## 1. Overview

The **CedCommerce** G Translator extension for Magento® 2 is an easy to use and efficient translator Extension. This extension provides the ability to the admin to translate the contents of their products to a different language. This extension can be used to convert the products in any language desired.

### **Key Feature(s) of G Translator Magento 2 extension**

- Admin can translate the products in any desired language.

## 2. Installation of G Translator Extension

### **To install the extension**

- Log in the **ftp**, and then go to Magento 2 root folder (generally present under the *public\_html* folder).
- Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
  - a. Upload or Drag and Drop *app/code/Ced* directory.
  - b. After successfully uploading the directory, the extension will be installed/upgraded.
  - c. Now run the following upgrade command in *cmd*

```
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy -f
php bin/magento index:reindex
php bin/magento cache:flush
```

## 3. Retrieve API credentials from Google

Once the extension is successfully installed in the Magento 2 store, the merchant has to enter the **API Key details** in the respective fields displayed on the **G Translator** page while setting up the configurations.

### **To get the API Key Details from the Google**

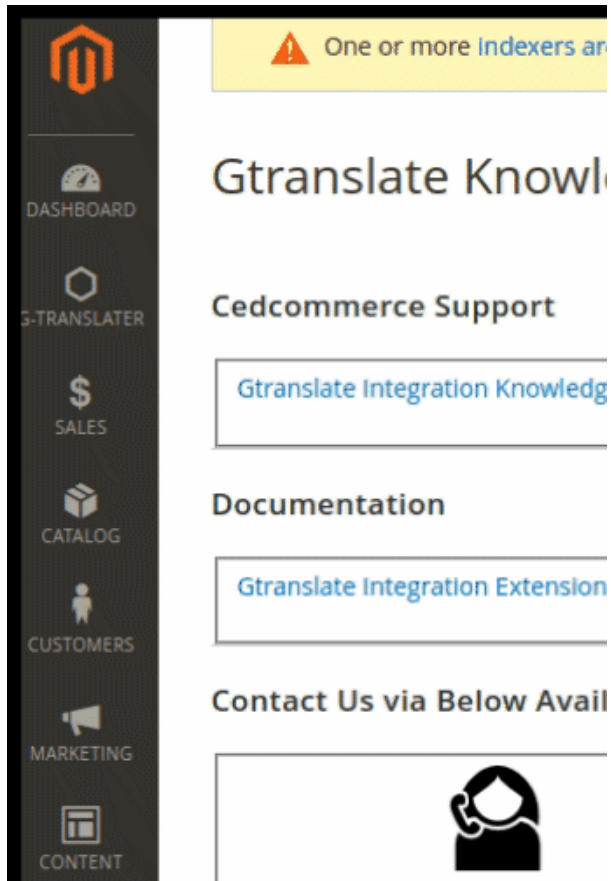

Generate Google API Key(<https://translatepress.com/docs/settings/generate-google-api-key/>)

## 4. G Translator Configuration Setting

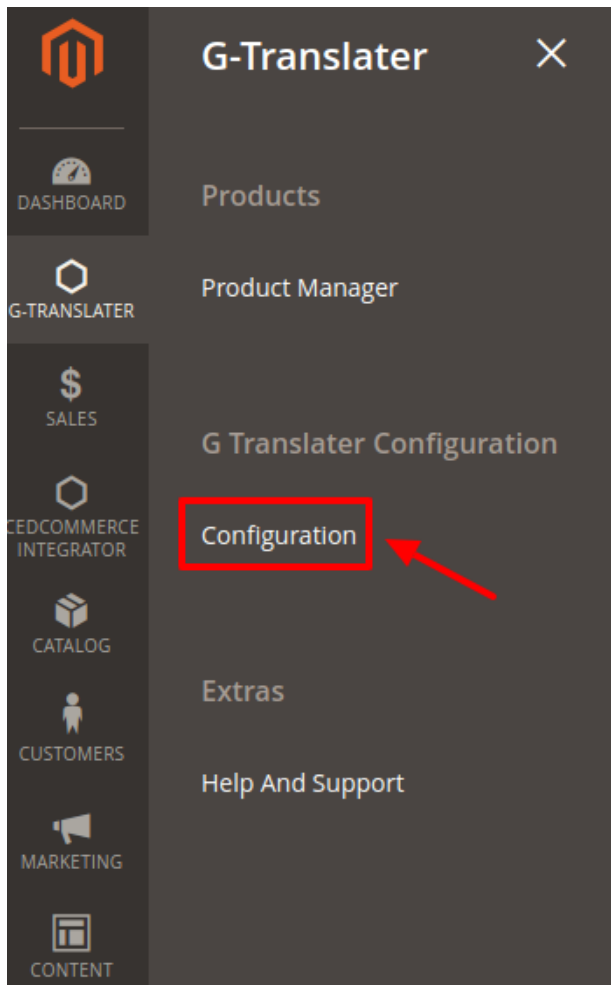

After the successful installation of the G Translator extension on the Magento 2 store, the admin has to set up the configuration settings required to enable the features of the extension.

### **To configure the settings**

1. Go to the **Admin** panel.

2. On the left navigation bar, click the **G Translator** menu, and then click **Configuration**.

The **Configuration** page appears.
