBay's recommended attributes or create custom attributes. Moreover, to enhance your listings, you can also map optional attributes.

Attribute Settings *

Map eBay Category attributes to your Shopline Product attributes or Set a Custom value based on the eBay Product category selected. Attributes are of two kinds- Required (Must Fill) and Optional.

- **Required:** These are a set of eBay attributes that you must map product attributes. You can also set a Custom Valid value for the same as per your requirement.
- **Optional:** This is an optional set of attributes you may or may not map per your requirements.

[Refresh eBay Attributes](#)
eBay Attributes**Shopline Attributes****Required ***

Please Select

✓ eBay 2

Please Select

✓ eBay 3

Please Select

✓ eBay 4

Please Select

Optional
[Add Attributes](#)

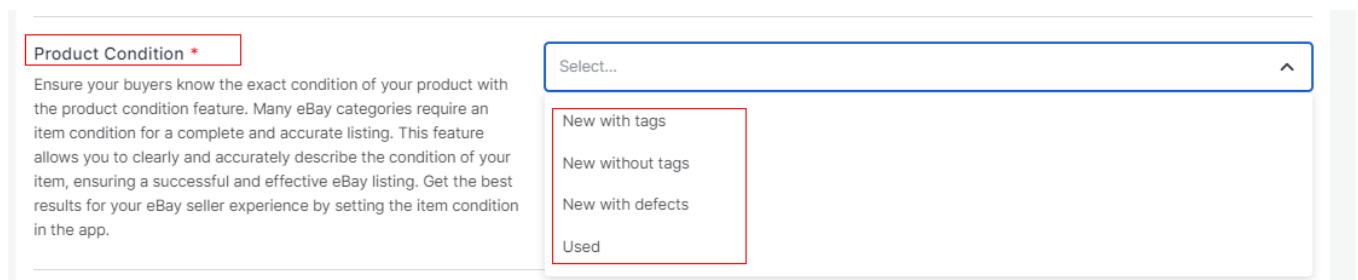

Optional Attributes can be added by clicking 'Add Attributes' above.

There are three kinds of attributes:

- **Required Attributes:** These are a set of attributes that you must fill in. You can also set valid custom values for the same as per your requirements.
- **eBay Recommended Attributes:** If you don't have any relevant attributes on Shopline to map with eBay, you can choose to go with recommended attributes that eBay provides.
- **Optional Attributes:** You can also add optional attributes for better listing enhancements.
- **Note*:** Based on your listing category, you may or may not get optional attributes to map.

Product Condition

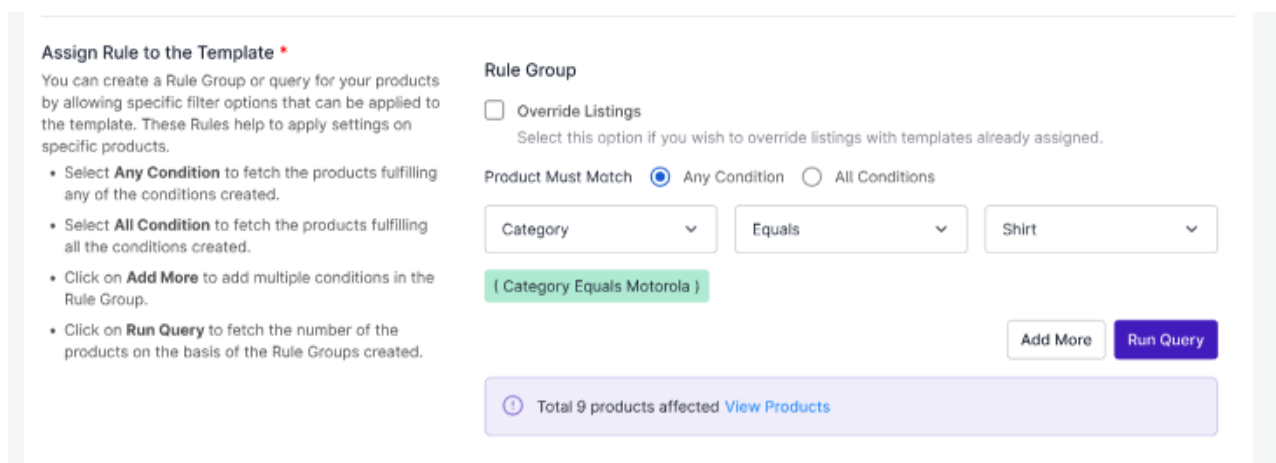

Many eBay categories require Product conditions for accurate and enhanced listing details. From the given drop-down, select the most suitable condition for your product.

The screenshot shows a form field labeled "Product Condition *" with a red border. To its right is a dropdown menu with a blue border. The dropdown is open, showing four options: "New with tags", "New without tags", "New with defects", and "Used". The text "Select..." is visible at the top of the dropdown menu.

Setting Rule Groups

In order to apply specific conditions to certain products using a particular template, rule groups are crucial.

The screenshot shows a form titled "Assign Rule to the Template *". It contains a "Rule Group" section with a checkbox for "Override Listings" and a "Product Must Match" section with radio buttons for "Any Condition" (selected) and "All Conditions". Below these are three dropdown menus: "Category", "Equals", and "Shirt". A green button labeled "(Category Equals Motorola)" is visible. At the bottom right are "Add More" and "Run Query" buttons. A purple bar at the bottom indicates "Total 9 products affected" with a link to "View Products".

To retrieve products that meet certain conditions, you can:

- Select "Any Condition" to fetch products that meet at least one of the conditions created.
- Select "All Condition" to fetch products that meet all conditions.
- You can add multiple conditions to the Rule Group by clicking "Add More."
- To retrieve the number of products based on the Rule Groups created, click on "Run Query."

Override Listings

Enabling the “Override Listings” option allows the app to assign a specific template to products that already have a template assigned. This means that if this option is enabled for a particular template, a product may have multiple templates assigned to it.

Once done, just click on **Save** on your top right.

Dashboard **Category Template** Product List Order List Feeds Configuration

Edit Template Save

Start editing your existing Category Template.

Template Name *
Enter a unique name for the product template you wish to create.
Enter Template Name
Template name should not exceed 80 characters.

Assign Business Policy *
Select your Payment, Shipping, and Return Policy to experience a frictionless selling experience.

6. Product List

Product List lets you manage and sort all your eBay listings, including bulk syncing and importing actions with your Shopline store.

Let's take a closer look at each section:

Product Status

Products

More Actions
Bulk Upload

Product List lets you manage and sort all your eBay listings, including bulk syncing and importing actions.

 The product count displayed in the menu below includes both the base product and its variants.

All 100

Uploaded 30

Not Uploaded 25

Uploaded with Errors 20

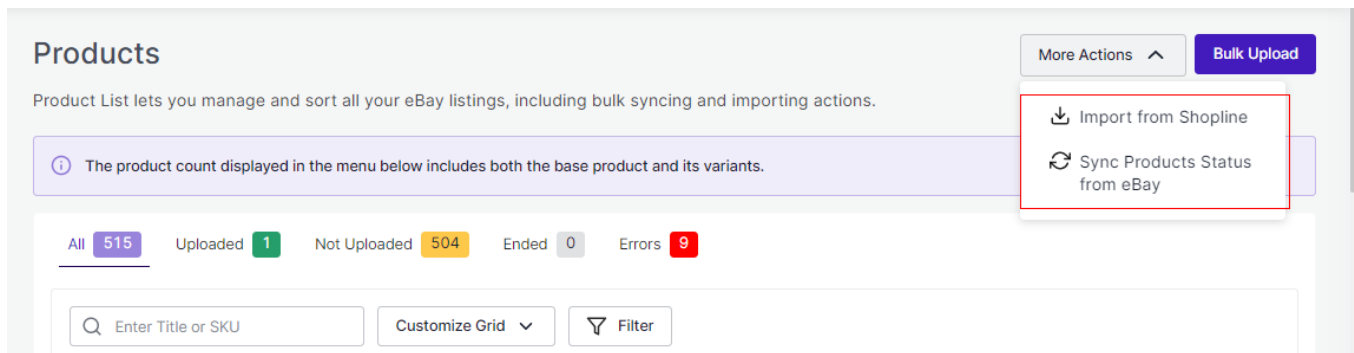

Ended 10

Errors 15

Product status helps you get no. of listings under different stages. Each status has a different meaning to convey:

- **All:** Total no. of products.
- **Uploaded:** List of products that have been uploaded to eBay marketplace.
- **Not Uploaded:** Total no. of products imported from Shopline to the app but not uploaded in eBay marketplace.
- **Uploaded with Errors:** Products that contain errors after sync information in already uploaded products.
- **Ended:** Products status set as `Ended` if not visible in eBay marketplace.
- **Errors:** Total no. of products with errors that need to be corrected.

More Actions

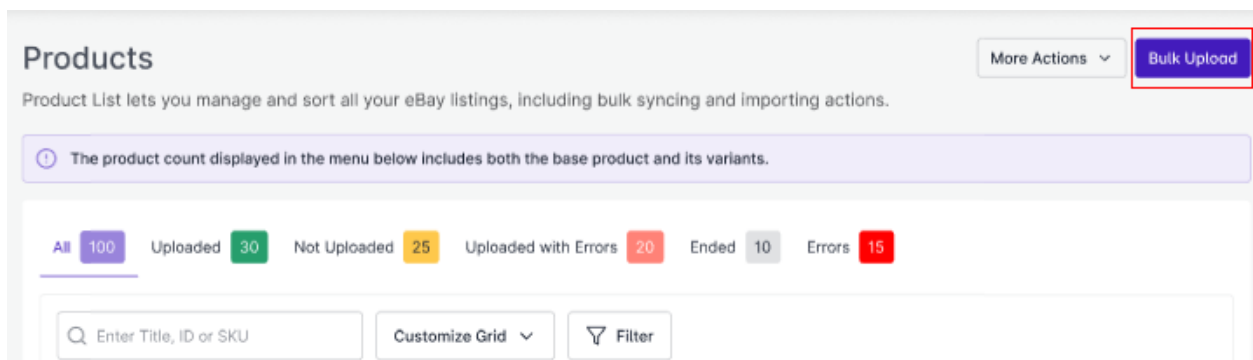

By clicking on More Actions, you can

- **Import from Shopline:** You can import all your products from Shopline to the app.
- **Sync Products Status from eBay:** When a product is uploaded from the app on eBay, a feed is sent to eBay for approval based on which products change their status. With the feature, You can sync the status of your products from eBay to avoid any confusion.

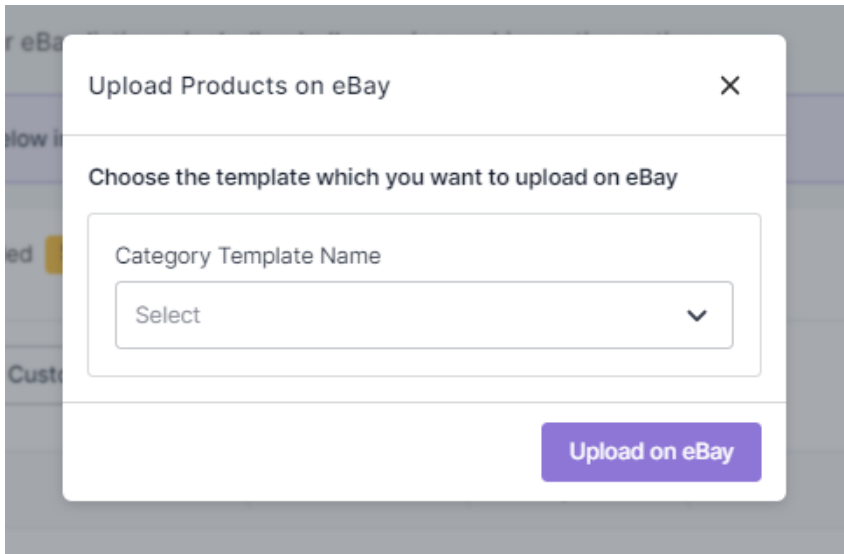

Bulk Upload

The feature helps you upload all the selected products from the app to eBay in bulk. This reduces the manual effort of linking and uploading products individually.

Follow the steps:

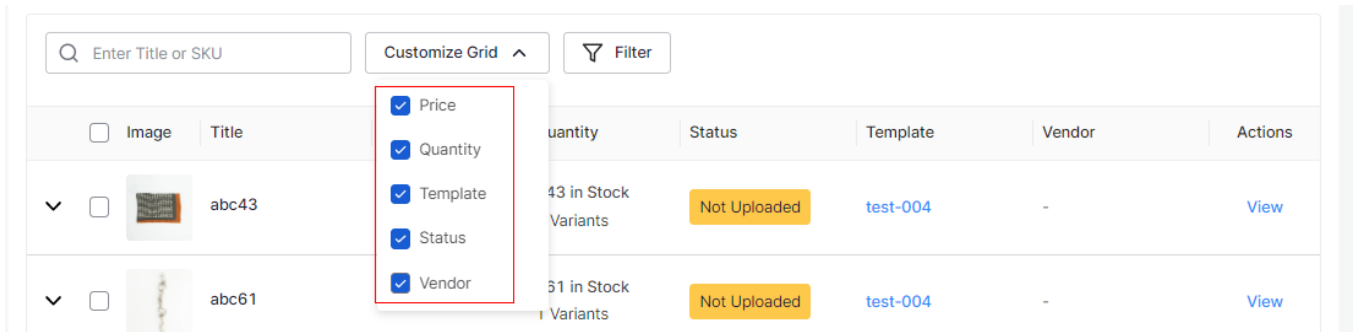

- Select the products
- Assign it a particular category
- Click on Upload on eBay button

- Track the status on the Feed.
- Track the ongoing process in the Activities section.

Customize Grid

By customizing the grid, you can get a list of products for a particular option that you select, enabling you to fetch the products quickly.

Filters

As not all the products are visible in the grid at a time, applying filters can quickly fetch the products falling under a specific condition. For example, if you are looking for products that are out of stock, you can simply apply a filter of Quantity and equal it with '0'. Hence, the app will display all the products that are out of stock.

The screenshot shows the 'Product List' tab in the CedCommerce eBay Integration interface. The main table displays product information with columns: Image, Title, Price, Quantity, and Status. The 'Quantity' column shows '143 in Stock' and '1 Variants'. The 'Status' column shows 'Not Uploaded'. A 'Filter' button is highlighted in the top right of the table. A sidebar on the right contains a 'Filters' panel with the following options:

- Product Type >
- Template Name >
- Quantity >
- Price >

The 'Quantity' filter is expanded, showing 'Minimum Quantity' and 'Maximum Quantity' input fields, both with the placeholder text 'Enter Quantity'. At the bottom of the sidebar are 'Reset' and 'Apply' buttons.

View Product Details

You can complete Product details by clicking the 'View' button on the extreme right.

Shopline

Ironman-cedstore.myshopline.com
Ankush Katiyar
p.satyaprakash.viet.2009@gmail.com

The tab contains five important sections, each with specified needs and settings.

- **Account Setting**

Get an overview of your active account credentials.

- **Product Setting**

Set your preferences for products' attribute syncing on the eBay marketplace.

- **Order Setting**

Set your preferences for Orders' syncing between your Shopline store and eBay marketplace.

- **Payment Setting**

Set your preferred Payment method for successfully syncing your orders from the marketplace to Shopline via the app.

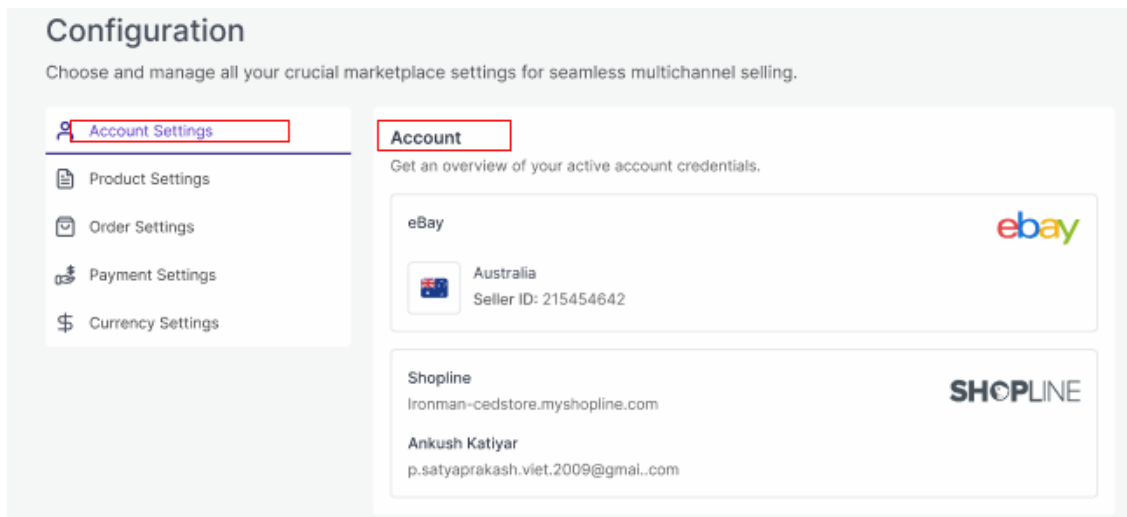

- **Currency Setting**

This setting lets you choose a common ground when dealing with different currencies on the eBay marketplace and Shopline store.

Let's check them one by one.

Account Setting

Through this setting, you can overview your connected account credentials.

Product Settings

The section helps you set syncing preferences between Shopline and eBay. You can manage the critical areas through the app for a seamless selling experience.

Product Syncing

You can select the attributes you want to sync from the app to eBay.

☒ **Product Syncing**
When switched to Yes, Selected attributes of the product will be revise from App to eBay. You can disable any attribute if you don't want to revise its value.

☐ Select All

| | | | |
|---|---|---|----------------------------------|
| <input checked="" type="checkbox"/> Title | <input type="checkbox"/> Quantity | <input type="checkbox"/> Category | <input type="checkbox"/> Barcode |
| <input type="checkbox"/> Description | <input type="checkbox"/> Main Images | <input type="checkbox"/> Item Specifics | |
| <input type="checkbox"/> Price | <input type="checkbox"/> Variation Images | <input type="checkbox"/> Weight | |

End Products

If you don't want any of your listings on eBay, here is the feature to help you out. Enabling the option will allow the app to end the product or listing on eBay as soon as deleted on Shopline.

☒ **End product**
The end Product option lets you end the Product listing on eBay. Enabling it will remove the listing from the eBay website when the product gets deleted from Shopline. The product will then no longer be available on the marketplace.

Item Location

The app lets you mention your product location to give buyers transparency about your products.

Item Location *

The Item Location section on the app allows you to specify the geographical location of your item on eBay. It includes selecting the item's country, zip code, and specific location. The information helps buyers to know the location of the item they are interested in. It increases the buyer's trust in the seller since it gives them more transparency.

Aruba Zip Code Location

Match Products from eBay

Set Attribute preferences between SKU or Title to enable the app to sync your same Shopline Listings and eBay listing on the selected attribute.

☒ Match products from eBay
 The feature allows you to set the attribute preference between the Title or SKU to map your existing eBay listings to your Shopline listings. Enabling helps you easily match your eBay products with your Shopline products and keep them in sync. By setting the attribute preference, you can ensure that the correct product is matched and avoid confusion or discrepancies. The feature is handy for sellers who have a lot of products on both platforms and want to keep them in sync with ease when selling through the app.

Add Attributes

Currency Converter

Enabling this setting automates currency conversion from your Shopline store to your eBay account. This saves time and ensures accurate pricing for cross-border sales, eliminating the need for manual rate calculations when creating listings.

Please note that your Shopline store currency is INR, with this feature the app will automatically convert it to eBay AUD currency.
